19. In cases in which the medical officer selected by the Agent has no diploma, he should not be employed without the approval of the Inspector General of the Medical Department.

A compounder or qualified Native doctor shall also be appointed to attend on the emigrants during the voyage.

20. The medical officer selected must be directed to the Protector's office for the purpose of having his testimonials examined and registered, and the Protector may, if he see reason for so doing, take the opinion of the Inspector General of the Medical Department as to the efficiency of such medical officer.

21. The Emigration Agent will be informed, by the Master of the vessel chartered by him, of the dates fixed for the official surveys, in order that the Agent may have an opportunity of being present. Any opinions or suggestions which the Agent may wish to express respecting the vessel, her stores, fittings, &c., on those occasions should be communicated there and then to the Protector and Medical Inspector of Emigrants. Unless of a trivial nature and disposed of at the time, the Agent should convey his views also in writing officially to the Protector, and without delay, before the vessel is passed as fit for the conveyance or reception of emigrants

22. Government having directed that a second medical officer shall accompany each ship to the Sandheads when epidemic disease is prevalent in Calcutta, any Agent not providing such an assistant will be required to obtain from the Surgeon of the depôt, on the day of the embarkation of the emigrants, a certificate to the effect that they have been generally healthy in depôt, and that no epidemic is prevalent among the coolies there. A copy of this certificate must be forwarded to the Protector's office.

23. Of the total number to be embarked, the proportion of adult females shall be 40 to every 100 adult males.

24. The Emigration Agent concerned should furnish the Master of the vessel chartered by him, when applying for a license, with a certified memorandum of the number and description of the emigrants likely to be embarked.

25. In a cases of emergency, when the proportion of females cannot be completed, an application should accompany the memorandum, reporting the deficiency for the information of Government, and submitting for approval the manner in which it is intended to be made good in subsequent shipments.

26. As a general rule, females in an advanced state of pregnancy, and infants who are too young to take ordinary food, and whose mothers cannot supply nourishment for them, should not be embarked

27. It shall be the duty of Emigration Agents to deliver to the Protector of Emigrants all property, wills, or other documents which may come into their possession, belonging to coolies who have died in depôt, on shipboard, or in the colonies, together with such descriptive

particulars of the deceased and their heirs as they may be in a position to furnish, in order that their relatives may be traced or identified and the property correctly disposed of.

28. The Emigration Agent shall, with as little delay as possible, inform the Protector of Emigrants, in writing, of any changes he may be authorized to make in the terms offered to intending emigrants, in order that the alteration may be communicated to Government as soon as possible.

29. The Emigration Agent should appoint a compounder (and an interpreter if necessary), and the sirdars, cooks, and (*unless found by the ship*) the topases, specified in Schedule E, scale No. 11. He should instruct them to be present at the time of embarkation, in order that they may assist the emigrants when embarking.

Topases for emigrant ships bound for places west of the Cape (West Indies, &c.), by whomsoever engaged, should be found by the ship, and placed on the articles under conditions to be prescribed by Government; but in all cases, whether engaged by Emigration Agents or ships, topases who are natives of India engaged for service on board emigrant ships, *must be ensured return passages*, and this condition shall be specified in their agreements.

30. Copies of all agreements entered into with medical subordinates, interpreters, and others, being natives of India, engaged to proceed with coolies to the West Indies or other colonies, should be forwarded to the Protector of Emigrants for submission to Government; and before the departure of each ship, a memorandum showing all natives of India (*other than emigrants and crew*) who may be engaged by the Emigration Agents for service on board of emigrant ships, should be furnished to the Protector of Emigrants. It will be the duty of the Protector to satisfy himself that advances of wages endorsed on such agreements have been actually paid to, and received by, the persons named in such agreements.

31. Between the first day of March and the fifteenth day of September, every emigrant proceeding to the west of the Cape shall be provided with an extra double blanket for use outside the tropics, in addition to the usual supply of clothing and blankets prescribed in scale No. 5 for the rest of the season.

32. In sufficient time previous to the day fixed for embarkation, the coolies should be arranged (relatives being kept together) in the numerical order in which their names will occur in the passes and the general register compiled from the passes, both of which must therefore correspond and be numbered accordingly.

33. Each emigrant must be provided with his pass, and may also be supplied with a tin ticket (to hang conveniently from the neck or arm where it may be easily seen), bearing the number, stamped in raised figures, corresponding with that affixed to his or her name in the pass and general register of emigrants about to be embarked.

34. When mustering the coolies on any occasion, and especially for inspection, prior to embarkation, they should be arranged and maintained in the order of their numbers to avoid confusion and ensure a correct muster

35. Emigration Agents should furnish the documents noted below, *viz.*—

To Masters.

(*a.*) A certified memorandum of the number and description of emigrants likely to be embarked, the proportion of adult females, and any explanation that the circumstances of the case may require.

(*b.*) Certificate under section 44 of the Act. (*See* Form No. 20.)

(*c.*) Two copies of the Indian Emigration Act and of all rules under section 56, and two copies of a translation of the Act and of such rules in such languages as the local Government may direct.

(*d.*) Passes or certificates to the emigrants under section 38 of the Act.

(*e.*) Four copies of the general register of emigrants compiled from their passes. (Form No. 23.) All four shall be signed by the Master; the Master shall then deliver two copies to the Emigration Agent, who after signing them shall retain one and return the other to the Master for the use of the emigration authorities at the port of debarkation. The Master shall also deliver two other copies to the Protector, who after signing them will retain one and return the other, in order that it may be duly filled up (as required by rule 104) and forwarded to the Government officer at the port of debarkation, who will ultimately return it with the Surgeon's medical records to the Protector of Emigrants at Calcutta.

(*f.*) A copy of instructions for guidance in the care and management of emigrants.

To Surgeons.

(*g.*) A blank form for recording daily issue of stores for emigrants. (Form No. 24 or 25.)

(*h.*) Admission and discharge book (blank). (Form No. 26.)

(*i.*) Medical case book (blank). (Form No. 27.)

(*j.*) Register of births and deaths (blank). (Form No. 28.)

(*k*) Medical history of the voyage (blank). (Form No. 29.)

(*l.*) Instructions to Surgeons for guidance in the care and management of emigrants, and a copy of the rules under the Indian Emigration Act.

(*m.*) A copy of the charter party.

Rules for the guidance of Masters of Emigrant Ships.

36. In addition to the following rules, their attention is directed to sections 40, 41, 42, 43, 44, 46, 49, 50, 51, 52, 53, 54 and 55 of the Indian Emigration Act.

37. Every vessel for which a license is required shall be surveyed under instructions from the Protector of Emigrants, through whom written application for the license must be made by the Master in Form No. 3.

38. On receipt of the application for license, the Protector shall, in communication with the Master Attendant, cause the vessel to be surveyed by an officer of the Master Attendant's Department, with a view to ascertain her sea-worthiness, the extent and nature of her accommodation,* &c. (under the terms of section 41 of the Act), the state of her tackle, boats, &c., as prescribed in Schedule A, together with such other additional requisites as may be considered necessary by the Marine Surveyor to render the vessel in every respect sea-worthy and fit for the conveyance of emigrants.

* Under Government order No. 122 of 10th January 1872, Sterling's rule is adopted in measuring emigrant ships.

39. The Marine Surveyor shall report the results of his survey and measurements to the Protector of Emigrants, first in Form No. 4, and subsequently, when everything is provided to his satisfaction, in Form No. 16.

40. After the Marine Surveyor's report in Form No. 4 has been forwarded to the Protector's office, the Master should arrange with the Protector of Emigrants for an inspection of the vessel in order to decide on her eligibility in other respects, her ventilation and fittings as specified in Schedule B. The Master must at once inform the Emigration Agent of the day and hour fixed for this survey.

41. The Protector, if satisfied in all respects, will then grant a certificate (Form No. 6) to the Master, and will require the Master to execute in duplicate the bond (Schedule D) in consideration of his receiving a license.

42. Prior to taking in the stores enumerated in the list of provisions and miscellaneous articles (Form No. 8 or 9), the Master shall send for the examination of the Protector samples of each article enumerated in the dietary scales. If they are approved, the *instructions* in Form No. 7 will be forwarded for the guidance of the Commander, who must carefully attend to them, and see that the officer in charge of the stores, &c., abides by them also.

43. The prescribed quantity of water must be taken directly from the municipal hydrant (and not by means of tank boats) into the ship's tanks, which must be thoroughly cleaned and whitewashed; and if the vessel is beyond the point to which the hydrants extend, she must come within a convenient distance of the nearest hydrant for this purpose. All the water for the emigrants must be stored in clean iron tanks, and *not in casks*. In ships carrying an approved distilling apparatus, a reduction of one-third the prescribed quantity of water is allowed, and Masters should lose no time in getting the machine examined by the Government surveyor of distilling machines.

44. The provisions, miscellaneous articles, medicines, instruments, disinfectants, &c., (Form No. 8 or 9 and scale No. 4 or 9), and the *extra clothing, blankets*, &c. (scale No. 5 or 10), must be on board at least one day before that fixed for the final survey, in order that the Surgeon of the ship (with whom the Master must communicate) may have an opportunity of examining those stores properly *on board the ship* prior to the final survey, which will be held after the Surgeon is satisfied and certifies to their correctness under scale No. 4 or 9 and in Form No. 13.

The medical stores and extra clothing, &c., should then be locked up safely pending their inspection by the Medical Inspector and Protector of Emigrants at the final survey.

45. It is the duty of the Master to ascertain that all the fittings, stores and water are of the best quality and amply provided according to scale. If he is unable to attend to this duty himself, he must on his own responsibility depute an officer specially to this work. The examinations of the Protector and Medical Inspector do not in any degree lessen the responsibility of the Master, who, when everything is ready for final survey, should forward the certificate and application for final survey (Form No. 14) to the Protector's office. When the time for the final survey has been fixed by the Protector, the Master must at once inform the Emigration Agent of it, in order that he may be afforded an opportunity of being present also.

46. Emigrants will not be allowed to embark on any vessel on board of which there is not a third officer, whose duty it shall be to have charge of the emigrant stores, to issue the rations, water, &c., for the emigrants, and to assist the Surgeon generally in the care and management of the emigrants on board.

47. No gunpowder, inflammable oils, spirits, jute, hides, nor any commodity likely by reason of its quantity or quality to be detrimental to the safety or health of the emigrants, shall be taken as cargo or part of the cargo; nor shall any vicious dogs or wild animals be allowed on board of an emigrant ship.

48. Responsible officers must be appointed to have charge of the fire-engine and other precautionary measures against the risk of fire.

49. In ships for the West Indies, the Master must see that the full number of *topases* (prescribed in scale No. 11) are provided. It must be distinctly understood that they are engaged solely on account of the emigrants, that they are to be entirely under the orders and control of the Surgeon, and must be placed on the articles under conditions to be prescribed by Government. (*See* Rule 29.)

50. Besides the bond (under section 40 of the Act, Schedule D, Appendix, required from the Master, and which, duly stamped, must be executed in duplicate at the office of the Protector of Emigrants), the Master shall forward to the Protector's office, *at least one clear day before the day appointed for the final survey*, the under-noted certificates duly filled up, dated and signed according to the forms prescribed in the Appendix, *viz.*—

(*a.*) A certificate to the effect that the conditions of Rules 46 and 47 have been complied with.—Form No. 12.

(*b.*) Two copies of the provision list duly filled up and signed,—Form No. or ; the Surgeon's certificates to scale No. 4 or 9, and Form No. 13.

(*c.*) A certificate of the total quantity of water, its source, &c.—Form No. 10.

(*d.*) A certificate from the Master stating that an officer has been appointed to the special charge of the emigrants, stores, &c., and that the fittings, stores, are ready for survey.—Form No. 14.

N.B.—*The following certificates should be forwarded to the Protector's office at least one day prior to that of embarkation :—*

(*e.*) A certificate from the Government surveyor of distilling machines to the effect that the requirements of Schedule C are fully complied with.—Form No. 11.

(*f.*) A certificate from the Master Attendant's office to the effect that the requirements of Schedule A and of the Marine Surveyor have been fully complied with.—Form No. 16.

(*g.*) A certificate from the Shipping Master's office to the effect that the proper number and description of crew (and in ships for the West Indies of *topases*) as per Schedule A (*and scale No.* 11) have been duly shipped.—Form No. 17.

(*h.*) A certificate from the owner or managing agents of the ship to the effect that a competent first class steam-tug has been engaged to tow the vessel to sea within twenty-four hours after embarkation of the coolies, and that there is seven days' supply of coal on board.

N.B.—In case a first class tug is not available, the steamer which it is proposed to engage in lieu of a first class tug shall be subject to the approval of the Master Attendant, who will signify his consent by countersigning the certificate.—Form No. 18.

(*i.*) Commanders are also required to furnish crew and passenger lists in Form No. 19; and, excepting emigrants and European or Native cabin passengers and their servants, who must be duly entered in the form above referred to, no other Native passengers shall be received on board an emigrant ship.

51. The date of embarkation may be decided on after, *but not before,* the ship has passed her final survey of fittings and stores, and the Master is cautioned against positively fixing the date for the steam-tug prior to this.

52. In appointing the time of embarkation, a sufficient interval must be ensured for the ship to reach her moorings, for the emigrants' stores to be properly stowed away, and for the vessel to be in every respect clean, in good order, and thoroughly prepared for the reception of her emigrants.

53. When everything is completed to the satisfaction of the Protector and Medical Inspector of Emigrants, and the ship is ready for sea, the clearance certificate in Form No. 20 under section 44 of the Act will be granted by the Protector of Emigrants to the Master, who will also obtain from the Emigration Agent a similar certificate.

54. Moorings are especially laid down abreast of the coolie embarkation wharf at Garden Reach, where Masters are required to moor their vessels securely before the emigrants embark; but no emigrant vessel shall leave her moorings for the coolie embarkation wharf until the final survey is over, unless the permission of the Protector of Emigrants has been obtained, and there is no objection to it.

Rules for the guidance of Surgeons of Emigrant Ships

55. The Surgeon shall call at the office of the Protector of Emigrants as soon as possible after his nomination, in order that his qualifications, &c., may be registered. He will leave his address at the office, and should intimate any change of residence as soon as it is conveniently possible, in order that communications from the office may be correctly addressed to him.

56. When the medical officer has no diploma, he shall not be employed without the approval of the Inspector General of the Medical Department, and native medical officers must have a fair knowledge of English.

57. The Surgeon is required to attend frequently at the depôt before embarkation, in order that he may become thoroughly acquainted with the health and physical condition of the coolies of whom he is about to receive charge, and he should see that they are all properly vaccinated.

58. He must take an early opportunity before embarkation of comparing the coolies in depôt with their passes (under section 38 of the Act), and when satisfied of their correctness he will countersign them.

59. The Surgeon, if in Calcutta at the time, shall be present with the Protector and Medical Inspector of Emigrants at the *first* official inspection for deciding on the eligibility, fittings, ventilation, &c., of the ship tendered for the conveyance of the emigrants of whom he is going in medical charge. He should visit the ship occasionally in the interval between the first and final survey, to satisfy himself in good time that there is nothing to which he would object, and should arrange with the Protector to see the samples of stores intended for the coolies before the samples are approved of. He must be present with the Protector and Medical Inspector at the *final survey* of ship's fittings and stores. Any suggestions or objections he may desire to make at either or both of the surveys should be stated there and then to the Protector and Medical Inspector, who, if the representation is of a trivial character, may deal with it at once, but if of a more serious or difficult nature, the Surgeon must without delay forward a written statement of his views officially to the Protector of Emigrants, who will give it careful attention. Should the Surgeon have no objections to urge on either of those occasions, he shall furnish the Protector of Emigrants with a certificate in Form No. 5 after the *first* inspection, and with a certificate in Form No. 15 after the *final survey.*

60. Prior to the time fixed for the final survey of stores, &c., the Surgeon, in communication with the Master, must appoint a convenient time for the careful examination, *on board the ship,* of the provisions, miscellaneous articles, medicines, instruments, disinfectants, extra clothing, and blankets supplied for the emigrants. If satisfied of their good quality and correctness according to scale, the Surgeon shall receive charge of the medical stores and

have them put into a safe place pending their examination at the final official survey. When satisfied he shall sign duplicate copies of the certified scales No. 4 or 9 (at foot of scale of medicines) and certificate Form No. 13. A copy of each must be furnished by him to the Protector of Emigrants, and a duplicate copy of each to the Emigration Agent.

61. Before the time of embarkation the Surgeon should also satisfy himself that the ordinary clothing and blankets supplied at the depôt to the coolies for their use on the voyage are of good quality, clean and sufficient according to scale, and that the compounder, sirdars, cooks, topases, &c., have been duly appointed.

62. The Surgeon must obtain the following documents from the office of the Protector of Emigrants:—

(*a.*) Blank forms of scale No. 4 or 9, and also certificate Forms Nos. 5, 13, 15, and 22.

(*b.*) Instructions to Surgeons regarding contagious fever on board of emigrant ships.

(*c.*) A copy duly signed by the Master of the scale and list of provisions, &c. (Form No. 8 or 9), taken on board at Calcutta.

(*d.*) A memorandum of the quantity and description of fresh provisions and water to be taken in by the Master either at the Cape or at St. Helena.

N.B.—For a list of documents to be obtained from the Emigration Agent, see Rule 35.

II.—THE EMBARKATION.

Rules for the guidance of Emigration Agents.

63. The emigrants, with their clothing, baggage, &c., should be at the wharf in sufficient time to be correctly arranged for medical inspection and muster, according to their numerical order in the general register, No. 1 being placed nearest the embarkation jetty.

64. Before leaving the depôt, the coolies should be supplied with good drinking water in their tin mugs or other vessels, and they should be particularly cautioned against drinking the river water at the time of embarkation.

65. When once numerically arranged for inspection and embarkation, they should not be permitted to leave their places; it should be impressed on the sirdars to attend to this, and the writers or other servants present should also see that no confusion results.

66. The compounder and establishment of cooks, topases, &c., must be present punctually to help the coolies with their bundles, and to assist the Surgeon in berthing the coolies when on board.

Rules for the guidance of Masters.

67. Before the time fixed for embarkation, the 'tween decks should be thoroughly cleaned and cleared for the reception of the emigrants. The lanterns, trimmed all ready for lighting, should be hung in their places, and unless wet weather prevents it, all the ventilation of the 'tween decks must be opened up.

68. When the weather is wet, or rain is expected, the tarpaulins for spreading tent fashion over the hatches must be put up, and awnings must be spread so as to shelter the coolies as they embark, and keep the 'tween decks as dry as possible.

69. The scuttle butts should be filled with drinking water, and the wash deck-tubs, filled with water, placed near the water-closets for the convenience of the coolies.

70. The landing stage, with ladder and hand rails, must be securely and conveniently fastened.

71. *All the crew must be on board previous to embarkation*, and should be mustered and examined by the Surgeon in the presence of the Protector of Emigrants and Emigration Agent, in order to ascertain their efficiency; and the Master should at the same time make sure that there are no stowaways on board by directing the chief officer (who will be assisted by the officer of customs) to search the vessel.

72. The Master must be present at the embarkation to satisfy himself, by comparing the passes with the names of the emigrants as they are called one by one in their numerical order in the general register, that all is correct; and two of the ship's crew, one to *count*, and the other to *note*, shall keep a careful tally of the total number of souls received on board.

73. No packages or traffic can be allowed on the embarkation stage at the time of embarkation.

74. After embarkation it is often necessary to issue a supply of biscuits and sugar to the coolies, and milk for the children if the Surgeon orders it. These articles should therefore be kept ready at hand.

75. Immediately after embarkation, coolies are very apt to carry fire for smoking into the 'tween decks if they can procure it; this should be guarded against.

76. After embarkation the Master and Surgeon will receive charge of the documents relating to the coolies, which will be furnished to them by the Emigration Agent.

77. In addition to the copies of the Act and Rules, and the emigrant's certificates or passes, the Emigration Agent will supply the Master of every vessel with four copies of the general register of emigrants (Form No. 23), all of which the Master is required to sign. He shall then deliver two of them to the Agent, who after signing them will return one to the Master for the use of the emigration authorities at the port of debarkation. The Master will also deliver two other copies of the register to the Protector of Emigrants, who after signing them well return one copy to the Master, in order that it may be duly filled up (as required by Rule 104) and forwarded to the Protector of Immigrants at the port of debarkation for ultimate transmission (with the medical records) to the Protector of Emigrants at Calcutta.

78. The heavy baggage (if any) of the coolies should be put down the hold.

79. The vessel must get under weigh and proceed down the river under steam within 24 hours from the time of embarkation.

Rules for the guidance of the Ship's Surgeon.

80. He should be at the embarkation wharf at least half an hour before the time appointed for the embarkation.

81. Prior to embarkation he shall examine the crew in the presence of the Protector of Emigrants and Emigration Agent, and if satisfied that they are in good health and fit for duty, he shall give a certificate in Form No. 22 to the Protector of Emigrants.

82. He shall, in conjunction with the Medical Inspector of Emigrants, examine the emigrants for the last time previous to their going on board, and reject any one considered unfit to go.

83. In berthing the coolies, the unmarried women should be placed furthest aft, the married couples next, and the single men forward.

84. The Surgeon should see that the compounder, sirdars, cooks, and topases are on board.

85. For every 100 adults four sirdars are appointed to act as head-men. The coolies must be divided into lots, and each sirdar should take charge of a company and also of a division of the lower deck, for the good order and cleanliness of which he is to be held responsible.

86. The Surgeon should instruct the sirdars and topases to see that no smoking or fire is allowed in the 'tween decks, and that the coolies do not drink the river water, but that which is supplied for them in the scuttle butts on deck. These points will require the Surgeon's personal attention.

III.—THE VOYAGE.

Rules for the guidance of the Commander.

87. After embarkation pilots and preventive officers are required to see that none but those entered in the list of passengers and crew (Form No. 19) remain on board, and that no other persons are received on board subsequently.

88. Commanders are required to afford to the pilots and preventive officers every assistance in their power in carrying out the separate instructions with which they are charged.

89. As the Surgeon will have the principal charge of the emigrants, every requisition made by him to the Commander, consistent with good order and discipline, (without inter fering with the routine duties of the ship, for which the Commander himself is always the responsible person,) must be promptly complied with, and the officers and crew are bound to render any reasonable assistance in their power when it is necessary for them to do so.

90. During the voyage Commanders should see that the 'tween decks are cleared three times every day, disinfected and *dry holystoned* daily by the coolies, and that, weather permitting, they are whitewashed throughout every alternate Saturday. No naked lights, loose hay or straw, shall be allowed between decks or in the hold at any time, nor on any account. At least six safety lanterns shall burn from dusk to daylight throughout the voyage for the use of the emigrants.

91. Wooden ships that do not make so much water as to require pumping out once a week, must twice a week have a sufficient quantity of water poured into their hold, and pumped out again for the purpose of keeping the bilges sweet.

92. The officers and crew of the ship must not be permitted to have any intercourse, or to interfere, with the emigrants; and no female emigrant is to be a servant to the Captain, Surgeon, cabin passengers, or officers of the ship.

93. The daily issue by the officer in charge of the rations and water for the coolies is to be carried out under instructions from the Surgeon before 6 A. M. every day, so that the first meal may be properly cooked and served out by 9 A.M., and the second by 3 P. M.; the issuing officer in charge of the stores must keep a correct account of the expenditure in Form No. 24 or 25, and have it initialed daily, as indicated therein. Medical stores and comforts shall be issued on the requisition of the Surgeon.

94. It must be clearly understood that the dietary scale is merely intended as *a guide, and not a hard and fast rule.* The provisions supplied according to that scale may be issued in such variety as to quantities and proportions as the Surgeon may consider necessary for the benefit of the coolies.

95. Meals must be taken on deck when practicable.

96. While proceeding down the river, the emigrants must be strictly prohibited from drinking the river water from alongside; but they should not be put on the allowance, till they are at sea, when the prescribed quantity should be issued twice daily, and must be pumped up through the flexible hose to the upper deck.

97. The wash deck-tubs should be filled regularly, and for the last time at 8 P. M., for the use of the coolies during the night. The tubs should be securely lashed near each block of water-closets.

98. Constant attention should be paid to the windsails and other sources of fresh air for the 'tween decks, but those which it would be dangerous to leave open must be closed in bad weather—side scuttles for example.

99. Awnings must be spread over the quarter and main decks when the weather permits, and coolies should be encouraged to keep as much in the open air as possible.

100. Tarpaulins for spreading "tent-fashion" over the hatchways when necessary to be kept at hand.

101. The 'tween decks must be kept perfectly free, clean, and as dry as possible, by means of hot sand and stoves, if necessary; and the upper deck is also to be kept clear of all unnecessary lumber.

102. The accommodation or space of the coolies must on no account be encroached upon the main quarter and poop decks must be given up to the coolies, at least to such extent as shall not interfere with the working of the ship.

103. The fire-buckets and life-buoys must be kept at all times in readiness, the regulations of the Board of Trade respecting lights and fog-signals shall be strictly observed throughout the voyage, and the times of hoisting and hauling down the lights shall be noted daily in the ship's log.

104. The Commander should retain in his possession the certificates and effects of those emigrants who die during the voyage, and should deliver them with an iventory of the articles to the Protector of Immigrants, or other proper authority, at the port of debarkation, together with the counterpart list and general register given to him by the Emigration Agent. Great care must be taken not to deface the lists or certificates. (*See* Rules 127 and 128.)

105. On arrival at the port of debarkation the state in which each emigrant is landed, and the deaths, should be entered in the column of remarks of the general register (signed by the Protector of Emigrants at Calcutta), which should be countersigned by the Master and Surgeon, and then forwarded to the proper Government authority at the port of debarkation for transmission to the Protector of Emigrants at Calcutta.

Rules for the guidance of the Surgeon.

106. As the health of those on board depends so materially on a strictly careful attention to all sanitary precautions and the early detection of disease, the Surgeon is specially charged with the duty of maintaining throughout the voyage a constant watchfulness over everything that may influence the health of those in his charge.

107. The Surgeon should, as far as possible, guard the coolies from harsh treatment; he should see that the space allotted to them on the upper and lower decks is not encroached upon, that there is no improper intercourse or interference on the part of the officers and crew with the emigrants, and if necessary he should report any infringements of this rule to the Master, who is bound to inquire into the matter and to adopt such measures as the case may require. No punishment shall be inflicted on any emigrant except with the consent of the Surgeon and Master of the ship, and the particulars of such cases must be duly entered in the ship's log.

108. It is the duty of the third officer (appointed for the purpose), and also of the sirdars, to assist the Surgeon in maintaining discipline, to see that his orders and daily instructions are carried out, to report any irregularities or cases of sudden sickness, to assist in distributing the rations, &c., and to superintend the cleanliness of the coolies, their accommodation, food and water.

109. The topasses must keep every part of the deck and hospital occupied by coolies constantly swept and clean, and must attend regularly to the thorough cleanliness of the water-closets by means of constant washing and the use of disinfectants.

110. They must also see that the tubs near the privies are securely fastened and kept regularly filled with water for the use of the coolies.

111. The cooks, assisted by the sirdars, will receive and cook the daily rations under the instructions of the Surgeon, and they must also take care of the galley fires and see that they are extinguished at 7 P. M. unless otherwise directed.

112. The coolies must be kept as much as possible in the open air; they should take their meals on deck whenever this is practicable, and at least one-half of their number should *always be on deck* when the weather permits it

113. Ventilation, and the means for promoting or modifying it, should be constantly attended to, and those openings which it would be dangerous to keep open, promptly closed on the approach of bad weather.

114. When possible, the coolies should bathe daily, a sail-screen being put up for the women; and they should wash their clothes at least twice a week. The decks should be *dry holystoned* by the male emigrants daily, when practicable, and disinfecting powder must be freely used where the decks have been soiled in any way.

115. The water-closets must be constantly inspected throughout the voyage.

116. The coolies' clothing and blankets should be aired thoroughly at least thrice a week. In damp weather the hanging stoves and hot sand may be cautiously used with advantage to hasten the drying of any parts of the deck, &c., that have been accidentally wetted.

117. At the outset of the voyage the Surgeon should take an account of, and hold in reserve, all the warm clothing in the possession of the emigrants, in order that they may be preserved and used as soon as a change of temperature renders it necessary. Each emigrant should be made responsible for the care of his or her own suit. There should be a general muster of all clothing and blankets once a week.

118. The provisions issued daily must be divided into two portions, so that they may be cooked for two meals; the first at 9 A. M., and the other at 3 P.M. The issues shall be recorded daily by the officer in charge, and attested by the initials of the Surgeon and officer. (*See* Form No. 24 or 25.)

119. It must be distinctly understood that the diet scale is merely intended as a fair *guide*, ensuring for the voyage a sufficient supply of provisions in those proportions which a consideration of their nutritive values renders necessary. The elements of a nutritious dietary are placed at the Surgeon's disposal, and it is intentionally left to his discretion to use and combine them to the best advantage for the emigrant's benefit under the varying circumstances of a long voyage. *All waste and excess must be strictly avoided.*

120. When cooking is prevented by bad weather, the *dry provisions* should be issued in lieu of cooked food.

121. Meals when ready must be reported to the Surgeon, who will see that the food is *well cooked* and fairly served out. The decks must be swept after each meal and dry holystoned or scraped after breakfast; the spaces under the platforms should be specially looked after, and all dirt thrown overboard.

122. Cooking utensils must be kept clean and inspected daily, and the boiling of rice or other articles in brackish water must be prohibited.

123. Coolies must not be allowed to retain or secrete in their clothes, &c., any food which they were unable to finish; the eating of stale food must be prevented. No smoking shall be allowed between decks.

124. Food for the sick, their medicines, &c., should be methodically arranged, so that they shall receive the prescribed quantities regularly every four hours, or at such other intervals as the Surgeon may decide on. The *night-nursing and feeding of the sick should be most particularly provided for.* It is between midnight and morning that the want of sufficient support is so severely felt, and is so likely to be neglected by a careless assistant.

125. Coolies must be encouraged to amuse themselves by harmless diversions, and should be allowed to play on their drums, &c., till eight bells.

126. It is the duty of the Surgeon to recommend to the Master such arrangements or expedients as may appear to the Surgeon likely to promote the health and comfort of the emigrants. It is the Surgeon's duty to keep a watchful eye over the health of the coolies; he should muster and inspect them twice daily, and by being constantly among them, he should be always in a position to detect the earliest symptoms of disease, such as scurvy, &c., communicable diseases (small-pox, cholera, &c.) must be isolated *at once;* the place vacated must be thoroughly cleaned and disinfected; and any suspected or infected articles should be completely destroyed or thrown overboard.

127. In case of an epidemic the nearest port must be made for and the emigrants disembarked. Unless the cause of death be a contagious or infectious disease, the corpse of no emigrant shall be thrown into the sea until six hours after death; but when a quicker burial is necessary under any circumstances, it may be allowed after the death has been ascertained and certified to in the ship's log by the medical officer, commander, and chief officer.

128. Both the Surgeon and the Master must send from the first port touched at to the Protector of Emigrants at Calcutta a report of all unusual occurrences affecting the health or welfare of the emigrants on board. The Surgeon and Master are mutually responsible for the care of the emigrants, and all the rules for the voyage (conveniently separated for the guidance of each) must be followed by both—each co-operating with the other for the good and safety of the emigrants entrusted to their care.

129. The Surgeon should make over the property of those emigrants who die on board, with a list of their effects, to the Master of the ship, who shall give him a receipt for them.

130. The Surgeon is required to keep the following records during the voyage, *viz.*—

(*a.*) A record of the patients admitted and discharged, in Form No. 26.

(*b.*) A medical case-book, in which *every* case must be entered, and not only those considered important, in Form No. 27.

(*c.*) A medical history of the voyage, in Form No. 29.

(*d.*) A register of births and deaths, in Form No. 28.

131. The above-named records, carefully kept and duly signed by the Surgeon, must be given in by him to the proper Government authority at the port of debarkation for transmission to the Protector of Emigrants at Calcutta, and to ensure correctness and regularity in these returns, no payment of any description is to be made to the Surgeon until the general and mortality registers have been examined and their correctness certified to by the Health Officer and Protector of Immigrants, or other proper Government authority at the port of debarkation.

OF RETURNED EMIGRANTS.

132. Early notice of the arrival off the cooly moorings at Garden Reach of any ship with return emigrants should be sent to the Protector of Emigrants in order that the vessel and her emigrants may be inspected by him, to whom a nominal roll of the emigrants, and any other documents or necessary information relating to them, together with the wills and property of emigrants who have died on board, should be made over as soon as it is conveniently possible.

133. Return emigrants, immediately on their landing, shall be properly lodged and provided for by the agent of the colony whence the coolies have returned, and they should not be detained in Calcutta longer than is necessary to arrange everything for their return. The sick should be sent to hospital at once, and all who are paupers returned to their homes at the expense of the colony. In all cases care must be taken that those who are blind, lame, or otherwise helpless, are sufficiently provided with such additional assistance for the journey home as their condition of circumstances may render necessary.

134. Return emigrants should be cautioned against carrying loose cash on their persons, and assisted, if they desire it, to obtain money orders on the local treasuries of the districts to which they are going.

135. Emigrants should be landed only during daylight and not after dark.

APPENDIX EMBRACING SCHEDULES AND FORMS.

SCHEDULE (A.)

Anchors, Cables, and Hawsers, according to Lloyd's requirements, for classification.

Anchor, bower	3	Weight according to tonnage. 1,000 tons' vessel should have bower anchors 30 cwt. each, exclusive of stock, which is about 5 or 6 cwt.; the stream 12 cwt.; and kedges 6 cwt., and 3 cwt. including stock.
„ stream	1	
„ kedges	2	
Chain 1¾	300 fathoms.	
„ stream	90 „	

Hawsers 2 or 3 of 11 inch, 9 and 7 or 5 either Europe or coir, 90 fathoms each.

Boats of approved construction; one to be a life-boat with four life-buoys, and fitted when practicable with Clifford's Lowering Apparatus.

	Feet.			Ft.	In.		Ft.	In.	
No. 1,	26	length,	×	7	0	breadth,	3	0	depth.
„ 2,	25	„	×	6	6	„	2	6	„
„ 3,	25	„	×	6	6	„	2	6	„
„ 4,	23	„	×	6	0	„	2	4	„
„ 5,	23	„	×	6	0	„	2	4	„
„ 6,	22	„	×	5	6	„	2	2	„

If the reare less than 350 men, No. 5 boat can be dispensed with. The same number of boats of an equivalent capacity can be substituted. Each boat to be fitted with masts, sails, rowlocks or tholes, oars (complete set), breakers (one at least to each boat), rudder, plugs, and painter.

Admiralty Charts of all the seas the ship is to traverse, and of the Islands, Coasts, Ports and Harbours contiguous thereto.

For Mauritius and places east of the Cape.

Bay of Bengal.
Penang.
Trincomalee.
Port Blair.
Acheen.

For the West Indies.

Bay of Bengal.
Port Blair.
Penang, Acheen, Trincomalee.
Mauritius, Natal, Algoa Bay, Table Bay, False Bay, St. Helena.
Pernambuco, Rio from Cape St. Roque to Trinidad. All the West India Islands.
Those ships bound to Trinidad or Demerara are not required to have charts of the West India Islands.

Books.

1. The lastest Commercial Code List of Ships.
2. Commercial Code of Signals.
3. Nautical Almanac.
4. Law of Storms.

Instruments, &c.

(*a*)—*Chronometers*, 2.
(*b*)—*Barometer*, 1 at least.
(*c*)—*Compass*, steering and boat's.
(*d*)—*Axe*, 1 at least ready for immediate use while proceeding down the river.
(*e*)—*Lead and lines*, deep sea and hand lead, 2 of each.
(*f*)—*Lightning conductor*, 1 to main mast at least.
(*g*)—*Lights*, as per Admiralty regulations. Blue composition for signal purposes, a quantity; and signal rockets if procurable.
(*h*)—*Force pump or fire-engine*, 1 at least with 2 flexible hoses, complete.
(*i*)—1 *head pump*. 1 *hold pump*, with flexible hose, for issuing fresh water on upper deck.
(*j*)—*Sails*, 2 sets in good order, with proper storm sails.
(*k*)—*Signals*, Commercial Code.
(*l*)—*Masts, yards* and *rigging* to be in good order and condition, and a spare spar shall be provided.
(*m*)—*Fire buckets* (stropped) 3 to every 100 tons of ship's register up to 600 tons, and 2 additional buckets for every 100 tons above 600; provided that the total number shall not be required to exceed 50 in any vessel. One-half of such buckets shall be kept constantly hung up on the quarter deck or other convenient place.
(*n*)—Poop, quarter and main-deck awnings complete and in good order.

Crew, &c.

Crew according to tonnage, *viz.*—

For the 1st	500 tons	4 men	to every	100	tons.
From 500 to	1,000 „	3 „	„	100	„
„ 1,000 tons and upwards		2 „	„	100	„

Of the whole number the ship is required to carry, exclusive of boys, one-half must be able seamen.

The above includes three officers.

The Commander and two officers to have certificates of competency.

N.B.—There must be *three* officers to every emigrant ship; and in the case of vessels bound for places west of the Cape of Good Hope, they must all be Europeans; but in vessels conveying emigrants to Mauritius, Réunion, &c., the third mate may be an East Indian.

SCHEDULE (B.)

Specification of Ventilation and Fittings to be provided for Ships chartered to convey East Indian Emigrants from Calcutta.

1. *Ventilation of the between-decks.*—Besides hatches (and if any stern ports or side scuttles the latter to be glazed, well fitted, about 14 feet apart, and as close to the upper deck as possible), there must be air shafts and cowlheaded funnels or tubes, with such other additional means for affording light and ventilation to the space intended for the accommodation of the emigrants as the Protector and Medical Inspector of Emigrants may consider necessary.

2. All cowlhead funnels must be well made, of stout sheet iron (1-12th of an inch thick), each tube averaging at least a foot in diameter with well expanded movable and revolving cowls. The upper lip of the cowl must be sufficiently well projected to keep out rain. The cowls must be thoroughly secure in their hold on the funnels to which they belong; and the funnels or tubes, properly flanged at the deck end, must be well fitted and very securely bolted to the deck.

3. Every cowlheaded deck opening shall be provided with a suitable plug for use in bad weather.

4. The air-shafts and combings round the deck openings must be strongly put together, properly caulked, and of such form and size as may be decided on by the Protector and Medical Inspector of Emigrants. They must be well sheltered above against wind and wet weather with properly constructed lids, covered with tarred canvas, glazed if necessary, and whitewashed inside.

5. The lower apertures of all cowlheaded tubes or air-shafts opening into the between-decks may be fitted, under instructions from the Protector, with means for fastening horizontal screens a few inches from the mouth of each aperture so as to diffuse the down draft of cold air.

6. One windsail for every hatchway, and two extra for air-shafts.

7. *Ventilation of the hold.*—Except in vessels fitted with ventilating masts, in which case a proportionate reduction may be allowed, there should be 5 steam pipes solidly and strongly put together, of stout metal or wood and air-tight, each at least 9 inches in diameter, fitted with cowlheads, and leading from the hold to the open air on the upper deck. They should be conveniently placed and so arranged as to carry off the steam from the cargo quite clear of the 'tween-decks, the air of which must be kept as pure and free from sources of contamination as possible.

8. Prior to taking in cargo or stores the ship's limbers and bilges if foul should be thoroughly cleaned, and the latter purified if necessary by the free use of some disinfectant, such as carbolic acid, &c.

9. All air-holes in the between-decks must be securely stopped.

10. *Fittings of the between-decks.*—Platforms between 3 and 4 feet high, very strongly built and supported by stout stanchions and cross-pieces, must be put up on each side of the deck opposite the hatchways. They may be 24 feet long by 6 wide, or half that width, and extended continuously all round the sides of the ship at the option of the Surgeon appointed to the vessel.

11. The after-third of the deck space, as the space or compartment more especially allotted for the accommodation of women, should be indicated by erecting a couple of equidistant stout stanchions on a beam line between the after-third and forward two-thirds of the vessel. This will sufficiently divide off the space set apart for this purpose without interfering with ventilation.

12. If necessary, bright sheet tin reflectors, 2 to 4 feet square, may be fitted conveniently, and at such an angle as to reflect light from above into the 'tween-decks below. It is sufficient to arrange them at the vessel's stem or stern when they are unusually dark.

13 All exposed or dangerous places where children or others are likely to injure themselves should be properly protected or closed.

14. The space to be occupied by the emigrants must be cleared of every obstruction, thoroughly cleaned, dried, and whitewashed throughout, and nothing must be slung up or stowed away between the beams.

15. Previous to embarkation and after the decks are cleared, bamboos, ropes, or stout rails must be securely fastened fore and aft to the amidship stanchions, so that the coolies may have something on which to hang their clothes and bundles, and to depend for support when the ship rolls.

16. The lower deck hatches must be closed and covered with tarpaulins properly battened down, or secured with iron bars locked; and in ships for the West Indies canvas screens (of No. 6 canvas) shall be fitted to each upper deck hatchway, so that they may roll up when not in use.

17. Hooks for hanging the required number of lanterns must be fixed at convenient distances apart, and where necessary.

18. *Fittings of the upper deck.*—Water-closets must be firmly fitted inside the vessel in two blocks, divided into compartments, the forward one (usually opposite the fore-hatch) for the men, and the after block, as far aft as it is conveniently possible, for the women and children. The number of compartments and seats, according to scale in the Protector's office, will depend upon the number of statute adults to be conveyed. The closets must be well built, securely covered on their tops with tarred or painted canvas, and every compartment must be fitted with strongly hinged doors capable of being fastened on both sides; each compartment should not exceed 22 inches in breadth, nor should the seats in them be more than 22 inches square, though the *length* of the *compartment* should exceed its breadth by a few inches in front of each seat for convenience in entering the closet. The foot-boards on either side for the seats must be about 7 inches wide and 8 inches apart, so as to leave a central space of that size to communicate with the closet floor and shoot, which (lined with sheet iron) should be as far as possible free from all angles or projections likely to obstruct. The shoots must carry the soil well clear of the ship's side. If considered dangerously large for young children, the ports or scuttles through which the shoots lead must be guarded with horizontal iron or hard wood bars to prevent accidents. A strong short hand-rail must be fitted inside the closet, and in a convenient position to hold on by. Those parts of the wood-work and shoots exposed to any source of contamination must be thoroughly and continuously lined with stout sheet iron, to prevent the wood from absorbing impurities, otherwise the floor and shoots must be constructed entirely of sheet iron or zinc of sufficient thickness. If the water-closets are unavoidably high, convenient steps must be provided.

19. As represented by the model at the office of the Protector of Emigrants the closets should be fitted with a simple recess for the reception of a well-secured safety lantern, so that one light shall illuminate many compartments at the same time.

20. Cabooses or cooking-ranges must be placed so as to afford shelter to the cooks, and whenever it is practicable *athwart* ships and inside the deck-house. The cooking-range should be securely placed on a platform of fire-bricks firmly laid in mortar, and as a precaution against fire, a space of a few inches must intervene all round it and between the bottom of the range and the fire-bricks below. All exposed wood-work unavoidably near the cooking-range or caboose must be well protected with sheet lead or iron against sparks and hot cinders.

The vents for smoke must be sheltered against rain, &c., by cowl or ridge ventilators. The size of the caboose or cooking-range will depend on the number of boilers likely to be in use at one time; but there should always be accommodation for 6 boilers abreast and of the usual sizes.

21. The iron *chapatee* plates must be adapted to the size of the fire-places.

22. The hospital shall invariably be on the upper deck, and must be fitted either in the poop or deck-house. When one has to be built, it must be as strong and secure as any deck-house with a raised floor on strong movable platforms 4 inches high. The roof shall be caulked and covered with painted canvas. It shall be sufficiently large for 6 bunks, and must be well lighted and ventilated to the satisfaction of the Surgeon in charge, and subject to the approval of the Medical Inspector.

23. A dispensary or dispenser's room for the accommodation of the compounder and medical stores must be provided in a suitable place (*e.g.*, one of the forward poop cabins), and it should be fitted up with shelves, bottle-rack, folding-table, and other conveniences, according to the requirements of the Surgeon in charge, subject to the approval of the Medical Inspector.

24. The hatchways in all ships for the West Indies must be fitted with storm or booby hatches of the form illustrated on the model in the Protector's office. They must be very strongly built, dove-tailed, and strengthened at their covers with stout angle irons or clamps. Their lids or leaves that lift up must be very strongly hinged and lined with ¼ inch planking, and if inconveniently large, the lids must be constructed so as to fold back twice. They must be well covered with painted or tarred canvas so as to be thoroughly water-tight, and glazed, if necessary, with thick glass properly protected.

25. The ordinary hatches belonging to the hatchways must be secured where they may be readily available when wanted.

26. Strong ladders shall be provided for every hatchway; there shall be a pair for the main hatch They should be fitted with stout hand-rails, one on either side; and the sides of the ladder must be firmly held together by means of iron rods secured with nuts at the ends) passing under the last step at the bottom and top of the ladder respectively.

27. As additional means for women and children to hold on by, when using the ladders in rough weather, a knotted hand-rope, fastened to the side of the hatch, should hang conveniently near each of the ladders.

28. Every vessel must be provided with good tarpaulins for spreading "tent-fashion" over each hatchway; it should be large enough to spread well over on all sides of the hatch so as to exclude rain, &c., but admit air.

29. Platforms, if necessary, for the accommodation of the emigrants or their stores may be ordered at the discretion of the Protector, not only over the long boat, but between the skids supporting the other boats of the ship or elsewhere.

30. At least two sheep pens (one for the ship's sheep and the other for the emigrants' sheep) must be fitted as far forward as possible, and not on the quarter or poop deck. They shall afford sufficient accommodation for the prescribed number of the sheep, and shall be built so as to be easily cleaned and well ventilated. Their bottoms or floor may be lined with sheet iron.

31. Two scuttle butts (= 120 gallons each) properly charred inside, clean, and provided with locks and keys must be secured for drinking water in convenient positions on deck; and a wash deck-tub shall be placed near each block of water-closets for the convenience of the coolies.

32. Every vessel, unless especially exempted by the Protector, must be fitted with a distilling machine, and be prepared to comply with the conditions specified in Schedule C subject to the approval of the Government surveyor of distilling machines.

33. Every vessel must be provided with a hold pump and flexible hose for issuing the fresh water from the tanks below on the upper deck.

34. Excepting ship's fittings, which must be properly secured, no lumber of any kind can be allowed on deck, which shall be as clear as possible for the accommodation of the emigrants.

35. Life-buoys (6) must be slung so as to be readily available when wanted.

36. The fire-engine, flexible hose, fire buckets, and all other appliances needful in case of fire, should have a proper place, and must be kept in good order, *all ready for use on the shortest notice.* (*See* Schedule A.)

37. Strong suitable *screws* and *not nails* must be used throughout in fastening the fittings at those points where they are subject to any strain likely to drag their parts asunder. The Master's special attention is drawn to this, as all the fittings must be well put together, and all hinges, bolts, clamps, sheet iron pipings or coverings, cowlheads, and every other description of fittings in which metal is used, must be thoroughly strong, well made, and well fastened.

SCHEDULE (C.)

Rules to be observed by Ships in respect to Fresh Water Condensers when offering for Emigrant Conveyance Charter.

1. All condensers to have a separate engine for working the circulating cold water pump, and under no circumstances is this engine to do other work except feed the steam boiler.

2. All condensers to be fitted with a filter and an aërating valve

3. The arrangement for discharging the circulating water from the condenser must be such that it can be delivered into buckets or connected with a hose for the purpose of washing decks, or in the case of fire, as well as discharging over the ship's side. A suitable hose and connection must also be provided.

4. Boilers will be preferred of an upright construction, though horizontal boilers, if satisfactory to the surveyor, will be accepted.

5. Boilers to be furnished with a steam-gauge indexed to double the working pressure. A glass water-gauge and two separate gauge cocks, one safety valve, and two mud-hole doors for the purpose of cleaning.

6. The boilers and all machinery to be properly covered in, and any wooden bulkhead in the vicinity of the boiler will have to be covered with sheet lead 4½lb. to the square foot, and securely fastened therefore.

7. The tools named as per annexed list will be required with each condenser :—

1 hydrometer and thermometer.
1 chipping hammer and spare handle.
2 flat chissels.
2 cross-cut chissels.
1 ratchet brace.
4 drills—⅜, ½, ⅝, and ¾ inch.
1 set of taps and dies comprising at least the following dimensions :—¼, ⅜, ½, and ⅝ inch.
2 suitable spanners (say ½ and ⅝).
1 shifting spanner.
6 files and handles assorted.
1 soldering bolt (copper).
2 pairs gas tongs to fit piping.
1 small vice and bench.
1 smith's forage.
1 „ anvil.
3 fire-irons suitable for the boilers.
2 firing shovels.
½ set of spare fire bars.
4 dozens spare bolts and nuts of useful sizes.
2 ¾-inch pipe connections. } The dimensions of the piping in connection with the condenser are to be substituted, if not as noted.
2 1-inch ditto ditto.
2 ¾-inch ditto elbow.
2 1-inch ditto ditto.
1 spare length of piping for main suction of at least 12 feet in length.
1 length of smaller piping.
1 spare slide rod for engine
6 spare gauge glasses for boiler.
25 India-rubber rings for ditto.
6 spare gauge glasses for condenser. } When required.
25 India-rubber rings for.
7lb of hard solder.
7 „ of soft ditto.
7 „ of borax ditto.
7 „ of resin ditto.
56 „ of charcoal.
14 „ of red lead.
14 „ of white lead.
14 „ of spun-yarn, or patent packing to suit glands.
1 gallon linseed oil.
10 gallons oil for lubrication.
10lb cotton waste.
40 tons of English coal for a passage to West Indies, and a proportionate quantity for longer or shorter voyages.

8. All the piping in connection with the condenser, especially the main suction and the condensed water discharge pipe, to be led in positions secure from accident or otherwise securely encased.

9. That at the time of survey it will be necessary to have the condenser at work, the condensed water to be delivered into a tub placed where most convenient and large enough to contain at least the quantity furnished by the condenser during the space of half an hour. This quantity will be accurately measured by a stamped imperial gallon measure, to be furnished by the ship, and no allowance will be made for any waste occurring from defective arrangements, that is to say, once the time has been taken as commencing the experiment, the work done in the next half hour will determine the efficiency of the machine.

10. The whole of the tools will have to be shown to the Surveyor, and must be of that class to satisfy the requirements of the Surveyor.

11. That the vessel offering for charter must obtain the certificate of condenser efficiency before being accepted by the Protector of Emigrants as fit to convey emigrants; and with this object early notice of the day on which the condenser will be ready for survey, and the position of the ship in the river, must be sent by the Master or Agents of the ship to the Engineer Surveyor.

12. That a competent person, subject to the approval of the Surveyor, shall be appointed to have charge of the apparatus, &c., for the voyage.

13. That no certificate will be granted unless the machine can yield 500 gallons of distilled water in 24 hours, and the whole arrangements, as mentioned herein, are to the entire satisfaction of the Surveyor, who, when satisfied, will forward his certificate to the Master or Agents of the ship in question, who (on their part) are particularly requested to forward it without delay to the Protector of Emigrants.

14. It must be clearly understood that these rules are liable to alteration after due and proper notice, and are issued as a guidance for ship owners and masters.

SCHEDULE (D).

Know all Men by these presents that I
at present residing in the town of Calcutta in the province of Bengal Mariner and Master and Commander of the or vessel called the
of the burthen of
tons or thereabouts at present lying in the River Hooghly am myself for myself and for the owners or owner of the said firmly bound in to Her Majesty's Secretary of State for India in the penal sum of rupees ten thousand of lawful money of British India to be paid to the said Secretary of State for India his certain attorney agents successors or assigns for which payment to be faithfully and truly made I for and on my own behalf and on behalf of the owners of the said
bind myself my heirs executors and administrators firmly by these presents sealed with my seal and dated this day of
in the year of Our Lord one thousand eight hundred and seventy

WHEREAS an Act (No. VII of 1871) entitled the Indian Emigration Act of 1871 has been lately passed by the Right Hon'ble the Governor-General of India in Council; and whereas in and by the said Act it is required that the Master of every ship destined to carry emigrants from India shall execute a bond binding himself and his owners in a penal some of rupees ten thousand to conform to the several conditions in the said Act provided; and whereas the said hath obtained the necessary license required by the said Act for carrying
emigrants to
and whereas the said
hath agreed to execute the bond required by the said Act for the due performance of the conditions provisos clauses and restrictions therein contained; and whereas the said hath also agreed on arrival
at to moor the said of
which he is Master in such secure place as the proper authority at any port at which he shall touch shall direct as soon as possible after the arrival of the said
at

Now the conditions of this bond or obligation are such that if the above bounden do and shall well and truly in all things abide by observe and keep all and singular the conditions provisos clauses and restrictions which on the part and behalf of the said
are or ought to be observed abided by and kept and which are comprised and mentioned in the said Act passed as aforesaid according to the true intent and meaning of the said Act. And if the said
do and shall immediately or as soon as possible after the arrival of the said at
moor the said or cause or procure her to be moored in such secure place as the Master Attendant or the Harbour Master or other officer duly authorized may direct or appoint. Then this obligation shall be void and of no effect otherwise shall remain in full force and virtue.

Signed sealed and delivered
at Calcutta in the presence
of

SCHEDULE E.—SCALES.

SCHEDULE E.

Embracing Scales of Dietary, Miscellaneous Articles, Medical Stores, Clothing, Utensils, and Attendant prescribed for Indian Emigrants proceeding to the West Indies, Mauritius, Réunion, &c.

No. 1.

Dietary Scale for Ships carrying Indian Emigrants to British and Foreign Colonies west of the Cape of Good Hope.

The length of voyage provided for (under section 83 of Act VII of 1871) is twenty weeks for sailing ships; fifteen weeks for those with auxilliary screw; and thirteen weeks for steamers.

Water, salt, and tobacco are to be provided for the entire voyage; dry provisions for bad weather, when cooking is impossible, for two weeks; and ordinary provisions that require cooking for the rest of the voyage.

OF ORDINARY PROVISIONS.

Daily allowances to each Statute Adult: Children above two and under ten years of age to receive half rations.

CLASS.	Articles.	lb	oz.	dr.	REMARKS.
Grain ...	Rice	0	20	0	For rice eaters.
	or Flour	0	16	0	For flour eaters.
	Dhall... For rice eaters ...	0	6	0	Urhur dhall, one-half ... Gram „ one-fourth ... Kullie „ one-eighth ... Moong „ one-eighth ... of the total quantity.
	Dhall... For flour eaters ...	0	4	0	
Oils ...	Ghee... For rice eaters ... or	0	1	0	Half an ounce extra allowance of ghee to each adult for every day that dried fish is supplied.
	Ghee... For flour eaters ...	0	or 1	8	
	Mustard oil	0	0	8	
Meats, &c. ...	Preserved mutton ...	0	2	8	In lieu of preserved mutton: To be supplied at scale rate dried fish for three weeks. Fresh mutton for about one week or eight days.
Vegetables ...	1 oz. pumkins or yams ... 2 „ potatoes ... ... 2 „ onions	0	5	0	In lieu of fresh potatoes there must be one month (thirty days) supply of dried preserved potatoes, and, as ¼ of a pound of preserved potato is reckoned equal to 1 pound of fresh potatoes, 15 ounces of preserved potatoes for each statute adult will be accepted as a substitute for 60 ounces (*i. e.*, a month's supply) of fresh potatoes. All the preserved potato must be on board at Calcutta.
Curry stuffs, &c...	Garlic	0	0	0½	
	Mustard seed	0	0	0½	
	Chillies	0	0	0½	
	Black pepper	0	0	1½	
	Coriander seed	0	0	2	
	Turmeric	0	0	4	
	Tamarind	0	0	8	
	Salt	0	0	8	
Narcotics ...	Prepared tobacco... ...	0	0	7	
	Leaf „	0	0	3	
	Water	1 gallon			To be taken originally direct from the municipal hydrant.
To every hundred statute adults...	Sheep* ... ... Averaging in weight 60lbs each	5 in number..			* As one sheep weighing 60lb yields about 25lb of available flesh, this number (5) is equal to eight days' supply of fresh mutton at scale rate.
		lb	oz.	dr.	
	Gram for 5 sheep ...	250	0	0	A fair daily allowance of gram and hay for each sheep is 3lb of each per diem.
	Hay for 5 „	250	0	0	

N. B.—Two-thirds of the allowance of fresh vegetables and half the allowance of fresh meat (*sheep*) must be taken in at Calcutta, and the balance at the Cape of Good Hope or St. Helena.

OF DRY PROVISIONS.

Total quantity to each Statute Adult for remaining two weeks, to be issued at discretion of Surgeon, the quantity being really sufficient for about eighteen days.

Articles.	lb	oz.	dr.	REMARKS.
Best coarse biscuit	36	0	0	
Choorah	4	8	0	
Gram	3	8	0	Is usually eaten with salt.
Sugar	2	8	0	Used with biscuits and choorah.

No. 2.

Scale of Medical Comforts for Ships conveying Emigrants to the West Indies for one hundred Adults.

(FOR 20 WEEKS.)

Articles.	Quantities in (pounds Avoird.)	REMARKS.
Liebig's extract of meat	5	A tea-spoonful (=150 grs.) dissolved in half a pint of warm water makes strong soup, which may be improved with flour, barley, finely ground dhall, &c., well cooked.
Mutton broth... ... ... 50 lb ..	100	In pound and half-pound tins.
Chicken broth ... ... 50 lb ...		
Preserved milk...	200	A pound tin of Anglo-Swiss milk, or one large (=10 oz.) bottle of Grimwade's, with ½ a gallon of warm water, makes good milk. *N. B.*—Every child under two years of age, whose mother is unable to nurse it, shall receive daily a pint of milk and from 3 to 6 oz. of sago or arrowroot, and every nursing mother may receive the same allowance at the discretion of the Surgeon.
Sago	80	
Arrowroot	50	
Soojee	30	
Flour	30	
Barley (pearl)	10	
Sugar	500	For sago, &c., or lime juice, when desired with it.
Tea	5	
Bael fruit (preserved)	30	A sufficient quantity of syrup or treacle should accompany, *separately*, to be added after inspection.
Lime juice	50 gallons	Sufficient for 80 days at 1 oz. a day to each adult.
Rum or brandy	20 gallons	
Port Wine	18 bottles	

For numbers above one hundred, the quantities must be proportionally increased according to above scale

No. 10.

Scale of Clothing and Utensils for each Emigrant proceeding to Mauritius and Réunion.

Articles for the voyage issued to the coolies at the depôt.	For Men.	For Boys.	REMARKS.
Stout grey shirting dhooties	2	2	Dhooties must be four yards each for men, and three yards each for boys.
Drill jacket	1	1	
Flannel banian	1	1	
Calico cap	1	1	
Patna blanket	1	1	
	For Women.	For Girls.	
Stout grey shirting sarries	2	2	Sarries must be six yards each for women, and three yards each for girls, and wide enough to extend from hip to ankle.
Flannel banian	1	1	
Patna blanket	1	1	
	For Infants.		
Stout grey shirting dhootie or sarrie	1		Dhootie or sarrie to be of two yards each.

Utensils.

Each man, woman, boy or girl must be provided with a tin plate and mug.

Memorandum of Extra Clothing, &c.

(To be forwarded to the ship prior to the day fixed for final survey.)

1. To make good wear and tear and losses of the clothing enumerated above, two (2) extra articles of each kind must be provided to every 100 statute adults.
2. Six (6) flannel bandages must be supplied for the use of the sick for each ship.

No. 11.

Scale of Attendants to be appointed for every One Hundred Statute Adults on board of Emigrant Ships proceeding to places either east or west of the Cape of Good Hope.

Besides a Compounder and Interpreter, whose duty it is to assist the Surgeon Superintendent and officer appointed to have charge of the emigrant stores, there shall be the undermentioned attendants, who, whenever it is practicable, ought to be men who have made previous voyages:—

(*a*) Sirdars or headmen, 4 to every 100 statute adults.
(*b*) Bandaries or cooks } Two of each to the first hundred, and one additional *of each*
(*c*) Topazes or sweepers } for every additional hundred statute adults.

N. B.—To meet caste prejudices, it is necessary to arrange so that Hindoo cooks of good caste (Brahmins) should cook for Hindoos, and Mussulman cooks for Mahomedans. Hence it is often expedient to select and appoint the cooks from among the coolies themselves.

DATED CALCUTTA,
The of 187 .

FORM NO. 6.

CERTIFICATE UNDER CLAUSE 5, SECTION 40 OF THE INDIAN EMIGRATION ACT NO. VII OF 1871.

PROTECTOR OF EMIGRANT'S OFFICE,
CALCUTTA,
The 187 .

CERTIFIED that the
is a good and proper vessel for the conveyance of emigrants, and that in the space allotted, viz.—

she will accommodate statute adult emigrants under the provisions of section 41 of the Indian Emigration Act No. VII of 1871.

Protector of Emigrants at Calcutta.

To

Master, Ship

FORM No. 7.

To

CAPTAIN

Ship

Dated

SIR,

I BEG to inform you that I have examined and passed the samples of provisions, &c., for the use of the cooly emigrants about to proceed to in the ship under your command. In receiving the stores and arranging for their survey, I have to request your careful attention to the following :—

Instructions.

1. The bulk of the provisions will be examined, and may, if necessary, be compared with the samples; therefore the whole must be kept above hatches until the survey is over.

2. All stores received on board for emigrants must be carefully weighed, and the number of packages correctly counted and noted. Excepting the vegetables, which must be carefully slung up under shelter, but not out of sight, *all the stores must be arranged between decks according to the order in which they stand in the provision list, three copies of which are herewith supplied.*

3. Each package must be distinctly marked with its net contents, and to facilitate calculation, the bags, casks, tins, cases, &c., in which each separate kind of article is packed, must be of *uniform size, at least for that article.*

4. The weighing, &c., of these stores is the duty of the officer specially appointed to have charge of them. He must keep a correct account in his copy of the provision list of the quantity and number of stores shipped. *This is important, and must be carefully done.*

5. In weighing rice, dhall, choorah, gram, flour, sugar, lime, &c., the average weight of a few bags may be taken as a guide; but fish, hay, and all the vegetables, must be weighed carefully throughout, as the weight of the bags, baskets, &c., is not sufficiently uniform to give a correct average.

6. All articles of a kind should be kept together, in order that they may be easily examined and counted.

7. Preserved meats, soups, and milk in tins, candles, brandy, port wine, &c., if in *original cases*, may be exposed in their cases, but if *not in original cases*, they must be sorted in tens on the platforms; and bags of rice, &c., must be arranged in tiers, five deep, so that all may be easily counted.

8. Iron cooking pots and wash-deck tubs must be kept filled with water to ascertain whether they leak, and arranged on deck for inspection.

9. You should ascertain that the water tanks, *properly cleaned and white-washed inside*, as prescribed in Rule 43, continue in good order, and that none leak.

10. The blanks in the accompanying three copies of the provision list will have to be correctly and neatly filled up with the quantities according to scale; after which, when you are satisfied that the proper quantities and qualities of stores, including the sheep, &c., have all been carefully weighed, counted, and in good order on board, and that the fittings, ventilation, hospital arrangements, medical stores, &c., are thoroughly complete, and all ready for survey, two copies of the enclosed list, duly filled up, dated and signed by you and the officer in charge of the stores, must be returned to this office with your application for final survey, and such application, with the lists, must be forwarded *at least one day previous to that on which the survey is desired.*

11. During the final survey no other work is to be carried on in the between-decks, and the officer who weighed the stores, assisted by the carpenter, sail-maker, and one or two of the crew, should be in attendance, so that cases and bags may be opened, examined, and closed, in order that the survey may be methodically and speedily conducted.

12. In conclusion the most serious disorder, loss of time, and inconvenience, are occasioned when the officers of the Emigration Department are called upon to hold surveys on imperfect fittings, or insufficient or inferior stores. I desire therefore to draw your particular attention to this point, and to request that you will be so good as to see that everything is really as it should be, thoroughly ready for survey at the appointed time.

I have the honor to be,

SIR,

Your obedient servant,

Protector of Emigrants, Calcutta.

(*a*) The daily average strength of emigrants (souls).									
(*b*) The daily average number of sick.									
(*c*) The rate per cent. of daily average sick to daily average strength.									
(*d*) The rate per cent. of deaths to daily average strength.									

RULES.

(*a*) To find the daily average strength of emigrants.—Divide the sum of the total number of souls present daily by the total number of days.

(*b*) To find the daily average number of sick.—Add together the number of sick in hospital for each day of the voyage; and divide the total by the number of days.

(*c*) To find the rate per cent. of daily average sick to strength.—Take the daily average number of sick and multiply that number by 100, and divide the product by the daily average number of strength.

(*d*) To find the rate per cent. of deaths to daily average strength.—Multiply the total number of deaths by 100, and divide the product by the daily average strength.

POLITICAL.

Fort William, the 20th February 1873.

No. 362*P.*—The following Regulation for the peace and government of the pergunnah of Spiti having been proposed by His Honor the Lieutenant-Governor of the Punjab has been considered and approved by His Excellency the Governor-General in Council, and is now published for general information, as having the force of law under 33 Vic., Cap. 3, Sec. 1 :—

This Regulation may be called "The Spiti Regulation, 1873;" it extends to the pergunnah of Spiti, and shall come into force on the 1st day of April 1873.

2. When there is reason to believe that an offence has been committed in the pergunnah of Spiti, the Nono of Spiti shall cause the person accused or suspected of having committed such offence to be brought before him, and shall, in his presence, enquire into such offence.

3. The said Nono shall record, or cause to be recorded, at the time, and in the presence of the accused, the statements of the complainant, the witnesses, and the accused, and the record of such statements shall be signed or sealed by the said Nono.

4. If the offence be murder or culpable homicide, or causing death by negligence, or an attempt to commit murder, or culpable homicide, or the abetment of any of these offences, or the abetment of suicide, or if, in the opinion of the said Nono, it cannot properly be punished by fine, he shall report the case to the Assistant Commissioner of Kulu, and shall, till the receipt of orders from the said Assistant Commissioner, confine the accused person, keeping an account of any sums expended for the guard and keep of such accused person.

5. In the case of any other offence, if, in the opinion of the said Nono, it can be properly punished with a fine of Rs. 200, the said Nono may, if he consider the accused person guilty of the offence, inflict a fine of such amount as he thinks fit, not exceeding Rs. 200.

6. In every case in which the said Nono fines any person, he shall, if such person demand it, give him a copy of his order, and of all statements made in the case. Such copy should be certified to be a true copy by the Nono, and be signed or sealed by him.

7. Any person fined by the said Nono may appeal within a reasonable time to the said Assistant Commissioner. Such appeal need not be on stamped paper, and may be sent through the post. It must be in every instance accompanied by a certified copy of the Nono's order, and of all statements in the case.

8. If any fine inflicted by the said Nono is not paid within a month, he may order the amount to be realized by attachment and sale of the movable property of the person fined. If such movable property is not sufficient to defray the fine, the Nono may report the case to the said Assistant Commissioner of Kulu, and if the Assistant Commissioner of Kulu procures the sanction necessary for the sale of immovable property, and orders the immovable property of the person fined to be sold, the said Nono may sell so much of the said immovable property as is necessary to defray the fine or the unsatisfied balance thereof.

9. The Nono shall, when ordered by the Assistant Commissioner of Kulu, suspend any enquiry in which he may be engaged under this Regulation, and transfer the case and the witnesses to the Assistant Commissioner's Court.

10. The Nono shall not try any case in which he himself, his own servants or relatives, are concerned, but send a report of the complaint in such cases to the Tehsil in Kulu.

11. The Nono shall keep up two registers, to contain the following statements : the numbers in each register to correspond :—

Register No. I.—Name of prosecutor, with parentage.
Age, caste, and residence.
Name of accused, with parentage.
Age, caste, and residence.
Charge.
Final orders and date.

Register No. II.—Name of person fined, with parentage, age, caste, and residence.
Date of order.
Amount of fine ordered.
Amount of fine realized.

The statements are to be kept up to date, and the registers submitted twice in the year to the Assistant Commissioner at Kulu, together with the fines realized. They must first be sent in in the spring, as soon as the passes are open, and again, the second time in the autumn, before the passes are closed.

12. Fines may be inflicted by the said Nono under this Regulation for the following offences :—

Committing an assault, voluntarily causing hurt, voluntarily causing grievous hurt, wrongful restraint, robbery, theft, rape, unnatural offences, adultery, abduction of women or of children under the age of ten years, kidnapping minors or persons of unsound mind from lawful guardianship.

And such offences, when falling under the jurisdiction hereby conferred upon the Nono, shall not be subject to the jurisdiction or procedure established by the Code of Criminal Procedure.

13. No proceeding of the Nono under this Regulation shall preclude the said Assistant Commissioner from holding an enquiry into any offence committed in the pergunnah of Spiti, f he think it desirable to do so.

14. No law hereafter passed by the Governor-General in Council shall be deemed to extend to the pergunnah of Spiti, unless the same be specially named therein.

The 21st February 1873.

No. 364*P.*—His Excellency the Viceroy and Governor General is pleased to continue, as a personal distinction, to Ramdin, a zemindar in the Kheree District of Oude, the title of Rai Bahadoor, which was conferred upon his late father, Toolaram Khyratee, in consideration of services rendered during the mutiny of 1857-58.

No. 366*P.*—In recognition of the valuable services rendered to Government by Sadashiva Balal, Sub-Assistant Inam Commissioner, Southern Division of the Bombay Presidency, His Excellency the Viceroy and Governor General is pleased to confer upon him the title of Rao Bahadoor as a personal distinction.

Dated the 7th February 1873.

In supersession of G. G. O. No. 340 of the 28th March 1872, and under instructions from the Right Hon'ble the Secretary of State for India, the Governor General in Council is pleased to notify that a Royal Engineer Officer of the Imperial List, on permanent staff employ under the Government, who had served eight years in India without proceeding to England at the conclusion of his regular tour of seven years, will be eligible for furlough to Europe under the Rules of 1868; but that during his residence out of India, he will only receive the English rate of pay of his rank, as laid down in paragraph 184 of the Royal Warrant of the 27th December 1870, Part I.

2. On his return to India for a second tour of service, the difference between the English rate of pay so drawn and "Furlough Pay" will be admitted to him.

3. If he should not return to India, he will be entitled to a refund of his passage-money to England.

The 19th February 1873.

No. 121.—Mr. T. C. Marshall is appointed to the Public Works Department as a temporary Sub-Engineer of the 2nd Grade, and posted to the Indus Valley (State) Railway.

No. 122.—Mr. J. S. Thorpe, Assistant Secretary to the Government of India in the Public Works Department, is granted privilege leave for one month, in extension of the leave granted him in Public Works Department Notification No. 666, dated 20th December 1872.

No. 123.—Mr. G. Bonny is appointed to the Public Works Department as a temporary Sub-Engineer of the 3rd Grade, and posted to the Western Rajpootana Railway Survey.

No. 124.—Mr. J. Ramsay, Executive Engineer, 3rd Grade, is transferred from the Holkar (State) Railway to the Indus Valley (State) Railway.

The 20th February 1873.

No. 126.—Mr. T. L. Tanner is appointed to the Public Works Department as an Assistant Engineer of the 1st Grade, and posted to the Punjab Northern (State) Railway.

No. 127.—Lieutenant Colonel F. W. Peile, R. E., Superintending Engineer, 1st Grade, on special duty, is appointed to officiate as Engineer-in-Chief of the Indus Valley (State) Railway during the absence of Mr. Campbell, or until further orders.

Notice.

In the matter of the Indian Company's Act, 1866, and in the matter of the Tirhoot Indigo Company, "Limited." } By an order made by the High Court of Judicature at Fort William in Bengal in the above matter, dated the fifteenth day of February instant, on the petition of the above-named Company, it was ordered that the said Tirhoot Indigo Company, "Limited," be wound up by this Court under the provisions of the Indian Company's Act, 1866.

GRAY & SEN.
Attorneys for the said Company.

POST OFFICE.

NOTIFICATIONS.

Calcutta, the 7th February 1873.

Information having been received that the American Mail Steamer timed to leave Hong-Kong for San Francisco on or about the 27th of April next will not perform the voyage in question, it is hereby notified that the despatch of mails for America *viâ* Hong-Kong, entered under date the 25th March in the Calendar of Mail Steamer departures from Bombay published in the Gazette of the 25th January 1873, will not be made.

A. M. MONTEATH,
Dir. Genl. of the Post Office of India.

OVERLAND PARCEL POST.

The 15th February 1873.

Under arrangements made with the Peninsular and Oriental Steam Navigation Company, parcels will be received, on or after the 15th March 1873, at any Post Office in India for transmission to the United Kingdom under the following conditions, *viz.* :—

(1). Every parcel should be securely packed in a closed cover, and should bear the *name and address of the person in the United Kingdom* for whom it is intended.

(2). Every parcel should be accompanied by a separate paper headed with the address of the parcel, and containing a *declaration of its contents and value* under the signature of the sender. Below the signature the address of the sender should be given.

(3). The parcel so addressed and the separate paper above referred to should then be enclosed in a *substantial outer cover.* This outer cover should be superscribed and addressed as follows :—

> *Overland Parcel Post.*
>
> To
>
> THE POSTMASTER,
>
> BOMBAY.

It must be *fully prepaid by means of postage stamps at the rate of* 3 *annas for every* 10 *tolas or fraction of* 10 *tolas in weight,* care being taken that the stamps adhere firmly to the cover. The parcel so made up must not exceed 25 seers in weight, or two feet in length by one foot in breadth or depth ; it will be received at any Post Office at the hours fixed for the receipt of ordinary banghy parcels, the usual receipt being given to the sender.

(4). On arrival at Bombay, the Postmaster will take off the outer covering and forward the inside parcel and accompanying declaration through the Bombay Agency of the Peninsular and Oriental Steam Navigation Company.

(5). The pre-payment above described will carry the parcel to London, any additional charge which may become due on account of British custom duty or carriage beyond London being realised from the addressee by the Peninsular and Oriental Steam Navigation Company or their local Agents.

(6). No parcel will be forwarded containing opium, jewellery, precious stones, and such like, or liquids, oils, spirits, or any explosive, dangerous, or offensive substance, such as gunpowder, matches, percussion caps, assafœtida, &c.

Arrangements having already been made for the booking of parcels in the United Kingdom by the Peninsular and Oriental Steam Navigation Company and their Agents for transmission to destination in India, persons in this country desirous of obtaining parcels may advise their friends or agents at home to send them by the "India Overland Parcel Post," either prepaid or unpaid.

F. R. HOGG,
Offg. Director Genl. of the Post Office of India.

The 21st February 1873.

Mails for Ceylon, Penang, Singapore, Hong-Kong, China and Japan, for transmission per Steamer from Bombay, will be closed at this Office on Saturday, the 22nd February, at 7 P. M.

BENGAL CIVIL FUND.

At a Half-yearly General Meeting of Subscribers to the Bengal Civil Fund, held at the Town Hall, Calcutta, on Wednesday, the 29th January 1873—

PRESENT:—S. Wauchope, Esq., C. B.; The Hon'ble V. H. Schalch; A. Money, Esq., C. B.; C. T. Buckland, Esq.; H. D. Sandeman, Esq.; H. L. Dampier, Esq.; The Hon'ble R. E. Egerton; R. B. Chapman, Esq.; H. A. Cockerell, Esq.; W. S. Halsey, Esq.; C. U. Aitchison, Esq.; F. R. Hogg, Esq.; James Monro, Esq.; J. Geoghegan, Esq.; C. A. Kelly, Esq.; A. Mackenzie, Esq.; T. W. Gribble, Esq.; D. M. Barbour, Esq.; W. M. Souttar, Esq.; C. F. Magrath, Esq.; W. H. Verner, Esq.; H. Luttman Johnson, Esq.; T. J. C. Plowden, Esq.; and C. E. Buckland, Esq.

C. T. Buckland, Esq., in the Chair.

Read the following report submitted by the Managers:—

"The Managers submit their Proceedings for the past half-year for the consideration and sanction of the Meeting."

I. "Subject to the approval of the Subscribers, they have admitted to the benefits of the Fund the widow and two daughters of the late Mr. H. C. Hamilton (an annuitant of 1865), who died on the 26th October last."

Mrs. Hamilton	... £ 300
Two daughters	... „ 200
	£ 500

II. "The Managers beg to submit, for the consideration of the Meeting, the application of Mr. Walker, asking remission of the fine of Rs. 50 incurred under Article V of the Rules of the Fund. Mr. Walker reported on the 30th June last to the Agents of the Fund, Messrs. Coutts & Co., the birth of his daughter on the 22nd May 1872, and was informed that a fine of Rs. 50 had been incurred under Article V of the Rules, as the event had not been reported within a month of the occurrence. Mr. Walker states that the delay was due to serious illness and consequent inability to attend to business of any sort."

III. "The Managers also submit to this Meeting the following statement in connection with the application of Mrs. Offord, formerly Mrs. Neave, for admission to Fund benefits."

"Mr. Neave was a Subscriber to the Fund under the Old Rules, and at the time of his decease (24th December 1848) had subscribed the sum of Rs. 15,924. He possessed considerable property over which he had full control, and he was bound under Article XXVI of the Old Rules to make a proper testamentary provision for his family. That article contains the following provisions:"—

"In case it shall be proved to the conviction of a General Meeting of Subscribers that a deceased member of this Fund has, during his life-time, whether in immediate anticipation of his death or otherwise, made such a disposition of any part of his property, real or personal, as but for this rule would throw the entire or partial support of his widow or offspring upon the Fund, who would not have been so supported by the Fund had such part of his property not been so disposed of, with the intention thereby of benefiting any party at the expense of the Fund, then the widow or offspring of such a member or both shall forfeit all right to any part of the support which would have been claimable if no such disposition had been made.

"It is hereby declared that a General Meeting of the latter, (*i. e.*, Subscribers), duly held according to the rules of the institution, shall have full power to reject the application for aid from the Fund in any instance in which it may appear that a Subscriber having property at his death, and having the power to dispose of it, has made no due provision for his family."

"The Managers, when acting under these provisions, have invariably decided that the whole of the private income left by the deceased Subscriber, whether from real or other property, must be taken in reduction of Fund Allowances."

"Mr. Neave not only omitted to make any will which would have secured his widow's maintenance, but by an indenture, executed with a view to destroy and entail some years before his death, expressly barred her from dower. This indenture was not examined till the year 1867, and thus Mrs. Neave drew from 1848 to 1867 dower from the estate, and no application for admission to Fund benefits was made on her behalf. In 1867, when her son put up the family property for sale, a careful examination of the title-deeds became necessary, and this showed that Mrs. Neave had all along been drawing dower illegally. Her son, Mr. Spencer Neave, however settled upon her £200 a year from the estate. He has since lost all his remaining property in unfortunate speculations, and Mrs. Offord now finds that only this sum of £200 a year is left to herself and her son out of the entire estate of the late Mr. Neave."

"Mrs. Offord has now applied for a pension from the Fund on the ground that, had it been known at the time of Mr. Neave's death that she was not entitled to dower, she would have received an annuity. But the Managers consider that, had this claim been made on the death of Mr. Robert Neave in 1848, it would have been rejected under the provisions of Rule 26 above quoted, and they are of opinion that the original fault is in no degree removed by the subsequent events. The Managers have therefore disallowed Mrs. Offord's claim, and they now submit the case for the decision of the General Meeting under the following provision of Article XX of the Old Rules:"—

"The Managers, after calling for any further information or evidence which may appear to them requisite, are to submit the application with the whole of the papers received by them, and the decision they may have come to thereupon, for the determination of the Subscribers at the next General Meeting."

IV. "The Managers have before them a note recorded in the Financial Department on the examination of the Bengal Civil Fund, which discusses and determines many questions of great importance. Mr. Monteath in a letter to the Managers has drawn special attention to one of its most prominent features, namely, the necessity, in view of the constantly increasing surplus, of either decreasing the rates of subscription or increasing benefits. The Managers have asked Mr. Monteath for an expression of his views on this question, and, on receipt thereof, the Managers will circulate them to the Service along with their proposals on this and other important points raised in the note of the Financial Department."

V. "The Managers have had before them letter No. 12, dated the 4th January 1873, from the Officiating Secretary to the Government of India, Home Department, on the subject of the eligibility of three newly appointed Native Members of the Civil Service to subscribe to the Bengal Civil Fund. The Government of India considers that, as the clause providing for subscriptions to the Fund was not struck out of those gentlemen's covenants, the privilege of becoming Subscribers cannot be refused to them, and they request the Managers"—

"*1st*, to draw up a rule placing, as far as possible, the benefits of the Fund as regards the widow and children of a Native Member of the Civil Service* on the same footing as the benefits secured by it to any other Member;"

* *i. e.*, one who has been admitted as a Subscriber to the Fund.

"*2nd*, to convey an expression of their opinion as to the rule to be adopted as to the future admission of Native Members of the Bengal Civil Service to subscribe to the Fund."

"The Managers are thus required to frame rules to meet the cases of those Native Civilians who have already been admitted as Subscribers to the Fund; and to give their opinion as to the *future* admission of Native Members of the Civil Service as Subscribers to the Fund."

"As regards the first of these points the Managers have drafted the following rules:"—

I.—That in the case of a Native Member of the Civil Service, who has but one wife at one time, the ordinary rules of the Fund shall apply.

II.—That in the case of a polygamous marriage where there are two or more wives living, only the one first married and her children can be on the Fund.

III.—That in any such marriage, in the event of the death of the wife first married, the wife married next in order of time may be brought upon the Fund from the date of the death of the first wife. Provided that it shall be incumbent on the husband to give special notice on or after the decease of his first wife of his wish to bring such second wife upon the Fund. On receipt of this notice, the case will, for the purposes of the Fund, be treated, as regards fines and all other matters, as if the husband had contracted a second marriage on the day of his first wife's decease.

IV.—Provided that in the event of a second wife married during the life of the first coming upon the Fund, her children shall be admissible to the benefits of the Fund, only if born not less than one year after the death of the first wife.

"As regards the second point, namely, the question of the future admission of Native Covenanted Civilians as Subscribers to the Fund, the Managers have informed the Government of India that in their opinion Native Civilians may in future be admitted under the rules given above or such others as may from time to time be framed to meet the circumstances."

"The Managers have at the same time informed the Government of India that they can in no way pledge the Service, to the opinions or the rules above noted, and also that they do not relinquish the right to make any such future rules, with reference to the conditions under which Native Members of the Civil Service are to subscribe to the Fund, as may be required, either by the changed constitution of the Service, or for actuarial or other reasons."

"The accounts of the past year (1871-72) are submitted."

Abstract of the Accounts of the Bengal Civil Fund for 1871-72.

E. E.

W. H. VERNER,

Offg. Secretary and Accountant.

Proposed by *Mr. Geoghegan*, seconded by *Mr. Plowden*, that the proceedings of the Managers in admitting to the benefits of the Fund, to the extent reported, the family of the late Mr. H. C. Hamilton, be confirmed. Carried unanimously.

Proposed by *Mr. Mackenzie*, seconded by *Mr. Money*, that Mr. Walker be informed, that the rule as to fine for failure to report birth being absolute, the fine imposed upon him cannot be remitted. Carried unanimously.

Proposed by *Mr. Barbour*, seconded by *Mr. C. E. Buckland*, that the Managers' proceedings in the case of Mrs. Offord be confirmed. Carried unanimously.

The Officiating Secretary drew attention to the part of the Managers' Report regarding the examination of the position of the Civil Fund by the Financial Department, and congratulated the meeting on the satisfactory conclusion there drawn as to the solvency of the Fund. It appeared that, after all adjustments which could be demanded by the Government had been made, there would still be a surplus of assets amounting to 18 lakhs of Rupees. Mr. Monteath had not yet found time to favor the Managers with his promised memorandum on the best mode of utilising this surplus, but the matter was under consideration.

Mr. Mackenzie said there was one very important point brought out in the Financial note, *viz.*, the necessity of revising the tables by which subscriptions were at present valued. This matter had pressed itself on the attention of those interested in the Fund very much of late years. Average salaries were decreasing and likely to decrease, and the Managers should make sure of their ground before they calculated on a surplus of this amount. No change should be made save under the best professional advice.

Mr. Barbour remarked that the question raised by Mr. Mackenzie was of very great importance. There was no doubt that salaries had decreased very considerably of late years, especially in the lower ranks of the service. In valuing the assets of the Fund, the amount of probable future subscriptions was a most important item. The actuary had founded his tables on the average income drawn by the members of the Service at the different ages from 20 upwards. The valuation of future subscriptions by these tables involved therefore the assumption that the average salaries for the future would be as high for the same ages as they had been in 1863. It was hardly necessary to point out that this assumption was not correct. Average salaries in the lower ranks of the Service had decreased every year since 1863, and there was no probability of matters returning to their normal state for 15 or 16 years from the present time. He had calculated for the year 1872 the average amount, for one year, of ordinary subscription of married members from age 21 to age 39. The actuary in constructing his tables had taken salaries as they stood on 1st April 1863, and his (Mr. Barbour's) calculation was founded on salaries as they stood on 1st April 1872, 9 years after :—

Married Members.

AGE.	ANNUAL AVERAGE SUBSCRIPTION BEING 2½ PER CENT. ON SALARY.		AGE.	ANNUAL AVERAGE SUBSCRIPTION BEING 2½ PER CENT. ON SALARY.	
	1872.	1863.		1872.	1863.
21 ...	120	90	31 ...	277	421
22 ...	135	86	32 ...	267	327
23 ...	145	94	33 ...	318	394
24 ...	170	185	34 ...	447	451
25 ...	171	203	35 ...	456	508
26 ...	169	235	36 ...	385	424
27 ...	205	285	37 ...	441	512
28 ...	203	288	38 ...	510	569
29 ...	257	275	39 ...	633	722
30 ...	287	311			

The decrease was very considerable and, although there might be other circumstances tending to lessen the loss to the Fund arising from diminution of salaries, still the figures he had given were sufficient to show the necessity for having the tables re-calculated and the assets and liabilities of the Fund very carefully valued before they sanctioned any increase of benefits or diminution of subscription.

It was then proposed by *Mr. Egerton* and seconded by *Mr. Aitchison*, "that the proposals of the Managers in regard to the Native gentlemen who have already been admitted to the Service and whose covenants contain a stipulation that they shall subscribe to the Civil Fund should be adopted."

Mr. Mackenzie rose to move an amendment. He said this question of admitting Native subscribers was one surrounded by practical difficulties. It was a question which he was sure would be met and discussed without any feelings of race prejudice, but it was one that affected very closely the interests of the Fund. He regretted much that it had been thought necessary to raise the issue in all its broadness at the present time. True, there were now three Native gentlemen in the Service in whose covenants there had been inserted, through an error in the India Office, a stipulation that they would become subscribers to the Civil Fund. These Native gentlemen were desirous of availing themselves of that stipulation, and he for one was ready to admit them to the Fund upon conditions. He would first, however, read to the meeting the distinct pledge given by the Secretary of State in 1864 when the first Native Civilian

was appointed to Bombay, as contained in Sir C. Wood's letter 108, dated 30th November 1864, to the Governor in Council, Bombay. "I have considered in Council your public letter dated "the 23rd July last, No. 24, which forwarded a letter from the Secretary of the Bombay Civil "(Provident) Fund, submitting certain questions with a view to the determination of the "position of Native gentlemen entering the Civil Service in relation to the Service Funds.

2. "So far as relates to subscriptions to the Civil Service Annuity Fund, there does not "appear to Her Majesty's Government to be any ground for making a distinction between "different members of the Covenanted Civil Service whether Europeans or Natives.

3. "With reference to the Provident Fund, Her Majesty's Government are of opinion "that, both as respects their domestic institutions and their personal requirements during "absence on leave, Natives of India differ so materially from Europeans that the Civil Fund "is not adapted to them: and it *does not appear to me that such alterations could be made in "the rules as would render that Fund a suitable institution for making provision for their widows "and families.*

4. "Arrangements will therefore be made for cancelling so far as relate to Natives of "India the rule, which requires that all persons entering the Covenanted Service shall subscribe "to the Widows' or Orphans' Funds."

Satyendra Nath Tagore, the Bombay Civilian, was therefore to have the option of withdrawing from the Fund, or of being bound by any rules that could be devised to meet his special case. He put an end to all difficulty however by voluntarily accepting monogamy as his rule of life. In the covenants of the Native gentlemen who had lately come to Bengal, the condition of subscription was unfortunately by oversight included. But the present Secretary of State had again reiterated Sir C. Wood's pledge in the following words:—

"A separate form of covenant will be prepared for future Native members of the Civil "Service, so that the mistake which has been committed may not occur again.

"I desire that Your Excellency in Council will make such arrangements as you may "deem right on the question of subscription to the Widows and Orphans' Fund, with respect "to the three gentlemen who have already joined the Bengal Civil Service."

It would be clear to the meeting therefore that the very radical change proposed by the Managers in the rules and constitution of the Fund had its origin in India and not in Westminster. He believed that there would be so many practical difficulties in the way of admitting Natives generally to the Fund, that he would advise the meeting to fall back absolutely upon the Secretary of State's pledges, after dealing with the particular cases now before them. He did not think the rules proposed by the Managers met the point. Many positions might be imagined which those rules did not cover, and the only condition which he thought could be accepted as qualifying for the privileges of the Fund, was the acceptance by the Bengali Civilians of the rules of monogamy. They must put themselves on the same footing as the other subscribers as far as that was possible. *The three gentlemen in question had voluntarily offered to give pledges of the kind required* and had agreed to accept monogamy as their rule of life. His amendment therefore precisely met their case without any change in the rules or constitution of the Fund. The amendment would run as follows:—

"That the Native gentlemen now in the Civil Service in whose covenants the condition of subscribing to the Fund has been inserted be admitted as subscribers on condition of their adopting monogamy as their rule of life, and giving similar pledges to those given by Mr. S. N. Tagore to the Bombay Fund, and provided that they and their families shall forfeit all interest in the Fund and in their subscriptions thereto if they marry a second wife in the life-time of the first."

Mr. Verner observed that the case of Satyendra Nath Tagore, on which the mover of the amendment relied, would not serve as a precedent in the sense intended by Mr. Mackenzie, for Mr. Tagore had not accepted monogamy as his rule of life. The Proceedings of the Bombay Fund showed that he abandoned the right to marry a second wife during the life-time of the first, only so far as the Fund was concerned, and the despatch of the Secretary of State No. 73, dated the 22nd September 1865, made this still more explicit, for it stated that Mr. Tagore had renounced not polygamy but all claim to any advantages which might accrue through an infringement of the rule of monogamy, and that it was on this understanding that he had been allowed to subscribe to the Fund.

Mr. Monro in seconding the amendment referred to the many cases which might arise in which the rules of the Fund would fail to cover the conditions of Native life. The Fund was a social institution intended for men bound by the same social rules. It must be remembered too that, when the time came for applying the rules, we should not have to deal with the educated Native Civilians themselves, but with their relatives and families living under Hindoo or Mahomedan law. We should infallibly get involved in perplexing litigation sooner or later.

A discussion ensued in which Messrs. *Money, Barbour, Egerton, Aitchison, Magrath* and others took part, generally supporting the views above enunciated on the general question, but supporting in some instances the rules proposed by the Managers. *Mr. Mackenzie* remarked in reply that the pledges offered by the Bengali Civilians were quite sufficient for the purposes of the Fund.

The amendment being put to the vote was not carried, the votes being 12 for and 12 against it.

The original motion was then put but was not carried, the votes being 10 for and 12 against it.

It was then proposed by *Mr. Egerton* and seconded by *Mr. Aitchison*, "that this Meeting" express their concurrence in the views recorded by the Secretary of State in the despatch No. 108, dated 30th November 1864, to the Bombay Government, and No. 46, dated 15th May 1872, to the Government of India, as to the inapplicability of the conditions of the Civil Fund to Native Covenanted Civilians and the expediency of expunging from their covenants the engagements relating to the Civil Fund."

Mr. Chapman said that he wished to propose an amendment.

He was anxious not to make it appear that any present who might think differently from himself were actuated by any abstract opposition to the admission to the Fund of members of the Covenanted Civil Service who were Natives of India; at the same time he thought that it was only proper that the Service should now affirm distinctly that it would recognise no distinction on account of race or colour. Mr. Chapman did not anticipate that in practice any of the difficulties that were suggested in the way of admitting Natives of India to the Fund would arise. It was not improbable that the Fund would rather benefit than otherwise by such admission, and he thought any fraud on the part of the families of Natives of India who were members of the Covenanted Civil Service in every respect as unlikely if not as impracticable as it would be in the case of Europeans. Then again as to polygamy; in practice it was highly unlikely that gentlemen, Natives of India, who became members of the Covenanted Civil Service, would ever contract polygamous marriages. But if the benefits to the family of a Native officer depended upon his abstaining from such a connection, it was easy to see that the penalty by which a rule against polygamy must be enforced would fall not upon the offender but often with much weight upon the innocent widow and children. All that it behoved the Service to consider was whether Natives of India could be admitted to the Fund without risk of injury thereto. It was not the duty of the Service to enforce its own views of social morality, however undeniably true they might be. Mr. Chapman therefore considered that the Service in disposing of this question should confine itself to the one point whether Natives of India could be enrolled as members of the Fund without endangering its stability. He had himself no doubt upon the point, but it would of course be proper that it should be settled deliberately and after professional investigation.

The following amendment was then proposed by *Mr. Chapman* and seconded by *Mr. Hogg*, "that this Meeting would affirm the principle that Natives of India, who are members of the Covenanted Civil Service, should be allowed to subscribe to the Civil Fund under any special rules or restriction that may be found necessary to protect the interest of the Fund."

Not carried, the votes being for 8 against 14.

The original proposition was then put and carried—the votes being for 14 against 8.

The accounts of the past year were approved.

The following gentlemen were elected Managers for the ensuing year, Hon'ble V. H. Schalch, James Monro, Esq., W. L. Heeley, Esq., W. M. Souttar, Esq., and H. Luttman Johnson, Esq.

A Vote of thanks was passed to the Chairman.

C. T. BUCKLAND,
Chairman.

CIVIL FUND OFFICE,
The 29th January 1873.

PROMISSORY NOTES.

Lost.

The undersigned having lost a Bill of Exchange No. 922, dated 2nd December 1872, for Five Thousand Rupees, drawn at Dacca by Messrs. Field, Wilson & Co. upon Messrs. Shaw, Jameson & Co., at Calcutta, and payable to the undersigned or his order at fifteen days after date thereof. Warns the public against purchasing it.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th February 1873, and is hereby promulgated for general information :—

ACT No. VII OF 1873.

An Act for the levy of Port-dues in the Ports of British Burma.

Preamble.

WHEREAS it is expedient from time to time to bring ports in British Burma under the provisions of Act No. XXII of 1855 *(for the regulation of Ports and Port-dues)* and to make regulations for the levy of dues in such ports without the necessity of passing a new Act for each occasion; It is hereby enacted as follows :—

Short title.

1. This Act may be called "The Burma Port-dues Act, 1873":

Local extent.

It extends only to the ports of British Burma which shall have been declared subject to the said Act No. XXII of 1855 :

To be read with Act XXII of 1855.

It shall be read with and taken as part of the same Act ;

Commencement.

And it shall come into force on the first day of March 1873.

Power to declare maximum amount of port-dues leviable in Burma.

2. In every case in which the Chief Commissioner of British Burma, with the previous sanction of the Governor General in Council, has declared or hereafter declares any port in British Burma to be subject to the said Act, he may, with the like sanction, by the same or any subsequent declaration, and notwithstanding anything contained in section forty-one of the said Act, further declare—

(*a*.) the maximum amount of dues to be levied in such port,

(*b*.) the conditions and modifications under which such dues shall be levied,

and may also from time to time, with the like sanction, vary such maximum amount, conditions and modifications.

What vessels chargeable.

Limitation of rate.

3. Provided that the dues so authorized shall be charged only on sea-going vessels of the burden of ten tons and upwards, and shall not exceed the rate of four annas for every ton of burden.

WHITLEY STOKES,

Secy. to the Govt. of India.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th February 1873, and is hereby promulgated for general information :—

ACT No. VIII OF 1873.

THE NORTHERN INDIA CANAL AND DRAINAGE ACT, 1873.

CONTENTS.

PREAMBLE.

PART I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
2. Repeal of Acts.
3. Interpretation-clause.
4. Power to appoint officers.

PART II.

OF THE APPLICATION OF WATER FOR PUBLIC PURPOSES.

5. Notification to issue when water-supply is to be applied for public purposes.
6. Powers of Canal Officer.
7. Notice as to claims for compensation.
8. Damage for which compensation shall not be awarded.
   Matters in respect of which compensation may be awarded.
9. Limitation of claims.
10. Enquiry into claims and amount of compensation.
11. Abatement of rent on interruption of water-supply.
12. Enhancement of rent on restoration of water-supply.
13. Compensation when due.
    Interest.

PART III.

OF THE CONSTRUCTION AND MAINTENANCE OF WORKS.

14. Power to enter and survey, &c.
    Power to clear land.
    Power to inspect and regulate water-supply.
    Notice of intended entry into houses.
    Compensation for damage caused by entry.
15. Power to enter for repairs and to prevent accidents.
    Compensation for damage to land.

SECTIONS.

16. Application by persons desiring to use canal-water.
    Contents of application.
    Liability of applicants for cost of works.
    Recovery of amount due.
17. Government to provide means of crossing canals.
18. Persons using water-course to construct works for passing water across roads, &c.
    If they fail, Canal Officer may construct and recover cost.
19. Adjustment of claims between persons jointly using water-course.
    Recovery of amount found due.
20. Supply of water through intervening water-course.
21. Application for construction of new water-course.
22. Procedure of Canal Officer thereupon.
23. Application for transfer of existing water-course.
    Procedure thereupon.
24. Objections to construction or transfer applied for.
25. When applicant may be placed in occupation.
26. Procedure when objection is held valid.
27. Procedure when Canal Officer disagrees with Collector.
28. Expenses to be paid by applicant before receiving occupation.
    Procedure in fixing compensation.
    Recovery of compensation and expenses.
29. Conditions binding on applicant placed in occupation.
30. Procedure applicable to occupation for extensions and alterations.

PART IV.

OF THE SUPPLY OF WATER.

31. In absence of written contract, water-supply to be subject to rules.
32. Conditions as to—
    power to stop water-supply;
    claims to compensation in case of failure or stoppage of supply;
    claims on account of interruption from other causes;
    duration of supply;
    sale or sub-letting of canal-water;
    transfer, with land, of contracts for water;
    no right acquired by user.

PART V.

OF WATER-RATES.

33. Liability when person using unauthorizedly cannot be identified.
34. Liability when water runs to waste.
35. Charges recoverable in addition to penalties.
    Decision of questions under sections 33 and 34.

SECTIONS.

36. Charge on occupier for water how determined.
"Occupier's rate."
37. "Owner's rate."
38. Amount of owner's rate.
39. Owner's rate not chargeable in respect of land temporarily assessed to land-revenue at irrigation-rates.
40. When occupier is to pay both owner's rate and occupier's rate.
41. Power to make rules for apportioning owner's rate.
42. When owner is to pay owner's rate.
43. Effect of introduction of canal-irrigation on landlord's right to enhance.
44. Water-rate by whom payable when charged on land held by several owners.

Recovery of Charges.

45. Certified dues recoverable as land-revenue.
46. Power to contract for collection of canal-dues.
47. Lambardárs may be required to collect canal-dues.
48. Fines excluded from sections 45, 46, 47.

PART VI.

OF CANAL-NAVIGATION.

49. Detainer of vessels violating rules.
Liability of owners of vessels causing damage.
50. Recovery of fines for offences in navigating canals.
51. Power to seize and detain vessel on failure to pay charges.
52. Power to seize cargo or goods, if charges due thereon are not paid.
53. Procedure for recovery of such charges after seizure.
54. Procedure in respect of vessels abandoned and goods unclaimed.
Disposal of proceeds of sale.

PART VII.

OF DRAINAGE.

55. Power to prohibit obstructions or order their removal.
56. Power to remove obstructions after prohibition.
57. Preparation of schemes for works of improvement.
58. Powers of persons employed on such schemes.
59. Rate on lands benefited by works.
60. Recovery of rate.
61. Disposal of claims to compensation.
62. Limitation of such claims.

PART VIII.

OF OBTAINING LABOUR FOR CANALS AND DRAINAGE-WORKS.

63. Definition of "labourer."
64. Power to prescribe number of labourers to be supplied by persons benefited by canal.
65. Procedure for obtaining labour for works urgently required.
66. Liability of labourers under requisition.

SECTIONS.

PART IX.

OF JURISDICTION.

67. Jurisdiction under this Act of Civil Courts.
68. Settlement of differences as to mutual rights and liabilities of persons interested in water-course.
69. Power to summon and examine witnesses.

PART X.

OF OFFENCES AND PENALTIES.

70. Offences under Act.
Penalty.
71. Saving of prosecution under other laws.
72. Compensation to person injured.
73. Power to arrest without warrant.
74. Definition of 'Canal.'

PART XI.

OF SUBSIDIARY RULES.

75. Power to make, alter and cancel rules.
Publication of rules.

SCHEDULE—Enactments repealed.

An Act to regulate Irrigation, Navigation and Drainage in Northern India.

Preamble.

WHEREAS, throughout the territories to which this Act extends, the Government is entitled to use and control for public purposes the water of all rivers and streams flowing in natural channels, and of all lakes and other natural collections of still water; and whereas it is expedient to amend the law relating to irrigation, navigation and drainage in the said territories; It is hereby enacted as follows:—

PART I.

PRELIMINARY.

Short title.

1. This Act may be called "The Northern India Canal and Drainage Act, 1873":

Local extent.

It extends to the territories for the time being respectively under the government of the Lieutenant Governors of the North-Western Provinces and the Panjáb, and under the administration of the Chief Commissioners of Oudh and the Central Provinces; and applies to all lands whether permanently settled, temporarily settled, or free from revenue;

Commencement.

And it shall come into force on the passing thereof.

Repeal of Acts.

2. The Acts mentioned in the schedule hereto annexed are repealed to the extent specified in the third column of the said schedule.

Interpretation-clause.

3. In this Act—unless there be something repugnant in the subject or context—

"Canal."

(1) "Canal" includes—

(a) all canals, channels and reservoirs constructed, maintained or controlled by Government for the supply or storage of water;

(b) all works, embankments, structures, supply and escape-channels connected with such canals, channels or reservoirs;

(c) all water-courses as defined in the second clause of this section;

(d) any part of a river, stream, lake or natural collection of water, or natural drainage-channel, to which the Local Government has applied the provisions of Part II of this Act;

"Water-course."

(2) "Water-course" means any channel which is supplied with water from a canal, but which is not maintained at the cost of Government, and all subsidiary works belonging to any such channel;

"Drainage-work."

(3) "Drainage-work" includes escape-channels from a canal, dams, weirs, embankments, sluices, groins and other works for the protection of lands from flood or from erosion, formed or maintained by the Government under the provisions of Part VII of this Act, but does not include works for the removal of sewage from towns;

"Vessel."

(4) "Vessel" includes boats, rafts, timber and other floating bodies;

"Commissioner."

(5) "Commissioner" means a Commissioner of a Division, and includes any officer appointed under this Act to exercise all or any of the powers of a Commissioner;

"Collector."

(6) "Collector" means the head revenue officer of a district, and includes a Deputy Commissioner or other officer appointed under this Act to exercise all or any of the powers of a Collector;

"Canal Officer."

(7) "Canal Officer" means an officer appointed under this Act to exercise control or jurisdiction over a canal or any part thereof;

"Superintending Canal Officer" means an officer exercising general control over a canal or portion of a canal;

"Divisional Canal Officer" means an officer exercising control over a division of a canal;

"Sub-Divisional Canal Officer" means an officer exercising control over a sub-division of a canal;

"District."

(8) "District" means a district as fixed for revenue purposes.

Power to appoint officers.

4. The Local Government may from time to time declare, by notification in the official Gazette, the officers by whom, and the local limits within which, all or any of the powers or duties hereinafter conferred or imposed shall be exercised or performed.

All officers mentioned in section three, clause (7), shall be respectively subject to the orders of such officers as the Local Government from time to time directs.

PART II.

OF THE APPLICATION OF WATER FOR PUBLIC PURPOSES.

Notification to issue when water-supply is to be applied for public purposes.

5. Whenever it appears expedient to the Local Government that the water of any river or stream flowing in a natural channel, or of any lake or other natural collection of still water, should be applied or used by the Government for the purpose of any existing or projected canal or drainage-work, the Local Government may, by notification in the official Gazette, declare that the said water will be so applied or used after a day to be named in the said notification, not being earlier than three months from the date thereof.

Powers of Canal Officer.

6. At any time after the day so named, any Canal Officer, acting under the orders of the Local Government in this behalf, may enter on any land and remove any obstructions, and may close any channels, and do any other thing necessary for such application or use of the said water.

Notice as to claims for compensation.

7. As soon as is practicable after the issue of such notification, the Collector shall cause public notice to be given at convenient places, stating that the Government intends to apply or use the said water as aforesaid, and that claims for compensation in respect of the matters mentioned in section eight may be made before him.

Damage for which compensation shall not be awarded.

8. No compensation shall be awarded for any damage caused by—

(a) stoppage or diminution of percolation or floods,

(b) deterioration of climate or soil;

(c) stoppage of navigation, or of the means of drifting timber or watering cattle;

(d) displacement of labour.

Matters in respect of which compensation may be awarded.

But compensation may be awarded in respect of any of the following matters:

(e) Stoppage or diminution of supply of water through any natural channel to any defined artificial channel, whether above or under ground, in use at the date of the said notification:

(f) Stoppage or diminution of supply of water to any work erected for purposes of profit on any channel, whether natural or artificial, in use at the date of the said notification:

(g) Stoppage or diminution of supply of water through any natural channel which has been used for purposes of irrigation within the five years next before the date of the said notification:

(h) Damage done in respect of any right to a water-course or the use of any water to which any person is entitled under the Indian Limitation Act, 1871, Part IV:

(i) Any other substantial damage, not falling under any of the above clauses (a), (b), (c) or (d), and caused by the exercise of the powers conferred by this Act, which is capable of being ascertained and estimated at the time of awarding such compensation.

In determining the amount of such compensation, regard shall be had to the diminution in the market-value, at the time of awarding compensation, of the property in respect of which compensation is claimed; and where such market-value is not ascertainable, the amount shall be reckoned at twelve times the amount of the diminution of the annual nett profits of such property, caused by the exercise of the powers conferred by this Act.

No right to any such supply of water as is referred to in clause (e), (f) or (g) of this section, in respect of a work or channel not in use at the date of the notification, shall be acquired as against the Government, except by grant or under the Indian Limitation Act, 1871, Part IV.

And no right to any of the advantages referred to in clauses (*a*), (*b*) and (*c*) of this section shall be acquired, as against the Government, under the same Part.

Limitation of claims.

9. No claim for compensation for any such stoppage, diminution or damage shall be made after the expiration of one year from such stoppage, diminution or damage, unless the Collector is satisfied that the claimant had sufficient cause for not making the claim within such period.

Enquiry into claims and amount of compensation.

10. The Collector shall proceed to enquire into any such claim, and to determine the amount of compensation, if any, which should be given to the claimant; and sections nine to twelve (inclusive), fourteen and fifteen, eighteen to twenty-three (inclusive), twenty-six to forty (inclusive), fifty-one, fifty-seven, fifty-eight and fifty-nine of the Land Acquisition Act, 1870, shall apply to such enquiries:

Provided that, instead of the last clause of the said section twenty-six, the following shall be read: "The provisions of this section and of section eight of the Northern India Canal and Drainage Act, 1873, shall be read to every assessor in a language which he understands, before he gives his opinion as to the amount of compensation to be awarded."

Abatement of rent on interruption of water-supply.

11. Every tenant holding under an unexpired lease, or having a right of occupancy, who is in occupation of any land at the time when any stoppage or diminution of water-supply, in respect of which compensation is allowed under section eight, takes place, may claim an abatement of the rent previously payable by him for the said land, on the ground that the interruption reduces the value of the holding.

Enhancement of rent on restoration of water-supply.

12. If a water-supply increasing the value of such holding is afterwards restored to the said land, the rent of the tenant may be enhanced, in respect of the increased value of such land due to the restored water-supply, to an amount not exceeding that at which it stood immediately before the abatement.

Such enhancement shall be on account only of the restored water-supply, and shall not affect the liability of the tenant to enhancement of rent on any other grounds.

Compensation when due.

13. All sums of money payable for compensation under this Part shall become due three months after the claim for such compensation is made in respect of the stoppage, diminution or damage complained of,

Interest.

and simple interest at the rate of six per cent. per annum shall be allowed on any such sum remaining unpaid after the said three months, except where the non-payment of such sum is caused by the wilful neglect or refusal of the claimant to receive the same.

PART III.

OF THE CONSTRUCTION AND MAINTENANCE OF WORKS.

Power to enter and survey, &c.

14. Any Canal Officer or other person acting under the general or special order of a Canal Officer,

may enter upon any lands adjacent to any canal, or through which any canal is proposed to be made, and undertake surveys or levels thereon;

and dig and bore into the sub-soil;

and make and set up suitable land-marks, level-marks, and water-gauges;

and do all other acts necessary for the proper prosecution of any enquiry relating to any existing or projected canal under the charge of the said Canal Officer:

Power to clear land.

and, where otherwise such enquiry cannot be completed, such officer or other person may cut down and clear away any part of any standing crop, fence or jungle;

Power to inspect and regulate water-supply.

and may also enter upon any land, building or water-course on account of which any water-rate is chargeable, for the purpose of inspecting or regulating the use of the water supplied, or of measuring the lands irrigated thereby or chargeable with a water-rate, and of doing all things necessary for the proper regulation and management of such canal:

Notice of intended entry into houses.

Provided that, if such Canal Officer or person proposes to enter into any building or enclosed court or garden attached to a dwelling-house not supplied with water flowing from any canal, he shall previously give the occupier of such building, court or garden at least seven days' notice in writing of his intention to do so.

Compensation for damage caused by entry.

In every case of entry under this section, the Canal Officer shall, at the time of such entry, tender compensation for any damage which may be occasioned by any proceeding under this section; and in case of dispute as to the sufficiency of the amount so tendered, he shall forthwith refer the same for decision by the Collector, and such decision shall be final.

Power to enter for repairs and to prevent accidents.

15. In case of any accident happening or being apprehended to a canal, any Divisional Canal Officer or any person acting under his general or special orders in this behalf may enter upon any lands adjacent to such canal, and may execute all works which may be necessary for the purpose of repairing or preventing such accident.

Compensation for damage to land.

In every such case, such Canal Officer or person shall tender compensation to the proprietors or occupiers of the said lands for all damage done to the same. If such tender is not accepted, the Canal Officer shall refer the matter to the Collector, who shall proceed to award compensation for the damage as though the Local Government had directed the occupation of the lands under section forty-three of the Land Acquisition Act, 1870.

Application by persons desiring to use canal-water.

16. Any persons desiring to use the water of any canal, may apply in writing to the Divisional or Sub-Divisional Canal Officer of the Division or Sub-Division of the canal from which the water-course is to be supplied, requesting such officer to construct or improve a water-course at the cost of the applicants.

The application shall state the works to be undertaken, their approximate estimated cost, or the amount which the applicants are willing to pay for the same, or whether they engage to pay the actual cost as settled by the Divisional Canal Officer, and how the payment is to be made.

Contents of application.

When the assent of the Superintending Canal Officer is given to such application, all the applicants shall, after the application has been duly attested before the Collector, be jointly and severally liable for the cost of such works to the extent mentioned therein.

Liability of applicants for cost of works.

Any amount becoming due under the terms of such application, and not paid to the Divisional Canal Officer, or the person authorized by him to receive the same, on or before the date on which it becomes due, shall, on the demand of such officer, be recoverable by the Collector as if it were an arrear of land-revenue.

Recovery of amount due.

17. There shall be provided, at the cost of Government, suitable means of crossing canals constructed or maintained at the cost of Government, at such places as the Local Government thinks necessary for the reasonable convenience of the inhabitants of the adjacent lands.

Government to provide means of crossing canals.

On receiving a statement in writing, signed by not less than five of the owners of such lands, to the effect that suitable crossings have not been provided on any canal, the Collector shall cause enquiry to be made into the circumstances of the case, and if he thinks that the statement is established, he shall report his opinion thereon for the consideration of the Local Government, and the Local Government shall cause such measures in reference thereto to be taken as it thinks proper.

18. The Divisional Canal Officer may issue an order to the persons using any water-course to construct suitable bridges, culverts, or other works for the passage of the water of such water-course across any public road, canal or drainage-channel in use before the said water-course was made, or to repair any such works.

Persons using water-course to construct works for passing water across roads, &c.

Such order shall specify a reasonable period within which such construction or repairs shall be completed;

If they fail, Canal Officer may construct,

and if, after the receipt of such order, the persons to whom it is addressed do not, within the said period, construct or repair such works to the satisfaction of the said Canal Officer, he may, with the previous approval of the Superintending Canal Officer, himself construct or repair the same;

and if the said persons do not, when so required, pay the cost of such construction or repairs as declared by the Divisional Canal Officer, the amount shall, on the demand of the Divisional Canal Officer, be recoverable from them by the Collector, as if it were an arrear of land-revenue.

and recover cost.

19. If any person, jointly responsible with others for the construction or maintenance of a water-course, or jointly making use of a water-course with others, neglects or refuses to pay his share of the cost of such construction or maintenance, or to execute his share of any work necessary for such construction or maintenance, the Divisional or Sub-Divisional Canal Officer, on receiving an application in writing from any person injured by such neglect or refusal, shall serve notice on all the parties concerned that, on the expiration of a fortnight from the service, he will investigate the case; and shall, on the expiration of that period, investigate the case accordingly, and make such order thereon as to him seems fit.

Adjustment of claims between persons jointly using water-course.

Such order shall be appealable to the Commissioner, whose order thereon shall be final.

Any sum directed by such order to be paid within a specified period, may, if not paid within such period, and if the order remains in force, be recovered by the Collector from the person directed to pay the same, as if it were an arrear of land-revenue.

Recovery of amount found due.

20. Whenever application is made to a Divisional Canal Officer for a supply of water from a canal, and it appears to him expedient that such supply should be given and that it should be conveyed through some existing water-course, he shall give notice to the persons responsible for the maintenance of such water-course to show cause, on a day not less than fourteen days from the date of such notice, why the said supply should not be so conveyed; and, after making enquiry on such day, the Divisional Canal Officer shall determine whether and on what conditions the said supply shall be conveyed through such water-course.

Supply of water through intervening water-course.

When such officer determines that a supply of canal-water may be conveyed through any water-course as aforesaid, his decision shall, when confirmed or modified by the Superintending Canal Officer, be binding on the applicant and also on the persons responsible for the maintenance of the said water-course.

Such applicant shall not be entitled to use such water-course until he has paid the expense of any alteration of such water-course necessary in order to his being supplied through it, and also such share of the first cost of such water-course as the Divisional or Superintending Canal Officer may determine.

Such applicant shall also be liable for his share of the cost of maintenance of such water-course so long as he uses it.

21. Any person desiring the construction of a new water-course may apply in writing to the Divisional Canal Officer, stating—

Application for construction of new water-course.

(1) that he has endeavoured unsuccessfully to acquire from the owners of the land through which he desires such water-course to pass a right to occupy so much of the land as will be needed for such water-course;

(2) that he desires the said Canal Officer, in his behalf and at his cost, to do all things necessary for acquiring such right;

(3) that he is able to defray all costs involved in acquiring such right and constructing such water-course.

Procedure of Canal Officer thereupon.

22. If the Divisional Canal Officer considers—

(1) that the construction of such water-course is expedient, and

(2) that the statements in the application are true,

he shall call upon the applicant to make such deposit as the Divisional Canal Officer considers necessary to defray the cost of the preliminary proceedings, and the amount of any compensation which he considers likely to become due under section twenty-eight;

and, upon such deposit being made, he shall cause inquiry to be made into the most suitable alignment for the said water-course, and shall mark out the land which, in his opinion, it will be necessary to occupy for the construction thereof, and shall forthwith publish a notice in every village through which the water-course is proposed to be taken, that so much of such land as belongs to such village has been so marked out, and shall send a copy of such notice to the Collector of every district in which any part of such land is situate.

Application for transfer of existing water-course.

23. Any person desiring that an existing water-course should be transferred from its present owner to himself, may apply in writing to the Divisional Canal Officer, stating—

(1) that he has endeavoured unsuccessfully to procure such transfer from the owner of such water-course;

(2) that he desires the said Canal Officer, in his behalf and at his cost, to do all things necessary for procuring such transfer;

(3) that he is able to defray the cost of such transfer.

Procedure thereupon.

If the Divisional Canal Officer considers—

(*a*) that the said transfer is necessary for the better management of the irrigation from such water-course, and

(*b*) that the statements in the application are true,

he shall call upon the applicant to make such deposit as the Divisional Canal Officer considers necessary to defray the cost of the preliminary proceedings, and the amount of any compensation that may become due under the provisions of section twenty-eight in respect of such transfer;

and, upon such deposit being made, he shall publish a notice of the application in every village, and shall send a copy of the notice to the Collector of every district through which such water-course passes.

Objections to construction or transfer applied for.

24. Within thirty days from the publication of a notice under section twenty-two or section twenty-three, as the case may be, any person interested in the land or water-course to which the notice refers may apply to the Collector by petition, stating his objection to the construction or transfer for which application has been made.

The Collector may either reject the petition or may proceed to inquire into the validity of the objection, giving previous notice to the Divisional Canal Officer of the place and time at which such inquiry will be held.

The Collector shall record in writing all orders passed by him under this section and the grounds thereof.

When applicant may be placed in occupation.

25. If no such objection is made, or (where such objection is made) if the Collector over-rules it, he shall give notice to the Divisional Canal Officer to that effect, and shall proceed forthwith to place the said applicant in occupation of the land marked out or of the water-course to be transferred, as the case may be.

Procedure when objection is held valid.

26. If the Collector considers any objection made as aforesaid to be valid, he shall inform the Divisional Canal Officer accordingly; and, if such officer sees fit, he may, in the case of an application under section twenty-one, alter the boundaries of the land so marked out, and may give fresh notice under section twenty-two; and the procedure hereinbefore provided shall be applicable to such notice, and the Collector shall thereupon proceed as before provided.

Procedure when Canal Officer disagrees with Collector.

27. If the Canal Officer disagrees with the Collector, the matter shall be referred for decision to the Commissioner.

Such decision shall be final, and the Collector, if he is so directed by such decision, shall, subject to the provisions of section twenty-eight, cause the said applicant to be placed in occupation of the land so marked out or of the water-course to be transferred, as the case may be.

Expenses to be paid by applicant before receiving occupation.

28. No such applicant shall be placed in occupation of such land or water-course, until he has paid to the person named by the Collector such amount as the Collector determines to be due as compensation for the land or water-course so occupied or transferred, and for any damage caused by the marking out or occupation of such land, together with all expenses incidental to such occupation or transfer.

Procedure in fixing compensation.

In determining the compensation to be made under this section, the Collector shall proceed under the provisions of the Land Acquisition Act, 1870; but he may, if the person to be compensated so desire, award such compensation in the form of a rent-charge payable in respect of the land or water-course occupied or transferred.

Recovery of compensation and expenses.

If such compensation and expenses are not paid when demanded by the person entitled to receive the same, the amount may be recovered by the Collector as if it were an arrear of land-revenue, and shall, when recovered, be paid by him to the person entitled to receive the same.

Conditions binding on applicant placed in occupation.

29. When any such applicant is placed in occupation of land or of a water-course as aforesaid, the following rules and conditions shall be binding on him and his representative in interest:—

First.—All works necessary for the passage across such water-course, of water-courses existing

previous to its construction and of the drainage intercepted by it, and for affording proper communications across it for the convenience of the neighbouring lands, shall be constructed by the applicant, and be maintained by him or his representative in interest to the satisfaction of the Divisional Canal Officer.

Second.—Land occupied for a water-course under the provisions of section twenty-two shall be used only for the purpose of such water-course.

Third.—The proposed water-course shall be completed to the satisfaction of the Divisional Canal Officer within one year after the applicant is placed in occupation of the land.

In cases in which land is occupied or a water-course is transferred on the terms of a rent-charge,

Fourth.—The applicant or his representative in interest shall, so long as he occupies such land or water-course, pay rent for the same at such rate and on such days as are determined by the Collector when the applicant is placed in occupation.

Fifth.—If the right to occupy the land cease owing to a breach of any of these rules, the liability to pay the said rent shall continue until the applicant or his representative in interest has restored the land to its original condition, or until he has paid, by way of compensation for any injury done to the said land, such amount and to such persons as the Collector determines.

Sixth.—The Collector may, on the application of the person entitled to receive such rent or compensation, determine the amount of rent due or assess the amount of such compensation; and if any such rent or compensation be not paid by the applicant or his representative in interest, the Collector may recover the amount, with interest thereon at the rate of six per cent. per annum from the date on which it became due, as if it were an arrear of land-revenue, and shall pay the same, when recovered, to the person to whom it is due.

If any of the rules and conditions prescribed by this section are not complied with,

or if any water-course constructed or transferred under this Act is disused for three years continuously,

the right of the applicant, or of his representative in interest, to occupy such land or water-course shall cease absolutely.

Procedure applicable to occupation for extensions and alterations.

30. The procedure hereinbefore provided for the occupation of land for the construction of a water-course shall be applicable to the occupation of land for any extension or alteration of a water-course, and for the deposit of soil from water-course clearances.

PART IV.

OF THE SUPPLY OF WATER.

In absence of written contract, water-supply to be subject to rules.

31. In the absence of a written contract, or so far as any such contract does not extend, every supply of canal-water shall be deemed to be given at the rates and subject to the conditions prescribed by the rules to be made by the Local Government in respect thereof.

Conditions as to—

32. Such contracts and rules must be consistent with the following conditions:—

power to stop water-supply;

(*a*) The Divisional Canal Officer may not stop the supply of water to any water-course, or to any person, except in the following cases:—

(1) whenever and so long as it is necessary to stop such supply for the purpose of executing any work ordered by competent authority, and with the previous sanction of the Local Government:

(2) whenever and so long as any water-course is not maintained in such proper customary repair as to prevent the wasteful escape of water therefrom:

(3) within periods fixed from time to time by the Divisional Canal Officer:

claims to compensation in case of failure or stoppage of supply;

(*b*) No claim shall be made against the Government for compensation in respect of loss caused by the failure or stoppage of the water in a canal, by reason of any cause beyond the control of the Government, or of any repairs, alterations or additions to the canal, or of any measures taken for regulating the proper flow of water therein, or for maintaining the established course of irrigation which the Divisional Canal Officer considers necessary; but the person suffering such loss may claim such remission of the ordinary charges payable for the use of the water as is authorized by the Local Government:

claims on account of interruption from other causes;

(*c*) If the supply of water to any land irrigated from a canal be interrupted otherwise than in the manner described in the last preceding clause, the occupier or owner of such land may present a petition for compensation to the Collector for any loss arising from such interruption, and the Collector may award to the petitioner reasonable compensation for such loss:

duration of supply;

(*d*) When the water of a canal is supplied for the irrigation of a single crop, the permission to use such water shall be held to continue only until that crop comes to maturity, and to apply only to that crop; but if it be supplied for irrigating two or more crops to be raised on the same land within the year, such permission shall be held to continue for one year from the commencement of the irrigation, and to apply to such crops only as are matured within that year:

sale or sub-letting of canal-water;

(*e*) Unless with the permission of the Superintending Canal Officer, no person entitled to use the water of any canal, or any work, building or land appertaining to any canal, shall sell or sub-let or otherwise transfer his right to such use: Provided that the former part of this clause shall not apply to the use by a cultivating tenant of water supplied by the owner of a water-course for the irrigation of the land held by such tenant:

transfer, with land, of contracts for water;

But all contracts made between Government and the owner or occupier of any immovable property, as to the supply of canal-water to such property, shall be transferable therewith, and shall be presumed to have been so transferred whenever a transfer of such property takes place:

(f) No right to the use of the water of a canal shall be, or be deemed to have been, acquired under the Indian Limitation Act, 1871, Part IV, nor shall Government be bound to supply any person with water, except in accordance with the terms of a contract in writing.

No right acquired by user.

[illegible] through a water-course [illegible] used in an unauthorized manner, and if the person by whose act or neglect such use has occurred cannot be identified,

Liability [illegible] using unauthorized, cannot be identified.

the person on whose land such water has flowed if such land has derived benefit therefrom,

or if such person cannot be identified, or if such land has not derived benefit therefrom, all the persons chargeable in respect of the water supplied through such water-course,

shall be liable, or jointly liable, as the case may be, to the charges made for such use.

34. If water supplied through a water-course be suffered to run to waste, and if, after enquiry by the Divisional Canal Officer, the person through whose act or neglect such water was suffered to run to waste cannot be discovered, all the persons chargeable in respect of the water supplied through such water-course shall be jointly liable for the charges made in respect of the water so wasted.

Liability when water runs to waste.

35. All charges for the unauthorized use or for waste of water may be recovered in addition to any penalties incurred on account of such use or waste.

Charges recoverable in addition to penalties.

All questions under section thirty-three or section thirty-four shall be decided by the Divisional Canal Officer, subject to an appeal to the head revenue officer of the district, or such other appeal as may be provided under section seventy-five.

Decision of questions under sections 33 and 34.

36. The rates to be charged for canal-water supplied for purposes of irrigation to the occupiers of land shall be determined by the rules to be made by the Local Government, and such occupiers as accept the water shall pay for it accordingly.

Charge on occupier for water how determined.

A rate so charged shall be called the "occupier's rate."

'Occupier's rate.'

37. In addition to the occupier's rate, a rate to be called the "owner's rate" may be imposed, according to rules to be made by the Local Government, on the owners of canal-irrigated lands, in respect of the benefit which they derive from such irrigation.

'Owner's rate.'

38. The owner's rate shall not exceed the sum which, under the rules for the time being in force for the assessment of land-revenue, might be assessed on such land, on account of the increase in the annual value or produce thereof caused by the canal-irrigation. And for the purpose of this section only, land which is permanently settled or held free of revenue, shall be considered as though it were temporarily settled and liable to payment of revenue.

Amount of owner's rate.

39. No owner's rate shall be charged [illegible] to [illegible] irrigation [illegible] rates, during the currency of such assessment.

Owner's [illegible] chargeable [illegible]

40. If such land is occupied by the owner,

When occupier is to pay both owner's rate and occupier's rate.

or if it is occupied by a tenant whose rent is not liable to enhancement on the ground that the value of the produce of the land or the productive powers of the land has or have been increased by irrigation,

such owner or tenant shall pay the owner's rate as well as the occupier's rate.

41. In the case of a tenant with a right of occupancy, the Local Government shall have power to make rules for dividing the owner's rate between such tenant and his landlord, proportionately to the extent of the beneficial interest of each in the land.

Power to make rules for apportioning owner's rate.

42. If the owner of the land is not the occupier, but has power to enhance the rent of the occupier on the ground that the value of the produce or the productive powers of the land has or have been increased by irrigation;

When owner is to pay owner's rate.

or if, when the amount of rent was fixed, the land was irrigated from the canal,

the owner shall pay the owner's rate.

43. If a revision of settlement is a ground for entertaining a suit for the enhancement of rent, the introduction of canal-irrigation into any land shall have the same effect on the landlord's right to re-enhance the rent of a tenant with a right of occupancy of such land, as if a revision of settlement had taken place, under which the revenue payable in respect of such land had been increased.

Effect of introduction of canal-irrigation on landlord's right to enhance.

44. Where a water-rate is charged on land held by several joint owners, it shall be payable by the manager or other person who receives the rents or profits of such land, and may be deducted by him from such rents or profits before division, or may be recovered by him from the persons liable to such rate in the manner customary in the recovery of other charges on such rents or profits.

Water-rate by whom payable when charged on land held by several owners.

Recovery of Charges.

45. Any sum, lawfully due under this Part, and certified by the Divisional Canal Officer to be so due, which remains unpaid after the day on which it becomes due, shall be recoverable by the Collector from the person liable for the same as if it were an arrear of land-revenue.

Certified dues recoverable as land-revenue.

46. The Divisional Canal Officer or the Collector may enter into an agreement with any person for the collection and payment to the Government by such person of any sum payable under this Act by a third party.

Power to contract for collection of canal-dues.

When such agreement has been made, such person may recover such sum by suit as though it were a debt due to him, or an arrear of rent due to him on account of the land, work or building in respect of which such sum is payable, or for or in which the canal-water shall have been supplied or used.

If such person makes default in the payment of any sum collected by him under this section, such sum may be recovered from him by the Collector under section forty-five; and if such sum or any part of it be still due by the said third party, the sum or part so due may be recovered in like manner by the Collector from such third party.

47. The Collector may require the lambardár or person under engagement to pay the land-revenue of any estate, to collect and pay any sums payable under this Act by a third party, in respect of any land or water in such estate.

Lambardárs may be required to collect canal-dues.

Such sums shall be recoverable by the Collector as if they were arrears of land-revenue due in respect of the defaulter's share in such estate;

and for the purpose of collecting such sums from the subordinate zamíndárs, ryots, or tenants, such lambardár or person may exercise the powers, and shall be subject to the rules, laid down in the law for the time being in force, in respect to the collection by him of the rents of land or of shares of land-revenue.

The Local Government shall provide

(a) for remunerating persons collecting sums under this section; or

(b) for indemnifying them against expenses properly incurred by them in such collection; or

(c) for both such purposes.

48. Nothing in sections forty-five, forty-six, or forty-seven applies to fines.

Fines excluded from sections 45, 46, 47.

PART VI.

OF CANAL-NAVIGATION.

49. Any vessel entering or navigating any canal contrary to the rules made in that behalf by the Local Government, or so as to cause danger to the canal or the other vessels therein, may be removed, or detained, or both removed and detained, by the Divisional Canal Officer, or by any other person duly authorized in this behalf.

Detainer of vessels violating rules.

The owner of any vessel causing damage to a canal, or removed or detained under this section, shall be liable to pay to the Government such sum as the Divisional Canal Officer, with the approval of the Superintending Canal Officer, determines to be necessary to defray the expenses of repairing such damage, or of such removal or detention, as the case may be.

Liability of owners of vessels causing damage.

50. Any fine imposed under this Act upon the owner of any vessel, or the servant or agent of such owner or other person in charge of any vessel, for any offence in respect of the navigation of such vessel, may be recovered either in the manner prescribed by the Code of Criminal Procedure, or, if the Magistrate imposing the fine so directs, as though it were a charge due in respect of such vessel.

Recovery of fines for offences in navigating canals.

51. If any charge due under the provisions of this Part in respect of any vessel is not paid on demand to the person authorized to collect the same, the Divisional Canal Officer may seize and detain such vessel and the furniture thereof, until the charge so due, together with all expenses and additional charges arising from such seizure and detention, is paid in full.

Power to seize and detain vessel on failure to pay charges.

52. If any charge due under the provisions of this Part in respect of any cargo or goods carried in a Government vessel on a canal, or stored on or in lands or warehouses occupied for the purposes of a canal, is not paid on demand to the person authorized to collect the same, the Divisional Canal Officer may seize such cargo or goods and detain them until the charge so due, together with all expenses and additional charges arising from such seizure and detention, is paid in full.

Power to seize cargo or goods, if charges due thereon are not paid.

53. Within a reasonable time after any seizure under section fifty-one or section fifty-two the said Canal Officer shall give notice to the owner or person in charge of the property seized that it, or such portion of it as may be necessary, will, on a day to be named in the notice, but not sooner than fifteen days from the date of the notice, be sold in satisfaction of the claim on account of which such property was seized, unless the claim be discharged before the day so named:

Procedure for recovery of such charges after seizure.

And if such claim be not so discharged, the said Canal Officer may, on such day, sell the property seized or such part thereof as may be necessary to yield the amount due, together with the expenses of such seizure and sale:

Provided that no greater part of the furniture of any vessel or of any cargo or goods shall be so sold than shall, as nearly as may be, suffice to cover the amount due in respect of such vessel, cargo or goods.

The residue of such furniture, cargo or goods, and of the proceeds of the sale, shall be made over to the owner or person in charge of the property seized.

54. If any vessel be found abandoned in a canal, or any cargo or goods carried in a Government vessel on a canal or stored on or in lands or warehouses occupied for the purposes of a canal, be left unclaimed for a period of two months, the Divisional Canal Officer may take possession of the same.

Procedure in respect of vessels abandoned and goods unclaimed.

The officer so taking possession may publish a notice that, if such vessel and its contents, or such cargo or goods, are not claimed previously to a day to be named in the notice, not

sooner than thirty days from the date of such notice, he will sell the same; and, if such vessel, contents, cargo or goods be not so claimed, he may, at any time after the day named in the notice, proceed to sell the same.

Disposal of proceeds of sale.

The said vessel and its contents, and the said cargo or goods, if unsold, or, if a sale has taken place, the proceeds of the sale, after paying all tolls, charges and expenses incurred by the Divisional Canal Officer on account of the taking possession and sale, shall be made over to the owner of the same, when his ownership is established to the satisfaction of the Divisional Canal Officer.

If the Divisional Canal Officer is doubtful to whom such property or proceeds should be made over, he may direct the property to be sold as aforesaid, and the proceeds to be paid into the district treasury, there to be held until the right thereto be decided by a Court of competent jurisdiction.

PART VII.

OF DRAINAGE.

Power to prohibit obstructions or order their removal.

55. Whenever it appears to the Local Government that injury to any land or the public health or public convenience has arisen or may arise from the obstruction of any river, stream or drainage-channel, such Government may, by notification published in the official Gazette, prohibit, within limits to be defined in such notification, the formation of any obstruction, or may, within such limits, order the removal or other modification of such obstruction.

Thereupon so much of the said river, stream or drainage-channel as is comprised within such limits, shall be held to be a drainage-work as defined in section three.

Power to remove obstructions after prohibition.

56. The Divisional Canal Officer, or other person authorized by the Local Government in that behalf, may, after such publication, issue an order to the person causing or having control over any such obstruction to remove or modify the same within a time to be fixed in the order.

If, within the time so fixed, such person does not comply with the order, the said Canal Officer may himself remove or modify the obstruction; and if the person to whom the order was issued does not, when called upon, pay the expenses involved in such removal or modification, such expenses shall be recoverable by the Collector from him or his representative in interest as an arrear of land-revenue.

Preparation of schemes for works of improvement.

57. Whenever it appears to the Local Government that any drainage-works are necessary for the improvement of any lands, or for the proper cultivation or irrigation thereof,

or that protection from floods or other accumulations of water, or from erosion by a river, is required for any lands,

the Local Government may cause a scheme for such drainage-works to be drawn up and published, together with an estimate of its cost and a statement of the proportion of such cost which the Government proposes to defray, and a schedule of the lands which it is proposed to make chargeable in respect of the scheme.

Powers of persons employed on such schemes.

58. The persons authorized by the Local Government to draw up such scheme may exercise all or any of the powers conferred on Canal Officers by section fourteen.

Rate on lands benefited by works.

59. An annual rate, in respect of such scheme, may be charged, according to rules to be made by the Local Government, on the owners of all lands which shall, in the manner prescribed by such rules, be determined to be so chargeable.

Such rate shall be fixed as nearly as possible so as not to exceed either of the following limits:—

(1.) Six per cent. per annum on the first cost of the said works, adding thereto the estimated yearly cost of the maintenance and supervision of the same, and deducting therefrom the estimated income, if any, derived from the works, excluding the said rate:

(2.) In the case of agricultural land, the sum which, under the rules then in force for the assessment of land-revenue, might be assessed on such land on account of the increase of the annual value or produce thereof caused by the drainage-work.

Such rate may be varied from time to time within such maximum by the Local Government.

So far as any defect to be remedied is due to any canal, water-course, road or other work or obstruction, constructed or caused by the Local Government or by any person, a proportionate share of the cost of the drainage-works required for the remedy of the said defect shall be borne by such Government or such person as the case may be.

Recovery of rate.

60. Any such drainage-rate may be collected and recovered in manner provided by sections forty-five, forty-six and forty-seven, for the collection and recovery of water-rates.

Disposal of claims to compensation.

61. Whenever, in pursuance of a notification made under section fifty-five, any obstruction is removed or modified,

or whenever any drainage-work is carried out under section fifty-seven,

all claims for compensation on account of any loss consequent on the removal or modification of the said obstruction or the construction of such work, may be made before the Collector, and he shall deal with the same in the manner provided in section ten.

Limitation of such claims.

62. No such claim shall be entertained after the expiration of one year from the occurrence of the loss complained of, unless the Collector is satisfied that the claimant had sufficient cause for not making the claim within such period.

PART VIII.

OF OBTAINING LABOUR FOR CANALS AND DRAINAGE WORKS.

Definition of "labourer."

63. For the purposes referred to in this Part, the word "labourer" includes persons who exercise any handicraft specified in rules to be made in that behalf by the Local Government.

64. In any district in which a canal or drainage-work is constructed, maintained or projected by Government, the Local Government may, if it thinks fit, direct the Collector

Power to prescribe number of labourers to be supplied by persons benefited by canal.

(a) to ascertain the proprietors, sub-proprietors or farmers, whose villages or estates are or will be, in the judgment of the Collector, benefited by such canal or drainage-work, and

(b) to set down in a list, having due regard to the circumstances of the district and of the several proprietors, sub-proprietors or farmers, the number of labourers which shall be furnished by any of the said persons, jointly or severally, from any such village or estate, for employment on any such canal or drainage-work when required as hereinafter provided.

The Collector may, from time to time, add to or alter such list or any part thereof.

65. Whenever it appears to a Divisional Canal Officer duly authorized by the Local Government, that, unless some work is immediately executed, such serious damage will happen to any canal or drainage-work as to cause sudden and extensive public injury,

Procedure for obtaining labour for works urgently required.

and that the labourers necessary for the proper execution thereof cannot be obtained in the ordinary manner within the time that can be allowed for the execution of such work so as to prevent such injury,

the said officer may require any person named in such list to furnish as many labourers (not exceeding the number which, according to the said list, he is liable to supply) as to the said officer seem necessary for the immediate execution of such work.

Every requisition so made shall be in writing, and shall state

(a) the nature and locality of the work to be done,

(b) the number of labourers to be supplied by the person upon whom the requisition is made, and

(c) the approximate time for which and the day on which the labourers will be required;

and a copy thereof shall be immediately sent to the Superintending Canal Officer for the information of the Local Government.

The Local Government shall fix, and may from time to time alter, the rates to be paid to any such labourers: provided that such rates shall exceed the highest rates for the time being paid in the neighbourhood for similar work. In the case of every such labourer, the payment shall continue for the whole period during which he is, in consequence of the provisions of this Part, prevented from following his ordinary occupation.

The Local Government may, with the previous sanction of the Governor General in Council, direct that the provisions of this Part shall apply, either permanently or temporarily (as the case may be), to any district or part of a district for the purpose of effecting necessary annual silt-clearances, or to prevent the proper operation of a canal or drainage-work being stopped or so much interfered with as to stop the established course of irrigation or drainage.

66. When any requisition has been made on any person named in the said list, every labourer ordinarily resident within the village or estate of such person shall be liable to supply, and to continue to supply, his labour, for the purposes aforesaid.

Liability of labourers under requisition.

PART IX.

OF JURISDICTION.

67. Except where herein otherwise provided, all claims against Government in respect of anything done under this Act may be tried by the Civil Courts; but no such Court shall in any case pass an order as to the supply of canal-water to any crop sown or growing at the time of such order.

Jurisdiction under this Act of Civil Courts.

68. Whenever a difference arises between two or more persons in regard to their mutual rights or liabilities in respect of the use, construction, or maintenance of a water-course, any such person may apply in writing to the Divisional Canal Officer stating the matter in dispute. Such officer shall thereupon give notice to the other persons interested that, on a day to be named in such notice, he will proceed to enquire into the said matter. And, after such enquiry, he shall pass his order thereon, unless he transfers (as he is hereby empowered to do) the matter to the Collector, who shall thereupon enquire into and pass his order on the said matter.

Settlement of differences as to mutual rights and liabilities of persons interested in water-course.

Such order shall be final as to the use or distribution of water for any crop sown or growing at the time when such order is made, and shall thereafter remain in force until set aside by the decree of a Civil Court.

69. Any officer empowered under this Act to conduct any inquiry may exercise all such powers connected with the summoning and examining of witnesses, as are conferred on Civil Courts by the Code of Civil Procedure; and every such inquiry shall be deemed a judicial proceeding.

Power to summon and examine witnesses.

PART X.

OF OFFENCES AND PENALTIES.

70. Whoever, without proper authority and voluntarily, does any of the acts following, that is to say,—

Offences under Act.

(1) damages, alters, enlarges or obstructs any canal or drainage-work;

(2) interferes with, increases or diminishes the supply of water in, or the flow of water from, through, over or under, any canal or drainage-work;

(3) interferes with or alters the flow of water in any river or stream, so as to endanger, damage or render less useful any canal or drainage-work;

(4) being responsible for the maintenance of a water-course, or using a water-course, neglects to take proper precautions for the prevention of waste of the water thereof, or interferes with the authorized distribution of the water therefrom, or uses such water in an unauthorized manner;

(5) corrupts or fouls the water of any canal so as to render it less fit for the purposes for which it is ordinarily used;

(6) causes any vessel to enter or navigate any canal contrary to the rules for the time being prescribed by the Local Government for entering or navigating such canal;

(7) while navigating on any canal, neglects to take proper precautions for the safety of the canal and of vessels thereon;

(8) being liable to furnish labourers under Part VIII of this Act, fails, without reasonable cause, to supply or to assist in supplying the labourers required of him;

(9) being a labourer liable to supply his labour under Part VIII of this Act, neglects, without reasonable cause, so to supply, and to continue to supply, his labour;

(10) destroys or moves any level-mark or water-gauge fixed by the authority of a public servant;

(11) passes, or causes animals or vehicles to pass, on or across any of the works, banks or channels of a canal or drainage-work contrary to rules made under this Act, after he has been desired to desist therefrom;

(12) violates any rule made under this Act, for breach whereof a penalty may be incurred,

Penalty.

shall be liable, on conviction before a Magistrate of such class as the Local Government directs in this behalf, to a fine not exceeding fifty rupees, or to imprisonment not exceeding one month, or to both.

Saving of prosecution under other laws.

71. Nothing herein contained shall prevent any person from being prosecuted under any other law for any offence punishable under this Act: Provided that no person shall be punished twice for the same offence.

Compensation to person injured.

72. Whenever any person is fined for an offence under this Act, the Magistrate may direct that the whole or any part of such fine may be paid by way of compensation to the person injured by such offence.

Power to arrest without warrant.

73. Any person in charge of or employed upon any canal or drainage-work, may remove from the lands or buildings belonging thereto, or may take into custody without a warrant and take forthwith before a Magistrate or to the nearest police-station, to be dealt with according to law, any person who, within his view, commits any of the following offences:

(1) wilfully damages or obstructs any canal or drainage-work;

(2) without proper authority interferes with the supply or flow of water in or from any canal or drainage-work, or in any river or stream, so as to endanger, damage or render less useful any canal or drainage-work.

Definition of 'Canal.'

74. In this Part the word 'Canal' shall (unless there be something repugnant in the subject or context) be deemed to include also all lands occupied by Government for the purposes of canals, and all buildings, machinery, fences, gates and other erections, trees, crops, plantations or other produce, occupied by or belonging to Government, upon such lands.

PART XI.

OF SUBSIDIARY RULES.

Power to make, alter and cancel rules.

75. The Local Government may, from time to time, with the previous sanction of the Governor General in Council, make rules to regulate the following matters:—

(1) the proceedings of any officer who, under any provision of this Act, is required or empowered to take action in any matter;

(2) the cases in which, and the officers to whom, and the conditions subject to which, orders and decisions given under any provision of this Act, and not expressly provided for as regards appeal, shall be appealable;

(3) the persons by whom, the time, place or manner at or in which, anything for the doing of which provision is made in this Act, shall be done;

(4) the amount of any charge made under this Act;

(5) and generally to carry out the provisions of this Act.

The Local Government may from time to time, with the like sanction, alter or cancel any rules so made.

Publication of rules.

Such rules, alterations and cancelments shall be published in the local official Gazette, and shall thereupon have the force of law.

SCHEDULE.

(See section 2.)

Number and year.	Title.	Extent of repeal.
VII of 1845.	An Act for regulating the Levy of Water-rent, Tolls, and Dues on certain Canals for Irrigation and Navigation, constructed by Government in the North-Western Provinces, and for the Protection of the said Canals from Injury.	The whole.
XIV of 1863.	An Act to amend Act X of 1859 (to amend the law relating to the Recovery of Rent in the Presidency of Fort William in Bengal).	Section fifteen.
XII of 1866.	An Act to provide for the compulsory taking of rights to form and maintain private water-courses from public works of irrigation.	The whole.
XXX of 1871.	An Act to regulate Irrigation, Navigation and Drainage in the Panjáb.	The whole.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 19.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th February 1873, and was referred to a Select Committee with instructions to make their report thereon in a month :—

No. 3 OF 1873.

THE INDIAN OATHS BILL, 1873.

CONTENTS.

PREAMBLE.

SECTIONS.

I.—Preliminary.

1. Short title.
   Local extent.
   Commencement.
2. Repeal of enactments.
3. Saving of certain oaths and affirmations.

II.—Persons authorized to administer Judicial Oaths and Affirmations.

4. Authority to administer oaths and affirmations.

III.—Persons by whom Oaths or Affirmations must be made.

5. Oath or affirmation to be made by—
   witnesses :
   complainants :
   jurors in Presidency towns.

SECTIONS.

IV.—Forms of Oaths and Affirmations.

6. Forms for witnesses or complainants.
7. Form for jurors.
8. Affirmation by Natives or by persons who object to oath.
9. Power of Court to tender certain oaths.
10. Court may ask party or witness whether he will make oath proposed by opposite party.
11. Administration of oath if accepted.
12. Evidence conclusive as against person offering to be bound.
13. Procedure in case of refusal to make oath.
14. Forms for persons making affidavit.
15. Proceedings and evidence not invalidated by omission of oath or irregularity.

V.—Official Oaths.

16. Judges, &c., not to be required to make official oath or affirmation.

Schedule of repealed enactments.

A Bill to consolidate the law relating to Judicial Oaths, and for other purposes.

Preamble.

WHEREAS it is expedient to consolidate the law relating to judicial oaths, affirmations and declarations, and to repeal the law relating to official oaths, affirmations and declarations ; It is hereby enacted as follows :—

I.—Preliminary.

Short title.

1. This Act may be called "The Indian Oaths Act, 1873 :"

Local extent.

It extends to the whole of British India, and, so far as regards subjects of Her Majesty, to the territories of Native Princes and States in alliance with Her Majesty ;

And it shall come into force on the first day of April 1873.

Commencement.

2. The enactments specified in the schedule hereto annexed are repealed to the extent mentioned in the third column thereof.

Repeal of enactments.

3. Nothing herein contained applies to proceedings before Courts Martial, or to oaths, affirmations or declarations prescribed by any law which, under the provisions of the Indian Councils' Act, 1861, the Governor General in Council has not power to repeal.

Saving of certain oaths and affirmations.

II.—Persons authorized to administer Judicial Oaths and Affirmations.

4. The following persons and Courts are authorized to administer, by themselves or by an officer empowered by them in this behalf, oaths and affirmations in discharge of the duties imposed upon them respectively by law:—

Authority to administer oaths and affirmations.

(*a*). Judges, Justices of the Peace, Magistrates, Coroners, Officers, Commissioners, Arbitrators, Military Courts of Request, and all other persons and Courts having by law or consent of parties authority to receive evidence;

(*b*.) The Commanding Officer of any military station occupied by troops in the service of Her Majesty: provided

(1) that the oath or affirmation be administered within the limits of the station, and

(2) that the oath or affirmation be such as a Justice of the Peace is competent to administer in British India.

III.—Persons by whom Oaths or Affirmations must be made.

5. Oaths or affirmations shall be made by the following persons:—

Oath or affirmation to be made by—

(*a*.) witnesses in Courts, whether Civil, Military, Criminal or Revenue:

witnesses:

(*b*.) witnesses before Commissioners, Arbitrators, and all other persons having by law or consent of parties authority to receive evidence:

(*c*) complainants in Criminal Courts:

complainants:

(*d*.) jurors in the towns of Calcutta, Madras and Bombay.

jurors in Presidency towns.

Nothing hereinbefore contained shall render it lawful to administer an oath or affirmation to an accused person.

IV.—Forms of Oaths and Affirmations.

6. In the case of a witness the form of oath shall be as follows:—

Forms for witnesses or complainants.

"You swear that you shall true answer make to all such questions as shall be asked you, without favour or affection to either party, and therein you shall speak the truth, the whole truth, and nothing but the truth. So help you God:"

in the case of a complainant the form of oath shall be as follows:—

"You swear that what you shall state is the truth, the whole truth, and nothing but the truth. So help you God:"

and in the case of a witness or complainant the form of affirmation shall be as follows:—

"I affirm that what I shall state is the truth, the whole truth, and nothing but the truth."

7. In the case of a juryman the form of oath shall be as follows:—

Form for jurors.

"You swear that you shall well and truly try and true deliverance make between our Sovereign Lady the Queen and the prisoner at the bar whom you shall have in charge, and a true verdict give according to the evidence. So help you God:"

and the form of affirmation shall be as follows:—

"You affirm that you shall well and truly try and true deliverance make between our Sovereign Lady the Queen and the prisoner at the bar whom you shall have in charge, and a true verdict give according to the evidence."

8. Where the witness, complainant or juryman is a Hindú or Muhammadan,

Affirmation by Natives or by persons who object to oath.

or has an objection to making an oath,

he shall, instead of making an oath, make the affirmation hereinbefore prescribed for a witness, complainant or juryman, as the case may be.

In every other case the witness, complainant or juryman shall make the oath so prescribed.

9. If any party to, or witness in, any judicial proceeding offers to give evidence on oath or solemn affirmation in any form common amongst, or held binding by, persons of the race or persuasion to which he belongs, and not repugnant to justice or decency, and not purporting to affect any third person, the Court may, if it thinks fit, notwithstanding anything hereinbefore contained, tender such oath or affirmation to him.

Power of Court to tender certain oaths.

10. If any party to any proceeding offers to be bound by any such oath or solemn affirmation as is mentioned in section nine, if such oath or affirmation is made by the other party to, or by any witness in, such proceeding, the Court may, if it thinks fit, ask such party or witness whether or not he will make the oath or affirmation.

Court may ask party or witness whether he will make oath proposed by opposite party.

11. If such party or witness agrees to make such oath or affirmation, the Court may proceed to administer it, or if it is of such a nature that it may be more conveniently made out of Court, the Court may issue a Commission to any person to administer it, and authorize such

Administration of oath if accepted.

person to take the evidence of the person to be sworn or affirmed and return it to the Court.

Evidence conclusive as against person offering to be bound.

12. The evidence so given shall, as against the person who offered to be bound as aforesaid, be conclusive proof of the matter stated.

Procedure in case of refusal to make oath.

13. If the party or witness refuses to make the oath or solemn affirmation, he shall not be compelled to make it, but the Court shall record, as part of the proceedings, the nature of the oath or affirmation proposed, the facts that he was asked whether he would make it, and that he refused it, together with any reason which he may assign for his refusal.

Forms for persons making affidavit.

14. In the case of an affidavit the form of oath shall be as follows:—

(a) by one deponent.

"Is that your name and handwriting?"

"You do swear that the contents of this your affidavit are true. So help you God."

(b) by two or more deponents.

To each deponent.

"Is that your name and handwriting?"

To all the deponents.

"You do severally swear that the contents of this your affidavit are true. So help you God,"

and the form of affirmation shall be as follows:—

"I affirm that the signature to this is my name and handwriting, and that the contents of this affidavit are true."

Proceedings and evidence not invalidated by omission of oath or irregularity.

15. No omission to take any oath or make any affirmation, no substitution of any one for any other of them, and no irregularity whatever in the form in which any one of them is administered, shall invalidate any proceeding or render inadmissible any evidence whatever, in or in respect of which such omission, substitution or irregularity took place.

V.—Official Oaths.

Judges, &c., not to be required to make official oath or affirmation.

16. No Judge, Magistrate, Justice of the Peace, or other officer shall, before entering on the execution of the duties of his office, be required to make any oath, or to make or subscribe any affirmation or declaration, that he will faithfully discharge such duties, or to the like effect.

SCHEDULE.

(*See section* 2).

PART I.—STATUTES.

Year and chapter.	Title.	Extent of repeal.
9 Geo. IV, c. 74.	An Act for improving the Administration of Criminal Justice in the *East Indies*.	Sections thirty-six and thirty-seven.
3 & 4 Wm. IV, c. 49.	An Act to allow Quakers and Moravians to make Affirmation in all cases where an Oath is or shall be required.	The whole Act, so far as it applies to British India.
3 & 4 Wm. IV, c. 82.	An Act to allow the People called Separatists to make a solemn Affirmation and Declaration instead of an Oath.	The whole Act, so far as it applies to British India.
5 & 6 Wm. IV, c. 62.	An Act to repeal an Act of the present Session of Parliament, intituled "An Act for the more effectual Abolition of Oaths and Affirmations taken and made in various Departments of the State, and to substitute Declarations in lieu thereof; and for the more entire Suppression of voluntary and extra-judicial Oaths and Affidavits;" and to make other Provisions for the Abolition of unnecessary Oaths.	The whole Act, so far as it applies to British India.
1 & 2 Vic., c. 77.	An Act for permitting Affirmation to be made instead of an Oath in certain cases.	The whole Act, so far as it applies to British India.

PART II.—ACTS.

Number and year.	Subject or title.	Extent of repeal.
IX of 1836	Commanding Officer's power to administer Oaths.	The whole.
XXI of 1837	Office Oaths and Declarations	So much as has not been repealed.
V of 1840	An Act concerning the Oaths and Declarations of Hindoos and Mahomedans.	So much as has not been repealed.
XV of 1843	An Act for the more extensive employment of Uncovenanted Agency in the Judicial Department.	Section two.

Number and year.	Title.	Extent of repeal.
XV of 1852	An Act to amend the Law of Evidence.	Section twelve.
XVIII of 1863.	An Act to make provision for the speedy and efficient disposal of the business now pending in the Office of the Master of the High Court of Judicature at Fort William in Bengal, and to provide for the abolition of the Oaths now administered to Hindoos and Mahomedans in the said Court, and to amend the Code of Civil Procedure in respect of process issued out of the said Court in the exercise of its Original Civil Jurisdiction.	Section nine.
IV of 1866	An Act to amend the constitution of the Chief Court of Judicature in the Punjab and its Dependencies.	Section five.
II of 1869	An Act for the appointment of Justices of the Peace.	Sections seven and eight.

VI of 1872	An Act to amend the Law relating to Oaths and Affirmations.	The whole.
XVIII of 1872.	An Act to amend the Indian Evidence Act, 1872.	Section twelve.
Bombay Act VI of 1866.	An Act to amend the Law relating to certain Declarations of Office in the Bombay Presidency.	The whole.

PART III.—REGULATIONS.

Number and year.	Title.	Extent of repeal.
Bengal Regulation IV of 1793.	A Regulation for receiving, trying, and deciding Suits or Complaints declared cognizable in the Courts of Dewanny Adawlut established in the several Zillahs, and in the Cities of Patna, Dacca, and Moorshedabad.	So much of section six as has not been repealed.
Bengal Regulation III of 1803.	A Regulation for receiving, trying, and deciding Suits or Complaints, declared cognizable in the Courts of Adawlut established in the several Zillahs in the Provinces ceded by the Nawaub Vizier to the Honourable the English East India Company.	So much of section seven as has not been repealed, and section eight.
Madras Regulation II of 1802.	A Regulation for establishing and defining the Jurisdiction of the Courts of Adawlut, or Courts of Judicature, for the Trial of Civil Suits in the first instance, in the British Territories immediately subject to the Presidency of Fort St. George.	Section thirteen, from and including the words "who previous" down to the end of the section.
Madras Regulation XII of 1802.	A Regulation for the appointment of the Ministerial Officers of the Civil and Criminal Courts of Judicature.	Section four.
Madras Regulation I of 1803.	A Regulation for defining the Duties of the Board of Revenue, and for determining the Extent of the Powers vested in the Board of Revenue.	Sections two and three.
Madras Regulation II of 1803.	A Regulation for describing and determining the Conduct to be observed by Collectors in certain cases.	Sections three and four.
Madras Regulation VI of 1816.	A Regulation for reducing into one Regulation the Rules which have been passed regarding the Office of Native Commissioners, for modifying and extending their Powers in the Trial and Decision of Civil Suits, and for authorizing them, under the designation of District Moonsiffs, to discharge certain additional Duties.	Section nine, from and including the words "and previously" down to the end of the section.
Madras Regulation XIV of 1816.	A Regulation for amending and modifying the Rules which have been passed regarding the Office of Vakeel or Native Pleader in the Courts of Civil Judicature.	Section five.
Madras Regulation VII of 1827.	A Regulation for constituting the Office of Native Judge.	Section four.
Bombay Regulation VI of 1799.*	A Regulation for enacting the existing Rules for the Collection of the Bombay Customs.	Section two, clause two, from and including the words "previous to" down to the end of that clause.
Bombay Regulation II of 1827.	A Regulation for defining the constitution of Courts of Civil Justice, and the powers and duties of the Judges and officers thereof.	Sections four and fifteen. In section eleven, clause one, the words "who previously to entering on the duties of their offices shall take and subscribe in open Court the oath contained in Appendix B." Appendix B.

* Printed at p. 246 of Clarke's edition of the Bombay Regulations, London, 1851.

Number and year.	Title.	Extent of repeal.
Bombay Regulation XII of 1827.	A Regulation for the establishment of a system of Police throughout the Zillahs subordinate to Bombay, for providing Rules for its Administration, and for defining the Duties and Powers of all Police Authorities and Servants.	So much of section three, clause five, as has not been repealed.
Bombay Regulation XIII of 1827.	A Regulation for defining the Constitution of Courts of Criminal Justice, and the Functions and Proceedings thereof.	So much of section thirty-six, clause two, as has not been repealed.
Bombay Regulation XVI of 1827.	A Regulation defining the Duties of the Collector, and his Powers in regard to Subordinate Revenue Officers, and providing Rules for the guidance of Land Revenue Officers in general, throughout the Territories subordinate to Bombay	Section three, and so much of section five as relates to taking oaths.
Bombay Regulation XIX of 1827.	A Regulation for the Presidency, prescribing Rules for the Assessment and Collection of the Land Revenue, and for collecting Taxes on Shops and Stalls, on beating the Battakee or making Proclamation by the Crier, on Country Music, on Wedding Sheds and Places of Public Amusement, on Houses, on Carriages, and on Horses; for causing Individuals who may sell or transfer Houses or Tenements subject to quit or ground rents to give Notice of the same to the Collector; and also for levying Fees in the Court of Petty Sessions and Police Offices.	Section one, clause two; and in section six from the words "and shall" down to the end. Appendix A.
Bombay Regulation XVIII of 1830.	A Regulation providing for the appointment of a Joint Judge within the Zillah of Poona.	Section two.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is two-fold—to consolidate the law relating to judicial oaths and affirmations, and to repeal the laws requiring declarations to be made by Judges, Magistrates, &c., before entering on their official duties. The Bill, if it become law, will replace twenty-seven enactments.

The Bill does not apply to proceedings before Courts-Martial, or to oaths prescribed by laws which the Governor General in Council has not the power to repeal.

Incidentally, the Bill will remove the doubt which has been raised as to the power of the Courts in certain parts of India to administer oaths and affirmations.

CALCUTTA,
13*th December* 1872.

A. HOBHOUSE.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th February 1873, and was referred to a Select Committee with instructions to make their report thereon in a month :—

No. 4 OF 1873.

THE NORTH-WESTERN PROVINCES RENT BILL, 1873.

CONTENTS.

PREAMBLE.

CHAPTER I.
PRELIMINARY.

SECTIONS.
1. Short title.
Local extent.
Commencement.
2. Acts repealed.
3. Interpretation-clause.

CHAPTER II.
RIGHTS AND LIABILITIES OF LANDLORD AND TENANTS.
4. Persons holding land at fixed rent without change since permanent settlement to continue to hold at such rates.
5. Tenants holding land at fixed rates to have right of occupancy at those rates.
6. Presumption where rent of land not changed for twenty years.
7. Tenants with right of occupancy at privileged rates.
8. Right of occupancy of tenant cultivating or holding land for twelve years.
Tenants barred from such right.
9. Rights under sections 5, 7 and 8 when transferable.

I.—Leases.

10. Lease to which tenant is entitled.
11. Leases to which tenants having right of occupancy are entitled.
12. Leases to which tenants not having right of occupancy are entitled.
13. Landlord granting lease entitled to counterpart engagement.
14. Relinquishment of land by tenant.
15. Service of notice through tahsíldár, if landlord or agent refuse to receive it.
16. Mode of serving notice.
Determination of class of tenure of tenant.

II.—Enhancement and Abatement of Rent.

17. Bar to enhancement of rent of tenants with right of occupancy at fixed rates.

SECTIONS.

18. Enhancement in case of tenants with privileged right of occupancy.
19. Enhancement after decree fixing rent.
20. Enhancement in case of tenants with right of occupancy under section 8.
Ground for enhancement.
Selection of villages for comparison.
21. Enhancement, in case of tenant with right of occupancy, after fixing of rent by decree.
Cases excepted.
22. Time for instituting suits for enhancement.
Decrees when to take effect.
23. Bar to enhancement except by agreement or under decree.
24. Grounds of claim to abatement by tenant with right of occupancy.

III.—On Commutation of Rent and Payment in Kind.

25. Commutation of rents in kind to fixed money payment.
Power to apply provisions of section to districts;
to empower officers to decide suits, and to lay down rules.
26. Application by tenant for deputation of officer to divide produce or appraise crop, when landlord neglects to attend.
27. Procedure on such application.

IV.—Ejectment.

28. Liability of tenant to pay interest on arrear and to be ejected.
Bar to ejectment without decree.
Ejectment not to be decreed for certain breaches of lease.
29. Procedure for ejectment of tenant with right of occupancy, or holding under unexpired lease.
30. In case of tenant for limited period, landlord may serve notice.
31. Contents of notice.
32. Mode of serving notice.
33. Effect of failure of tenant to institute suit to contest liability to ejectment.
34. Procedure to enforce ejectment.
Saving of tenant's right to sue.
Notice of ejectment when void.
35. Right of ejected tenant to value of growing crops or ungathered produce.
36. Application for assessment of rent-free land.
Limitation.
Written deed of grant valid against applicant.
Possession for 50 years to vest proprietary right.
Saving of liability for Government revenue.

V.—Compensation for Improvements made by Tenants.

37. Tenants' right to compensation for improvements.
38. Basis of, and mode of making, compensation.
39. Settlement of difference as to amount or value of compensation.
40. Reference to arbitration.
41. Right of tenant to damages for exactions in excess of rent or for withholding receipt.
Contents of receipt.

SECTIONS.

42. Damages for extorting payment of rent by duress.
Liability to punishment for extortion not affected.

VI.—Deposit of Rent in Government Treasury.

43. Deposit of amount tendered by tenant and refused.
44. Form and verification of application.
Penalty for false statement.
45. Notice to issue on deposit being made.
46. Mode of serving notice.
47. Payment to person served with notice on his application.
48. Refund to depositor.

CHAPTER III.

DISTRAINT.

49. Produce of land hypothecated for rent.
Recovery of arrears by distraint.
Bar to distraint of produce covered by security.
Sharer not entitled to distrain.
50. No distraint for over-due arrear, nor, without agreement, for excess over past year's rent.
51. Distraint by managers under Court of Wards, &c.
Liability to damages for illegal act.
52. Persons empowered to distrain to give written authority to servants employed to make distress.
53. Standing crops, and crops gathered liable to distraint.
Exception.
54. Defaulter to be served with written demand and account.
Mode of service.
55. Distress to be proportionate to arrear.
List of property to be prepared, and copy served on owner.
56. Standing crops, &c., when attached, may be reaped and stored by cultivator, or, if he neglect, by distrainer.
Sale of products which cannot be stored.
57. Assistance to distrainer opposed or apprehending resistance.
58. Distress to be withdrawn on tender of arrear and expenses before sale.
59. Application for sale.
60. Contents of application.
Deposit of cost of service of notice.
61. Procedure by Amín, &c., on receipt of application.
62. Amín to suspend sale on receipt of Court's certificate of institution of suit.
63. Suit to contest distrainer's demand before issue of notice of sale.
64. Distress when to be withdrawn.
65. When sale may be proceeded with.
66. Place of sale.
Manner of sale.
Withdrawal of distress when demand and costs satisfied.
67. If fair price be not offered, sale may be postponed and shall be then completed.
68. Payment of purchase-money.
Re-sale on default.
Certificate to purchaser.
69. Deduction, from proceeds, of costs of sale.
Payment of distrainer's expenses.

SECTIONS.

Discharge of arrear with interest.
Surplus.
70. Sale-officers and employees prohibited from purchasing.
71. Report of irregularities by distrainer.
Postponement of sale, and report to Court when defaulter has not received due notice.
Order of Court.
72. Levy of charge when sale-officer attends and no sale takes place.
Recovery from owner.
Recovery from distrainer.
Limit to charge.
73. Proceedings of Amíns, &c., subject to revision and orders of Collector.
Power to call for reports and statements.
74. Order of sale when amount adjudged due.
Second proclamation of sale.
Sale on failure to pay debt and costs.
75. In suit to contest his demand, distrainer to prove arrear.
Recovery of amount decreed in favour of distrainer.
Compensation in case of vexatious distress.
76. Suit by person claiming property distrained for arrears alleged to be due from another.
Release of property on security being given.
Order of Court when claim dismissed.
Decree for release and compensation when claim upheld.
Saving of prior claim of person entitled to rent of land.
77. Procedure where right to distrain is claimed by other than distrainer.
Saving of right to sue in Civil Court.
78. Persons prevented from suing in time to save property from sale, may sue for damages.
79. Wrongful acts of distrainer.
80. Suit by owner against person distraining or selling without authority.
Penalty in addition to damages.
81. Limitation of suits under sections 78, 79, 80.
82. Procedure in case of resistance to distraint.

CHAPTER IV.

OF PROCESS.

83. Mode of serving process.
Deposit before issue.
Power to direct service free of charge.
84. Punishment for resistance of process.
Power to issue summons and warrant.
Orders under this section appeal against.

CHAPTER V.

JURISDICTION OF COURTS AND APPEALS.

Suits cognizable under the Act.

85. Suits cognizable by Revenue Courts only.
Bar to cognizance by other Courts.

IV.—Suits by, and against, Lambardárs, Co-sharers and Muafidárs.

V.—Appeals.

Investigation of plea of set-off.
86. Judgment of Collector final where amount, or value of property, in suit, does not exceed 100 rupees,

SECTIONS.

unless certain questions determined.
Appeal in such cases.
87. In suits not open to appeal, Collector may grant re-hearing upon discovery of new evidence, &c.
88. Appeal from decision of Collector of second class.
89. Time for presentation.
Time to be excluded from reckoning.
90. Procedure in appeal.
91. Re-admission of appeal.
92. Judgment in appeal.
93. Appeal to District Judge.
Appeal to High Court.
94. Rules as to time of presentation, &c., to apply.
95. Special appeal to High Court from decisions of District Judge.
96. Rules as to last day for presentation, deposit or payment, when Court is closed on such day.

VI.—Limitation of Suits.

97. Limitation of suits.

VII.—Applications and Appeals.

98. Applications cognizable by Revenue Courts only.
99. Notice to defendant.
100. Time for presenting appeals from orders.
Power to Board to call for cases.

VIII.—Jurisdiction of Courts.

101. Local Government may invest officers with Collector's powers, and withdraw them.
102. Suits and applications cognizable by Collectors.
103. Additional suits and applications cognizable by Collector, first class.
104. Additional suits cognizable by Collector, first class, specially empowered.

CHAPTER VI.

ON PROCEDURE UP TO JUDGMENT.

105. Mode of instituting suits. Contents of plaint or statement of claim.
106. Statement by whom to be presented.
107. Verification of statement.
108. Document relied on by plaintiff to be presented with statement.
Admission afterwards.
109. Procuring production of document in possession of defendant.
110. Contents of statement in suits for arrears of rent.
111. Contents of statement in suits for ejectment,
or for recovery of occupancy or possession.
112. Return or amendment of statement.
113. Issue of summons; order for personal attendance or appearance by agent.
114. Fixing of day to be specified in the summons,
order to produce documents,
and to bring witnesses.
115. Mode of serving summons.
116. Endorsement on summons as to mode of service.
117. Service of summons in another district.
118. Deposit of cost of serving summons or warrant.
Effect of failure to deposit.

SECTIONS.

119. Procedure when plaintiff desires issue of warrant of arrest.
120. Procedure after arrest of defendant.
121. Procedure when defendant is brought before Court under warrant.
Form of security-bond.
122. Procedure when defendant cannot be arrested under warrant.
123. Compensation for arrest applied for without reasonable cause.
124. Consequence of neither party appearing on day fixed.
125. If defendant only appear, Court shall pass judgment by default; or decree upon admission of claim.
Proviso.
126. If plaintiff only appear, Court may proceed *ex parte*.
127. If defendant appear on adjourned hearing, Court may allow him to be heard in answer.
128. No appeal from judgment *ex parte* or by default;
but Court may revive suit and alter or rescind decree.
Adverse party to be summoned.
129. Examination and cross-examination of parties and agents.
Defendant may file written statement.
130. Mode of examination.
131. Witness produced may be examined.
132. Document relied on by defendant to be produced at first hearing.
133. Decree after examination, if no further evidence is required.
134. Party to attend in person when his agent is unable to answer.
Judgment or order, if he fail to appear.
135. Procedure when parties at issue on question requiring evidence.
136. Parties to produce witnesses or procure attendance by summons.
137. Provisions regarding attendance, examination, &c., of witnesses.
138. Case to be struck off if neither party appears;
Trial of issue *ex parte*.
139. Provisions to apply when suits are instituted or defended on behalf of landholders by their employees.
Processes served on such employees.
140. Personal attendance of female plaintiff or defendant when not required.
141. Parties may employ agents or mukhtárs; but personal attendance not excused.
Fee for agent not chargeable as costs.
142. Court may grant time or adjourn hearing.
143. Court may cause local enquiry and report, or may itself enquire.
Provisions applied to such enquiry.
Record in case of enquiry by Court.
144. Defendant may pay admitted debt and costs into Court.
Plaintiff chargeable with subsequent costs if he proceed and recover no further sum.
145. No interest to plaintiff after date of deposit by defendant.
146. In suits for rent, third person who has enjoyed it to be made a party.
Saving of right to sue in Civil Court to prove title to rent.

SECTIONS.

147. Provisions of Civil Procedure Code as to arbitrations applied.
148. Court may order tenant to repair damage caused by breach of contract or lease, for which ejectment or cancelment of lease is decreed.
149. Delivery of judgment.
Language and contents.
When it may be in English.

CHAPTER VII.

PROCEDURE IN EXECUTION OF DECREE.

150. Mode of executing decree for ejectment or re-instatement of ryot.
Magistrate to give it effect in case of opposition.
151. Mode of executing decree for cancelment of lease or for ejectment or re-instatement of farmer or tenant.
152. Power to order detention in, or commitment to, civil jail, in certain cases.
153. Process against surety on failure to deliver judgment-debtor into custody.
154. Process of execution against person or property, but not both.
Applications on which it may issue.
Form of process.
155. Execution against movable property.
Articles excepted from attachment.
156 Date and duration of warrant.
157. Second and successive warrants.
158. After one year execution not to issue without notice to party concerned.
159. Execution not to issue against heir or representative of deceased party without notice.
160. No process of execution after three years, if judgment be for sum not exceeding five hundred rupees.
Regulation of period in such cases.
161. Procedure in execution of warrant against person.
Limit of imprisonment.
162. No person to be imprisoned a second time under same judgment.
When further liability extinguished.
When not extinguished.
163. Diet-money to be deposited at time of issue of warrant.
164. Effect of non-payment of diet-money in advance during imprisonment.
165. Diet-money spent to be costs in suit.
Refund of remainder.
166. Procedure in executing writ against movable property.
167. Time to elapse before sale of movable property.
Custody meanwhile.
Provisions applied to sales.
168. Examination of third party claiming interest in property.
Stay of sale.
169. Adjudication of such claims.
Rules applied.
170. Compensation awardable against claimant failing to establish right.
171. No appeal from order under sections 169, 170.
Right to sue in Civil Court.
Proviso.
172. Sale not vitiated by irregularity in publishing or conducting it.

SECTIONS.

Right to sue for damage.
Limitation.
173. Sale of transferable undertenures in execution of decrees for arrears of rent due in respect thereof.
Exception.
Process for recovery of portion of decree remaining unsatisfied after sale of tenure.
174. If third party claim land, share or interest to be sold, Court to stay sale and enquire into and adjudicate upon the claim.
175. Rules applied to adjudication of such claims.
No appeal.
Right to sue in Civil Court.
176. In execution decrees for money, if judgment not otherwise satisfied, execution may be applied for against immovable property.
177. Mode of executing process if immovable property be a house or other building.
178. Procedure in case of objection offered before sale.

A Bill to consolidate and amend the law relating to the recovery of Rent in the North-Western Provinces.

Preamble.

WHEREAS it is expedient to consolidate and amend the law relating to the recovery of Rent in the North-Western Provinces of the Presidency of Fort William in Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. This Act may be called "The North-Western Provinces Rent Act, 1873:"

Local extent.

It extends to the territories under the government of the Lieutenant Governor of the North-Western Provinces, except the Jhánsí Division, the Province of Kumaon, the Terai Parganas, the Parganas of Agori, Singrauli and Bichipúr, and the tract of country known as Jaunsár Báwar;

Commencement.

And it shall come into force on the passing thereof.

Acts repealed.

2. Act No. X of 1859 (*to amend the law relating to the recovery of Rent in the Presidency of Fort William in Bengal*), Act No. XIV of 1863 (*to amend Act X of* 1859) and Act XXII of 1872 (*to explain and amend Act* No. X of 1859) are hereby repealed.

Interpretation-clause.

3. In this Act, unless there be something repugnant in the subject or context—

'Land.'

(1.) 'Land' means land assessed, or liable to be assessed, and land the revenue whereof has been assigned or released by Government:

'Rent.'

(2.) 'Rent' means whatever is payable by the tenant on account of the use or occupation of land:

'Tenant.'

(3.) 'Tenant' means any occupant of land, who is, or, but for a special contract, would be, liable to pay rent therefor:

'Landlord.'

(4.) 'Landlord' means the person to whom a tenant is liable to pay rent:

'Seer.'

(5.) For the purposes of this Act, 'Seer' means—

(*a.*) land which was recorded as seer at last settlement, and has been continuously so recorded since; or,

(*b.*) land continuously cultivated by the proprietor himself, with his own stock or by hired labour, for twelve years; or,

(*c.*) land which is recognized by village-custom as the special holding of a co-sharer, and is treated as such in the distribution of profits or charges among the co-sharers:

'Arrear of rent or revenue.'

(6.) An 'arrear of rent or revenue' means any instalment of rent or revenue which is not paid on or before the day when the same became due, whether under written engagement, or according to law or local usage:

'Collector of the District.'

(7.) 'Collector of the District' means the Officer in charge of the Revenue Administration of the District:

'Civil Jail.'

(8.) 'Civil Jail' means the civil jail of the District, and includes any place appointed by the Local Government for the confinement of prisoners under sentence of any Court constituted under this Act:

'Názir.'

(9.) 'Názir' includes any officer of a Court who is authorised to serve or execute its process.

CHAPTER II.

RIGHTS AND LIABILITIES OF LANDLORD AND TENANTS.

Persons holding land at fixed rent without change since permanent settlement to continue to hold at such rates.

4. Persons possessing a permanent transferable interest in land, intermediate between the proprietor of an estate and the tenants, and who, in the permanently-settled districts, hold (otherwise than under a terminable lease) at a fixed rent which has not been changed from the time of the permanent settlement, shall continue to hold at such rent.

Tenants holding land at fixed rates to have right of occupancy at those rates.

5. Tenants who, in the permanently-settled districts, hold lands at fixed rates which have not been changed since the permanent settlement, shall have a right of occupancy at those rates, and shall be called 'tenants with a right of occupancy at fixed rates.'

Presumption where rent of land not changed for 20 years.

6. Whenever, in any suit under this Act, it is proved that the rent at which land is held by a tenant, or person mentioned in section four, has not been changed for a period of twenty years next before the commencement of the suit, it shall be presumed that the land has been held at that rent from the time of the permanent settlement, unless the contrary be shown, or unless it be proved that such rent was fixed at some later period.

Tenants with right of occupancy at privileged rates.

7. All tenants in a village who have lost their proprietary rights in such village, or whose ancestors have lost such rights since the introduction of British Rule, and all persons who may lose such rights hereafter, in any of the ways following, namely :—

(1.) by sale for arrears of revenue :

(2.) by sale in execution of a decree of a Civil or Revenue Court :

(3.) by private agreement, sale or mortgage :

(4.) by confiscation under Act No. XI of 1857 or Act No. XIV of 1857,

shall have a right of occupancy at privileged rates in any lands, situated in such village, cultivated by them at the time of the passing of this Act, or at the date of their ceasing to be proprietors, if such date is subsequent to the passing of this Act.

Right of occupancy of tenant cultivating or holding land for 12 years.

8. Every tenant who has held or cultivated land continuously for twelve years has a right of occupancy in the land so held or cultivated by him.

The holding of the father or other person from whom the tenant inherits, shall be deemed to be the holding of the tenant within the meaning of this section :

Tenants barred from such right.

Provided, that no right of occupancy shall be acquired under this section after the passing of this Act—

(1.) by any tenant in land sub-let by him to others :

(2.) by any tenant in land which he holds from an occupancy or privileged tenant, or tenant holding at fixed rates :

(3.) by any tenant in seer land :

(4.) by any tenant in land held by him under a written contract, expressly stipulating that he shall acquire no right of occupancy in such land :

(5.) by any tenant in land held by him on condition of service.

Rights under sections 5, 7 and 8 when transferable.

9. All rights of occupancy acquired under sections five, seven and eight, shall be heritable, but not transferable *inter vivos*, except when they are transferable by local custom.

1.—*Leases.*

Lease to which tenant is entitled.

10. Every tenant is entitled to receive from the person to whom the rent of the land held or cultivated by him is payable, a lease containing the following particulars :—

(*a.*) the quantity of such land; and, where the fields have been numbered in a Government survey, the number of each field :

(*b.*) the amount of annual rent :

(*c.*) the instalments in which the same is to be paid :

(*d.*) any special conditions of the lease :

(*e.*) if the rent is payable in kind, the proportion to be delivered and mode of valuation, and the time and manner and place of delivery.

Leases to which tenants having right of occupancy are entitled.

11. Tenants having a right of occupancy are entitled to receive leases at rates of rent determined in accordance with the provisions contained in sections eighteen and twenty.

Leases to which tenants not having right of occupancy are entitled.

12. Tenants not having a right of occupancy are entitled to leases only on such terms as may be agreed upon between them and their landlord :

Provided that no lease shall be granted, and no rent of land shall be fixed, by any landlord, for any period exceeding the term of his own engagements with Government for his land; and that, in case any lease is granted, or the rent of the land be fixed for any longer period, the lease or engagement shall be null and void for the excess beyond such term.

Landlord granting lease entitled to counterpart engagement.

13. Every landlord who grants a lease is entitled to receive a reciprocal engagement from the tenant, executed by the tenant, and conformable with the terms of the lease.

The tender to any tenant of a lease, such as the tenant is entitled to receive, shall entitle the person to whom the rent is payable to receive a reciprocal engagement from such tenant.

Relinquishment of land by tenant.

14. Every tenant holding from year to year shall continue liable for the rent of the land in his holding for the ensuing year, unless on or before the first day of May in any year he gives notice in writing to the landlord, or his recognized agent, of his desire to relinquish such land at the close of the agricultural year, and relinquishes it accordingly :

or unless it has been let to any other person by such landlord or agent.

Service of notice through tahsíldár, if landlord or agent refuse to receive it.

15. If the landlord or his agent refuse to receive such notice, and to sign a receipt for the same, the tenant may make an application to the tahsíldár, who shall cause the notice to be served on such landlord or agent, the tenant paying the costs of service.

Mode of serving notice.

16. The notice shall, if practicable, be served personally on the landlord or agent; but if he cannot be found, service may be made by affixing the notice at his usual place of residence, or if he does not reside in the district wherein the land is situated, at the *chaupál*, or other conspicuous place in the village where the land is situate.

Determination of class of tenure of tenant.

On the application of any tenant to have his class of tenure determined, the Collector shall determine the class to which he belongs, namely,

whether he has a right of occupancy at fixed rates,

or a right of occupancy at privileged rates,

or a right of occupancy only,

or whether he is a tenant without a right of occupancy.

2.—*Enhancement and Abatement of Rent.*

Bar to enhancement of rent of tenants with right of occupancy at fixed rates.

17. The rent paid by tenants with right of occupancy at fixed rates shall not be liable to enhancement.

Enhancement in case of tenants with privileged right of occupancy.

18. The rent paid by tenants having a privileged right of occupancy shall not be enhanced except by decree passed in a suit brought under this Act, or by an order passed by a Settlement Officer under the law for the time being in force;

and such rent shall be raised to a rate which shall be two annas in the rupee less than the rate which they would have to pay under section nineteen, if they were occupancy tenants.

Enhancement after decree fixing rent.

19. After the passing of such decree or order, the rent so fixed shall not be liable to enhancement during the term of settlement in the temporarily-settled districts;

or, in the permanently-settled districts, for thirty years from the date of such decree or order.

Enhancement in case of tenants with right of occupancy under section 8.

20. The rent paid by tenants with right of occupancy under section eight shall not be liable to enhancement, except—

(1.) by a written agreement, to be attested before the Kánungo:

(2.) by order of a Settlement Officer passed under the North-Western Provinces Revenue Act, section seventy-six:

(3.) by suit under this Act.

Ground for enhancement.

Enhancement shall be decreed or ordered only on the ground that the rate of rent paid by such tenant is below the prevailing rate payable by the same class of tenants for land of a similar quality, with similar advantages in villages of a similar quality, with similar advantages.

The word 'class' shall not be deemed to include caste, unless it is proved that, by the local custom, caste is taken into account in the determination of the rate of rent:

Selection of villages for comparison.

Provided that, whenever the district or tahsíl, or other local area in which such land is situated, shall have been divided by the Settlement Officer into circles of like capacity and soil, the villages of similar quality, with like advantages, for the purpose of this section, shall be selected from the villages in such circles.

When the Settlement Officer has not divided the district or other local area as aforesaid, the Court shall select, for the purpose of comparison, villages of similar quality and with similar advantages, from the tahsíl in which the land to be enhanced is situated, or a tahsíl immediately adjacent.

Enhancement, in case of tenant with right of occupancy, after fixing of rent by decree.

21. After the rent of any tenant with right of occupancy under section eight has been fixed by any decree under this Act, such rent shall not be liable to enhancement for the period of ten years after passing of such decree, or until the period of settlement of the district shall lapse, whichever term shall first expire:

Cases excepted.

Nothing in this section applies—

(1.) to cases in which land has been gained by alluvion after the date of such decree;

(2.) to cases in which the area of the tenant's holding has been added to since the date of such decree;

(3.) to cases in which the productive powers of the land have been increased, otherwise than by the agency or at the expense of the tenant, after the date of such decree.

Time for instituting suits for enhancement.

22. Suits for enhancement must be brought on or before the fifteenth day of November preceding the agricultural year for which enhancement is sought,

Decrees when to take effect.

and all decrees for enhancement passed under the last preceding section shall take effect from the first day of July next following the date of the decree.

Bar to enhancement except by agreement or under decree.

23. No tenant shall be liable to pay rent in excess of that payable in the last preceding year,

unless the parties have agreed as to the rent to be paid, and have attested their agreement before the Kánungo of the pargana,

or unless the rent has been enhanced by decree of Court.

Grounds of claim to abatement by tenant with right of occupancy.

24. Every tenant having a right of occupancy shall be entitled to claim an abatement of the rent previously paid by him on either of the following grounds:—

1st,—That the area of the land has been diminished by diluvion or otherwise:

2nd,—That the productive powers of the land have been decreased by any cause beyond the power of the tenant.

3.—*On Commutation of Rent and Payment in Kind.*

Commutation of rents in kind to fixed money payment.

25. In all cases in which rents have heretofore been paid in kind, or on the estimated value of a portion of the crop, any officer employed in making or revising the settlement of the land-revenue, may, on a suit instituted, either by the tenant, not being a tenant-at-will, or by the landlord, make a decree commuting such rent into a fixed money payment.

The rate or amount of rent thus fixed shall be binding upon the parties concerned, subject to the provisions of this Act, and shall take effect from the first day of July next following the date of the decree.

Power to apply provisions of section to districts;

The Local Government may, by a notification in the official Gazette,

(*a.*) declare the provisions of this section applicable to any district or portion of a district, whether under settlement or not,

to empower officers to decide suits,

(*b.*) declare what officers are empowered to hear and decide suits for the commutation of rents in kind, or rents paid by an estimated value of a portion of the crop, to fixed money payments; and

and to lay down rules

(*c.*) lay down rules determining the circumstances under which such suits may be heard or refused, and the principles to be followed in their adjudication.

Application by tenant for deputation of officer to divide, produce or appraise crop, when landlord neglects to attend.

26. Wherever rent is taken by division of the produce in kind, or by estimate or appraisement of the standing crop, or other procedure of a similar nature, requiring the presence both

of the cultivator and proprietor, either personally or by a representative,

if the landlord or his agent neglect to attend at the proper time,

the tenant may present an application to the tahsíldár, requesting that a proper officer be deputed to make the division, estimate or appraisement.

Procedure on such application.

27. On receiving such application, the tahsíldár shall issue a written notice to the landlord to attend on the date and at the time specified in the notice, and shall depute an officer before whom such division, estimate or appraisement, shall be made.

If the landlord fails to attend, the officer shall call in three other tenants of the estate, as assessors, to divide the grain or appraise the crops, and shall decide the amount of rent payable by the tenant according to their award, and shall give the tenant a written authority to divide the grain or cut the crops.

Such decision shall be final, and any suit brought to set it aside shall be dismissed with costs.

4.—*Ejectment.*

Liability of tenant to pay interest on arrear and to be ejected.

28. When an arrear of rent remains due from any tenant on the thirtieth day of June, such tenant shall be liable to pay interest on such arrear at twelve per cent. per annum, and to be ejected from the land in respect of which the arrear is due:

Bar to ejectment without decree.

Provided that no tenant having a right of occupancy, or holding under a lease the term of which has not expired, shall be ejected otherwise than in execution of a decree or order under the provisions of this Act.

Ejectment not to be decreed for certain breaches of lease.

No ejectment of a tenant or cancelment of a lease shall be decreed on account of any breach of the lease which is not detrimental to the land demised, or which is not inconsistent with the purpose for which the land was demised.

Procedure for ejectment of tenant with right of occupancy, or holding under unexpired lease.

29. If the landlord desire to eject a tenant with right of occupancy, or a tenant holding under an unexpired lease, against whom a decree for arrears has been passed and remains unexecuted, he may, after the end of the agricultural year in which such arrears accrued, apply to the Court, and the Court on receiving such application shall (subject to the provisions of the Indian Limitation Act, 1871, and of section one hundred and sixty of this Act) cause a notice to be served on the tenant directing him to pay the amount due by the decree into Court within fifteen days from receipt of the notice. If such amount be not so paid, the Court shall eject the tenant.

In case of tenant for limited period, landlord may serve notice.

30. If the landlord desire to eject a tenant not having a right of occupancy, or any other tenant holding only for a limited period, after the determination of his lease or tenancy, he shall serve a written notice on such tenant under the provisions of this Act.

Contents of notice.

31. The notice of ejectment shall be written in the vernacular language and character of the village;

it shall specify the land from which the tenant is to be ejected;

and it shall inform him that he must vacate the land on or before the first day of May next following; or that, if he means to dispute the ejectment, he must institute a suit for that purpose on or before that date.

Mode of serving notice.

32. The notice shall be served through a tahsíldár on or before the first day of April in each year, and the landlord shall pay the cost of service; it shall be served personally on the tenant, if practicable; but, if he cannot be found, service may be made by affixing the notice to his usual place of residence.

Effect of failure of tenant to institute suit to contest liability to ejectment.

33. If the tenant on whom such notice of ejectment has been served fail to institute a suit to contest his liability on or before the first day of May next after the service, his tenancy of the land in respect of which the notice has been served shall be held to cease on that date: unless, after the service, the landlord authorises him to continue in the occupation of the land.

Procedure to enforce ejectment.

34. If no such suit is brought, and the landlord require the assistance of the Collector to eject any person whose tenancy is alleged to have ceased under the provisions of section thirty, he may apply for such assistance before the ploughing for the *kharíf* harvest commences; and if the Court is satisfied that notice was served on such tenant, and that no subsequent agreement has been entered into between him and his landlord, it shall give such assistance accordingly:

Saving of tenant's right to sue.

Nothing done by the Court under the previous part of this section shall affect the right of any tenant to institute a suit against his landlord for illegal ejectment, and to recover compensation for the same.

Notice of ejectment when void.

If the landlord allow the tenant on whom the notice of ejectment has been served to remain in occupation of the land, and to prepare it for the *kharíf* harvest, the notice of ejectment shall be deemed void.

Right of ejected tenant to value of growing crops or ungathered produce.

35. Any tenant ejected in accordance with the provisions of this Act, shall be entitled to receive from the landlord the value of any growing crops or other ungathered products of the earth, belonging to the tenant, growing on the land at the time of his ejectment.

Application for assessment of rent-free land.

36. Any proprietor who desires to assess any land granted free of rent, shall apply to the Collector, and such application shall be dealt with as a suit under this Act.

Limitation.

Every such suit shall be instituted within the period of twelve years from the time when the person claiming the right to assess the land came into

the possession of the estate, by inheritance, or otherwise :

Provided that a written instrument of grant, given by the applicant, and specifically covenanting that the grant shall not be resumed, shall be held valid as against such applicant during the currency of the settlement :

Written deed of grant valid against applicant.

Provided, further, that rent-free possession for fifty years, including two successions, shall vest in the grantee or his representative a proprietary right in the land so held.

Possession for 50 years to vest proprietary right.

But no length of rent-free occupancy, nor any grant made by the proprietor, shall release such land from its liability to Government for the revenue assessable on the same.

Saving of liability for Government revenue.

5.—*Compensation for Improvements made by Tenants.*

37. If any tenant make, or the person from whom he inherits has made, any such improvements on the land in his possession as are specified in the Land Improvement Act, 1871, such tenant shall not be ejected from such land without payment of compensation for the outlay in money, labour, or both, expended in making such improvements.

Tenants' right to compensation for improvements.

38. Such compensation shall be based on the present value of such improvements ; and may, at the option of the landlord or his representative, be made—

Basis of, and mode of making, compensation.

1st,—by payment in money ;

2nd,—by the grant of a beneficial lease of the land, by the landlord or his representative, to the tenant or his representative ;

3rd,—partly by payment in money, and partly by the grant of such lease as aforesaid.

39. In case of difference as to the amount or value of the compensation tendered, either party may apply to the Collector stating the matter in dispute, and requesting a determination thereof.

Settlement of difference as to amount or value of compensation.

On receiving such application, the Collector shall cause notice thereof to be served on the other party, and, after taking such evidence as the parties or either of them may adduce, and after such further inquiry as he may deem necessary, determine the amount of the payment, or the terms of the lease, or both.

In determining such amount, or the terms of such lease, the Collector shall take into account any assistance given to the tenant by the landlord, either directly in money, material or labour, for the purpose of making such improvements, or indirectly by subsequently allowing the tenant to hold at a rate of rent more favourable than the rate at which he otherwise would have held.

40. The Collector may refer any application brought under section thirty-nine to arbitration, in which case the proceedings shall be in accordance with the provisions of the North-Western Provinces Revenue Act.

Reference to arbitration.

41. Every under-tenant or ryot, from whom any sum is exacted in excess of the rent specified in his pattá, or payable under the provisions of this Act, whether as *ábwáb* or under any other pretext,

Right of tenant to damages for exactions in excess of rent or for withholding receipt.

and every under-tenant, ryot or cultivator from whom a receipt is withheld for any sum of money paid by him as rent,

shall be entitled to recover, from the person receiving such rent, damages not exceeding double the amount so exacted or paid

Receipts for rent shall specify the year or years on account of which the rent is acknowledged to have been paid ;

Contents of receipt.

and any refusal to make such specification shall be held to be a withholding of a receipt.

42. If payment of rent, whether the same be legally due or not, is extorted from any under-tenant or ryot by illegal confinement or other duress, he shall be entitled to recover such compensation, not exceeeding the sum of two hundred rupees, as the Court thinks reasonable.

Damages for extorting payment of rent by duress.

An award of compensation under this section shall not bar or affect any penalty or punishment to which the person practising such extortion may be subject by law.

Liability to punishment for extortion not affected.

6.—*Deposit of Rent in Government Treasury.*

43. If any tenant having a right of occupancy or holding under an unexpired lease, or under an agreement or decree, tenders to the person authorized to receive it full payment of the rent due from him, and if the amount so tendered be not accepted, and a receipt for the amount forthwith granted, the tenant may thereupon deposit such amount in the Collector's Court to the credit of the person authorized to receive it.

Deposit of amount tendered by tenant and refused.

44. The application to the Collector shall be drawn up in the form (A) annexed, and shall be verified in the manner prescribed for the verification of plaints under section one hundred and seven :

Form and verification of application.

and the person making the verification shall be subject to the penalty therein laid down, if the application contain any averment which he knows or believes to be false, or does not know or believe to be true.

Penalty for false statement.

45. On receiving the money so deposited, the Collector shall issue to the person to whose credit it has been deposited a notice in the form (B) annexed.

Notice to issue on deposit being made.

46. Such notice shall be served through the tahsíldár upon the person to whom it is addressed, or upon his recognized agent.

Mode of serving notice.

In their absence, the notice shall be affixed at the *chaupál*, or other conspicuous place in the village in which the land for which the rent is due is situated.

47. If the person on whom such notice is served, or his recognized agent, appears, and applies that the money in deposit be paid to him, it shall be paid accordingly.

Payment to person served with notice on his application.

48. If no application be made by the person on whom the notice was served, or by his agent, the sum shall be repaid to the depositor on the expiration of two years from the date of the deposit.

Refund to depositor.

CHAPTER III.

DISTRAINT.

Produce of land hypothecated for rent.

49. The produce of the land is held to be hypothecated for the rent payable in respect thereof;

Recovery of arrears by distraint.

and when an arrear of rent, as defined in section three, is due from any cultivator of land, the zamíndár, lákhirájdár, farmer, dependent taluqdár, under-farmer or other person entitled to receive rent immediately from such cultivator, instead of suing for the arrear as hereinbefore provided, may recover the same by distress and sale of the produce of the land on account of which the arrear is due, under the rules contained in this Chapter:

Bar to distraint of produce covered by security.

Provided always, that, when a cultivator has given security for the payment of his rent, the produce of the land for the rent of which security has been given, shall not be liable to be distrained:

Sharer not entitled to distrain.

Provided also, that no sharer in any estate, who is not entitled to collect the whole rent from the tenant, shall have power to distrain.

No distraint for overdue arrear, nor, without agreement, for excess over past year's rent.

50. A Distress shall not be made for any arrear which has been due for a longer period than one year;

nor for the recovery of any sum in excess of the rent payable for the same land in the preceding year, unless a written engagement for the payment of such excess has been executed by the cultivator, and attested before the Kánungo.

Distraint by managers under Court of Wards, &c.

51. The power to distrain vested by section forty-nine in zamíndárs, and other persons entitled to receive rent from cultivators of land, may be exercised by managers under the Court of Wards, surbarakars, and managers of estates held under khás management, and other persons lawfully entrusted with the charge of landed property;

and also by the náibs, gumáshtas, and other agents, employed by such persons as aforesaid, in the collection of rent, if expressly authorized by power-of-attorney in that behalf:

Liability to damages for illegal act.

Provided that, if any wrongful act is committed by any such náib, gumáshta, or other agent, under colour of the exercise of the said power, the person employing such agent shall be liable, as well as the agent, for to make compensation for such act.

Persons empowered to distrain to give written authority to servants employed to make distress.

52. When any person, empowered to distrain property under section forty-nine or section fifty-one employs a servant or other person to make the distress, he shall give to such servant or person a written authority for the same, and the distress shall be made in the name and on the responsibility of the person giving such authority.

Standing crops and crops gathered liable to distraint.

53. Standing crops and other ungathered products of the earth, and crops or other products when reaped or gathered, and deposited in any threshing-floor or place for treading out grain or the like, whether in the field or within a homestead, may be distrained by persons invested with power to distrain under the provisions of this Act.

Exception.

But no such crops or products, other than the produce of the land in respect of which an arrear of rent is due, or of land held under the same engagement, and no grain or other produce after it has been stored by the cultivator, and no other property whatsoever, shall be liable to be distrained under this Act.

Defaulter to be served with written demand and account.

54. Before or at the time when a distress is made under this Act, the distrainer shall cause the defaulter to be served with a written demand for the amount of the arrear, together with an account exhibiting the grounds on which the demand is made.

Mode of service.

The demand and account shall, if practicable, be served personally on the defaulter; or, if he abscond or conceal himself, so that they cannot be so served, shall be affixed at his usual place of residence.

Distress to be proportionate to arrear.

55. Unless the amount of the demand is immediately paid or tendered, the distrainer may distrain property as aforesaid of value proportionate to the amount of the arrear, with costs of the distress;

List of property to be prepared and copy served on owner.

and shall prepare a list or description of the said property, and deliver a copy of the same to the owner, or, if he be absent, affix it at his usual place of residence.

Standing crops, &c., when attached, may be reaped and stored by cultivator, or, if he neglect, by distrainer.

56. Standing crops and other ungathered products may, notwithstanding the distress, be reaped and gathered by the cultivator, and may be stored in such granaries or other places as are commonly used by him for the purpose.

If the cultivator neglect to do so, the distrainer shall cause the said crops or products to be reaped or gathered, and in such case shall store the same either in such granaries or other places as aforesaid, or in some other convenient place in the neighbourhood.

In either case the distrained property shall be placed in the charge of some person appointed by the distrainer for the purpose.

Sale of products which cannot be stored.

Crops or products which from their nature do not admit of being stored, may be sold before they are cut or gathered, under the rules hereinafter provided; but in such case, the distress shall be made at least twenty days before the time when the crops or products or any part of the same would be fit for cutting or gathering.

Assistance to distrainer opposed or apprehending resistance.

57. If a distrainer is opposed, or apprehends resistance, and desires to obtain the assistance of a public officer, he may apply to the Court, and the Court may, if it thinks necessary, depute an officer to support the distrainer in making the distress.

Distress to be withdrawn on tender of arrear and expenses before sale.

58. If at any time after property has been distrained, and prior to the day fixed for its being put up to sale as hereinafter provided, the owner of the

property tender payment of the arrear demanded of him, and of the expenses of the distress, the distrainer shall receive the same, and shall forthwith withdraw the distress.

Application for sale.

59. Within five days from the time of the storing of any distrained crops or products,

or, if the crops or products do not from their nature admit of being stored, within five days from the time of making the distress,

the distrainer shall apply for sale of the same to the Amín, or other officer authorized to sell property in satisfaction of decrees of the Civil Court within the circle in which the distrained property is situate, or to such other public officer as the Local Government appoints for the purpose.

Contents of application.

60. The application shall be in writing, and shall contain—

(*a*) an inventory or description of the property distrained,

(*b*) the name of the defaulter and his place of residence,

(*c*) the amount due, and the date of the distress, and

(*d*) the place in which the distrained property is deposited.

Deposit of cost of service of notice.

Together with the application, the distrainer shall deliver to the Amín or other officer the amount necessary for the service of a notice upon the defaulter as hereinafter provided.

Procedure by Amín, &c., on receipt of application.

61. Immediately on receipt of the application, the Amín or other officer shall transmit a copy of it to the Court;

and shall serve a notice in the form (C) contained in the schedule to this Act, or to the like effect on the person whose property has been distrained, requiring him, either to pay the amount demanded, or to institute a suit to contest the demand before the Court, within the period of fifteen days from the receipt of the notice.

He shall at the same time send to the Court, for the purpose of being put up in his office and in the kachahrí of the tahsíldár, a proclamation fixing a day for the sale of the distrained property, which shall not be less than twenty days from the date of the application; and shall deliver a copy of the proclamation to the peon charged with the service of the notice, to be put up by him in the place where the distrained property is deposited.

The proclamation shall contain—

(*a*) a description of the property,

(*b*) the demand for which it is to be sold, and

(*c*) the place where the sale is to be held.

Amín to suspend sale on receipt of Court's certificate of institution of suit.

62. If a suit is instituted before the Court in pursuance of the aforesaid notice, the Court shall transmit to the Amín or other officer, and, if so requested, shall deliver to the owner of the distrained property, a certificate of the institution of such suit;

and on such certificate being received by, or presented to, the Amín or other officer, he shall suspend proceedings in regard to the sale of the distrained property.

Suit to contest distrainer's demand before issue of notice of sale.

63. A person whose property has been distrained in the manner hereinbefore provided, may institute a suit to contest the demand of the distrainer immediately after the distress, and before the issue of notice of sale.

When such suit is instituted, the Court shall proceed in the manner prescribed in the last preceding section.

If, thereafter, application for the sale of the property is made to the Amín or other officer, he shall send a copy of the application to the Court, and suspend further proceedings, pending the decision of the case.

Distress when to be withdrawn.

64. The person whose property has been distrained may, at the time of instituting any such suit as aforesaid, or at any subsequent period, execute a bond with a surety, binding himself to pay whatever sum may be adjudged to be due from him, with interest and costs of suit;

and when such bond is executed, the Court shall give to the owner of the property a certificate to that effect, and, if so requested, shall serve the distrainer with notice of the same;

and upon such certificate being presented to the distrainer by the owner of the property, or served on him by order of the Court, the property shall be released from distress.

When sale may be proceeded with.

65. On the expiration of the period fixed in the proclamation of sale, if the institution of a suit to contest the demand of the distrainer has not been certified to the Amín or other officer in the manner herein before provided, he shall, unless the said demand, with such costs of the distress as shall be allowed by him, be discharged in full, proceed to sell the property or such part of it as may be necessary, in the manner following.

Place of sale.

66. The sale shall be held at the place where the distrained property is deposited, or at the nearest ganj, bázár, hát or other place of public resort, if the Amín or other officer is of opinion that it is likely to sell there to better advantage.

Manner of sale.

The property shall be sold by public auction, in one or more lots, as the officer holding the sale may think advisable;

Withdrawal of distress when demand and costs satisfied.

and if the demand with the costs of distress and sale be satisfied by the sale of a portion of the property, the distress shall be immediately withdrawn with respect to the remainder.

If fair price be not offered, sale may be postponed and shall be then completed.

67. If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) be not offered for it, and the owner of the property, or some person authorized to act on his behalf, apply to have the sale postponed until the next day, or the next market day, if a market be held at the place of sale, the sale shall be postponed

until such day and shall be then completed whatever price may be offered for the property.

Payment of purchase-money.

68. The price of every lot shall be paid for in ready money at the time of sale, or as soon thereafter as the officer holding the sale thinks necessary;

Resale on default.

and, in default of such payment, the property shall be put up again and sold.

Certificate to purchaser.

When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate, describing the property purchased by him and the price paid.

Deduction, from proceeds, of costs of sale.

69. From the proceeds of the sale of distrained property, the officer holding the sale shall make a deduction at the rate of one anna in the rupee on account of the costs of the sale, and shall send the amount to the Court, in order that it may be credited to Government.

Payment of distrainer's expenses.

He shall then pay to the distrainer the expenses incurred by the distrainer on account of the distress, and of the issue of the notice and proclamation of sale prescribed in section sixty-one, to such amount as, after examination of the statement of expenses furnished by the distrainer, he thinks proper to allow.

Discharge of arrear with interest.

The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale;

Surplus.

and if there be any overplus, it shall be delivered to the person whose property has been sold.

Sale officers and employees prohibited from purchasing.

70. Officers holding sales of property under this Act, and all persons employed by or subordinate to such officers, are prohibited from purchasing, either directly or indirectly, any property sold by such officers.

Report of irregularities by distrainer.

71. Amíns and other officers as aforesaid are required to bring to the notice of the Court any material irregularities committed by distrainers under colour of this Act;

Postponement of sale, and report to Court when defaulter has not received due notice.

and if, in any case, on proceeding to hold a sale of property, the Amín or other officer find that the owner of the property has not received due notice of the distress and intended sale, he shall postpone the sale and report the case to the Court,

Order of Court.

and the Court shall direct the issue of another notice and proclamation of sale under section sixty-one, or pass such other order as to it may seem proper.

Levy of charge when sale officer attends, and no sale takes place.

72. When an Amín or other officer has proceeded to any place for the purpose of holding a sale, under this Act and no sale takes place, either for the reason stated in the last preceding section, or because the demand of the distrainer has been previously satisfied, no intimation of such satisfaction having been given by the distrainer to the Amín or other officer, the charge of one anna in the rupee on account of expenses shall be leviable and shall be calculated on the estimated value of the distrained property.

Recovery from owner.

If the demand of the distrainer be not satisfied until the day fixed for the sale, the charge for expenses shall be paid by the owner of the property, and may be recovered by the sale of such portion thereof as may be necessary.

Recovery from distrainer.

In every other case it shall be paid by the distrainer and may be recovered by attachment and sale of his property under the warrant of the Court:

Limit to charge.

provided, that in no case shall a larger amount than ten rupees be recoverable under this section.

Proceedings of Amíns, &c., subject to revision and orders of Collector.

73. All proceedings under this Act of the Amíns and other officers as aforesaid, shall be subject to the revision and orders of the Collector of the District,

Power to call for reports and statements.

and the Collector of the District, with the sanction of the Board of Revenue, may require the submission of such periodical reports and statements of business done by the Amíns and other officers as may be thought necessary.

Order of sale when amount adjudged due.

74. When a suit has been instituted to contest the demand of a distrainer and the property has not been released on security, if the demand or any portion of it is adjudged to be due, the Court shall issue an order to the Amín or other officer authorizing the sale of the property;

Second proclamation of sale.

and on the application of the distrainer, within five days from the receipt of such order by the Amín or other officer, such Amín or officer shall publish a second proclamation in the manner prescribed in section sixty-one, fixing another day for the sale of the distrained property, which shall not be less than five nor more than ten days from the date of the proclamation;

Sale on failure to pay debt and costs.

and unless the amount adjudged to be due with the costs of distress be paid intermediately, shall proceed to sell the property in the manner hereinbefore provided.

In suit to contest his demand, distrainer to prove arrear.

75. In all suits instituted to contest the demand of a distrainer, the distrainer shall be required to prove the arrear in the same manner as if he had himself brought a suit for the amount under the foregoing provisions of this Act.

Recovery of amount decreed in favour of distrainer.

If the demand or any part thereof is found to be due, the Court shall make a decree for the amount in favour of the distrainer, and such amount may be recovered by sale of the property, as provided in the last preceding section, if the distress has not been withdrawn;

and, if any balance remain due after such sale, by execution of the decree against the person and any other property of the defaulter,

or, if the property have been released on security, by execution of the decree against the person and property of the defaulter and of his surety.

Compensation in case of vexatious distress.

If the distress is adjudged to be vexatious or groundless, the Court, besides directing the release of the distrained property, may award such compensation to the plaintiff as the circumstances of the case require.

Suit by person claiming property distrained for arrears alleged to be due from another.

76. If any person claim as his own, property which has been distrained for arrears of rent alleged to be due from any other person, the claimant may institute a suit against the distrainer and such other person, to try the right to the property, in the same manner and under the same conditions as to the time of instituting the suit and to the consequent postponement of sale, as a person whose property has been distrained for an arrear of rent alleged to be due from him, may institute a suit to contest the demand.

Release of property on security being given.

When any such suit is instituted, the property may be released upon security being given for the value of the same.

Order of Court when claim dismissed.

If the claim is dismissed, the Court shall make an order for the sale of the property, or for the recovery of the value thereof, as the case may be, for the benefit of the distrainer.

Decree for release and compensation when claim upheld.

If the claim is upheld, the Court shall decree the release of the distrained property with costs, and such compensation (if any) as the circumstances of the case require:

Saving of prior claim of person entitled to rent of land.

Provided always, that no claim to any produce of land liable to distress under this Act, which at the time of the distress may have been found in the possession of a defaulting cultivator (whether such claim be in respect of a previous sale, mortgage or otherwise,) shall bar the prior claim of the person entitled to the rent of the land, nor shall any attachment in execution of a judgment of any Civil Court prevail against such prior claim.

Procedure where right to distrain is claimed by other than distrainer.

77. If, in any case in which property has been distrained for an arrear of rent, and a suit has been instituted to contest the demand, the right to distrain for such arrears is claimed by or on behalf of any person other than the distrainer, on the ground of such other person being actually and in good faith in the receipt and enjoyment of the rent of the land, such other person shall be made a party to the suit, and the question of the actual receipt and enjoyment of the rent by him before and up to the time of the commencement of the suit shall be enquired into, and in deciding the suit the result of such inquiry shall be taken into consideration.

Saving of right to sue in Civil Court.

Provided always, that the decision of the Court shall not affect the right of either party who may have a legal title to the rent of the land, to establish his title by suit in the Civil Court if instituted within one year from the date of the decision.

Persons prevented from suing in time to save property from sale, may sue for damages.

78. If any person whose property has been distrained for the recovery of a demand not justly due, or of a demand due or alleged to be due from some other person, is prevented by any sufficient cause from bringing a suit to contest the demand or to try the right to the property as the case may be, within the period allowed by section ninety-seven, and his property is in consequence brought to sale, he may, nevertheless, institute a suit under this Act to recover compensation for the illegal distress and sale of his property.

Wrongful acts of distrainer.

79. If any person empowered to distrain property, or employed for the purpose under a written authority by a person so empowered, distrain or sell, or cause to be sold, any property for the recovery of an arrear of rent alleged to be due, otherwise than according to the provisions of this Act,

or if any distrained property is lost, damaged, or destroyed by reason of the distrainer not having taken proper precaution for the due keeping and preservation thereof,

or if the distraint is not immediately withdrawn when it is required to be withdrawn by any provision of this Act,

the owner of the property may institute a suit under this Act to recover compensation for any injury which he has thereby sustained.

Suit by owner against person distraining or selling without authority.

80. If any person not empowered to distrain property under sections forty-nine and fifty-one, nor employed for the purpose under a written authority by a person so empowered, shall distrain or sell or cause to be sold any property under colour of this Act, the owner of the property may institute a suit under this Act to recover compensation from such person for any injury which the plaintiff has sustained from the distraint or sale,

Penalty in addition to damages.

and the defendant shall be held to have committed criminal trespass, and shall be subject to the penalties for that offence, in addition to any damages which may be awarded against him in such suit.

Limitation of suits under sections 78, 79, 80.

81. Provided that any suit which may be instituted under any of the last three sections, shall be commenced within the term prescribed by section ninety-seven.

Procedure in case of resistance of distraint.

82. If any person resist a distraint of property duly made under this Act, or forcibly or clandestinely remove any distrained property, the Court, upon complaint being made within fifteen days from the date of such resistance or removal, shall cause the person accused to be arrested and brought before the Court with all convenient speed, and the Court shall, if possible, proceed forthwith to try the case.

If the case cannot be at once heard, the Court may, if it think fit, require the party arrested to give security for his person, and, in default of such

security, may commit him to the civil jail until the case is tried,

and if the offence be proved and the offender be the owner of the property concerned, the Court shall order him to be imprisoned in the civil jail for six months, or until the whole arrear due to the distrainer, with all expenses and costs, is paid or levied under warrant of the Court by distress and sale of the property of the offender.

If the offender be not the owner of the property, he shall make good to the distrainer the value of the same, and shall further be liable to a fine not exceeding one hundred rupees,

or, in default of payment thereof, to imprisonment in the civil jail for a period not exceeding two months.

CHAPTER IV.

OF PROCESS.

Mode of serving process.

83. Every process issued by a Court under this Act shall be under the seal and signature of the Court, and shall be served or executed by the Názir, or by such other officer as the Court may direct, at the cost of the party at whose instance it is issued.

Deposit before issue.

The amount of such cost, and, in the case of summons to a witness, any sum required for the travelling expenses of such witness, shall be deposited in Court before the process is issued:

Power to direct service free of charge.

Provided that, if in any case the Court is satisfied that a party is unable to pay the cost of any necessary process, it may direct such process to be served free of charge.

Punishment for resistance of process.

84. Any resistance or opposition to the lawful process of a Court under this Act may be punished by the Court according to the provisions of the law for the time being in force for the punishment of resistance or opposition to the processes of the Courts of civil justice.

Power to issue summons and warrant.

When, in any such case, the offender is not present, the Court may summon him to answer to the charge: and if after due service of the summons he fail to attend, may issue a warrant for his apprehension.

Appeal against orders under this section.

Orders passed by Collectors under this section shall be subject to appeal as provided by section one hundred.

CHAPTER V.

JURISDICTION OF COURTS AND APPEALS.

Suits cognizable under this Act.

Suits cognizable by Revenue Courts only.

85. Except in the way of appeal as provided in this Act, the Courts of Revenue alone shall take cognizance of the following descriptions of suits, and such suits shall be heard and determined in the said Courts in the manner provided in this Act, and not otherwise;

Bar to cognizance by other Courts.

and except in the way of appeal as provided in this Act, all other Courts are hereby prohibited from taking cognizance of any such suits, whether the claim be joined to a claim cognizable by such other Courts or not.

I.—Suits by a landlord—

(1.) for arrears of rent;

(2.) for enhancement of rent of a tenant having right of occupancy;

(3.) for the ejectment of a tenant or for cancelling any lease on account of a breach of the conditions of any contract by which a tenant may be liable to ejectment, or a lease may be liable to be cancelled;

(4.) for the resumption of rent-free grants, or the determination of the rent of land thitherto held free of rent.

II.—Suits by a tenant—

(5.) for contesting a notice of ejectment;

(6.) for the recovery of rent illegally exacted or extorted, and for damages on account of the illegal exaction or extortion of rent, or any unauthorised cess or impost, or on account of extortion of rent by any means not warranted by law;

(7.) for compensation for withholding receipt for rent paid;

(8.) for compensation for illegal ejectment;

(9.) for the recovery of the occupancy of any land from which a tenant has been illegally ejected by the landlord;

(10.) for contesting the exercise of the powers of distress conferred on landlords and others by this Act, or any thing purporting to be done in the exercise of the said power, or for compensation for illegal distress;

(11.) for abatement of rent;

III.—Suits by tenants or landlords—

(12.) for pattás or counterparts, and for the determination of the rates of rent at which such pattás or counterparts are to be delivered.

IV.—Suits by, and against, Lambardárs, Co-sharers and Muáfídárs.

(13.) Suits by lambardárs for arrears of Government revenue, payable through them by the co-sharers whom they represent, and for village-expenses and other dues for which the co-sharers may be responsible to the lambardár;

(14.) Suits by co-sharers for their share of the profits of an estate, or any part thereof, after payment of the Government revenue and village-expenses, or for a settlement of accounts;

(15.) Suits by muáfídárs, or assignees of the Government revenue, for arrears of revenue owing to them, as such muáfídárs or assignees;

(16.) Suits by taluqdárs and other superior proprietors, for arrears of revenue or otherwise, not being rent due to them as such taluqdárs or superior proprietors.

Investigation of plea of set-off.

Where, in reply to any suit under this Act, a set-off is pleaded, the Court shall investigate such plea, notwithstanding that the matter of the set-off involves an inquiry beyond the ordinary jurisdiction of the Court under this Act.

V.—Appeals.

Judgment of Collector final where amount, or value of property in suit does not exceed 100 rupees,

86. In suits under this Act, tried and decided by a Collector of the First Class, if the amount sued for, or the value of the property claimed, does not exceed one hundred rupees,

the judgment of the Collector shall be final, and not open to revision or appeal, except as hereinafter provided,

unless certain questions determined.

unless in any such suit a question of right to enhance or otherwise vary the rent of a tenant, or any question relating to a title to land, or to some interest in land as between parties having conflicting claims thereto, has been determined by the judgment,

Appeal in such cases.

in such case the judgment shall be open to appeal in the manner provided in section ninety-three and following sections of this Act.

In suits not open to appeal, Collector may grant re-hearing upon discovery of new evidence, &c.

87. In suits in which the judgment of the Collector is final as provided in the last preceding section, the Collector may, upon the application of either party, if preferred within thirty days from the date of the decision, order the rehearing of a suit, upon the ground of the discovery of new evidence or matter material to the issue of the case, which the applicant had no knowledge of, or could not produce, at the time of trial.

Appeal from decision of Collector of second class.

88. When any such suit as aforesaid, in which, if tried and decided by a Collector of the first class, the judgment of such Collector would be final, is tried and decided by a Collector of the second class, an appeal from the judgment of the Collector of the second class shall lie to the Collector of the District.

Time for presentation.

89. The petition of appeal shall be presented to the Collector within fifteen days from the date of the decree;

Time to be excluded from reckoning.

provided that such time as may be requisite for procuring a copy of the decree appealed against shall not be reckoned as part of the fifteen days.

Procedure in appeal.

90. The Collector shall fix a day for hearing the appeal, and shall cause notice of the same to be served on the respondent in the manner hereinafter prescribed for the service of summons.

If, on the day fixed for hearing the appeal, or any other day to which the hearing may be adjourned, the appellant does not appear in person or by an agent, the appeal shall be dismissed for default.

If the appellant appears and the respondent does not appear in person or by an agent, the appeal shall be heard *ex parte*.

Re-admission of appeal.

91. If an appeal be dismissed for default of prosecution, the appellant may, within fifteen days from the date of the dismissal, apply to the Collector for re-admission of the appeal,

and if it be proved to the satisfaction of the Collector that the appellant was prevented by any sufficient cause from appearing when the appeal was called on for hearing, the Collector may re-admit the appeal.

Judgment in appeal.

92. After hearing the appeal, the Collector shall give judgment in the manner hereinafter prescribed for giving judgment in original suits, and the judgment of the Collector shall be final.

Appeal to District Judge.

93. In all suits other than those in which, when tried and decided by a Collector of the first class, the judgment of such Collector is declared to be final, or when tried and decided by a Collector of the second class, an appeal is allowed to the Collector of the District, an appeal from the judgment of the Collector shall lie to the District Judge,

Appeal to High Court.

unless the amount or value in dispute exceed five thousand rupees, in which case the appeal shall lie to the High Court.

Rules as to time of presentation, &c., to apply.

94. The rules in force in regard to the time within which appeals from the decisions of Civil Courts may be received, and to the manner in which such appeals are heard and determined, and to all proceedings which may be had in respect of such appeals, shall be applicable to appeals to the District Judge or High Court under this Act.

Special appeal to High Court from decisions of District Judge.

95. The decisions of District Judges passed in regular appeal under this Act, shall be open to special appeal to the High Court, in the same manner, and subject to the same rules, as the decisions of District Judges passed in regular appeal are open to special appeal under the Code of Civil Procedure and the Indian Limitation Act, 1871.

Rule as to last day for presentation, deposit or payment, when Court is closed on such day.

96. Whenever a Court is closed on the last day of any period provided in this Act for the presentation of any memorandum of appeal, or for the deposit or payment of any money in Court, the day on which the Court reopens shall be deemed to be such last day.

VI.—Limitation of Suits.

Limitation of suits.

97. Suits for recovery of arrears of rent, revenue or share of profits, may be brought within two years from the date when the arrears became due:

Suits relating to distress, or for recovery of rent in kind, where no application for appraisement has been given in under section twenty-six, may be brought within three months from the date of the cause of action:

All other suits may be brought within one year from the time that the right to sue accrues, unless otherwise specially provided for in this Act.

VII.—Applications and Appeals.

Applications cognizable by Revenue Courts only.

98. The Courts of Revenue alone shall take cognizance of the following descriptions of applications, and such applications shall be heard and determined in the said Courts in the manner provided under this Act:—

(1.) Application by landlord, or agent employed by a landlord, to compel the production of accounts by patwáris;

(2.) Application by tenant for assistance in the division or appraisement of standing crops, under section twenty-six;

(3.) Application from a landlord to eject a tenant with right of occupancy, under section twenty-nine;

(4.) Application from a landlord under section thirty-four for assistance to eject a tenant, on whom a notice of ejectment has been served and who has not brought a suit to contest such notice:

(5.) Application from a tenant to determine the value of any standing crops, or ungathered products of the earth, belonging to the tenant and being on the land at the time of his ejectment under section thirty-five;

(6.) Application for compensation for improvement, under section thirty-seven;

(7.) Application to determine the nature and class of a tenant's tenure, under section sixteen.

Notice to defendant.

99. On receipt of an application under section ninety-eight, notice thereof shall be served on the defendant in the manner laid down in section one hundred and fourteen.

Time for presenting appeals from orders.

100. Appeals against orders passed on applications by officers vested with the powers of a Collector of the first or second class under this Act, shall be presented to the Collector of the District within fifteen days of the date of the order.

An appeal from the order of the Collector of the District shall be presented to the Commissioner of the Division within thirty days from the date of the order, and his decision shall not be open to further appeal:

Power to Board to call for cases.

Provided that the Board of Revenue may call for any case and pass such orders on it as they think fit.

VIII.—Jurisdiction of Courts.

Local Government may invest officers with Collector's powers, and withdraw them.

101. The Local Government may invest any officer with the powers of a Collector of the first or second class under this Act, and may at any time deprive any officer of such powers.

Suits and applications cognizable by Collectors.

102. Collectors of the first and second class shall have as such, power to try suits and applications of the following descriptions:—

(1.) Suits for arrears of rent, clause one, section eighty-five;

(2.) Suits for compensation for withholding receipt for rent paid, clause seven, section eighty-five;

(3.) Suits to contest the exercise of the powers of distraint conferred on landlords and others by this Act, or anything purporting to be done in exercise of the said powers, or for compensation for illegal distraint, clause ten, section eighty-five;

(4.) Suits by lambardárs for arrears of Government revenue, payable through them by the co-sharers whom they represent, and for village-expenses and other dues, for which the co-sharers may be responsible to the lambardár, clause thirteen, section eighty-five;

(5.) Suits by muafidárs or assignees of the Government revenue, for arrears of revenue owing to them as such muafidárs or assignees, clause fifteen, section eighty-five;

(6.) Applications by a landlord, or by an agent employed by a landlord, to compel the production of accounts by patwáris, under clause one, section ninety-eight;

(7.) Applications by a tenant for assistance in the division or appraisement of standing crops, under section ninety-eight, clause two;

(8.) Applications by a tenant to determine the value of any standing crops or ungathered products of the earth, belonging to the tenant, and being on the land at the time of his ejectment, under section ninety-eight, clause five;

(9.) Suits by taluqdárs for arrears of revenue under clause sixteen, section eighty-five.

Additional suits and applications cognizable by Collector, first class.

103. Collectors of the first class, in addition to the suits and applications specified in section one hundred and two, shall have power to try suits and applications of the following descriptions:—

(1.) Suits to eject a tenant, or cancel a lease, on account of breach of the conditions of any contract by which a tenant may be liable to ejectment, or a lease may be liable to be cancelled, clause three, section eighty-five;

(2.) Suits to contest notices of ejectment, clause five, section eighty-five;

(3.) Suits to recover rent illegally exacted or extorted, and for compensation for such exaction or extortion of rent, or any unathorized cess or impost, or for extortion of rent by confinement or other duress, or by any other means not warranted by law, clause six, section eighty-five;

(4.) Suits to recover the occupancy of any land from which a tenant has been illegally ejected by the landlord, clause nine, section eighty-five;

(5.) Suits for compensation for illegal ejectment, clause eight, section eighty-five;

(6.) Suits by co-sharers for their share of the profits of an estate or any part thereof, after payment of the Government revenue and village-expenses, or for a settlement of accounts, clause fourteen, section eighty-five;

(7.) Applications by a landlord for assistance to eject a tenant, on whom notice of ejectment has been served, under section ninety-eight, clause three;

(8.) Applications by a landlord to eject a tenant with right of occupancy, under section ninety-eight, clause four;

(9.) Applications for compensation for improvements, under section ninety-eight, clause six;

(10.) Applications to determine the nature and class of a tenant's tenure, section ninety-eight, clause seven.

Additional suits cognizable by Collector, first class, specially empowered.

104. In addition to the powers specified in sections one hundred and two and one hundred and three, a Collector of the first class specially empowered by Government, shall have power to try the following suits:—

(1.) Suits for enhancement of rent of a tenant having right of occupancy, under clause two, section eighty-five;

(2.) Suits for abatement of rent, under clause 11, section eighty-five;

(3.) Suits for the resumption of rent-free grants, or for the determination of rent of land thitherto held rent-free, under clause four, section eighty-five;

(4.) Suits for pattás or counterparts, and for the determination of the rates of rent at which such pattás or counterparts are to be delivered, under clause twelve, section eighty-five.

CHAPTER VI.

ON PROCEDURE UP TO JUDGMENT.

Mode of instituting suits. Contents of plaint or statement of claim.

105. Suits under this Act shall be instituted by presenting to the Court a plaint or statement of claim, which shall contain

(*a*) the name, description and place of abode of the plaintiff;

(*b*) the name, description and place of abode of the defendant, so far as they can be ascertained;

(*c*) the substance of the claim, and its value estimated according to the law for the time being in force for the valuation of suits; and

(*d*) the date on which the right to sue accrued.

Statement by whom to be presented.

106. The statement of claim shall be presented by the plaintiff, or by an authorized agent of the plaintiff, who has personal knowledge of the facts of the case, or by an agent who shall be accompanied by a person who has such knowledge.

Verification of statement.

107. The statement of claim shall be subscribed and verified at the foot by the plaintiff or his agent in the manner following, or to the like effect:—

"I, *A. B.*, do declare that the above statement is true to the best of my knowledge and belief."

Document relied on by plaintiff to be presented with statement.

108. If the plaintiff rely in support of his claim on any document in his possession, he shall deliver the same to the Court at the time of presenting his statement of claim.

Admission afterwards.

Unless such document be so delivered, or its non-production be sufficiently excused, or unless the Court see fit to extend the time for producing the same, it shall not afterwards be admitted.

Procuring production of document in possession of defendant.

109. If the plaintiff require the production of any document in the possession or power of the defendant, he may, at the time of presenting his statement of claim, deliver to the Court a description of the document, in order that the defendant may be required to produce the same.

Contents of statement in suits for arrears of rent.

110. If the suit be for the recovery of an arrear of rent, the statement shall specify the name of the village and estate, and of the pargana or other local division in which the land is situate:

and, if the arrear is alleged to be due from any ryot, the quantity of land, and (where fields have been numbered in a Government survey) the number of each field, and yearly rent of the land; the amount (if any) received on account of the year for which the claim is made; the amount in arrear, and the time in respect of which it is alleged to be due.

Contents of statement in suits for ejectment,

111. If the suit be for the ejectment of a ryot, farmer or tenant, from any land, farm or tenure,

or for recovery of occupancy or possession.

or for the recovery of the occupancy or possession of any land, farm or tenure,

the statement shall describe (as circumstances may require) the extent, situation and designation of the same; and, if necessary for the identification of the land, shall set forth the boundaries of such land.

Return or amendment of statement.

112. If the statement of claim do not contain the several particulars hereinbefore required to be specified therein, or be not subscribed and verified as hereinbefore required, the Court may return the statement to the plaintiff, or, at its discretion, allow it to be amended.

Issue of summons; order for personal attendance or appearance by agent.

113. If the statement of claim be in proper form, the Court, except as otherwise hereinafter specially provided, shall direct the issue of a summons to the defendant,

and if the plaintiff require the personal attendance of the defendant, and satisfy the Court that such attendance is necessary, or the Court of its own accord require such attendance, the summons shall contain an order for the defendant to appear personally on a day to be specified in the summons,

otherwise, the summons shall order the defendant to appear personally or by an agent duly authorized on his behalf, who has personal knowledge of the subject, or who shall be accompanied by a person who has such personal knowledge.

Fixing of day to be specified in the summons.

114. The day to be specified in the summons shall be fixed with reference to the state of the file and the distance that the defendant may be or be supposed to be at the time from the place where the Court is held,

order to produce documents,

and the summons shall order the defendant to produce any document which he may have in his possession, of which the plaintiff demands inspection, or upon which the defendant may intend to rely in support of his defence.

and to bring witnesses.

It shall also enjoin him to bring with him his witnesses, if they are willing to attend without issue of process, and shall be in the form D contained in the schedule to this Act, or to the like effect.

Mode of serving summons.

115. The summons shall be served by delivering a copy thereof to the defendant personally when practicable;

or, if the summons cannot be served on the defendant personally, by affixing a copy of it to some conspicuous part of his usual residence

and also affixing a copy of the same in the Collector's office.

Endorsement on summons as to mode of service.

116. If the summons be served personally, the Názir shall endorse on the summons the fact of such service.

If personal service be not effected, the Názir shall endorse on the summons the reason of not serving it personally, and how it has been served.

Service of summons in another district.

117. If the usual residence of the defendant be in another district, the summons, together with the cost of the service thereof, shall be sent by the public post to the Collector of such district, who shall issue the summons, and return the same, after service, with the prescribed endorsement, to the officer by whom it was transmitted to him.

Deposit of cost of serving summons or warrant.

118. The amount of the cost of serving the summons,

or, if a warrant be issued as provided in the next succeeding section, of serving the warrant,

shall in all cases be deposited in Court upon the same day or the day next following that on which the plaint or statement of claim is presented to the Court.

Effect of failure to deposit.

If the said amount be not so deposited (except in cases in which the Court may allow the issue of summons free of cost under the discretion reserved to it in section eighty-three), the case shall not be brought on the file of suits;

but in such case the plaintiff may present another plaint at any time within the period allowed by the rules for the limitation of suits.

Procedure when plaintiff desires issue of warrant of arrest.

119. If in any suit against an under-tenant or ryot for the recovery of an arrear of rent, the plaintiff desires a warrant of arrest to be issued against the defendant, such defendant being resident within the district in which the suit is instituted, he shall present, with his statement of claim, an application for the issue of such warrant.

When such application is presented, the Court shall examine the plaintiff or his agent, on his oath or affirmation, or otherwise, according to the law for the time being in force in relation to the examination of witnesses, and inspect the documents adduced by him in support of his claim; and if *primâ facie* the claim appear to the Court to be well founded, and that, if a summons be issued, the defendant will abscond instead of appearing to answer the claim, the Court may issue a warrant for the arrest of the defendant.

The Court shall fix a reasonable time for the return of the warrant, and the officer entrusted with the service thereof shall, at the time of arresting the defendant, deliver to him a notice addressed to the defendant containing the particulars of the claim, and requiring the defendant, if he contest the claim, to bring with him any document upon which he may intend to rely in support of his defence.

But no such warrant shall be issued in a suit for arrears of rent due in respect of a dependent taluq, or other transferable tenure, which, as hereinafter provided, is liable to farm or transfer in execution of any decree which may be passed in the case.

Every warrant issued and notice delivered under this section, shall be respectively in the forms E and F in the schedule hereto annexed or to the like effect.

Procedure after arrest of defendant.

120. If a defendant be arrested under the warrant of arrest, he shall be brought with all convenient speed before the Court, and the Court shall commit him to custody, unless he deposit in Court such sum as may be specified in the notice.

Procedure when defendant is brought before Court under warrant.

121. When a defendant is brought before the Court under warrant, the Court shall with all convenient speed proceed to try the case in the manner hereinafter provided; and if the suit cannot be at once adjudicated, the Court may, if it think fit, require the defendant to give security for his appearance whenever the same may be required at any time whilst the suit is pending, or until execution of the final decree which may be passed thereon, and may commit him to the civil jail to be there detained until he shall furnish such security or deposit such sum as the Court shall order.

Form of security-bond.

The security-bond shall be in the form G contained in the schedule to this Act, or to the like effect.

Procedure when defendant cannot be arrested under warrant.

122. If the defendant cannot be arrested under the warrant, the Court, on the application of the plaintiff, shall either postpone the case for such period as to it may seem proper, in order that the plaintiff may apply within the said period for another warrant to be issued for the arrest of the defendant, or shall forthwith issue a proclamation, to be affixed in its own office and at the residence of the defendant, fixing a day for the hearing of the case, which shall not be less than ten days from the date of the publication of the notice, at the residence of the defendant.

If the defendant appear in pursuance of the proclamation, he shall be dealt with as provided in the last preceding section.

Compensation for arrest applied for without reasonable cause.

123. If it appear to the Court that the arrest of the defendant was applied for without reasonable cause, the Court may, in its decree, award to the defendant such sum not exceeding one hundred rupees as it may deem a reasonable compensation for any injury or loss which he may have sustained by reason of such arrest, or of his detention in jail during the pendency of the suit.

Consequence of neither party appearing on day fixed.

124. If on the day fixed by the summons or proclamation for the appearance of the defendant, or on any subsequent day to which the hearing of the case may be adjourned prior to the recording of an issue for trial as hereinafter provided, neither of the parties appear in person or by an agent, the case shall be struck off, with liberty to the plaintiff to bring a fresh suit, unless precluded by the rules for the limitation of suits.

If defendant only appear, Court shall pass judgment by default; or decree upon admission of claim.

125. If on any such day the defendant only appear, the Court shall pass judgment against the plaintiff by default, unless the defendant admit the right to sue, in which case the Court shall proceed to give judgment for the plaintiff upon such admission without costs:

Proviso.

Provided that such judgment, if there be more than one defendant, shall be only against the defendant who makes the admission.

If plaintiff only appear, Court may proceed *ex parte*.

126. If on any such day the plaintiff only appear, the Court, upon proof that the summons or proclamation has been duly served according to the provisions of this Act, shall proceed to examine the plaintiff or his agent, and after considering the allegations of the plaintiff, and any documentary or other evidence adduced by him, may either dismiss the case or postpone the hearing of it to a future day for the attendance of any witness the plaintiff may wish to call, or may pass judgment *ex parte* against the defendant.

If defendant appear on adjourned hearing, Court may allow him to be heard in answer.

127. If the defendant appear on any subsequent day to which the hearing of the suit may be postponed under the last preceding section, the Court may, upon such conditions, if any, as to costs or otherwise as it may think proper, allow the defendant to be heard in answer to the suit as if he had appeared on the day fixed for his attendance.

No appeal from judgment *ex parte* or by default;

128. No appeal shall lie from a judgment passed *ex parte* against a defendant who has not appeared, or from a judgment against a plaintiff by default for non-appearance.

but Court may revive suit and alter or rescind decree.

But in all such cases if the party against whom judgment has been given shall appear, either in person or by agent, if a plaintiff, within fifteen days from the date of the Court's order, and, if a defendant, within fifteen days after any process for enforcing the judgment has been executed, or at any earlier period, and shall show good and sufficient cause for his previous non-appearance, and shall satisfy the Court that there has been a failure of justice, the Court may, upon such terms and conditions as to costs or otherwise as it thinks proper, revive the suit and alter or rescind the decree, according to the justice of the case.

Adverse party to be summoned.

But no decree shall be reversed or altered without previously summoning the adverse party to appear and be heard in support of it.

Examination and cross-examination of parties and agents.

129. When both parties appear in person or by agent on the day named in the summons, or upon any subsequent day to which the hearing of the case may be adjourned, for sufficient reason to be recorded by the Court, the Court shall proceed to examine such of the parties as may be present, and either party or his agent may cross-examine the other.

If either of the parties be not bound to attend personally, any agent by whom he shall appear, or any person who shall accompany such agent, shall be examined and cross-examined in like manner as the party himself would have been if he had attended personally.

Defendant may file written statement.

At the time of the examination, the defendant, if he think fit, may file a written statement of his defence.

Mode of examination.

130. The examination of the parties or their agents or such other persons as aforesaid shall be upon oath or affirmation, or otherwise, according to the law for the time being in force relative to the examination of witnesses.

The substance of the examination shall be reduced to writing in the vernacular language of the Court, and shall be filed with the record.

Witness produced may be examined.

131. If either of the parties bring forward a witness on such day, the Court may take the evidence of such witness.

Document relied on by defendant to be produced at first hearing.

132. If the defendant rely on any document in support of his defence, he shall deliver the same into Court at the first hearing of the suit;

and unless such document be so delivered, or its non-production be sufficiently excused, or unless the Court see fit to extend the time for producing the same, it shall not afterwards be admitted.

Decree after examination, if no further evidence is required.

133. If after the examination required by section one hundred and thirty, and also the examination of any witness who may attend to give evidence on behalf of either of the parties, and after a consideration of the documentary evidence adduced, a decree can be properly made without further evidence, the Court shall make its decree accordingly.

Party to attend in person when his agent is unable to answer.

134. If on such examination as aforesaid the agent of either party be unable to answer any material question relating to the case which the Court is of opinion that the party whom he represents ought to answer, and is likely to be able to answer if interrogated in person, the Court may postpone the hearing of the case to a future day, and direct that the party whose agent may have been unable to answer as aforesaid shall attend in person on such day;

Judgment or order if he fail to appear.

and if the party so directed to attend shall fail to appear in person on the day appointed, the Court may pass judgment as in case of default, or make such other order as it may deem proper in the circumstances of the case.

Procedure when parties at issue on question requiring evidence.

135. If on such examination as aforesaid it appear that the parties are at issue on any question upon which it is necessary to hear further evidence, the Court shall declare and record such issue, and shall fix a convenient day for the examination of witnesses and the trial of the suit; and the trial shall take place on that day, unless there be sufficient reason for adjourning it, which reason shall be recorded by the Court.

136. The parties shall bring forward their witnesses on the day of trial, and if either party require assistance to procure the attendance of a witness on such day, either to give evidence or to produce a document, he shall apply to the Court in sufficient time before the day fixed for the trial, to enable the witness to be summoned to attend on that day; and the Court shall issue a summons requiring such witness to attend.

Parties to produce witnesses or procure attendance by summons.

137. The law and rules for the time being in force relating to the evidence of witnesses, for procuring the attendance of witnesses and the production of documents, and for the examination, remuneration, and punishment of witnesses, whether parties to the case or not, in cases before the Civil Courts of the Presidency of Bengal, shall, except so far as may be inconsistent with the provisions of this Act, apply to and be of equal force and effect in suits under this Act.

Provisions regarding attendance, examination, &c., of witnesses.

138. If on the day fixed for the trial of any issue neither of the parties appear, the case shall be struck off under the conditions provided in section one hundred and twenty-four.

Case to be struck off if neither party appears.

If on any such day one only of the parties appear, the issue may be tried and determined in the absence of the other party, upon such proof as may be then before the Court.

Trial of issue *ex parte*.

139. When suits under this Act are instituted or defended by náibs, gumáshtas or other persons employed in the collection of rent or management of land, in the name and on the behalf of the landholders by whom they are so employed, all the provisions of this Act, by which the personal appearance or attendance of parties to a suit is or may be required, shall be applicable to such náibs, gumáshtas or other persons;

Provisions to apply when suits are instituted or defended on behalf of landholders by their employees.

and anything which, by this Act, is required or permitted to be done by a party in person, may be done by any such person as aforesaid.

Processes served on any such person shall be as effectual for all purposes in relation to the suit, as if the same had been served on the landholder in person:

Processes served on such employees.

and all the provisions of this Act relative to the service of processes on a party to the suit shall be applicable to the service of processes on such person.

140. A female plaintiff or defendant shall not be required to attend in person, if she be of a rank or class which, according to the custom and manners of the country, would render it improper for her to appear in public.

Personal attendance of female plaintiff or defendant when not required.

141. Any party to a suit may employ an authorized agent or mukhtár to conduct the case on his behalf,

Parties may employ agents or mukhtárs;

but the employment of such agent or mukhtár shall not excuse the personal attendance of the plaintiff or defendant, in cases where his personal attendance is required by the summons, or any order of the Court; and no fee for any agent shall be charged as part of the costs of suit in any case under this Act.

but personal attendance not excused.

Fee for agent not chargeable as costs.

142. The Court may in any case grant time to the plaintiff or defendant to proceed in the prosecution or defence of a suit,

Court may grant time or adjourn hearing.

and may also, from time to time, in order to the production of further proof, or for other sufficient reason to be recorded by the Court, adjourn the hearing or further hearing of any case, in such manner as to it may seem fit.

143. The Court may, at any stage of a case, cause a local inquiry and report respecting the matter in dispute to be made by any officer subordinate to it, or by any other officer of Government, with the consent of the authority to whom such officer is subordinate, or may itself proceed to the spot, and make such local inquiry in person.

Court may cause local enquiry and report, or may itself enquire.

The provisions of the law for the time being in force relative to local inquiries by Amíns or Commissioners, under orders of the civil courts, shall apply to any local inquiry made by any officer under this section,

Provisions applied to such enquiry.

and, so far as they are applicable, to inquiries made by the Court in person.

In the latter case the Court, after completing the inquiry, shall record on the proceedings such observations as appear to it appropriate, and the observations so recorded shall be received as evidence in the suit.

Record in case of enquiry by Court.

144. The defendant in any suit under this Act may pay into Court such sum of money as he thinks a full satisfaction for the demand of the plaintiff, together with the costs incurred by the plaintiff up to the time of such payment, and such sums shall be paid to the plaintiff.

Defendant may pay admitted debt and costs into Court.

If the defendant deposit less than the sum claimed and the plaintiff elect to proceed in the case, and ultimately recover no further sum than has been paid into Court, the plaintiff shall be charged with any costs incurred by the defendant in the suit after such payment.

Plaintiff chargeable with subsequent costs if he proceed and recover no further sum.

145. No interest shall be allowed to a plaintiff on any sum paid by the defendant into the Court from the date of such payment, whether such sum be in full of the plaintiff's claim, or fall short thereof.

No interest to plaintiff after date of deposit by defendant.

146. When in any suit between a landholder and a ryot or under-tenant under this Act, the right to receive the rent of the land or tenure cultivated or held by the ryot or under-tenant is disputed on the ground that some third

In suits for rent, third person who has enjoyed it to be made a party.

person has actually and in good faith received and enjoyed such rent before and up to the time when the right to sue accrued, such third person shall be made a party to the suit,

and the question of such receipt and enjoyment of the rent by such third person shall be enquired into, and the suit shall be decided according to the result of such enquiry:

Saving of right to sue in Civil Court to prove title to rent.

Provided always, that the decision of the Court shall not affect the right of either party, who may have a legal title to the rent of such land or tenure, to establish his title by suit in the Civil Court, if instituted within one year from the date of the decision.

Provisions of Civil Procedure Code as to arbitrations applied.

147. The provisions of chapter VI (relative to Arbitration) of the Code of Civil Procedure shall apply to suits and applications under this Act.

Court may order tenant to repair damage caused by breach of contract or lease, for which ejectment or cancelment of lease is decreed.

148. Whenever a decree is given for the ejectment of a tenant, or the cancelment of a lease, on account of any breach of a condition of the contract or lease, by which the land in the occupation of such tenant has been injured, the Court may order the tenant to repair the damage caused by such breach of contract or lease within one month,

and if such damage shall be so repaired, execution shall be stayed.

Delivery of judgment.

149. The Collector shall pronounce judgment in open Court.

Language and contents.

The judgment shall be written in the vernacular language of the Collector and shall contain the reasons for the same, and shall be dated and signed by the Collector at the time it is pronounced:

When it may be in English.

Provided that the judgment may be written in English, if the Collector is able to write a clear and intelligible decision in that language.

CHAPTER VII.

PROCEDURE IN EXECUTION OF DECREE.

Mode of executing decree for ejectment or re-instatement of ryot.

150. If the decree be for the ejectment of any ryot from land occupied by him, or for the re-instatement of any ryot in the occupancy of land from which he has been ejected, the decree shall be executed by giving the possession or occupancy of the land to the person entitled by the decree to such possession or occupancy.

Magistrate to give it effect in case of opposition.

If any opposition is made to the execution of the order for giving such possession or occupancy, by the party against whom the order is made, the Magistrate, on the application of the Court, shall give effect to the same.

Mode of executing decree for cancelment of lease or for ejectment or re-instatement of farmer or tenant.

151. If the decree be for the cancelment of any lease or the ejectment of any farmer or other person (not being an actual cultivator),

or for the re-instatement of any farmer or other such person in the possession of a farm or tenure from which he has been ejected,

the decree shall be executed by proclaiming the substance of the decree to the cultivators or other occupants by beat of drum, or in such other manner as may be customary, and affixing the same in some conspicuous place within, or adjacent to, the farm or tenure.

Power to order detention in, or commitment to, civil jail, in certain cases.

152. If the decree be for arrears of rent, or for money, papers or accounts, and the defendant has been committed to jail, or appear, pursuant to the conditions of any security-bond given under section one hundred and twenty-one, the Court may order that he be detained in, or committed to, the civil jail, unless he immediately pay into Court the amount of the decree with costs, or otherwise comply with the terms of the decree.

Process against surety on failure to deliver judgment-debtor into custody.

153. If the judgment-debtor has given security for his appearance, and be not present when judgment is pronounced, and the surety fail to deliver him into custody when required so to do, process of execution may be taken out against the surety in the same manner as if a decree for the amount due by the debtor had been passed against the surety.

Process of execution against person or property, but not both.

154. Process of execution may be issued against either the person or the property of a judgment-debtor;

but process shall not be issued simultaneously against both person and property.

Applications on which it may issue.

Such process may be issued on the oral application of the judgment-creditor, his agent, or mukhtár, made at the time the decree is passed, or thereafter, upon the written application of the judgment-creditor, his agent, or mukhtár.

Form of process.

Process of execution against the person or movable property of a debtor shall be in form II or I contained in the schedule to this Act, or to the like effect.

Execution against movable property.

155. Any movable property required to be seized under an execution shall, if practicable, be described in a list to be furnished by the judgment-creditor;

but, if the creditor is unable to furnish such list, he may apply for a general attachment of the debtor's effects, to the amount of the judgment and costs.

In either case, the property to be seized shall be pointed out to the officer entrusted with the execution of the process, by the creditor, or his agent:

Articles excepted from attachment.

Provided that no implements of husbandry, or cattle actually employed in agriculture, or tools of artisans, shall be attached under this section.

Date and duration of warrant.

156. Every warrant of execution shall bear date on the day on which it is signed by the Court, and shall continue in force for such period as the Court may direct (not being more than sixty days), calculated from such date.

157. Second and successive warrants of execution may be issued by order of the Court on the application of the judgment-creditor, after the expiration of the period fixed for the continuance in force of a previous warrant.

Second and successive warrants.

158. Process of execution shall not be issued upon any judgment, without previous notice to the party against whom execution is applied for, if, when application for the issue of the process is made, a period of more than one year shall have elapsed from the date of the judgment, or from the date of the last previous application for execution.

After one year execution not to issue without notice to party concerned.

159. Execution on a judgment shall not issue against the heir or other representative of a deceased party, without notice to such heir or other representative to appear and be heard.

Execution not to issue against heir or representative of deceased party without notice.

160. No process of execution of any description whatsoever shall be issued, on a judgment under this Act, after the lapse of three years from the date of such judgment, unless the judgment be for a sum exceeding five hundred rupees,

No process of execution after three years, if judgment be for sum not exceeding 500 rupees.

in which case the period within which execution may be had shall be regulated by the general rules in force in respect to the period allowed for the execution of decrees of the Civil Court.

Regulation of period in such cases.

161. If a warrant issue for taking in execution the body of any person, the officer charged with the execution of the warrant shall bring him with all convenient speed before the Court.

Procedure in execution of warrant against person.

If such person does not then deposit in Court the full amount specified in the warrant,

or make such arrangement for the payment of the same as shall be satisfactory to the judgment-creditor,

or satisfy the Court that he has no present means of paying the debt,

the Court shall send him to the civil jail, there to remain for such time as may be directed by a warrant addressed to the keeper of the jail, unless in the meantime he pays the full amount, for the payment of which he is liable under the decree:

Provided that the time for which a debtor may be confined in execution of a decree under this Act, shall not exceed three months when the amount decreed (exclusive of costs) does not exceed fifty rupees,

Limit of imprisonment.

or six months when such amount does not exceed five hundred rupees,

or two years in any other case.

162. Any person once discharged from jail shall not be imprisoned a second time under the same judgment.

No person to be imprisoned a second time under same judgment.

If the amount due under the decree do not exceed one hundred rupees, the Court may declare such discharged person absolved from further liability under that decree.

When further liability extinguished.

In other cases the discharge shall not extinguish the liability of the discharged person under the decree, or exempt any property belonging to such person from attachment in execution of the same.

When not extinguished.

163. Any person applying for a warrant of arrest under section one hundred and nineteen, or suing out process of execution against the body of any person, shall deposit in Court, at the time of issue of the warrant, diet-money for thirty days at such rate as the Court may direct, not exceeding two annas per diem, unless the Court for any special reason direct that deposit be made at a higher rate, which shall not exceed four annas per diem.

Diet-money to be deposited at time of issue of warrant.

164. Payment of diet-money at the same rate shall be made previously to the commencement of each succeeding month of the imprisonment, in failure of which the party confined shall be discharged.

Effect of non-payment of diet-money in advance during imprisonment.

165. All diet-money spent in providing subsistence for any prisoner shall be added to the costs in the suit,

Diet-money spent to be costs in suit.

and any diet-money not so spent shall be returned to the person who deposited the same.

Refund of remainder.

166. In executing a writ of execution against the movable property of a debtor liable under this Act, the officer charged with the execution of the writ shall prepare a list of the property pointed out by the judgment-creditor, and shall publish a proclamation, specifying the day upon which the sale is intended to be held, together with a copy of the said list at the intended place of sale and at the residence of the debtor.

Procedure in executing writ against movable property.

A copy of the said proclamation and list shall be transmitted to the Court and shall be affixed in its office.

167. No sale of any movable property taken in execution shall be made until after the end of ten days next following the day on which such property may have been so taken.

Time to elapse before sale of movable property.

Until such sale the property shall be deposited in some fit place, or it may remain in custody of some fit person approved by the officer executing the writ.

Custody meanwhile.

The provisions of sections sixty-six to seventy, so far as the same are applicable, shall apply to sales under this section.

Provisions applied to sales.

168. If before the day fixed for the sale a third party appear before the Court and claim a right or interest in any of the movable property taken in execution, the Court shall examine such party or his agent on oath or af-

Examination of third party claiming interest in property.

firmation or otherwise, according to the law for the time being in force relative to the examination of witnesses,

Stay of sale.

and, if it see sufficient reason for so doing, may stay the sale of such property.

Adjudication of such claims.

169. The Court shall adjudicate upon such claim and make such order between the claimant and the plaintiff and defendant in the original suit as seems fit.

Rules applied.

In trying such claim, the Court shall be guided by the rules contained in this Act, so far as they may be applicable.

Compensation awardable against claimant failing to establish right.

170. If the claimant fail to establish his right to the property taken in execution, the Court, at the time of disposing of the case, may award to the judgment-creditor against such claimant, as part of the costs, such sum as it deems sufficient to cover any loss of interest or damage which the judgment-creditor may have sustained by reason of the postponement of the sale of the property.

No appeal from order under sections 169, 170.

171. No appeal shall lie from any order passed by the Court under the two last preceding sections.

Right to sue in Civil Court.

But the party against whom the same is given may bring a suit in the Civil Court to establish his right at any time within one year from the date of the order:

Proviso.

Provided that, if the order be for the sale of the property, the suit shall not be for the recovery of the property, but shall be for compensation from the judgment-creditor by whom the property was brought to sale.

Sale not vitiated by irregularity in publishing or conducting it.

172. No irregularity in publishing or conducting a sale of movable property under an execution shall vitiate such sale,

Right to sue for damage.

but this rule shall not deprive any person injured by such irregularity from recovering compensation therefor by suit in the Civil Court:

Limitation.

provided that such suit be brought within one year from the date of sale.

Sale of transferable under-tenures in execution of decrees for arrears of rent due in respect thereof.

173. If the decree be for an arrear of rent due in respect of an under-tenure which by the title-deeds or the custom of the country is transferable by sale, the judgment-creditor may apply for the sale of the under-tenure, and the under-tenure may thereupon be brought to sale in execution of the decree, according to the rules for the sale of under-tenures for the recovery of arrears of rent due in respect thereof contained in any law for the time being in force.

Exception.

But no such application shall be received when a warrant of execution has been previously issued against the person or movable property of the judgment-debtor, so long as such warrant remains in force.

Process for recovery of portion of decree remaining unsatisfied after sale of tenure.

If, after sale of an under-tenure, any portion of the amount decreed remains due, process may be applied for against any other property, movable or immovable, belonging to the debtor, and any such immovable property may be brought to sale in the manner provided in section one hundred and seventy-seven.

If third party claim land, share or interest to be sold, Court to stay sale and enquire into and adjudicate upon the claim.

174. If, before the day fixed for the sale of any such land, share or interest, in execution of a decree for arrears of revenue or rent due in respect of such under-tenure, a third party appear before the Court, and allege that he and not the person against whom the decree has been obtained, is the proprietor of such land, share or interest, and was in lawful possession of the same at the time when such decree was obtained, the Court shall examine such third party in the manner provided in section one hundred and sixty-eight for the examination of third parties,

and if it see sufficient reason for so doing, and such third party deposit in Court the amount of the decree or give sufficient security for the same, the Court shall stay the sale and proceed to enquire into and adjudicate upon the claim.

Rules applied to adjudication of such claims.

175. In trying such claim the Court shall be guided by the rules contained in this Act, so far as the same may be applicable,

No appeal.

and the judgment passed by the Court on such claim shall not be subject to appeal;

Right to sue in Civil Court.

but the party against whom it is given may bring a suit in the Civil Court to establish his right at any time within one year from the date of the judgment.

In execution of decrees for money, if judgment not otherwise satisfied, execution may be applied for against immovable property.

176. In the execution of any decree for the payment of money under this Act, not being money due as arrears of rent of a saleable under-tenure, if satisfaction of the judgment cannot be obtained by execution against the person or movable property of the debtor within the district in which the suit was instituted, the judgment-creditor may apply for execution against any immovable property belonging to such debtor.

Mode of executing process if immovable property be a house or other building.

177. If the immovable property against which execution is applied for be a house or other building, process shall be issued in the same manner as for the attachment and sale of movable property,

and the provisions of sections one hundred and sixty-six and one hundred and sixty-seven shall be applicable to the execution of such process.

Procedure in case of objection offered before sale.

178. If, before the day fixed for the sale of any immovable property as aforesaid, objection be offered to the sale on the ground of such property not belonging to the judgment-debtor, and consequently not being liable to be sold in execution of a decree against him, the Collector

shall examine the party making the objection in the manner prescribed in section one hundred and sixty-eight for the examination of third parties,

and, if satisfied that there is sufficient ground for so doing, shall stay the sale and proceed to enquire into and adjudicate upon the objection in the same manner, and subject to the same right of suit by the party against whom judgment may be given, as is provided in section one hundred and seventy-five.

SCHEDULE.

FORM A. (*See section* 44.)

I, *A. B.* of do solemnly declare that I did personally, or by my agent *C. B.*, on the day of , tender payment to *E. F.* of the sum of Rs. as and for the whole amount due from me on account of rent from the month of to the month of both inclusive. I further declare that the said *E. F.* refused to accept the sum so tendered, and to give a receipt in full for the same, and I do declare that, to the best of my belief, the sum of rupees —— so tendered, and which I now desire to pay into Court, is the full amount I owe the said *E. F.*

FORM B. (*See section* 45.)

Court of the Collector of dated the day of

To *E. F.* &c.

With reference to the written declaration of *A. B.*, you are hereby informed that the sum of rupees therein mentioned is now in deposit in this Court and that the above sum will be paid to you, or to your duly authorized agent, on application.

[This is to be written on a copy of the declaration in Schedule made by the person paying the money into Court.]

FORM C. (*See section* 61.)

FORM OF NOTICE TO OWNER OF DISTRAINED PROPERTY.

Office of Commissioner for sale of distrained property.

A. B., Distrainer.

[*Name, description and address of the owner of the property.*]

Whereas the said *A. B.* has applied to have the distrained property specified below sold for the recovery of alleged to be due to him as arrears of rent, you are hereby required either to pay the said sum to the said *A. B.*, or to institute a suit before the Collector to contest the demand within fifteen days from the receipt of this notice, failing which the property will be sold.

Dated this day of 187 .

FORM D. (*See section* 114.)

FORM OF SUMMONS TO DEFENDANT.

No. (of suit) dated

In the Court of

A. B., Plaintiff.

[*Name, description and address of plaintiff.*]

C. D., Defendant.

[*Name, description and address of defendant.*]

Whereas the said *A. B.* has brought a claim against you in this Court for (*here specify particulars of claim as given in the statement,*) you are hereby required to appear in person in this Court on the day of [*if not specially required to appear in person, state,* "in person or by an agent who has personal knowledge of the subject or who shall be accompanied by a person who has such knowledge"] to answer the abovenamed plaintiff, and you will bring with you (or send by your agent) [*here mention any document the production of which may be required by the plaintiff*] which the plaintiff desires to inspect, and all documents on which you may intend to rely in support of your defence. You will also bring with you your witnesses, if they are willing to attend without issue of process.

FORM E. (*See section* 119.)

FORM OF WARRANT OF ARREST.

No. (of suit) dated

In the Court of

A. B., Plaintiff.

C. D. Defendant.

To the Názir of the Court of the Collector of

Whereas the plaintiff in this suit has obtained an order from the Court for the arrest of the defendant, you are hereby commanded to bring the defendant before the Court on or before the day of to be dealt with according to law.

Dated this day of 187

FORM F. (*See section* 119.)

FORM OF NOTICE TO ACCOMPANY SUCH WARRANT.

In the Court of

A. B., Plaintiff.

[*Name, description and address of plaintiff.*]

C. D., Defendant.

[*Name, description and address of defendant.*]

Whereas the said *A. B.* has brought a claim against you in this Court for (*here specify particulars of claim as given in the statement*) and has obtained a warrant for your arrest, you are hereby required, unless you admit the claim, to bring with you to the Court all documents on which you may intend to rely in support of your defence.

FORM G. (*See section* 121.)

FORM OF SECURITY BOND FOR APPEARANCE OF DEFENDANT.

Whereas *A. B.*, plaintiff, has instituted a suit in the Court of the Collector of against *C. D.*, defendant, and the said *C. D.* has been required to give security for his appearance at any time when called on while the suit is pending and until execution of the decree, I, *E. F.*, hereby declare myself surety for the said *C. D.'s* appearance as aforesaid, and in case of his making default in such appearance, I engage to pay any sum for the payment of which the said *C. D.* may be liable under the decree. *If the suit be for the delivery of papers or accounts specify some sum to be fixed by the Collector.*

FORM H. (*See section* 154.)

WRIT OF EXECUTION AGAINST THE PERSON.

A. B., Plaintiff.

C. D., Defendant.

To the Názir of the Court of the Collector of

Whereas the said *C. D.* was directed by a decree of this Court, under date the day of 187 , to pay to *A. B.* the sum of and for costs of suit, amounting to , and whereas the said *C. D.* has omitted to pay the same, you are hereby commanded to apprehend the said *C. D.*, and to bring him with all convenient speed before this Court to be dealt with according to law.

FORM I. (*See section* 154.)

WRIT OF EXECUTION AGAINST THE EFFECTS.

A. B., Plaintiff.
C. D., Defendant.

To the Názir of the Court of the Collector of

Whereas *C. D.* was directed by a decree of this Court under date the day of 187 , to pay to *A. B.* the sum of and for costs of suit, amounting to , and whereas the said *C. D.* has omitted to pay the same, you are hereby commanded to levy the said sum of , and the sum of for costs of executing this process, by seizure and sale of such moveable property of the said *C. D.* as (is described in the list annexed, and) [*if no list is furnished, these words to be omitted*] shall be pointed out to you by the judgment-creditor or his agent; and you are hereby ordered to sell such property of the said *C. D.*, on some convenient day, not being less than ten nor more than fifteen days from the day of seizure, unless the amount leviable as aforesaid shall be sooner paid; and you are hereby commanded to certify to me what you shall do by virtue of this warrant.

STATEMENT OF OBJECTS AND REASONS.

Proposals to modify Act X of 1859, so far as it concerns the North-Western Provinces, have for some years been before the Local Government. The Act had been passed but a short time when its provisions were very generally pronounced unsuitable to cultivating tenures in Upper India. It did not give sufficient protection to large classes of tenants who held land prescriptively at favourable rates, while numbers of tenants, who had not hitherto been declared to have rights of occupancy in their holdings, were suddenly proclaimed tenants with beneficial interests. The conditions under which the rent of tenants with a right of occupancy could be enhanced, though apparently clear and intelligible, have, in practice, been found inequitable. Again, after decree of enhancement, there was no limit or term protecting the tenant from a further suit. When the re-settlement of the Provinces commenced, other defects were brought to light. It was found that the standard of enhancement adopted under the Act had led to much injustice. The rates selected as exemplars were very generally not representative rates, and the area of comparison was too limited. But the main point which forced itself on the attention of the Government was the expediency of recognising the old cultivating classes, who had at one time or other, under British rule, possessed proprietary rights.

The problem before the Government was, while giving to the landlords full and fair opportunities of enhancement on all classes of tenants, to recognise the claims of the old cultivating bodies. It was necessary that these should be compelled to submit to the proprietors, and to pay an equitable rent for their old holdings. It was equally necessary to protect them from constant and irritating attempts at enhancement, and to admit the superiority of their claim to hold at favourable rents, as compared with the classes who, by Act X of 1859, have been vested with rights of occupancy.

It is proposed to provide, in the Land Revenue Bill, for the determination of the rights and rents of these ex-proprietary cultivators, at time of settlement, by the Settlement Officer. The present Bill lays down the proposed law in regard to the ordinary action of the Rent Courts, after settlement has been completed, and in cases arising after settlement. Tenants entitled to hold at privileged rates have been divided into four classes: namely, those who, or whose ancestors, have lost their proprietary rights since the introduction of the British Rule, or may hereafter lose them, by—

(1.) Sale for arrears of revenue;

(2.) Sale in execution of a decree of the Civil or Revenue Courts;

(3.) Private agreement, sale or mortgage;

(4.) Confiscation under Acts XI and XIV of 1857.

Every tenant who has held or cultivated land continuously for twelve years has been declared to have a right of occupancy, with certain specified exceptions, in the land so held or cultivated by him. Tenants at fixed rates have been recognized, as provided for by Act X of 1859; and all rights of occupancy are declared heritable, but not transferable, except when they are so by local custom.

The object of the framers of the Bill has been, while enforcing protection for the classes termed "privileged," to alter as little as possible the existing law in regard to rights of occupancy. Hence, though a creation of our own, the rule absolutely conferring such a right

after twelve years' cultivation has been maintained. Similarly, it has been sought to strengthen the position of the proprietor in his *seer* land, by retaining the provisions of the present law, which forbid the growth of occupancy rights in such lands; and by laying down, with greater precision than has hitherto been attempted, what shall be considered *sír* lands for the purposes of the Rent Act.

On this point there is a great conflict of opinion; and the definition of *sír*, embodied in the Bill, is a compromise of the views of contending parties. On the one hand, it is urged that *sír* lands were, under Native Rule, the lands held free of revenue by the proprietor, on consideration of his collecting and paying in the revenue: and that the Government having now given him a share of the rental assets, and assessed his *seer* lands, they can no longer be considered as retained exclusively for his maintenance, or as held on any special and distinctive tenure, but should be regarded as in all respects similar to all other lands—the proprietor's *sír* being in fact equivalent merely to the proprietor's actual cultivation. On the other hand, it is pointed out that, by the custom of the country, much land, though not actually in the proprietor's cultivation, is practically recognised as *seer*, both by proprietors and cultivators; that in such land cultivators, other than the proprietor, are sub-tenants, or tenants-at-will only; and that any law ignoring this would be opposed to local custom, would be extremely unjust to the proprietors, and would not be popular with any class.

The Bill is divided into six chapters.

Chapter I defines certain terms used in the Bill.

Chapter II deals with the Rights and Liabilities of Landlords and Tenants, including Leases, Enhancement, and Abatement of Rent, Commutation of Rent, Payment in kind, Ejectment, Compensation for Improvements made by Tenants, Deposits of Rent in the Government Treasury.

Chapter III deals with Distraint.

Chapter IV is entitled "Jurisdiction of Courts and Appeals," and embraces Suits cognizable under the Act, Suits by a landlord, Suits by and against Lambardárs, Co-sharers, and Muáfidárs, Appeals, Limitation of Suits, Applications and Appeals therefrom, and Jurisdiction of Courts.

Chapter V lays down the Procedure of the Rent Courts, and

Chapter VI, the final Chapter, the Procedure in Execution of Decree.

In Chapter II, after laying down the classes of tenants as above specified, it is provided that all tenants shall be entitled to leases, but that the leases of all tenants shall expire with the term of the Government settlement. This section re-enacts Act XVI of 1842, the repeal of which has led to much inconvenience, and has opened a door to collusive leases by the proprietor, on the eve of a re-settlement of the Government revenue. The provisions for enhancement or abatement of rent differ in several important points from those of the present law. Rents paid by tenants with right of occupancy at fixed rates will, as heretofore, not be liable to enhancement. The rent of tenants having a privileged right of occupancy will be liable to be raised to a rate which shall be two annas in the rupee less than the rent paid by tenants with right of occupancy only. This class, again, will be liable to enhancement only on the ground that the rent paid is below the prevailing rate payable by the same class of tenants, for land of a similar quality with similar advantages, in villages of a similar quality with similar advantages. Class, in the absence of local custom, is not to be held to include caste. Where a Settlement Officer has formed villages into circles for purposes of assessment, the standard villages shall be selected from such circle. In the absence of any such guide, the villages are to be selected from the same tahsil or from a tahsil immediately adjacent. The rents, whether of tenants holding at privileged rates, or tenants with a right of occupancy, are to be fixed for a term of years. The sections regarding commutation of rents in kind into money-rents do not need much notice. It will, however, be seen that power is now given only to tenants, not being tenants at will, or to landlords, to apply for commutation. The following sections provide for ejectment, and modify in some respects the present law. No ejectment of a tenant, or cancelment of a lease, shall be decreed on account of any breach of the lease which is not detrimental to the land leased, or which is not contrary to the purpose for which it was leased. With a view further to avoid forfeiture of leases as much as possible, the principle recognized by Act X of 1859, in the case of non-payment of rent, is extended to all breaches for which forfeiture may be incurred. Time is to be given to the tenant to remedy the injury or breach for which forfeiture has been decreed. Thus, a tenant who has planted trees in his field will first have time given him to uproot the trees, and will only be evicted should he fail to do so. A tenant with right of occupancy can be ejected for arrears only after notice served through a Court, and after the end of the agricultural year in which such arrears accrued. Provision is made for ejectment of tenants not having rights of occupancy, or whose leases have expired. Section 33 provides for applications to dispossess grantees of land exempt from rent. Much land so held became, twelve years ago, permanently rent-free, because landlords did not sue to resume it within the terms allowed by Act X of 1859. This was inequitable, landlords in many cases being wholly ignorant of the provision; and it is now sought to provide a remedy which, while securing the rent-free holding to the tenant, if he has so held it for fifty years, including two successions, gives the proprietor in all other cases,

at each fresh succession to the property, power to resume, within twelve years, land granted rent-free by his predecessors.

The sections regarding compensation are new. The grant of compensation is made a condition to ejectment, but not to enhancement; and the compensation is to be based on the *present value* of the improvements made by the tenant, and is to be given either in money or by the grant of a beneficial lease of land, or by both.

Chapter IV defines the suits which shall be heard under the Act; and excepting that suits against agents have been struck out as being of the nature of civil suits, the sections differ little from the present law. Appeals and applications follow, and do not need special notice. Under "Jurisdiction of Courts" are specified the cases under the Act with which the several classes of Collectors are empowered to deal: the more important being reserved to Collectors of the first class, while no Collectors, even of the first class, unless specially empowered, will have power to try suits for enhancement or abatement of rent, for resumption of rent-free grants, or determination of rent thereon, or suits for pattas or counterparts, and the determination of the rates of rent at which such pattas or counterparts are to be delivered.

The other chapters, namely—

III, relating to Distraint,

V, laying down the procedure of the Rent Courts, and

VI, relating to procedure in Execution of Decrees, re-enact, without alteration, the provisions of the existing law, as contained in Acts X of 1859 and XIV of 1863, and therefore need no comment.

SUPPLEMENT TO

The Gazette of India.

CALCUTTA, SATURDAY, FEBRUARY 22, 1873.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA,

HOME DEPARTMENT.

TREATMENT OF SNAKE-BITE BY MEANS OF THE INJECTION OF AMMONIA AND BY OTHER REMEDIES.

The following papers on the subject of the treatment of snake-bite are published for general information:—

In pages 283 to 296 is reprinted a paper read before the Medical Society of Victoria by Professor George B. Halford, M.D., in June 1870, and published in the Australian Medical Journal, together with an Appendix. Dr. Halford is an advocate of the treatment of snake-bite by injection of Ammonia.

The pages which follow contain the remarks (in some cases abstracted) of the Officers of the Indian Medical Service to whom copies of Dr. Halford's pamphlet were forwarded.

THE TREATMENT OF SNAKE-BITE IN VICTORIA:

BY GEORGE B. HALFORD, M. D.,

MEMBER OF THE ROYAL COLLEGE OF PHYSICIANS OF LONDON, PROFESSOR OF ANATOMY, PHYSIOLOGY, AND PATHOLOGY IN THE UNIVERSITY OF MELBOURNE.

[Being a paper read before the Medical Society of Victoria, June 1st 1870.]

MR. PRESIDENT AND GENTLEMEN,—When for this paper I first took pen in hand, my intention was to answer some false statements concerning me which appeared in the *Lancet* of May 26, and which were re-published in some of the daily papers of this city; but, as I reviewed the doings of the past eighteen months, I quite forgot the *Lancet* and the papers. Hence, Sir, I must apologise for saying nothing about them, and for changing the title of my paper from "A reply to the *Lancet*, &c.," to "The Treatment of Snake-bite in Victoria."

The 1st case in which liquor ammoniæ was injected, from my previous suggestions, into the human veins, occurred at Beechworth, 185 miles from Melbourne, in the practice of Dr. Dempster. A man had been bitten at 8 in the morning, and was insensible and apparently dying at noon. Dr. Dempster injected twelve minims of liq. ammoniæ fort., diluted with water, into the saphena vein. The patient woke up immediately, and presently recovered. As this is the first recorded case, it is as well to state that the remedy was used as a *dernier ressort*. Had Dr. Dempster any probability of saving his patient by other means, he would not have

injected ammonia; but having done so, and with immediately perceptible good effects, he attributed the man's recovery to the injection of ammonia. Dr. Dempster's account of this case at once attracted the attention of the medical profession of this colony.

The 2nd case was in the practice of Mr. Arnold, of Elsternwick, who, assisted by Mr. A'Beckett, of St. Kilda, near Melbourne, failed to arrest by ordinary means the progress of the poisoning. When the man was insensible to sound and light, I at their request injected thirty minims of liquor ammoniæ, B. P. sp. gr. ·959, into the superficial radial vein. The patient at once roused, and conversed with those about him. The species of snake was *Hoplocephalus superbus.*

The 3rd case is recorded in the New South Wales papers, but I have failed in getting full particulars, Dr. Irwin, the medical practitioner, having since died.

The 4th case—a man was bitten at Moyston, 146 miles from Melbourne. The patient was comatose, and fast sinking. Liquor ammoniæ was injected into the basilic vein, and recovery followed. In a letter to me, Dr. O'Grady states that, "but for injection of ammonia, the man would have died."

The 5th case—a girl, aged 14. The symptoms were total paralysis, complete stupor. Fifteen minims of liquor ammoniæ were injected into the median vein by Mr. Barnett, of Smythesdale, 107 miles from Melbourne, and the patient was roused in a few minutes, and recovered. The species of snake was *Hoplocephalus curtus.*

The 6th case occurred at Mornington, 35 miles from Melbourne. The boy was insensible. Mr. Lane injected thirty minims of liquor ammoniæ into the basilic vein. The previously dilated and insensible pupils immediately contracted, and consciousness returned, and recovery followed.

The 7th case—a child, aged nine years,—was perfectly insensible; pupils fixed and dilated. This happened at Seymour, 64 miles from Melbourne. Diluted ammonia was injected into a vein at the bend of the elbow, by Messrs. Henshall and Stillman, and the child roused immediately, and recovered in a few hours.

Case 8 is a somewhat doubtful case, the child, aged 9 years, having been brought to the hospital at Kyneton, 56 miles from Melbourne, 27 hours after the accident. Five minims of liquor ammoniæ fort., with twenty-five of warm water, were injected into the basilic vein. Before the injection the pulse was intermitting frequently, the extremities cold, and the pupils dilated and insensible to light; there was also locked-jaw. Four hours after, a similar dose was again injected. No apparent effect followed the use of the remedy, and the child died, remaining perfectly sensible to the last.

Case 9.—Dr. Rae, of Bacchus Marsh, 34 miles from Melbourne, injected thirty minims of liquor ammoniæ and thirty of water into the basilic vein of a man who was perfectly insensible, cold, and, according to the Doctor's belief, on the point of dying. The patient roused in one minute after the injection, and in less than half-an-hour walked away, recovered.

Case 10.—Symptoms in this case not severe; more like those of drunkenness. Dr. Starke, of Creswick, 109 miles from Melbourne, injected ammonia into a vein, and the boy recovered unusually quickly.

Case 11.—In which a man was believed to be sinking, having been bitten twice by an infuriated brown snake *(Diemenia superciliosa)*, was roused in one minute by an injection of ammonia into the vein; but the bitten parts not having been excised, and a ligature loosened after the supposed recovery, all the worst symptoms returned, and a repetition of the injection five times was required in order to thoroughly restore the patient. This occurred in the practice of Dr. Dowling, of Talbot, 131 miles from Melbourne.

Case 12.—A woman was bitten at Tarraville, in Gipps Land, 207 miles from Melbourne. She was described by Dr. Eccles as cold, pulseless, insensible, and on the point of dying. The veins were twice injected with liquor ammoniæ, and consciousness returned in twenty minutes. The circulation was restored immediately upon the injection.

Case 13.—The only interest about this case, which occurred at Taradale, 67 miles from Melbourne, is that ammonia was injected, by Drs. Crooke and Hutchison, both into the vein and subcutaneously; and that after the circulation had been restored by the injection, she roused and recovered.

Case 14.—In the practice of Dr. Langford, of the Kyneton hospital, in which thirty-six minims of liquor ammoniæ, B. P. sp. gr. ·959, were injected into a vein of the fore-arm of a woman, who was totally paralysed, insensible, and in a most alarming condition. She roused immediately, and walked about the ward without assistance.

Case 15.—A boy, aged 12, was bitten at Devil's Creek, and became pulseless, comatose, and totally helpless; the pupils dilated and insensible to light. Six drops of liquor ammoniæ fortissimus, with two drachms of water, were injected into a vein of the fore-arm. Consciousness at once returned, the pulse rose, and recovery ensued. My authorities for this case are the boy's own father, Mr. Richardson, and Mr. Walpole.

Case 16.—A man was brought to Dr. Rae, of Colac, 92 miles from Melbourne. He had been bitten at 12-30 P. M., and at 4-30 P. M. was comatose, the pupils were dilated and insensible to light, and the extremities cold. Ammonia of a gradually increasing strength was injected ten different times into a vein in each arm, until one drachm and a half of liquor ammoniæ fortissimus had been used. The pulse and breathing improved, the pupils contracted, the jaw, which had fallen, drew up, and, to the astonishment of everybody, he walked away in two hours.

Case 17.—A woman was bitten at Bambra, and soon became drowsy and helpless. On arriving at Winchelsea, a distance of 14 miles, she was completely comatose, and was carried into the house. The pupils were fixed, dilated, and insensible to light. Dr. Meyler injected ten minims of liquor ammoniæ fortissimus, mixed with fifty of water, into the cephalic vein. During the operation she was quite insensible. Before half a minute had elapsed, she roused up into consciousness, the pulse became fuller, and the temperature of the body sensibly increased. In a quarter of an hour she began to eat bread and butter, and from that time rapidly recovered.

Case 18.—A woman was bitten at Tumbacumba, New South Wales, between 9 and 10 A. M., and having had ammonia injected under the skin, was at 5-30 P. M. quite helpless, pale, and nearly insensible. Twelve minims of liquor ammoniæ fortissimus, mixed with twenty-four of water, were injected into a vein of the arm previously laid bare. Half was first injected, and the remainder after the lapse of ten minutes. It had an almost instantaneous and magical effect, consciousness returning, with free use of the muscles, succeeded by cheerfulness. By-and-bye the bad symptoms returned, and the injection was twice repeated and recovery followed. She had no recollection of anything that occurred from the time of stupor setting in, at noon, till near midnight. My authority for this case is Mr. R. D. Mathews, whose hypodermic syringe was used.

Case 19 has been communicated to me by Dr. Bennett, of Albury, 207 miles from Melbourne. A child, aged 7 years, was supposed to have been bitten by a snake in the morning. No particular symptoms occurred till 7-30 P. M. Drs. Bennett and Keating found him pale, the skin cold and clammy, the pulse 120, the pupils widely dilated, very drowsy but easily aroused, and able to answer any question very sensibly. Liquor ammoniæ was injected into the basilic vein. The child rallied, and was put to bed quite easy and comfortable, pulse 90, skin warm. The next morning the neck, cheeks, and tongue appeared swollen; these symptoms increased till about 1 P. M. He now refused to swallow, the pulse rose to 130, the pupils became again widely dilated, the extremities cold, and drowsiness constant. Injections into the vein were now made four times at intervals of a quarter of an hour each. The child improved very much; his colour returned; he could drink easily; the pupils were less dilated; he became quite sensible, now and again talking voluntarily to his mother. Dr. Bennett adds, "I felt quite satisfied, and left him for a couple of hours, during which time Dr. Keating saw him, and considered him very much better. Soon after 10-30 I found him greatly changed; pulse 160, very weak. I wished to inject again, but the mother would not allow it, and I have only to regret I did not enforce it." Soon afterwards the child died.

The 20th case is that of a child, six and a half years old, bitten by a snake at Dandenong, 19 miles from Melbourne. Before reaching Dr. Phillips,' at 3 P M., neat brandy was given to him every five minutes, so that half a pint was consumed. On arriving, the pupils were widely dilated, the pulse very small, very irregular. There was great disposition to sleep, and great intolerance of the efforts either to awaken him or to give brandy; but a consciousness, when aroused, very different from a state of intoxication. Two ounces more brandy were given, but no improvement following, diluted ammonia was injected into the cephalic vein, and repeated. Not all of the ammonia passed directly into the vein, and the solution was of uncertain strength, none so strong as it should be. The child also lost some blood, as the vein was opened with a lancet. However, the child died, the *post mortem* examination revealing none of the ordinary appearances of snake-bite, but great congestion of the brain, which it is not improbable was caused by the brandy. Although in my opinion a case of snake-poison, it can scarcely be said to have been treated on my plan alone.

Of the foregoing twenty cases, three then have ended fatally, a child being in each case the sufferer.

In Dr. Langford's case, No. 8, twenty-seven hours had elapsed since the child had been bitten, and before he was brought to the hospital.

In Dr. Bennett's case, the child had apparently recovered from the coma, difficulty of swallowing, and collapse, under the treatment which, to the Doctor's regret, was stopped by the mother. We have seen in cases Nos. 11, 16, and 18, that the amount and strength of the ammonia must be increased in proportion to the severity of the case.

Case 20 was also a child, and possibly beyond any treatment; but cases 7 and 12 were also children of the ages of 9 and 12, and yet recovered.

Of the seventeen successful cases, it may be said that they would have recovered had nothing at all been done. No one can deny this; but I have been at the pains of inquiring of those who had charge of the patients, and this is their reply:—

Dr. Dempster believes the man would soon have died.

Drs. Arnold, A'Beckett, and Wooldridge, the same.

A similar opinion was expressed by Drs. O'Grady, Barnett, and Lane, Dr. Rae (of Bacchus Marsh), Dr. Rae (of Colac), Dr. Dowling, Mr. Eccles, Messrs. Henshall and Stillman, Dr. Langford, &c., of the cases attended by them.

I pass now to the consideration of the state of a person dangerously bitten by a snake, and to the effect of ammonia when injected into the circulation. And here, in addition to a mere statement of facts, I must pass into hypothesis.

In fatal cases of snake-poisoning, whether in this colony, India, America, or Africa, it may be stated, as a rule, with few exceptions, that the blood loses its power of coagulation, and becomes thinner and poorer; its colour resembling the most deoxidised form of Stok's cruorine.

This blood, however, after death, greedily absorbs oxygen, when exposed to the air, and it absorbs it more than unpoisoned blood. Since my attention was first directed to this subject, I have met with Dr. Harley's observations on the influence of poisons on the respiratory gases. In a dog poisoned by a puff-adder, the blood absorbed two per cent. more of oxygen than healthy blood similarly treated. Now, as I asked in my first paper on this subject, why, when no impediment exists to the access of oxygen, should the blood become so gradually deoxodised in people bitten by snakes; excepting on the supposition that something had been added to the blood which prevented those actions and re-actions between blood and oxygen upon which the manifestations of life depend? The fluid state of the blood is also in harmony with deficient oxidation, and yet there is no hindrance to respiration; no reason, like in drowning, why oxygen should not reach the blood; it does reach, but in the presence of the serpent's poison, its life-sustaining power is withheld, unless some other agent be added to the blood to counteract it. The deficiency of fibrine and of oxygen I formerly explained on the supposition of the growth of foreign cells within the blood. I now modify that view, and explain the facts differently. The facts are still the same, but their interpretation different. The large cells are strangely altered, white corpuscles, greatly swollen, and certainly increased in quantity; the increase in size apparently keeping pace with the fluidity of the blood, although such changes do not occur in white corpuscles simply placed in water. This change in the corpuscles commences during life, but goes on indefinitely after death, until all the granular matter seen at first in the blood becomes converted into cells. Their average diameter is $\frac{1}{1700}$ inch. The nucleus is round, or kidney-shaped, and the outer cell-wall so extremely delicate as to escape the notice of most observers, until their attention is repeatedly directed to it; in addition, the application of magenta reveals a minute colored spot, like a ruby, at some part of the circumference, resembling the macula seen in the *red* corpuscles of all vertebrates, as pointed out by Roberts. But this condition of white cell is common to nearly all fluid blood of dogs and cats I have since examined. Where especially it is deficient in fibrine, the cells become very evident after death. But when the blood is rich in fibrine, the corpuscles, being less at liberty, retain their normal shapes. In fact, they swell in serum minus fibrine; on the contrary, in leucocythæmia, where both white cells and fibrine are in excess, these changes do not occur. (*See Appendix*).

I am still inclined, however, to refer all these changes in the blood to the introduction of germinal matter* from the serpent's glands, and all the symptoms to such changes. To explain: there is little, if any, difference, chemically, between starch and sugar; but, physically, they are very different; little difference, chemically, between fibrine and albumen; physically, they are very different. But both starch and fibrine are rendered soluble by the addition of minute particles of germinal matter: in the first case, from the salivary glands; in the second, from the stomach. True, with the latter is combined an acid, but without the pepsine cells no digestion takes place, and, what is very remarkable, a very minute quantity is able to convert a very large quantity of fibrine into albumen, so long as the mixture remains acid; the pepsine cells require no renewal, since, for want of a better explanation, they are said, by their mere presence, to determine the conversion. A little spittle from a man's mouth will change starch into sugar within one minute. These things being true, is it unreasonable to claim for the secretion of another closely allied gland to the salivary, an equal power in another direction? What the changes produced in the blood are we do not yet fully know; but that which in healthy blood is called fibrine is diminished, digested, if you will, in the presence of serpent's venom. If the quantity of venom entering the circulation is great, the changes are greater, and the chances of recovery less. If the animal is small, his chances are still less; if it depends much upon oxygen with a naturally highly fibrinous blood, rapid circulation and absorption, it soon falls a victim. Thus, a bitten bird falls in a few minutes from a twig to which it has hopped, to the waiting reptile beneath. Hence the old stories of snakes charming birds. If the animal be in a great degree indifferent to oxygen, *i. e.*, can live for a long time under water, in carbonic acid gas, as a reptile or hybernating animal, with correspondingly slow circulation and absorption, its chances of recovery are greater; it is naturally more indifferent to the presence of venom, and the probability of absorption from a wound is much less.

But, it may be said, the symptoms of snake-poisoning come on too soon for such changes in the blood to be produced; but recollect the nearly instantaneous action of ptyaline. Again, if venom enter a vein, one minute will certainly suffice for its entire circulation through the body. Estimating the quantity of blood in the body as 12 lbs., and the contents of the left ventricle as 3 ozs., then the whole mass of the blood would be circulated by 64 heart-beats; and, taking the normal beats at 75 per minute, this quantity of blood would pass through the heart, carrying with it the imported venom, in 51 seconds. In June 1866, I showed by experiments that dyes, such as magenta, may be absorbed from the serous cavities, peritoneum, and pleura, and from the subcutaneous connective tissue, and traverse the circulation, and be excreted by the kidneys, and ejected by the bladder, under five minutes. The experiments were made on dogs and fowls. Lately, Drs. Macnamara and Haughton have found iodine pass from the tunica vaginalis testis, and to be discharged by the bladder in four minutes; therefore, in man symptoms of poisoning may certainly be possible in five minutes, in birds in half that time.

Believing, then, that in the blood itself the chemical changes occur which have their resultants in voluntary and reflex acts (will, motion), and in animal heat, let us turn to the condition of our snake-bitten patient. He is usually pale, with a great tendency to sleep, the heart's

* The germinal matter consists of nuclei $\frac{1}{400}$ inch diameter. The fluid is either slightly acid or neutral.

action is feeble, and in some cases deep coma ensues, from which it is difficult to arouse him; in fact, the countenance is like that of an epileptic after the convulsion. Do not the pallor and drowsiness indicate an anæmic state of the brain, or rather a diminution of the arterial capacity and extension of the venous surface analogous to that which takes place in a less degree in ordinary sleep, according to the researches of Mr. Durham? In all of the cases brought before you this evening, the functions of the cerebral ganglia and higher sensorium were completely in abeyance, or for a time extinct. Dead the sufferers were to both sound and light, and to this hour they have no knowledge of the injections to which they were subjected. Now it is worthy of notice, that recent views ascribe the phenomenon of sleep to the using up of the previously stored-up oxygen in the blood, analogous to the views I propounded in June 1867, for the accession of sleep in cases of snake-poisoning.

There is yet another symptom of snake-poisoning, which deserves the greatest consideration; I allude to the condition of the pupil. It is that of extreme dilatation, depending, as I believe, upon the condition of the central optic ganglia. Light is pouring into the eye-ball, and yet no reflex acts are produced. An exactly similar condition affects the auditory ganglia, vibration after vibration shocks the tympanum, each falling silently upon the central ganglia.

Sometimes this condition of the sensory ganglia, including probably the corpora striata, optic thalami, and corpora quadrigemina, exists whilst the higher cerebral ganglia either remain a long time unaffected or escape entirely; in the latter case, recovery resulting; in the former, constituting a most dangerous state, and one that should make the physician very anxious, more especially when accompanied by swelling or pain in the neck. From the details of cases I have read, I should fear these symptoms more than the deepest coma. I was very pleased to see, however, that in Dr. Bennett's case, 19, the symptoms yielded to the injections of ammonia. Our esteemed fellow-citizen, Mr. Clement Hodgkinson, thus records in the *Herald* his own experiences, after having been bitten in New South Wales, showing the dullness, if such a term may be used, of the central, and immunity of the higher, ganglia. He says:—"There was insensibility to the effect of pungent salts when held to the nostrils, and to pinches inflicted on me by some of the lookers-on, who desired to thereby prevent me from falling into a comatose condition. There was also deprivation of sight. About two hours after I was bitten, this symptom attained its greatest intensity, and I was then scarcely able to distinguish the features of the persons near me." Mr. Hodgkinson, we all know, is no ordinary man, and I have no doubt his intellectual activity, or will, contributed to save him. Poor Mr. Drummond was conscious to the last, sight and feeling having been for some time deficient. His force of character contributed greatly to prolong his life. I may be better understood, if I contrast them with men of an opposite class. The Hindoos, with will so pliant, or character so impressible, as to be drawn into the mesmeric state with ease; bitten, they soon die, yielding without an effort to avoid their fate.

The treatment that I had recommended is that of injecting dilute ammonia, say, at the least, 30 minims of the liquor ammoniæ, B. P. sp. gr. ·959 into a superficial vein. If properly injected, the vein having been first exposed, and its coats pierced with the nozzle of the hypodermic syringe, the alkali soon reaches the heart, vigorous contractions follow, blood that was recently stagnating in the capillaries passes on, cut vessels, which had ceased bleeding, bleed afresh, the temperature rises, the colour improves, the muscles contract, the sensory ganglia respond to external impressions, the nearly or quite inanimate mass is now animate. Light and sound are perceived, the faces of friends are recognised. This is no exaggerated picture, but such as I have myself witnessed in dogs (the central organ being exposed, and artificial respiration kept for an hour) recovering instantly from the stupor of chloroform. I have also repeatedly pierced the heart itself, and there injected the ammonia, with similar good and no bad effects. I have witnessed the same restoration to consciousness in the station-master at Elsternwick (Case No. 2), and can call to your recollection the same startling assertions from all parts of the colony. Thus, Dr. Dempster's words are:—"It affected him at once; he woke up and became sensible." Dr. Barnett says:—"In a few minutes she began to recover from the stupor, and became so excited as to be held down on her bed." In Mr. Lane's case, verified by my friend Professor Wilson, the pupils began to contract, and consciousness returned in a few seconds, certainly under a minute. Dr. Rae, of Bacchus Marsh, assured me he thought his patient dying, and yet—not believing then in this remedy—he injected, and within a minute consciousness returned, and in about ten minutes the man walked into the open air unassisted. Dr. Longford says:—"Having used the injection three times without effect in the case of the boy Piggins, I used it in this case (No. 14) with the full expectation of failure, and was never more surprised than when I saw my collapsed patient rise up and walk away." Mr. Dallimore, writing to the *Age*, about Dr. Dowling's case, says:—"When I went to see the man while under treatment, I was quite as sceptical of the ammoniacal injection as the contributor to the *Medical Gazette* appears to be; but its action is so startling, I may say so magical, that if a man on seeing it could not be convinced, he must be singularly constituted." In Dr. Meyler's case, the woman being in a comatose state, was roused to consciousness in half a minute. Dr. Meyler has since written to me on this subject; his words are:—"The treatment in Mrs. Parker's case was not only decidedly successful, but exceeded my most anxious hopes, and finally removed any lurking doubts that may have lingered in my mind," and so on of others. But let us bestow the short time that is left, for the paper is already too long, upon considering the *modus operandi* of the remedy.

The remedy, then, is ammoniacal gas in solution, an old and favourite one for snake-bite the world over; but instead of putting it into a stomach, the stagnating vessels of which can-

not absorb—for all the brandy and ammonia poor Mr. Drummond took were afterwards found in the stomach and intestines, and so no doubt of others—I inject it into the blood itself; the gas, experiencing a rise of temperature, expands, and presently is in direct contact with every tissue in the body, the capillary walls alone intervening—in fact, it becomes both a central and peripheral stimulus, so powerful that as yet no soporific tendency has counteracted it; none of the comatose states of snake-poisoning have failed to be removed by it; *but, as its power is expended, fresh supplies must be brought.* It does not act as a transitory stimulus to the heart; it maintains vigorous pulsations for at least twenty minutes or more, frequently requiring no repetition. Its presence in the nervous system and muscles is shown by the resulting animation; there is also a rise of temperature. It is presumable, therefore, that oxidation is going on in the blood, where before there was little or none; that the abnormal molecular changes going on in the blood are arrested; that electrical action results; and that the capillaries of the muscular system, the whole body over, are inducing to form heat or excite motion—the wheel of life is turning again, so lately on the point of stopping—for the muscles are now recognized as nothing but machines for the conversion of heat into motion; the determining and directing power residing in the nerve tissue; the fuel in the blood. It might be asked, Is it possible that the ammoniacal gas, under the influence of electric forces within the body, may be decomposed, that its hydrogen and the active oxygen in the blood may be condensed to form water? If so, the quantity of hydrogen contained in one half-drachm syringe would yield heat which, by transformation into muscular energy, would enable the patient to raise his own weight his own height. But, indeed, we know little of the molecular actions and re-actions taking place in living organisms, and it is difficult to say what is the destiny of ammonia thus introduced into the blood. But it is also as difficult to trace its functions in, and depositions from, the sap of plants; and yet we know that it stands in as important a relation to both plants and animals as heat itself. It is the source of all the nitrogenous elements of both, the re-actions between which and the external forces constitute life. Thus much, however, we can say, *viz.*, that just as the sounds emanating from a musical box are the result of a force communicated from without, so are the signs of animation proceeding from a patient previously insensible, as in these cases, the result of a force communicated from without, potential in the syringe, active in the body.

The lessons we have learnt from those who have used this remedy, and have sent their cases for publication to me, are that a good battle must sometimes be maintained ere recovery ensues. As with every other remedy, the amount required must depend, be judged of, by the effect produced; the great fear is that too little, rather than too much, will be injected. *The greatest care should be used that none of the ammonia is spilt, or sloughing will follow;* but if the canula of the syringe be properly introduced, and the injection be forcibly made, so as to mix the ammonia immediately with the blood, I believe none will follow. A little inflammation may result, but what of that if the patient be saved?

As symptoms of recovery instantaneously follow the use of ammonia in this way, we are saved the prolonged anxiety attending former treatments.

Objections have been made to the value of this treatment, on the supposition that Australian snakes are not venomous, or at least not dangerously so. Now, the cases brought forward to-night are a sufficient refutation of such errors. I find, from public records, that in some instances our snakes are as dangerous as those of India, and certainly quite as deadly as the rattlesnake. Thus, Underwood, a snake-charmer, was bitten at 7-30 P. M., and was dead by 8-3 P. M.; this is in one hour. Cartwright, another exhibitor of snakes, was bitten some time after 3 P. M.; by 3-30 P. M. he was insensible, with fixed, dilated pupils, and at 4 o'clock was dead; that is, within one hour. One case has been communicated to me by Mr. Casey, Surgeon, of Melbourne, of death within half-an-hour. There are many cases on record of death considerably within twelve hours, and to live beyond twenty-four hours is rare—that is, when the case ends fatally. And, indeed, except in size and length of fangs and quantity of poison, the cobra differs little from our tiger-snake (*Hoplocephalus curtus*), which, like the cobra, erects itself, dilates the neck, and, in confinement or at bay, is very vicious. *Hoplocephalus superbus*, another beautiful species, is exceedingly dangerous. This is popularly called the diamond-snake, just as in many parts the tiger-snake is called the carpet-snake; but both the true diamond and carpet snakes are harmless. Next, we have the common brown-snake (*Diemenia superciliosa*), which, although it does not expand the neck like the cobra, is yet, according to Professor M'Coy, in size and structural affinity closely allied to it. The bite is very deadly. The black-snake (*Pseudechis porpyriacus*) is also very common in some parts and very deadly. It, according to Mr. Gerard Kreft, of Sydney, "raises about two feet of its body off the ground, flattens out the neck like a cobra, and then darts at its prey or enemy." The same authority states that animals, such as dogs and goats, die usually within one hour from the bite of any of the above species. I have experimented chiefly with the tiger-snake (*Hoplocephalus curtus*) and have obtained the same results; but in one instance one of my tiger-snakes killed a dog in seven minutes. I have inoculated with the poison of all but the black-snake, and find them equally deadly.

Further, I feel certain, from my own actual experiments, that equal amounts of poison from either American, Indian, or Australian snakes are equally pernicious, if introduced into the blood. Thanks to Dr. Weir Mitchell, of Philadelphia, whose essay* should be read by all students of this subject; I have examined minutely rattlesnake poison. I find tiger-snake

* "Researches upon the Poison of the Rattlesnake"—Smithsonian Contributions to Knowledge, vol. xii.

poison exactly like it, acting similarly in the presence of the following agents, *viz.*, nitric acid, hydrochloric acid, sulphuric acid, acetic acid, tannic acid, ammonia, and alcohol. Both cobra and rattlesnake poisons act similarly on the blood; the same fluidity results, with the same *post mortem* production of multitudes of large and maculated white cells. This I have repeatedly verified; and if others cannot see these enlarged cells, it is no fault of mine. I have shown them to many who could not see them, while they were all the time under their eye, and yet many were good microscopists. I find also that, by inoculation, dogs die as rapidly from tiger-snake poison as from either of the other two; but the local symptoms are from the cobra and rattlesnake bites severer than from that of our Australian snakes. The general symptoms, however, are the same. Of the man bitten a few years past by a large cobra in Melbourne, Mr. Fitzgerald says:—"Five hours after the accident, I found him in a state of stupor; pupils dilated; the extremities and body were colder than natural; the power of speech was lost." Now, these are the symptoms of nearly all the cases detailed this evening, which symptoms were dissipated immediately on the injection of ammonia. I do not say they will be similarly dissipated in *every case* of cobra poisoning, or even of tiger-snake poisoning; but in the majority of cases it may be expected that they will, for what has happened seventeen times in Victoria, may certainly happen as many times again, or oftener, in India or in America. As yet I have seen no account of the injection of ammonia into the veins of men in India. In London, Dr. Tyler Smith used it with the best effects in puerperal fever (blood-poisoning).

Such, Sir, are the observations I have found it my duty to address to this Society. Much more I might have said, but I have limited myself principally to a detail of cases which, I believe, cannot be controverted; and I have to thank those gentlemen who have so kindly and fully communicated to me facts upon which this paper is based, and I sincerely hope, when this is read by them in their scattered and isolated districts, it may be to them a satisfaction.

In the discussion which followed,

The PRESIDENT said, that, for some reason or other, Professor Halford had scarcely alluded to the article in the *Lancet*, in reply to which, as they had been informed by circular, he had prepared his paper. He, the President, nevertheless, considered it his duty to make a few remarks in reference to the unjust manner in which Professor Halford had been treated by the leading medical journal of England. He was, indeed, unable to understand how a scientific organ of such standing as the *Lancet* should have admitted into its columns statements which it must have known, or ought to have known, to have been untrue from the beginning to end. The Professor was accused of having taken credit for two discoveries, one of which, *viz.*, ammonia, as an antidote to snake-bite, was no discovery at all, and the other of which (the method of treatment by injection) was one of the oldest methods of therapeutics. Professor Halford, however, had never asserted that ammonia was an antidote in snake-poisoning, in a chemical sense of the word, but he simply argued that, if ammonia had really a beneficial effect in these cases when taken by the mouth, as had been generally assumed, it would exert its influence upon the system much more quickly, and in a much higher degree, when introduced directly into the circulation. He, consequently, instituted a series of experiments on animals, and it was on the strength of the satisfactory results he obtained that a number of independent medical men, whose veracity nobody had a right to doubt, injected ammonia into the veins of patients suffering from snake-bite. Every one, without prejudice, who read the cases as reported by these gentlemen, could but arrive at the one conclusion, that in most of the cases life had been saved through the agency of the ammonia injections. They knew very well that transfusion of blood had been practised occasionally, and that water containing the saline constituents of the blood had been injected in cholera; but, hitherto, it was always understood that the injection of remedies directly into the circulation was fraught with the greatest danger. He, the President, was not aware that, previous to Professor Halford's experiments, ammonia had ever been injected into the veins of the human subject; that this, however, could be done not only with impunity, but in poisoning from the bite of snakes indigenous to these colonies, with most favourable results, was a fact for the knowledge of which society was indebted to Professor Halford. In the case of prussic acid poisoning, moreover, which occurred the previous week, the remarkable effect of the ammonia, although injected only a considerable time after the poison had been taken, strongly pointed to this mode of treatment in all those cases of poisoning in which stimulants were indicated.

MR. LANE said,—It is not my intention, Mr. President, to make any remarks on the nature of the action of ammonia when injected into the circulation.

Nevertheless, as one of the cases of snake-poisoning mentioned in Professor Halford's paper came under my care for treatment, I may be permitted to state to this Society a few particulars respecting it.

When brought to my house, four hours after the injury, the boy was completely insensible to the almost brutal treatment of his attendants. He was placed on a sofa in this insensible condition. The eyes were fixed, and the pupils considerably dilated. Two punctures were visible in the left leg, from each of which blood had been oozing. I now injected ten minims of the liquor ammoniæ fort., mixed with twenty of water. In ten minutes he answered questions, and in half-an-hour he walked into an adjoining room, and completely recovered.

Now, Sir, I can well understand that persons not belonging to the profession, on seeing a man dying (as they supposed), and in ten minutes hearing that man answer questions when put to him, and in another twenty minutes walking into an adjoining room, may well be excused if they stagger at their previous belief in the existence of the bite. But, on the other hand, when members of the medical profession (men trained to recognize symptoms and to

attach to them their value), after witnessing such a condition, and seeing for themselves the subsequent effective restoration by the injected ammonia, deny and denounce its efficiency, I simply should doubt their veracity; for I should consider that they were influenced by premeditated prejudice or determined obstinacy.

Dr. Thomas said that Professor Halford had adduced a sufficient number of cases to establish the fact that ammonia may be injected into the veins of man and the lower animals with impunity, and, in cases of snake-bite, with the advantage of saving life. Transfusion, we all knew, was not new; no one pretended it was so—it had been practised for ages. He (Dr. T.) had, some twenty-five years ago, performed it in the case of a lady who was sinking from hæmorrhage. Some blood of an attendant was injected into the patient's vein. She rallied for a short time, but expired before the lapse of many hours.

Nearly all the cases recorded by Professor Halford were those of patients under the care of different medical men, living far and in opposite directions from each other. The results of the injection were in each case of great similarity, and were of great value. Such testimony was not that of a man "riding his hobby," but of a number of skilled, intelligent practitioners.

He was glad that Professor Halford was now of opinion that the globules, which he formerly considered as foreign cells, were white blood-corpuscles, altered in size according to the density of the fluid in which they floated. That was his (Dr. T.'s) opinion when he first examined the blood of dogs which had died from snake-poison, and he expressed it at the meeti[illegible] of the Royal Society, when the Professor read his first paper on the subject.

There was one remark he should wish to make. It seemed to him that snakes were m[illegible] numerous now, and their bite more fatal, than they were many years ago; for during [illegible] practice, extending from 1839 to 1852, which was very extensive, he was not aware, at [illegible] very outside, of more than half-a-dozen cases, and not one had a fatal termination. [illegible] whom he attended, he recommended stiff and frequent doses of brandy until intoxic[illegible] induced. Could the increase be attributed to the extinction of the black race, and [illegible] appearance of the laughing-jackass from the populated districts.

He, for one, was not aware that ammonia had been injected into the vein[illegible] Professor had done so, and he thought that great credit was due to Professor [illegible] having instituted a theory which so many medical men had reduced so successfully [illegible] Soubeiran, in 1832, discovered chloroform, but Professor Simpson discovered [illegible] properties. Ammonia had long ago been discovered, but only Professor Hal[illegible] that it could be injected into the blood, and that, when so applied, it countera[illegible] of snake-poisoning. Simpson everywhere ranked as a discoverer, and so must [illegible]

Dr. McMillan remarked that, during the reading of this interesting p[illegible] struck by the remarkable degree of *uniformity* in the results obtained b[illegible] ammonia into the veins in cases of snake-bite; and he considered that this [illegible] enhanced the value of the testimony, and should go far to convince, even [illegible] as to the efficacy of this remedy when applied in the manner proposed by [illegible] Dr. McMillan further remarked that, in connection with this subject, it might be well to estimate more accurately the therapeutic value of alcoholic stimulants when exhibited as a remedy in snake-bite. It had been shown by Dr. Halford that when the circulation was languid, and the nervous system prostrated by the shock, that alcoholic fluids were not absorbed, but that they remained accumulated in the stomach and intestines. Hitherto, people had been accustomed to trust very much to stimulants of this class; and if it could be shown that they possessed comparatively little value in arresting the fatal tendency of the snake virus, it might lead to a more prompt and general adoption of that which had alone proved worthy of confidence as a remedy in snake-bite. We all remembered that in our class-teachings on this subject, much stress used to be laid on the importance of *topical* treatment. We were told to excise the part; to make an incision, and cause the current of blood to flow outwards, that it might carry the poison with it. We were even told that we might apply our mouths and suck the part; with the same end in view, to apply ammonia to the wound, nitrate of silver, &c. It appeared, however, from the evidence adduced in this paper, as well as from the numerous experiments made by Professor Halford, that the poison entered the current of the circulation with such rapidity as to render all local treatment vain and useless.

In reply, Professor Halford stated that he could not enter into controversy with anonymous writers who were either untruthful or ignorant. He had neither the time nor the inclination to do so. The subject was one in which no disguise was required. A great series of experiments on apparently dying people had been done all over the colony at his suggestion, and with remarkable success. He had felt all this time on his trial; for had the results been different—had death in any one case been attributable to the injection of ammonia—there would not have been wanting those to upbraid him. Nothing but a continued series of experiments had led him to suggest this treatment, and he had done it conscientiously, and, therefore, fearlessly; at the same time, he was aware that it had struck the majority of medical men as a most dangerous and unwarrantable proceeding. To throw into a vein a fluid too caustic to spill upon the tissues or put into the mouth seemed madness. He had never said that ammonia destroyed the poison; on the contrary, he had long ago stated in the *Argus* that, when the strongest ammonia was added to snake-poison, and the mixture injected beneath the skin of a dog, all the symptoms of snake-poisoning resulted as regularly as if the poison had been untouched. Dr. Weir Mitchell had previously found the same to be true of the poison of a rattlesnake.

As regarded the exhibition of spirits, he did not believe that, when the dose of poison was large, they *could* act beneficially. They were either rejected, *i. e.*, vomited, or, on account of the depressed condition of the circulation, not absorbed. He had heard many say, "Give spirits so as to make the patient drunk; if you can do this, he is saved; if you cannot, he will die." To his mind, this proved that, in the case of patients getting drunk, the spirits were absorbed, and therefore the cases not so dangerous from the commencement, and doubtless the spirits were beneficial. But when the patient could not be made drunk, the original danger was greater, and no absorption of the spirits took place. It had been in such cases that the injection of ammonia was so serviceable, urging on the stagnating streams of life, and leading to recovery. Dr. McMillan had somewhat misunderstood him as to the value of excision. True, if the poison had entered the circulation, little or no good could result from local treatment; but in the majority of cases, time elapsed before the virus entered the blood, for all punctures were not directly into the veins. Therefore, in all cases, cut out the part at once, rather than neglect it. A glance at Dr. Dowling's case, and at many others which were recorded, would show this. He said, "Don't give the poison a chance; if possible, get rid of it at once, rather than fight it afterwards with ammonia or any other remedy." This was clearly our duty.

In conclusion, he hoped the profession would remember what he had recorded in the *Medical Journal* of last November, *viz.*, the facility and safety with which the iodide and bromide of ammonium and drachm doses of sulphurous acid could be thrown directly into the veins. He had also injected as much as four grains of pure carbolic acid, dissolved in thirty drops of glycerine, into the blood of dogs, and repeated it several times. Each injection was followed by clonic spasms, severe or mild, in proportion to the dose used, but soon passing off, and perfect health remaining. Those who believe in the germs of disease being in the blood, and that carbolic or sulphurous acid could destroy them, might think over these facts.

Dr. Aubrey Bowen, in proposing a vote of thanks, remarked that Dr. Halford, in defending himself from the unfair and somewhat personal attack made upon him in the *Lancet*, was not only doing so for himself, but for by far the greater part of the medical profession in Victoria, who had in a very marked manner concurred in giving due credit to Dr. Halford's exertions; and he considered that in recapitulating and reviewing his experiments on the influence of the direct injection of ammonia into the veins, he had most satisfactorily refuted the aspersions cast upon him.

APPENDIX.

Further Observations on Snake-poisoning. By George B. Halford, M. D., *Professor of Anatomy, Physiology, and Pathology in the Univerciy of Melbourne.*

[Read before the Royal Society of Victoria, 27th August 1868.]

In former papers communicated to this Society, I have dwelt particularly on the vast numbers of white cells seen in the blood after death from snake-poison. Subsequent and repeated observations have confirmed my original description equally of the growth, size, and maculated condition under the influence of magenta of these bodies; but lately my friend, Mr. Ralph, Surgeon of Kew, near Melbourne, has discovered a nearly similar condition of blood in animals poisoned by prussic acid. I have confirmed his observations, and most probably such bodies will be found, and arise, wherever after death coagulation of the blood does not take place. The whole subject, therefore, requires re-consideration. The facts are as I stated, but possibly have relations hitherto unknown to me.

From the first I stated these white cells arise in a structureless molecular matter, nucleus first, cell-wall after; and that in some manner they took the place of what is called fibrine; and, further, that the higher the thermometer for the time being, the more numerous and larger were these bodies.

The changes, therefore, take place when the blood is stagnant, but still retained within the veins.

Now, it is fortunate that I can direct the attention of this Society to some other phenomena in the growth of cells, as observed by Dr. Onimus and recorded in the *Journal de l'Anatomie et de la Physiologie*, 1867, and just received in Melbourne. He disbelieves in the doctrine of Virchow that *omnis cellulaé cellulá*, and holds that *cells arise in an amorphous blastema.*

This agreeing with the origin of the white cells I have described, let us follow Dr. Onimus in his experiments and conclusions.

The fluid from a recent blister was filtered so as to obtain a fluid containing no kind of form, neither white corpuscles nor epithelial scales. This fluid was enclosed in small tubes of goldbeater's-skin, and placed beneath the skin of a live rabbit.

After 2 hours—the serum was still transparent, although it had lost its primitive citrine colour. In it were seen a few white cells and granules.

After 24 hours—the serum was turbid, and contained a great quantity of white cells and granules.

After 36 hours—the serum was quite white, milky, and composed entirely of white cells and granules; the white cells having all the characteristics of white corpuscles of the blood.

Increase of animal temperature aided the production of the white cells.

No white cells nor any sort of anatomical element was formed in the serum of blisters, from which the fibrine had coagulated.

The presence of white cells artificially added to serum from which the fibrine had separated, had no effect in causing further development of white cells.

It is certain, therefore, there is some relation between the growth of white cells and those elements which by their separation from the liquor sanguinis constitute fibrine.

It will be remembered that I referred all the morbific agency to the microscopic germinal matter found in snake-venom, and not to any fully formed cells. Dr. Onimus observes that in infectious diseases, miasmatic or virulent changes are not found on the side of elements having form, but in the composition and properties of the plasma. The white cells of the virulent pus of a chancre resemble those from a healthy sore; it is in the serum that search must be made for the difference in the properties of the two prudent fluids.

It is, however, possible that with increased microscopic power, and more time for such labors, modifications of form and property may even be recognised in the molecular matter of serum.

Now, it has been maintained by some, and by Dr. Weir Mitchell, of Philadelphia, whose writings on snake-poisoning deserve, and have my willing respect, that nothing like germinal matter exists in snake venom. I cannot agree with him.

But I have always stated it exists in a very microscopic form, and that to this minute elementary germinal matter the activity of the venom is due. Since this was stated by me, similar conclusions have been arrived at by M. Chauveau (*Comtes Rendus*, 1868), of the nature of the vaccine virus, which he describes as consisting of—*first*, the serum, an albuminous fluid, holding the various soluble substances in solution; and, *secondly*, the solid elements, consisting of white cells and of elementary granules, both of which are suspended in the serum.

After separating the white cells, the remainder was as virulent as ever, and the clear serum was found to be harmless; but in the elementary granular matter dwelt the activity of the virus.

I hope this short and imperfect communication may induce others to think on the correlation of the animal poisons.

Experiments performed with the assistance of Drs. Neild *and* Wooldridge, *to show the action of ammonia upon the central organ, and that it may not only be injected into the veins, but into the heart itself, without injurious effects, and also that it counteracts in a most powerful manner the lethal influence of chloroform.*

Experiment I.

A large young dog was got under the influence of chloroform; the front of the chest was removed, and artificial respiration maintained, chloroform being occasionally dropped into the bellows.

11-27 A. M.—Half a drachm of liq. ammoniæ B. P. sp. gr. 0·959 was injected into the left external jugular vein. The heart's action was at once accelerated, but soon settled down to steady pulsations.

11-35 A. M.—Half a drachm more was injected into the right ventricle. Immediate increase of the heart's action ensued. Consciousness returning, as evidenced by the reflex movements of the eye-lids, and by a withdrawing of the leg on pricking the foot. Pulsation powerful and steady.

11-45 A M.—Completely conscious, struggling to get up. More chloroform was poured into the bellows. Soon became insensible again.

11-50 A. M.—Half a drachm was injected into the left ventricle. This was almost immediately followed by a contraction of all the muscles of the body, which soon subsided. Heart's pulsation very vigorous.

11-53 A. M.—Dog returning to consciousness; more chloroform poured into the bellows. Soon again insensible.

12 noon.—Half a drachm more injected into the left ventricle. The same increased pulsation, followed by slight universal spasm as before.

12-2 P. M.—Dog quite conscious and struggling; more chloroform poured into the bellows.

12-11 P. M.—Dog again conscious and struggling; more chloroform poured into the bellows.

12-13 P. M.—Again quite insensible, pupils dilated, &c.

12-17 P. M.—Half a drachm more ammonia was injected into the right ventricle. Heart pulsated forcibly, the same general spasm following.

12-22 P. M.—Dog again conscious; more chloroform by the bellows.

12-26 P. M.—The dog being again quite insensible, I injected half a drachm more into the right jugular vein. In ten seconds the heart's action was increased, the same general muscular spasm following. Sensibility returning as shown by the reflex acts of the eyelids, &c.

12-33 P. M.—Quite conscious and struggling to get up; more chloroform in the bellows; soon again insensible.

12-36 P. M.—Half a drachm more injected into the left ventricle. Pulsations immediately increased, followed by the same general spasm, but in a milder degree.

12-40 P. M.—Heart's action powerful and steady; pulsations good all over the body.

12-43 P. M.—Dog again quite conscious; more chloroform given; soon insensible.

12-48 P. M.—One whole drachm was injected into the left ventricle. Heart's action immediately quickened, followed by the general spasm. Reflex action of eyelids returning.

12-57 P. M.—Dog quite conscious, and struggling hard to get up, he seeming to have as much vitality as ever, and a sufficient trial having been made, the heart was cut out, and an end put to the experiment.

On examining the cavities of the heart, there was not the least trace of irritation or inflammation, and the punctures through the muscular substance were scarcely visible. The vigour and persistence of the heart's contractions after removal from the body were greater than I had ever before witnessed.

EXPERIMENT II.

Another large dog was chloroformed, the front of the chest removed, and artificial respiration maintained for one hour and twenty minutes, during which time the heart's movements were carefully observed. As in the former case, the injection of the ammonia had the effect of continually rousing the dog from the full influence of the chloroform, necessitating always a further supply of the anæsthetic before another quantity of ammonia was used. In this dog both jugular veins once, the right ventricle once, and the left ventricle three times were injected with half-drachm doses of liq. ammoniæ B. P. sp. gr. 0·959. The results were precisely similar to those noticed in the other dog, *viz.*, immediate increase of the heart's pulsations, settling down into steady beats. The same muscular spasms followed by returning consciousness, and, lastly, the same absence of any visible injury to the heart's cavities or walls.

On the injection of ammonia into the veins *By* G. B. HALFORD, M. D., F. R. C. P., *Professor of Anatomy, Physiology, and Pathology in the Melbourne University.*

On Wednesday evening, April 7, 1869, I detailed to the Medical Society of Victoria the results of some experiments I had performed, with the assistance of Dr. Neild and Mr. Wooldridge, showing that within one hour and a half as much as four drachms and a half of the liq. ammoniæ B. P. sp. gr. ·959 might be injected into the veins, and even into the heart of dogs completely narcotised with chloroform, with the effect, at each injection of 30 minims, or even 60 minims, of restoring the animal to thorough consciousness and apparent original vigour. When the animals were subsequently killed, no injurious effect could be discovered in any organ of the body—the punctures into the ventricles even not being visible. I, therefore, suggested that in over-prolonged narcotism from chloroform, and in threatening syncope, the injection of ammonia might be used, in the case of syncope, by injecting into the external jugular, or with a proper instrument, into the heart itself

My detractors in this colony have seized hold of a statement made by Dr. B. W. Richardson, of London, in a lecture printed in the *Medical Times and Gazette* of July 1870, which is as follows:—"It has been hoped to neutralise the physiological action of chloroform by injection of antidotes into the veins. I tried the injection of ammonia into the veins as far back as the year 1854, and, although the injection excited the heart, it did not offer any material advantages."

I had duly read this on receiving our journals last October, and should have let it pass unnoticed, had it not been recently used against me. I am bound now to examine and comment upon it carefully.

Now, as Dr. Richardson and myself have ever been the best of friends, and as he has no greater admirer than I, it becomes me to deal with this sentence with the utmost care; and in doing so I shall quote his own words of 1858, and show that what he then believed, and what I too believed, of the effects of ammonia on animal life, was error; and that, so far as I can find, his experiments of injecting ammonia into the veins, to counteract poisoning by chloroform, have never been published, and I think must really have been forgotten by himself in 1858. I have never heard of them. It will be seen further on why I should have heard of them. But I did not, and that it is which perplexes me, and makes so contradictory his published words of 1858 and 1870, seeing that in 1858 there was an absolute necessity for his alluding to the subject. But, so far as I can find in his writings, he is silent on this point, having only used a small quantity of ammonia to retain the fluidity of the blood during the operation of transfusion. In the appendix to his work, *On the Cause of the Coagulation of the Blood*, page 440, he says: "In cases where danger arises from the administration of chloroform, I have seen the patient made to breathe ammonia vapour, not as a mere excitant to respiration (for in this sense it may be used legitimately with due care), but as a supposed general restorative. As the effects of ammonia in a large dose are, however, the same as those of chloroform in their leading particulars, the free introduction of ammonia into the narcotised patient is the addition of one volatile narcotic to another volatile narcotic."

Nothing is here mentioned, it will be seen, of injecting ammonia into the veins. When ammonia really enters the blood it is not a volatile narcotic at all. The fact is, the inhalation of the vapour of ammonia, except extremely diluted, is incompatible with life, not because it enters the blood, but from its interference with the necessary respiratory changes needed in that fluid. Its action, as a sudden poison when given by the mouth, is due to its deleterious effects on the tissues, and very probably through direct continuous stimulation of the peripheral

twigs of the pneumogastric, causing the reflex opisthotonos mentioned by Dr. Richardson at page 113 of his work; for, most certainly, the dose that will produce death when given by the mouth will not produce it when thrown directly into the blood. Therefore, it must kill by its influences before it reaches the blood. This was the origin of my suggesting its direct administration in snake-poisoning, &c. It is the same in slow poisoning with ammonia; there are other elements to be considered besides the blood, which, the organs being healthy, is soon purified of any ammonia that may reach it. Of course, if, as at page 114, ammonia is given to a dog in doses of from five to twenty grains of the bicarbonate for upwards of a month, and for the last few days in increased frequency and dose, death will result, not from the presence of ammonia in the blood, but from impairment of function and destruction of tissues. The *post mortem* revealed it. I allude to these things because I wish my readers to understand the advantage that may result in some cases, by avoiding the ordinary portals to the blood-current, *viz.*, the lungs and stomach. Thus, seven-grain doses of carbolic acid, mixed with glycerine, I have thrown into the veins of dogs, this large dose being only followed by temporary clonic spasms, from which the animal soon recovers. Now, it would be impossible to give this by the mouth—it is an actual caustic. Again, more remarkable still, sulphurous acid cannot be given in any large dose by the mouth, and if given, most probably never reaches the blood, and yet, in the space of two hours, I have thrown as much as six fluid drachms of undiluted acid into the jugular and femoral veins of dogs, without causing the least distress. This may be regarded as a digression, but it very forcibly shows the advantage of the direct injection of certain remedies, as in the case of ammonia, over that by the mouth, and the different results that are produced.

I now proceed to extract entire, commencing at page 448 and ending at page 452 of the same work, the section which concerns me chiefly. I shall make no additions to, or subtractions from, it, merely introducing a few running remarks. The extract is headed in the work,—

Application of Ammonia to the Operation of Transfusion of Blood.

"Since the time when Lower first performed the experiment of transfusing the blood of one animal into the vessels of another (1866), and Denys, of Montpelier, gained unenviable notoriety for pushing this operation into practical operation with too much enthusiasm, it has been felt a difficulty in the steps of the operation to hold the drawn blood fluid for a time sufficiently long to secure its free transfusion into the animal body. It is true that several ingenious instruments have been devised, which in some measure meet the difficulty, but not effectually. In this section I shall show that the cautious addition of ammonia to the drawn blood answers every practical purpose for sustaining fluidity, and for simplifying the operation.

"EXPERIMENT CCCCVII.—TRANSFUSION OF BLOOD.—On one occasion I had in my laboratory twenty ounces of sheep's blood held fluid by a solution of five grains of ammonia in a drachm of water. The blood had been kept fluid, for several hours, in a closely stoppered bottle. I had placed a dog under the influence of chloroform for an intended operation, when I perceived that the heart was stopping from the effect of the narcotic. I instantly laid open the external jugular vein, and blood escaped copiously; but, nevertheless, death took place. Prevented from following out the original operation, I thought it would be interesting to see how the sheep's blood would run in the vessels of this animal. I, therefore, warmed a portion of it to 98°, put a tube into the jugular vein, and injected four ounces with the greatest ease. I then laid bare the common carotid, and performed the same experiment with equal facility. The facility with which the operation was done suggested the plan of transfusing blood into a living animal after a similar manner. I have now performed this operation several times with excellent results. As examples, I shall give two representative experiments; the one showing the dangers which are to be avoided; the other, the operation as it may be safely practised.

"EXPERIMENT CCCCVIII.—TRANSFUSION OF BLOOD.—I laid bare the jugular vein of a healthy dog, and drew from it into an evaporating dish two ounces of blood, in which were four grains of ammonia, with a drachm of water. The blood was set aside for a brief interval. Next, I drew two other ounces of blood from the same vein into another evaporating dish, in which there was no ammonia, and set this aside that it might coagulate, the vein being meantime secured above the opening by a firm ligature. When the blood in the second cup had firmly coagulated, an event which occurred about four minutes after its abstraction, I drew into a two-ounce syringe the blood charged with ammonia, and which was still quite fluid, and introducing into the vein the nozzle of the syringe, threw in slowly the ammoniated blood. The syringe was withdrawn, and the vein was tied below the opening. For a few moments after the injection there was but little change; then suddenly the action of the heart became so bounding and intense that it seemed to heave up the chest-wall. Almost coincident with this, general tetanic spasms occurred, with rigid opisthotonos; and, in fine, symptoms so strictly analogous to those produced by strychnia, that the action of the two agents could not have been distinguished by a stranger ignorant of the cause of the symptoms. The chest was fixed, and death took place in four minutes. An hour after death the body was opened. The right side of the heart and the whole venous system were charged to distension with dark blood, which was perfectly fluid, and remained so for three hours on exposure to the air. In the left side there was also blood, of a bright red colour, and fluid. Set aside, this arterial blood coagulated in fifteen minutes on exposure to the air at a temperature of 70°. The corpuscles were very much modified. In this experiment, the first of a series on a living animal, the ammonia was added in a poisonous dose, and the results were strikingly marked. The

analogy between the actions of ammonia and strychnia is so striking, when the former is thus thrown in excess into the circulation, that I cannot dwell too strongly on the fact, since it may have an ultimate bearing on the mode in which strychnia destroys life, and the means to be adopted in cases where this alkaloid is fatally administered. In an experiment in which Dr. Halford lent me his assistance, the same results were observed, under the same circumstances."

In this passage, written in 1858, we have Dr. Richardson's assertion, which at the time was assented to by myself, that four grains of ammonia,* mixed with two ounces of blood and slowly injected into the circulation, were as intensely poisonous as a similar quantity of strychnia. This, he says, is a point on which he cannot too strongly dwell. How much, then, did he inject into the veins, in 1854, to resuscitate in chloroform poisoning? This is, to me, the puzzling question. If he had injected four grains of carbonate of ammonia, dissolved in water, into the veins in 1854, he would not have found it produce death like strychnia, and not having found it, he would not have attributed the death in the experiment in 1858 to the ammonia, but sought for it in the manner of injecting the somewhat altered or altering blood into the heart. For I found, in 1868, very much to my astonishment at first, that four grains of carbonate of ammonia, in a sufficient quantity of water to just dissolve it, might be injected into the jugular vein of dogs without producing any injurious effect whatever. I have thrown ten grains into the veins in the space of five minutes without the least bad symptom following. But was it the liquor ammoniæ which Dr. Richardson used in 1854? Let us see how he speaks of this preparation in 1858.

"EXPERIMENT CCCCIX.—TRANSFUSION OF BLOOD.—I laid bare the jugular vein of a healthy terrier-dog, and drew off two ounces of blood into an evaporating dish, containing three minims of liquor ammoniæ, sp. gr. ·880, with thirty minims of water. Other two ounces of blood were drawn off into another dish containing no ammonia, and set aside to coagulate. The vein meantime was tied above the opening. After four minutes the blood in the second cup had firmly coagulated. The ammoniated blood was still completely fluid. After five minutes more had elapsed, the nozzle of the injecting syringe was introduced into the vein of the animal, and the ammoniated blood was injected. Dr. Halford, who managed the syringe, took great care to introduce the syringe slowly, and a full quarter of an hour was taken up in this way. Then the syringe was withdrawn, and the vein was tied beneath the opening. In the course of this operation, not a dangerous symptom supervened. The blood ran easily. As it first reached the heart, that organ, which had been flagging, beat with a little more force, and sustained this activity without abnormal increase. The animal recovered without the slightest indication of injury, and it is alive and well now.

"A small portion of the ammoniated blood left in the evaporating dish was observed to coagulate thirty-five minutes after the blood was first drawn; it formed into a firm clot. The temperature of the day was 75° Fah.

"In performing the operation of transfusion by this simple means in the human subject, in the extreme cases adapted to the operation, a few precautions are required. The amount of ammonia, first added to the blood about to be transfused, should not exceed two minims of the stronger liquor ammoniæ to the ounce of blood; for it is quite easy, if a diluted solution of the ammonia be ready at hand, to add a little more in course of operation if the blood should show a tendency to coagulate. The ammonia diluted with water, in the proportion of one part of the alkali to ten of water, should be placed in the vessel in which the blood is caught from the vein; and the blood as it falls into the vessel should at first be very gently stirred. When sufficient blood is obtained, and the injecting syringe is at work, the injection should be made with the greatest care and slowness. Indeed, scarcely any pressure on the piston is required, and there is no cause for haste. This is a great advantage, for I take it, one of the dangers of transfusion is the rapid distension of an empty and enfeebled heart with a full charge of blood. Harvey, whose shrewdness seems to have let nothing in his way escape observation, refers to the syncope which sometimes occurs in bleeding, not as a result of the hæmorrhage, but on the removal of the fillet: or, as the vulgar say, 'from the turning of the blood.' Harvey thought that this occurred from the coldness of the blood, which retreated on the heart, but I think that I have demonstrated by experiment in another place, that the effect is due to the sudden load of blood thrown upon the enfeebled organ.

"With these precautions the operation of transfusion, by the process I have described, is at once as simple as it is effectual; and in sinking from loss of blood it has this advantage, that to the new charge of blood there is added an agent having the property of stimulating the flagging heart into renewed force and activity."

I have thus extracted all that Dr. Richardson has said on this subject, and I now ask, if he thus feared the introduction of any more than two or three drops of liquor ammoniæ into the circulation in 1858, how much did he use in 1854 in attempting to resuscitate from chloroform. He could not have used more than three or four drops, or he would not have thus feared this quantity in 1858. For assuredly had he used this quantity, or more, he would have given benefit rather than have done harm. Liquor ammoniæ is not the strychnoid poison that he imagined it was in 1858, and he would have known this in 1854 if he had used it at that date to restore from chloroform. I have thrown repeatedly from ten to twenty minims into the veins of dogs without harm; and the human subject has been pretty freely injected with it in this colony. Thus, of the same preparation, *viz.*, the liquor ammoniæ fortior. sp. gr. ·880,

* It was the carbonate of ammonia.—G. B. H.

Drs. Jackson and Cotter injected twenty-five minims within an hour or so, with recovery from the syncope and vomiting of snake-poisoning.

Mr. Gillbee used forty minims in a case of narcotism and syncope from chloroform poisoning, with the effect of restoring the man to consciousness and to his home, where he lived thirty-two hours, and then succumbed to an attack of *delirium tremens*, from which his liquor-steeped body never recovered. In this case nothing but good symptoms followed each injection.

Dr. Dowling injected sixty minims in a severe case of snake-poisoning, and heroically saved his man.

Therefore, if Dr. Richardson was so fearful of a few drops in 1858, could he have used it to restore from chloroform, as he says, in 1854? I think he must be making a mistake, deceiving himself in fact. I beg of him, if he have the notes of the experiments by him, to publish them. At any rate, the statement made in his lecture in 1870 is apparently so contradicted by his written words of 1858, and by all that I remember, as to need some explanation. Nothing in Dr. Richardson's work, or in his edition of Snow's work on chloroform, that I can find, suggests the injection of ammonia for any purpose, the only use he made of it being to hold the blood fluid, at the same time regarding it as a poison analogous to strychnia.

Dr. Fayrer, who was consulted on the subject by the Government of Bengal, observed as follows:—

"I have repeatedly tested the efficacy of liquor ammonia used hypodermically with the view of counteracting the action of the virus of the deadly snakes of India on the lower animals, and that the result has been to show that it has no power of saving life.

Snakebites are of different degrees of severity, and represents the inoculation of varying quantities of the virus according to circumstances. A large number of those bitten recovers, and of these the recovery may, no doubt, be aided by medical treatment, and probably ammonia is one of the most useful therapeutic agents for the purpose, and as such I advocate its administration.

In the more severe cases (and there are probably over 20,000 deaths from such annually in India), where a vigorous snake, say a cobra, has *fully* inoculated its poison, I fear all drugs are alike impotent. I am unable to believe, from anything I have yet seen, that an antidote, as the word is conventionally understood, is, or is likely to be, known.

I have read Dr. Halford's views and experiments with much interest as those of a man well-known to science, and I regret that I have been unable to arrive at similar conclusions with reference to the hypodermic injections of ammonia.

My views, so far as they go, are derived from actual experiments carefully and repeatedly performed on animals, with the aid of men well qualified to form opinion or detect errors in what they saw. The conclusions arrived at are recorded in the enclosed pamphlets, which I beg you will submit for His Honor's perusal. As yet I have seen no reason for modifying them.

I have had no opportunity of testing the efficacy of ammonia hypodermically injected in human beings, badly bitten by deadly snakes; but I see no reason for supposing that it would be more efficacious in man in *really severe* bites than in the lower mammalia, on whom the effects of the poison are similar."

SUMMARY OF EXPERIMENTS ON THE INFLUENCE OF SNAKE POISON.

By J. Fayrer, M. D., C. S. I.

(Re-published from the Indian Medical Gazette.)

The experiments, of which this is a summary, were commenced in October 1867, and have been continued as regularly since, at such intervals, as time and other and more important avocations permitted. My object has been to determine by actual observation the effect on life of the poison of the venomous snakes of this country, and to test the value of remedies, whether internal or external.

So many absurd ideas on the subject prevail that it is desirable to know the real truth, not less with reference to the actual *modus operandi* of the poison, than to the value of the many vaunted antidotes. The results, I regret to say, tend to show that, in the present state of our knowledge, we can do little to counteract or neutralize the action of the poison; but what may be expected from treatment I have endeavoured to show.

As to antidotes, I could speak with reserve on the subject of possible future discoveries; my experience does not encourage me to hope that we shall discover anything that can be regarded as an antidote, such as is generally meant by that term. But, considering the imperfection of our knowledge on this and kindred subjects, I would do nought to deter or discourage others from further investigation.

My personal experience is derived from the action of the poison in the lower animals, and a few cases in man; the antagonism of the venom to the vital forces is shown in one as well as in the other, and is no doubt subject to the same laws. The deductions from one are applicable to the other.

The greatest care has been observed in all the experiments, and most of them have been often repeated to exclude, as far as possible, sources of error, and to obviate generalization from insufficient data.

Almost every experiment has been witnessed by competent observers, to whom I am much indebted for their assistance, and for the additional value which their presence attaches to the validity of what was done.

The object of investigation has been the simple truth. I can safely say there was neither foregone conclusion to maintain, nor theory either to support or oppose.

The snakes with which the experiments have been conducted were—

The varieties of Naja Tripudians or Cobra.

The Ophiophagus Elaps or Hamadryad.

The Bungarus Fasciatus or Sankni.

The Bungarus Cœruleus or Krait.

Some of the Hydrophidæ.

The Daboia Russelli.

The Echis Carinata.

The Trimeresurus Monticola.

And in the case of the Calophides and the other Crotalidæ, I have referred to the experiments of others, not having had opportunity of testing them myself.

The living creatures experimented on have been the ox, horse, goat, pig, dog, cat, civet, mongoose, rabbit, rat, fowls, kites, herons, fish, innocent snakes, poisonous snakes, lizards, frogs, toads, snails.

The symptoms produced by the poison both constitutionally and locally have been carefully noted. The state of the blood has also been examined, specially with reference to structural changes—and for this part of the investigation I have been much indebted to Professors Partridge, Ewart, W. Palmer, J. Anderson, and Dr. Douglas Cunningham.

In point of relative deadliness I should be inclined to consider that the cobra, ophiophagus, and daboia are very nearly on a par. They are quite capable of destroying a full grown dog in half an hour, sometimes in much less time; and very frequently I believe man has succumbed within an equally short period, though generally the time is much longer.

The bungarus cœruleus is, I believe, just as deadly, but apparently does not kill quite so quickly. The bungarus fasciatus is less fatal, and kills less quickly than the bungarus cœruleus. The echis, if one may credit the reports from Scinde, and they are confirmed, to a certain extent, by Major MacMahon, Deputy Commissioner of Delhi, is also a very deadly snake. It destroys life rapidly in small animals; but from its small size, it is perhaps less likely to be fatal to man, though from what I have seen of the effects of its poison on pigeons, fowls, and dogs, I should regard it with peculiar dread.

Of the hydrophidæ less is known; but the few experiments I have performed, and those by Mr. Stewart, prove that they are very fatal, and I should think human life would be in great danger from their bite.

The calophides and crotalidæ of Hindustan are certainly not so deadly as those I have mentioned, and though capable of inflicting a painful and, in some instances, no doubt, a dangerous bite, they are not so much dreaded as the other snakes.

There are differences in the symptoms produced by the poisonous bites of the different thanatophidia, but none of any great physiological or pathological import. In some cases convulsions are more marked, and in others death is preceded by a more marked appearance of lethargy. In some, as in those of the echis, the local symptoms are peculiarly severe; in others less so. But the differences are more of degree than of kind. They all point to exhaustion and paralysis of the nerve centres—the sources of the origin of vital force—every function fails rapidly, and vitality is soon extinct.

Local paralysis of the bitten part, great depression, faintness, exhaustion, nausea, vomitting, hæmorrhage, relaxation of the sphincters, involuntary evacuation, not unfrequently of a sanguineous or muco-sanguineous character, precede the complete loss of consciousness, and after this convulsions occur just before life ceases.

The *post-mortem* appearances frequently reveal simply nothing except the marks of the fangs and the slight ecchymosis about them; or if the creature have survived some hours, infiltration, and, perhaps, incipient decomposition of the tissues. The lungs are not generally congested, the heart is not generally overloaded, the viscera look natural enough, death is not traceable to special disturbance of any one great function, such as respiration, and the blood, after death, in the cases of the lower animals, certainly, and if in them, why not in man,* nearly always coagulates firmly on removal from the body, after death, from poisoning by the calubrine snakes. But in death by viper poisoning it remains permanently fluid. The cause of this I am quite unable to explain, but there can be no doubt of the facts as regards the lower animals, for they have been proved by often repeated experiments.

From experiment, I have arrived at the following conclusions.—Snake poison acts with most vigor on the warm-blooded animals; birds succumb very rapidly; a vigorous snake can destroy a fowl in a few seconds.

* It is to be noted that in most recorded *post-mortem* examinations of human beings, who have died from snake bite (whether colubrine or viperine), the blood is noted to have remained fluid after death I cannot reconcile this with the condition of the blood in animals, which is, as I have stated, coagulable after death, from colubrine poisoning, found after death, from viperine poisoning. Further examination is needed.

The power of resistance is generally in relation to the size of the animal, though not altogether so; cats, for example, resist the influence of the poison almost as long as dogs three or four times their size.

The cold-blooded animals also succumb to the poison, but less rapidly. Fish non-venomous snakes, mollusca, all die. So far as I can decide from experience the poisonous snakes are not affected by their own poison, *i. e.*, a cobra may bite itself, or another cobra, and with no evil result.

The less are probably affected by the more poisonous snakes, *e. g.*, the bungarus seem to be affected by cobra poison, though slowly.

It is possible that they can all to some extent affect each other, though infinitely less than other animals. In many of the various experiments I have performed, the cobra, daboia, and krait did not appear to be able to poison themselves or each other. Some of the experiments render this doubtful, and seem to show that a cobra or daboia may poison a krait, or *vice versâ*, but that they escape more frequently than they suffer.

Snake poison is absorbed through delicate membranes. It is deadly when applied to a mucous or serous membrane, to the stomach, or the conjunctiva. The idea that it is only capable of absorption by direct injection into the blood is erroneous.

The blood of animals poisoned to death by the colubrine snakes coagulates after death. That of animals poisoned by the viperidæ remains permanently fluid.

The bodies of animals poisoned by snakes are eaten with impunity by man and animals. I have had repeated proofs of this. The fowls and pigeons killed in my experiments were always taken away and eaten by the sweepers who were present, and who sought them greedily. They were not unfrequently given to dogs or cats; no harm followed.

The blood of an animal dead from snake poisoning is itself poisonous; if injected into another animal, it destroys life. This shews the intensity of the poison; a drop or two diluted with the blood of a fowl or animal renders the whole poisonous. Venomous snakes, though not at all, or very slightly, affected by snake poison, are very susceptible to other poisons, such as strychnine or carbolic acid. The latter destroys them very rapidly, and they seem to regard it with peculiar aversion. Poisonous snakes are not, as a general rule, very aggressive, except perhaps the echis. They seek to be left in quiet, to be let alone. They bite only if disturbed or irritated, and even then they often will not bite, but make one or two strikes at the enemy as if to frighten it.

In my experiments, I had always the greatest difficulty to get the cobra, krait, or daboia to bite voluntarily. An animal may remain in a cage or box with a cobra or daboia a very long time before it is injured, and perhaps, after all, it is taken out untouched, even after trampling on and bruising the snake, in its efforts to escape from its enemy, which is as much frightened as itself. There is much hissing and demonstration of attack, but frequently nothing done. If pressed and overteazed, they bite at last, and if they insert their fangs and retain their hold, the bite is generally fatal.

The echis, however, will strike and mortally wound a fowl or small animal directly it approaches it, and its dart is so rapid that it is scarcely seen.

Snakes frequently strike and even wound without poisoning, or very slightly so. The fang merely scratches and makes a tear, but if inserted and retained for a second the poisonous bite has then been inflicted. Of course, any abrasion or scratch, however trivial, may be dangerous, as some of the virus may be inoculated or shed over it, probably not enough to kill, but sufficient to cause dangerous symptoms.

A snake that has bitten often, or that has very recently eaten, or that has been long in confinement without food, is less dangerous than others; its bite may be almost harmless, though not always so: a daboia that lived a whole year in a cage without food was deadly a few days before its death.

The popular notions as to the effects of the so-called antidotes are, I believe, erroneous; such for the most part being utterly powerless or inert. The ligature, excision or cautery, if applied in time, are the only rational remedies that can be of avail in a really poisonous bite. Others are recovered from by the inherent vigor of the person bitten, aided by rational treatment, support, stimulants, and possibly to some extent by arsenic, iodine, bromine, or potas, or others of the many remedies recommended; but as antidotes in the ordinary acceptation of the term even these, I fear, are no better than others.

The poisonous snakes when they either shed or lose by accident their fangs, regain new ones in from a few days to a month or six weeks. An echis was re-furnished with fangs, firmly anchylosed to the maxillary bone, on the third day after the removal of the former ones. If the whole mucous capsule be removed, and the maxillary bone injured in extracting the fangs, the reserve teeth already developed and the germs are also destroyed, and no new fangs are reproduced. This is often done by the snake-catchers, but when imperfectly, and the reserve fangs and germs not destroyed, fatal accidents have occurred from the unexpected re-appearance of fangs.

Snakes cast their epidermis frequently; the cobra and krait once or twice in a month, but the echis I have kept for three months without its changing its skin. Snakes will live months without food or water. A daboia lived for one year without food. It moulted frequently, became very thin, but it was active and poisonous to the last.

I conclude the summary by remarking that I feel thankful that I have brought this long series of experiments to a conclusion without any accident of a serious nature to those con-

cerned in them. The constant manipulation of excited and vicious venomous snakes is a service of danger, and one in which we could hardly expect to be long engaged without some casualty. I am happy to say that only on two occasions was there any cause for anxiety. In the first, one of my assistants had a small quantity of cobra poison projected into the eye. Immediate ablution and careful avoidance of rubbing removed it, leaving only a temporary congestion and weakness of eye.

In the second case my principal snake-man was bitten by an echis in the thumb; immediate excision and cauterization of the part was had recourse to, and no evil results followed.

Experiments on the effects of the poison of the Hydrophidæ, by W. D. Stewart, Esq., *Civil Surgeon of Pooree, communicated by Dr. J. Fayrer.*

Experiment No. 1.

9th May, 1870, at 5-45 p. m.—The thigh of a half-grown fowl, cleaned of feathers, was presented to the sea snake. It bit rapidly two or three times, and drew blood. After being bitten, the fowl crouched on its bent legs and never stood again.

5-49.—Pupils dilated; shook its head as if excited; then began to droop; eyelids closing; beak resting on the ground.

5-50.—Raising its beak up and down; head rotating from side to side; sitting all the time; no convulsions.

5-55.—Lying on its side quite powerless.

5-59.—Dead in 14 minutes.

With a lens no punctures could be made out; even scratches could hardly be seen at seat of bite; blood dark, coagulated firmly.

From Mr. Stewart's description, I imagine the snake was H. Cyanocincta. In speaking of its fangs, he says:—" Fangs about two-thirds of a line long, with a double curve, first bent forwards at base, then backwards, before terminating in its point. Poison groove extends only from the four-fifth on anterior aspect.

Experiment No. 2.

10th June, 1870.—Present: Mr. Thomson, c. s., and Mr. Stewart.

A long thin-necked snake, with white pea-sized spots on side of neck; unable to bite. Poison gland removed, and inserted at 11 a. m. into a wound made in the thigh of a half-grown fowl.

11-12 p. m.—No apparent result.

3 p. m.—It was observed to be drooping and unable to move.

6 p. m.—Dead.

This snake was most probably H. Chloris.

Experiment No. 3.

July 1st.—A similar snake was obtained on 1st July. It was torpid, but the trial was made by pressing the jaws firmly over the thigh of a fowl.

No result.

Experiment No. 4.

June 20th.—A Pelamis Bicolor, torpid and unable to bite. Mouth opened, and jaws made to close firmly over fleshy part of a fowl's thigh.

No result.

Experiment No. 5.

June 29th,—A sea snake (probably H. Cyanocincta) was made to close its jaws on a chicken's thigh at 6 a. m., with firm pressure, as it could not bite voluntarily.

9 a. m.—Lame, crouched.

3 p. m.—Eye-lids half-closed; head drooping; respiration gasping, during which beak opens, and a crowing sound occurs; feathers ruffled; purged frequently.

June 30th.—Lying half-dead; refuses food; mark of bite bluish colour.

July 1st.—Recovered and able to move about; it remained well.

Experiment No. 6.

June 30th.—A Pelamis Bicolor, caught fresh in a hand net. It was quite lively, and able to bite.

A small fowl was bitten by it at 6-26 a. m.; the wound scarcely a scratch.

7 a. m.—Crouching, drooping.

8 a. m.—Beak rising and falling.

9 a. m.—Insensible.

9-50 a. m.—Quite dead.

Blood fluid after death.

Experiment No. 7.

July 5th, 1870.—A sea snake, a new species, allied to H. Hardwickii, bit a full-sized fowl in the thigh at 8-30 a. m. The marks of the bite were distinct.

8-34.—Fowl seated.

8-35.—Drooping; eyes closing; rotating the head on the beak in a sitting posture.

8-38.—Convulsed; head resting on ground.
8-42.—Continued convulsions.
8-42.—Legs thrown backwards in final spasm; tail spread out; quite dead in 17 minutes.
Blood coagulated after death.

EXPERIMENT No. 8.

July 22nd.—The same snake was tried on a dog, but it was too feeble to bite: its jaws were pressed firmly on the inner part of the high. No evil result to the dog.

EXPERIMENT No. 9.

Hydrophis Cyanocincta, 4 feet long, bit a half-grown fowl voluntarily in the thigh twice or thrice, drawing blood, and leaving slight ecchymosis at 9-37.
9-40.—Fowl drooping; eyes closing; head resting on beak.
9 41.—Fell over on its side.
9-42.—Convulsed.
9-46.—Dead in 9 minutes.

EXPERIMENT No. 10.

The same snake bit a pariah dog, twice on the thigh, at 4-40 P. M.
5-20.—Dog restive, salivated, burrowing its muzzle in the sand.
5-25.—Seated, body thrown forwards, head down, partially convulsed, salivation increasing.
5-30.—Spasms; defecated.
5-35.—Involuntary evacuations; respiration slow; tongue hanging out of mouth; salivation very profuse.
5-40.—Dead in one hour.

EXPERIMENT No. 11.

July 23rd.—The same snake, kept alive in a hole in the wet sand, bit a full grown fowl at 7-35 A. M. This was not a fair bite, and took no effect. Bit again at 7-45 effectively. Fowl sat down after the bite.
8-11.—Lay down; head resting on beak; became convulsed.
8-25.—Convulsions.
8-35.—Dead.
The Hydrophis of four feet in length is evidently a very dangerous creature.

Experiments with Snake Poison by DR. FAYRER.

I am indebted to Mr. Galiffe, Collector and Supervisor of Calcutta Canals, for fine specimens of Hydrophis Coronata and Enhydrina Bengalensis from Dhappa.

EXPERIMENT No. 1.

A fowl was bitten in the thigh by Enhydrina Bengalensis, about 43 inches long, at 5-48 P. M. of 11th August.
The snake was sluggish, and could only be made to bite by forcibly closing the jaws in the fowl's thigh. The fangs were small, and barely drew blood.
5-51.—Crouched, and became convulsed almost immediately.
Died at 5-55, or in 7 minutes.
The blood formed a firm coagulum when removed from the body after death.

EXPERIMENT No. 2.

August 12th.—The above snake died at 9 P. M. yesterday. Its jaws were closed with pressure on a fowl's thigh this morning at 7-34 A. M.
8-5.—The fowl limps.
8-12.—Crouching; feathers staring; wings expanded.
8-20.—Head drooping, resting point of the beak on the ground.
9-5.—Remains in the same condition.
9-50.—Convulsed.
11-35.—Remained in much the same condition until death after four hours.
The poison of this snake when vigorous and fresh in its own element, the salt water, must be very deadly.

EXPERIMENT No. 3.

On the 9th August, a Hydrophis Coronata was made, with much difficulty, and only by pressure, to close its very small jaws on the comb, and then on the thigh of a half-grown chicken. At 3-30 P. M., the chicken was excited, but apparently not in pain after the bite.
4 P. M.—Pecked some grains of rice.
4-11.—Crouching.
4-16.—Head falls over; starts when its beak touches the ground.
4-30.—Drowsy; beak resting on the ground; wings drooping.
4-53.—Eyes closed, beak resting on the ground; starts at intervals; any noise makes it rise with a jerk.
5-15.—Cannot be roused by noise, but starts when touched; falls over on its side.
5-33.—Apparently dead, lying on its side; slight convulsions when raised by the wings.
5-55.—Dead in 2 hours and 25 minutes.

The poison of this snake is also very virulent; it was weak, had been many days in captivity, living in fresh water, but without food. The head is exceedingly small, and the fangs almost imperceptible. In its native element, I should imagine, it is, notwithstanding its small jaws, very dangerous. I have never met with a case of bite of the Hydrophis in the human being, but I think there can be no doubt that if a man were bitten by a well-grown snake, and in the water, where the snake would be active and vigorous, the danger would be as great as though he were bitten by a cobra on the land. Few accidents occur, the boatmen know the danger and avoid them.

Mr. Galiffe in his note to me also speaks of a fatal case in 1½ hours, which occurred somewhere in the vicinity of the Salt Water Lake.

In the Returns for 1869 I find a notice of a fatal case of a master of a ship who was bitten when bathing at Moulmein. I append a very interesting case, taken from the naval records, in which a seaman of H. M. S. *Algerine* was bitten mortally by a sea snake caught at Madras.

The case is in the transactions of the Zoological Society of London, vol. 2, p. 303.

"The other death in this vessel (H. M. S. *Algerine*) requires a more lengthened notice. On the 9th October, while the ship lay at anchor in the Madras roads, a water snake was caught measuring seven feet six inches long, and six inches-and-a-half in girth at the thickest part. After the patient had handled the reptile for some time, it suddenly bit him on the inside of the index finger of the right hand, inflicting a wound resembling that caused by the point of a pin. He declined having the wound fomented, having been bitten by reptiles of the same kind, as he supposed, in the Straits of Malacca, without any bad consequences. At 8 A. M., half an hour after the infliction of the wound, he made a good breakfast, dressed, and about 10 o'clock went on deck. After taking a few turns, he was suddenly seized with vomiting, the matter ejected being of a dark-brown colour, resembling coffee ground, and of a very offensive odour. After a short time his pulse became small, variable, and intermitting, and the pupils were dilated, but contracted steadily by the stimulus of light. The left side of the face was slightly paralysed; there was subsultus tendinum, and the skin was covered with a cold, clammy perspiration; the countenance was anxious and indicative of much distress. In consequence of the spasmodic action of the muscles of the glottis, he breathed with great difficulty. The integuments from the wound to the wrist were slightly swollen, and on the right side of the neck and face they presented a mottled appearance of dark purple and livid colour. A ligature having been placed above the wrist, and fomentations applied to the hand, a liniment, composed of turpentine, liq. ammoniæ, and olive oil, was rubbed on the throat and neck. He made frequent attempts to swallow a mixture containing liq. ammoniæ and tinct. opii, but failed. At 10-20, in consequence of the spasms of the muscles of the glottis, he was put into a warm-bath, which apparently relieved the symptoms, and enabled him to take a dose of the mixture, which caused him to vomit a dark ropy fluid. About 20 minutes, after coming out of the bath (in which he remained 10 minutes), the spasmodic actions of the muscles of the neck and throat became more severe, and the whole body assumed a purple colour. The breathing became very difficult from the obstructions caused by a dark-brown substance, which came away in a stringy form from the air-passages. By 11 o'clock he was in a state of coma, the pupils were contracted, and the pulse imperceptible at the wrist. At 11-20, not quite four hours from the time he was bitten, he died. It does not appear that any *post-mortem* examination of the body took place. It will be remarked that the symptoms in this case very much resembled those produced by the bite of a rabid animal, although they were much more violent and more speedily fatal."

Taken from the Statistical Report on the health of the Navy on the East Indian Station in the years 1837, '38, '39, '40, '41, '42, and '43.

Remarks on certain of the Hydrophidæ, and Extracts from Notes on them by MR. STEWART, *Civil Surgeon of Pooree.*

"I have been fortunate in getting a number of both these specimens (H. Cyanocincta) lately, but unfortunate again, in that they perished very soon after I got them; some in fact were brought nearly dead. Whether it is that the violent surf threw them on the shore, or that they are with difficulty kept alive when once removed from the sea, I am not sure. The fact, however, is the same, that though kept in a gurrah of sea-water and exposed to the air, the animals are very feeble after 10 or 12 hours.

"I intend to have readier arrangements in future, so as to get the snakes to bite as soon after they are caught as possible. I am sorry that my attempts to get them to bite lately have been a failure from the above cause; but I hope to be able to supply you with a few facts as soon as I can.

"The Pelamis Bicolor is called by the Telinga fishermen Kullunder Samp, and is looked on as a very deadly snake by them; but I hope to satisfy myself about the truth of this.

"I got a female Hydrophis Cyanocincta brought to me dead. It had 16 eggs in it, each as large as a full-sized hen's egg. The young snakes in each egg were perfectly formed, and about six inches long.

"I still experience the same difficulty in getting the snakes active enough to bite. When they are freshly thrown upon the shore, they are ready to bite; but by the time I get them they are exhausted.

"I have tried dissecting out the poison gland, and inserting it under the skin of the thigh of a fowl. The first was from a thin-necked small-headed snake. The fowl did not appear to be affected at the time, but was found all but dead three hours after; and by six hours was quite dead. I tried Pelamis Bicolor this way, but failed. I am not, however, satisfied with this, as I was told that the snake was first brought to my house while I was out, and had been biting at sticks and other things thrust into its mouth. So I think its poison may have been exhausted.

"Sea snakes are at this season (June) very difficult to obtain. In the quieter months of the cold weather, when a great deal of fishing goes on, I believe numbers are then caught in drag nets; whereas just now, with high sea and fresh breezes, nothing is done, and I have great difficulty in getting fresh specimens.

"A good plan for keeping the sea snakes alive is to make holes in the wet sand near the sea-water. I was thus able to keep one alive all day, and able to bite yesterday evening and again this morning. So placed, they must be protected from kites and crows by a cover of some kind.

"From my little experience of the Hydrophidæ, I can say that I have not yet seen one which did not kill if it bit fairly. Three difficulties I have noticed in the way of a fair bite; first, the inertness of the snake after being removed from its native element; second, the extreme difficulty in getting its small poison fangs to insert in anything like tough skin; third, the feeble power of the jaws of some, from natural conformation and from want of muscular action, necessary for full closure, and expulsion of the poison. Every snake that was found active and able to bite of itself, closing its jaws perceptly, inflicted a fatal wound. Mere pressure of the jaws of dead and dying snakes over soft parts, with the view to bring out the action of the poison, was in nearly every instance followed by no result.

"The dissection and insertion of the poison gland was tried in two instances; in one death followed after some hours; in the other case it was a failure. I have been trying to find out from fishermen any peculiarities they know of the Hydrophidæ, but their statements are seldom the same on two occasions.

"I have not been able to hear of any fatal bites from sea snakes in fishermen, who dabble so freely in the waters, either when fishing with small hand nets near the shore, or in catamarans further out. As I said before, many snakes are enclosed in deep sea-nets, but these men know their deadly properties and lift them away.

"The fact of these men plying about so freely in the water near the surf, and withal escaping being bit, should go far to remove the fears of sea-bathers, even though it be more generally known that they are liable in the enjoyment to be in proximity to such deadly neighbours. I have enquired of several fishermen, but not one can recollect of any man losing his life in this way.

"Natives declare that Pelamis is the most deadly of all, and refer to their Shastras about it. The boatmen believe that this snake bit Mahadeb, and the god, to cool the burning effect of the venom, dipped himself in the sea, on which account Juggurnauth (or Maha Probha, as he is also called) banished the Kullunder Samp (Pelamis) beyond the seas. Mahadeb is a god worshipped under water, and exposed only once a year. I have not had an opportunity of enquiring into this fable from the pundits."

In addition to these notes, Mr. Stewart has been kind enough to send me some fine specimens of Pelamis Bicolor, Hydrophis Cyanocincta, H. Jerdonii, H. Curta, H. Chloris and another new species which Dr. Anderson, the Curator of the Indian Museum, says is allied to H. Hardwickii, but quite different. He has named it H. Fayreri.

With several of these Mr. Stewart was able to experiment, and the results of these experiments, which are appended, prove that the venom of the Hydrophidæ justifies the evil repute it has acquired.

My own experience of the Hydrophidæ is limited to experiments with H. Coronata and Enhydrina Bengalensis. For these specimens I am indebted to Mr. Galiffe, Collector and Supervisor of Calcutta Canals. They were caught by fishermen in the tidal nullahs near Calcutta, and experiment proved them to be very poisonous.

On enquiry from Mr. Galiffe on the subject, he says—"I have enquired from the fishermen of any fatal case of snake-bite. In one instance a fisherman was bitten by one Ghunga Berah, and died in 1½ hour. They speak of three other kinds, whose bites, however, are easily cured."

Mr. Stewart observes, what has been noticed by others, that the Hydrophidæ are very delicate and die soon after being captured, even if in their native element. I was astonished, therefore, to find that a fine specimen of H. Coronata lived for 8 or 10 days, although it was only occasionally placed in a jar of fresh water, the rest of the time living in an ordinary cage like other snakes. The movements were exceedingly graceful in the water, whilst it seemed powerless, stupid, and blind on the land. Its head and jaws were exceedingly small, and it was with the greatest difficulty it was made to bite, and then only by compressing its jaws; when, however, it did insert its fangs, small as they were, the poison was soon fatal to a fowl.

Fatal case of poisoning by Daboia Russelli by Dr. W. A. Thomson, *Staff Surgeon, H. M. S. "Thayetmyo," communicated by Dr. J. Fayrer.*

The following very interesting account of a fatal case of snake-poisoning has been forwarded to me by Dr. Thomson, Staff Surgeon, H. M. S., from Thayetmyo, in Burmah.

From the description, the snake was evidently Daboia Russelli, or Russel's Viper, the Tiepolonga of Ceylon.

28th Sept. 1870.

The following instance occured at Thayetmyo, British Burma, in May 1868. The subject was a gunner of the Royal Artillery. By kind permission of Dr. Croker, R. A , at present in medical charge of A-23, R. A., I am enabled to furnish the following particulars extracted from the Case Book.

The case was recorded by Dr. Murray, Staff Assistant Surgeon, who was in medical charge of the Battery at the time the accident occurred.

R. W., age 23 years. Service 9 years.

A strong powerfully-built man, of good muscular development, was admitted into hospital this morning (May 22nd, 1868). States that soon after daybreak, as he was entering the "fowl-house," which is in close proximity to the barracks, he observed a dark thick-set snake of about two feet and a half in length (species unknown, but not a cobra), and that he took up a piece of bamboo and began teasing it, whereupon the reptile turned and bit him on the finger.

The snake held on for a short time, and it was with some little difficulty the man shook it off. The "fowl-house," where the accident occurred, is distant from the hospital about 600 or 700 yards. The man came at once to hospital, being advised by one of his comrades to do so, when on the way he became very weak.

The apothecary saw the patient on his arrival at hospital.

It is supposed that a lapse of 20 minutes must have occurred from the time he received the bite until he reached the hospital, and nothing had been done meantine in the way of remedies.

The apothecary immediately scarified the wounded finger freely, made the patient suck the wound, and administered ammonia. I was then sent for, and proceeded without delay. On examination, I found two small punctured wounds on first phalanx of index finger of the left hand. The finger itself was swollen and livid.

The patient complained of very little pain, but seemed naturally anxious, although it was considered by many that the snake was non-venomous.

I ordered hot fomentations with a view to encourage, as much as possible, the bleeding from the part where it had been freely scarified.

I also ordered constant fomentations all over the arm.

An aperient was given. It was directed that the patient be carefully watched.

Vespere, 6 P. M.—The bowels were moved through the day, but the patient has been restless, turning on one side, then on another.

The finger and hand are considerably swollen and discoloured, and the fore-arm is partially so.

The pain is not severe, although he complains of it, extending up the arm; no swelling from elbow upwards.

Is slightly feverish.

Pulse good and not hurried; complains of thirst; ordered lemonade to drink.

To have an opiate at bed time.

The hand and arm to be constantly stuped with poppy-heads, and the patient to be carefully watched during the night.

23rd May.—On my visit this morning, I found the man most dangerously ill.

At times excited, tossing about his arms and legs in every direction, and rolling his head from one side to another.

The pulse almost imperceptible. Breathing hurried, 40·1′. Surface covered with cold clammy sweat. Conscious when roused, and then immediately falling back into a stupor.

Face suffused.

Ordered brandy and water, stimulating draughts of ammonia, and turpentine stupes to extremities.

The left hand and arm greatly swollen. Bluish tint over the hand. Surface from elbow to shoulder much reddened.

The inflammation extended to the left side of chest, which was also red and swollen.

He rallied a little for upwards of an hour between 7 and 8 A. M., and then began to sink. Pupils became contracted, and insensible to the stimulus of light.

From 8 A. M. he became rapidly unconscious. Now and again he tossed himself about with such violence that the attendants had some difficulty in keeping him in bed.

The treatment mentioned above was persevered in, and, in addition, galvanism was applied along the spine and over the chest.

At 8-30 A. M. he was moribund. Respiration 40. Restless and unconscious. Heart's action fluttering. Spasmodic twitchings observed over course of diaphragm. Pulse at wrist not detected.

Died at 9 A. M.

Post-mortem appearances 7 hours after death.

External appearance of the body was that of a person who had been well nourished and healthy, and of great muscular development.

The left hand and arm were considerably swollen; also swelling of left axilla.

Two small punctured wounds were observed on first phalanx of index finger of left hand.

Head.—On removing calvarium, considerable congestion was observed of the vessels on the surface of the brain. There was a general softened state of the brain subtance throughout.

In right lateral ventricle a small quantity of serous fluid was found.

Thorax.—Lungs collapsed. When cut into were found gorged with blood, the latter being remarkable for its fluidity. The apices of lungs were emphysematous.

Heart.—Size normal, structure healthy. A large clot of blood in left ventricle, extending into ascending portion of aorta, and having appearance and consistence of black currant jelly; clots were also found in right ventricle and auricle, and in pulmonary arteries. That in the latter was semi-fluid.

Liver.—Normal, and appearance when cut into healthy.

Gall bladder distended with bile.

Bowels.—Appearance healthy. Spleen, natural size, soft and easily broken up by the fingers. Kidneys, healthy in structure, and normal in size. Bladder empty.

REMARKS.—The above case was highly interesting. I saw the man about one hour and a half before death, when his symptoms were exactly as described by Dr. Murray.

I did not see the snake, as unfortunately it had been destroyed and thrown away the day before.

The following description, however, was given to me by Assistant Apothecary Roberts, A-23, R. A:—

"It was a snake about 2½ feet in length, with a flat oval head. The thickest part of the body measured about three inches in circumference. The tail was five inches long.

"The colour of the head and back of a French grey; the belly white.

"In the middle of the back ran a row of lozenge-shaped spots (white).

"It had two large curved fangs."

I am inclined to believe from the description that the snake was a species of viper.

THAYETMYO,
The 25th July 1870.

W. A. THOMSON, *M. D.*,
Staff Surgeon.

Note.—When the left hand was cut into, the muscles were found disintegrated and of a dark colour. When the upper arm was cut into, the muscles soft and infiltrated with serous effusion.

D. MURRAY, *M. D.*,
Staff Asst. Surgeon.

On the Treatment of Snake-bite.

Snake poison produces fatal or deleterious effects, either by completely paralysing the nerve centres, and thus causing rapid dissolution, or by partially paralysing them, and poisoning the blood, thereby inducing pathological conditions of a secondary nature, which may, according to circumstances, cause the slightest or the most dangerous symptoms.

The effect produced depends on two sets of conditions: *first*, the species of the snake, its actual state at the time, the quantity and quality of its poison, and the circumstances under which it inflicts the bite; *second*, the species, size, and vigour of the living creature, and the circumstances under which it is bitten.

Snake poison is essentially a neurotic, or nerve force paralyser, and, when it takes full effect, it kills by annihilating, in some unknown way, the source of nerve force.

But it is also an irritant; for, if applied to a mucous membrane, or to the conjunctiva, it causes violent inflammation; absorption at the same time takes place, and the symptoms of poisoning are produced.

It is also, to a certain extent, a septic; for if the bitten creature survive, the wound and the parts about it are apt to slough and to induce septicæmia. The poison acts by absorption; that is, by entering the circulation, and so reaching the nerve centres; it produces, according to the quantity or intensity of the venom, either death, or severe local and constitutional symptoms. If it find entry by a large vein, such as the femoral or jugular, life may be destroyed in a few seconds.

The blood itself is affected by the poison. I have not been able to detect any corpuscular changes, such as those described by Professor Halford, nor have I any exact information on the chemical changes it undergoes or may have undergone; but that it is altered there can be no doubt; and in poisoning of the lower animals, at all events by the viperidæ, its coagulability after death is generally destroyed, whilst after death by poisoning, by the colubrine snakes, the blood generally coagulates.

As the blood is the channel through which the poison acts, it is obvious that the first object should be to arrest, destroy, or prevent its entry into the circulation, or, if it have already entered, neutralize or counteract its action, or to procure its elimination by the agency of the natural depurating organs and their secretions, and to treat local, consecutive, and constitutional symptoms by such remedial measures as may be required by the patient's condition. Absorption takes place with extreme rapidity; so fast, indeed, that it was formerly supposed, in the case of some of the more active poisons, that they acted by transmission of a shock through

the nervous system; and, so far as we know at present, it is not improbable that such, in some instances, may be the case. But rapid as the effect of snake bite sometimes is, there is no reason to believe that it operates on the nerve centres through any other channel than that of the vascular system.

The experiments of Blake, Hering, and later of Claude Bernard, show that absorption takes place with such rapidity as to explain the most rapid deaths from such cause. Blake (*vide* Guy's Forensic Medicine, 3rd edition, page 388) found that a poison passed from the jugular vein to the lungs of a dog in from four to six seconds; from the jugular vein to the coronary arteries of the heart in seven seconds; a poison injected into the jugular vein was distributed throughout the circulation in nine seconds. Claude Bernard found that a saturated solution of sulphuretted hydrogen introduced into the jugular vein of a dog began to be eliminated from the lungs in three seconds, and when injected into the femoral vein of the same dog in six seconds.

I have neither seen nor heard of any case of snake poisoning in man or the lower animals so rapid, though in some I have observed the first symptoms in a few seconds, as to justify the conclusion that poisoning had occurred otherwise than through the medium of the circulation.

Such being the rapidity of the absorption and action of the poison, it is obvious that if the means, whatever they may be, of destroying and arresting its entry, be not applied immediately, but little benefit can be expected from them. If more than a few seconds have elapsed, we can only hope by these measures to prevent the entry of so much of the poison as may be diffused in the areolar tissue surrounding the bitten spot.

As the chief hope of safety lies in preventing the entry of any poison at all into the circulation, the earlier appropriate measures are resorted to, the better is their chance of success. These I will now describe.

The ligature.—This, if applied immediately, at a little distance above the bitten part, may not only arrest the entry of the poison into the circulation, but may also prevent its diffusion in the areolar tissue in a centric direction. The efficacy of this method of treatment has long been recognized by the natives of this country, who apply it, not just above the bite only, but at several places on the limb at intervals of some inches. There is reason to believe that if this be done without delay, the course of the poison may sometimes be stayed and life saved. Not long ago I saw a professional snake-charmer in the employ of the King of Oude, who said that he had been bitten in the finger by a fresh cobra. A ligature was immediately tied in three or four places above the bite, and though he suffered constitutionally to some extent, he had escaped with life. His finger, however, was shrunk and anchylosed, owing to excessive burning, the result of fire which was applied in the form of live-coal until the tendon shrivelled and was destroyed.

The danger and difficulty lie in not applying the ligature quickly enough. The confusion and alarm caused by the bite, the brief time that must elapse before the simplest ligature can be improvised, are liable to cause dangerous delay; and with every second of time lost, the danger increases. There is also the probability that the ligature may not be sufficiently tightened; no mercy, therefore, can be shewn; it must be tightened to the utmost, or it will not effect its purpose, and the poison will enter and do its fatal work. A piece of the dress twisted, a bit of string, a strap, anything that can be made to enclose the limb or part, should be immediately applied, and should be strained to the uttermost by twisting with a piece of stick; nor should the tension cease until the circulation is entirely arrested, and the part is livid with the retained blood.

The experiments I have made on the lower animals show not only how rapidly the poison enters, if the circulation be not immediately arrested, but also how difficult it is so thoroughly to compress the limb as to completely stop the circulation.

I found it all but impossible, with the strength of a pair of hands, so to tighten the ligature as to effect complete strangulation of a dog's hind leg.

The method most likely to succeed would be to tie the ligature tightly round the part, including a piece of stick, or some such lever, and then, by twisting the stick, so completely strangulate the part that circulation ceases—at whatever cost, this should be done. If the bite be in a finger, thumb, or toe, the first ligature should be applied a short distance above the bite, a second on the fore-arm or leg, and even a third higher up; it is the best, perhaps the only, chance of saving life; and however great the pain, it must be endured. No time should be lost in scarifying the punctures so as to allow the blood to flow freely; and then in applying fire, a live-coal, a red-hot iron, some caustic, mineral or carbolic acid, to the wound, so as to destroy the poison which is contained in the strangulated part; the disorganization must be very complete, or even then it will fail, as enough of the poison may remain to be subsequently absorbed when the ligature is removed, and after all destroy life. In the case of a finger or toe, I believe that immediate amputation would be justifiable, if the sufferer or his companions, an instrument being at hand, had the moral courage to lop off the part at once.

The natives are in the habit of placing a live-coal, or of exploding gun-powder, on the bitten part, and no doubt they are right in doing so.

The place and circumstances under which snake-bites occur are frequently such as not to leave much choice of means; but it would generally be possible to extemporize a ligature and a hot coal, or perhaps among sportsmen a little gun-powder might be forthcoming. Should the bite be inflicted on a part of the body where a ligature could not be applied, the only expedient remaining is to excise the part to the depth of punctures, let it bleed freely, and then apply fire or caustic. There is no time for reflection or consideration; it must be done at once, and thoroughly, or there is no hope of avoiding the influence of the poison. If the snake has been

seen and recognized as venomous, no doubt remains as to its necessity. But, if it has not been seen, and the marks indicate a poisonous snake-bite, the patient must have the benefit of the doubt, or his chance of life may be lost.

Suction either by the mouth or cupping-glasses is useful; for the latter purpose any small vessel might suffice; a little spirit or a piece of burnt paper alone would serve to exhaust the air; that by the mouth is efficacious, but it must be borne in mind that there is danger in applying the poison to the lips, for it may be absorbed, and evil results follow to the operator. But suction, however practised, should be applied after the ligature in those cases where that application is practicable; where it is not, after excision, and before the application of caustic or cautery. Fire may be applied, as I have said, either by the live-coal, the hot iron, or by exploding gun-powder on the part, or by the moxa.

The mineral acids, chloride of zinc, carbolic acid, or strong acetic acid, may be applied with a piece of old linen or cotton attached to the end of a piece of stick or other convenient vehicle.

The liq. ammoniæ, or liq. potas, are among the local applications recommended, but I have ascertained, by experiment, that they do not destroy the poisonous properties of the verus, although *mixed with it* in even more than equal quantities, and therefore are not to be trusted. Ipecacuanha, iodine, and other specifics are recommended as local applications. They are, I fear, useless.

Such are the local measures to be resorted to. At the same time, as there is great and rapidly increasing depression both from mental as well as physical causes, stimulants should be given at once frequently and freely. Hot brandy, or whisky, or rum and water, equal parts of each, are the best. Ammonia is also useful as a stimulant, and may be given in any of its officinal forms—the carbonate, the liq. ammoniæ, or the eau-de-luce. But it is simply as a stimulant, and has no specific or antidotal action beyond this. At the same time, warmth and sinapisms to the precordial and epigastric regions, in some cases cold douches, and all measures that may tend to rouse and stimulate the failing nervous energy, should be resorted to. So far popular notions are supported by science. But another popular view of the treatment of the so-called lithargy induced by the poison—that by walking the person violently about, and keeping him awake by flogging, pinching and other such violent measures—is, in my opinion, of very doubtful efficacy, if not altogether wrong. The man who is dying from snake-bite is perishing from rapid exhaustion of nerve force. To make him take violent exercise and deprive him of rest seems to me more likely to do harm than good. It would be almost as reasonable to give a man a blow on the head to recover him from concussion of the brain, or give him antimony to cure him of sea-sickness. Let him lie down; leave him to rest, to sleep, if he can. Many of the cases of so-called poisoning are not poisoning at all; the snake has not been seen, and it may have been innocent, or it may have been a poisonous snake, but exhausted. The punctures are there, and the appearances are all those of snake-bite. But the depression is due to mental shock from the dread of impending death. I have seen such a case.

Rousing, in the fashion I have alluded to, might do good here, but I believe that in real poisoning it can do only harm by exhausting the already-sinking powers of life. It may be said, it has often succeeded; people have been so treated and recovered. Who can say they would not have recovered as soon, perhaps sooner, without it? "*Post hoc*" does not always mean "*Propter hoc.*"

With reference to the snake stones which, when applied to the bites, are said to absorb and suck out the poison and obviate its evil effects, I have only to say that I believe they are perfectly powerless to produce any such effect. Of this more subsequently.

As unfortunately, in a large number of cases, persons who have been bitten by venomous snakes are not so promptly and vigorously treated, and the poison has found entry and manifested its presence by dangerous symptoms, it is too late to hope for any benefit from the application of the ligature or other local measures having for their object neutralization or destruction of the poison. The only course of treatment now to be adopted is that of endeavouring to neutralize or counteract the action of the poison which has already affected the nerve centres and poisoned the blood, and to support the strength during the continuance of the depressing influence.

This brings me to speak of the so-called antidotes, many of which have been and are so much vaunted. To name them all would be impossible, but I may say that most reliance has been placed on a few, such as ammonia, arsenic, iodine, bromine, the poison and the bile of other snakes, the guaco plant, ipecacuanha, aristolochia, senega, and, indeed, on nearly every drug in or out of the pharmacopœia, to say nothing of many other things that have been in vogue among the ignorant, vulgar, or superstitious, and that have nothing whatever but credulity to suggest their utility. I have made repeated experiments with many of them on the lower animals, and have seen nothing to induce me to believe that they have any good effect whatever.

I have no hesitation in saying that I believe them to be useless, and that excepting for their stimulant action, when they have any, they are inert. When the symptoms of poisoning have set in, either when the ligature and excision, or caustic or cautery, have failed, or when they have not been used, I believe that the only rational treatment is to endeavour to rouse the sinking energies, and arrest the tendency to fatal paralysis of the nerve force, by the aid of alcohol or other stimulants, such as ammonia or ether, judiciously administered, avoiding anything that can depress, such as fatigue or over-exertion, especially that of the popular

method of making the sufferer walk when his force is almost expended. Brandy or whisky, indeed any form of alcohol, should be given freely and frequently, though not in large quantities sometimes recommended. Galvanism may also be of service along the spine to the solar plexus or to the heart; in certain cases cold douches may be useful. Hot bottles and sinapisms may be applied, and every encouragement should be given to the sufferer, for much of the depression depends on mental causes. I have seen a strong man, who appeared almost at the point of death (from fright), recover in a very short time when I told him that the snake that had bitten him was innocent, and let it take hold of my finger to prove it so. So that whatever can be done to remove this element of depression, should be done by encouragement and assurance of safety (when the snake is found to have been innocent or weak), and in other cases, with hopes of recovery, which not unfrequently takes place, not because antidotes have been given, but because the bite has been imperfect or the snake incompetent; and, no doubt the recovery may be aided and expedited by treatment such as I have described. It will be inferred from what I have said that I put little faith in any of the so-called antidotes. My views of the treatment of snake-bite are, that if the early endeavours to prevent the entry of the poison into the system are unsuccessful, as unfortunately is too frequently the case, our reliance must be placed on supporting the strength with alcoholic, ammoniacal, or ethereal stimulants, and by treating consecutive mischief of constitutional or local character by such combination of remedial measures as the peculiar symptoms may suggest. My belief is that, if a certain quantity of the poison have entered the circulation, we can expect but little benefit from treatment of any kind; where less has entered, yet enough to cause dangerous, present and consecutive symptoms, we may do much to support the strength and save life by ordinary rational measures. But that we possess any drug or substance, solid or fluid, that, either swallowed or inoculated, can counteract or neutralize the poison once absorbed, and acting on the nerve centres, I do not believe, and I think the notion that we do is a dangerous one and liable to do harm by inspiring confidence in ways and means in which none should be placed. I have already explained how snake-bites may occur, and yet the bitten person may not be poisoned at all; or so slightly, as to leave it quite possible that recovery may take place. In such cases, recovery is due mainly to the inherent vigour of the individual, and in part, no doubt, to treatment. It is also my belief that a large proportion of such cases would recover without any treatment at all, though in some the judicious use of remedies may turn the balance in the patient's favor. I neither wish to discourage treatment, nor to throw cold water on investigation, but merely to state the facts as I think they exist.

It is right that the truth should be known, even if it be not what we could wish it; and it is better that we should study preventive measures and ascertain exactly how much we can do in those cases where our aid may be of avail, than that we should trust to measures which common sense and science alike should make us distrust.

With reference to the subsequent effects, constitutional or local, they should be treated on ordinary surgical principles. The strength should be supported by nutrients and wine, with such mineral or vegetable tonics as may seem appropriate. Collections of pus should be evacuated; the separation of sloughs aided by poultices and antiseptics, and the healing wounds dressed as other wounds of a similar form or character from other causes would be dressed and tended.

Should symptoms of a pyæmic or septicæmic nature arise, we must treat them as we would do similar conditions arising under other circumstances. The result will depend on the extent of blood-poisoning and the vigour of the person.

Although, from what I have said, it will be evident that in cases of real bites from the deadly forms of snake our reliance is chiefly on early and preventive measures, and not on the so-called antidotes, I hope it will not be inferred that I mean we are altogether powerless; far from it! I believe that in a number of cases—and I have described them—we may be of use; and we can, at all events, alleviate suffering, give hope and confidence where we are justified in doing so, and do all that science and common sense suggest as likely to be of service. The plan suggested by Dr. Halford, of Melbourne, of injecting ammoniæ into the veins, does certainly seem more rational than most suggestions that have been made, and I regret exceedingly that in my own experiments it has proved of no avail. The reason may, indeed, be in the greater virulence of the Indian Thanatophidia, and this may be the explanation of my failure where Dr. Halford has found success. But after all, the more venomous snake is the most crucial test. I would say the same in reference to the similar use of the liq. potas by Dr. Shortt in Madras. He, I believe, does not attach the same amount of importance to it as Dr. Halford does to the ammoniæ. In my researches both have been equally powerless, and I confess that I have felt much disappointed that experience has not confirmed the benefit of what certainly were rational suggestions by authorities to whom science is deeply indebted for much valuable information and most earnest investigation on an important subject.

I would summarize the treatment of snake-bite as follows:—Apply, at once, a ligature or ligatures, at intervals of a few inches, as tight as you can possibly tie them; and the one nearest to the wound tighten by twisting with a stick or other such agent. Scarify the wound, and let it bleed freely. Apply either a hot iron or live-coal, or explode some gun-powder over the part; or apply either carbolic or some mineral acid or caustic. Let the patient suck the wound whilst you are getting the cautery ready; or if any one else will run the risk, let him do it.

If it be a positive bite on a toe or finger, especially if the snake has been recognized as a deadly one, either completely excise, or amputate immediately at the next joint. If the bite

be on another part, where a ligature cannot be applied, or indeed if it be on the limbs above the toes or fingers, cut the part out at once completely.

Let the patient be quiet. Do not fatigue him by exertion. When, or even before, symptoms of poisoning make their appearance, give eau-de-luce, or liq. or carbonate of ammoniæ, or even better than these—hot spirits and water. There is no occasion to intoxicate the person, but give it freely, and at frequent intervals.

If he become low, apply sinapisms and hot bottles, galvanism or electro-magnetism over the heart and diaphragm. Cold douches may also be useful.

The antidotes, in addition, may be used by those who have faith in them; but, as I have said, I fear there is no reason to believe that they are of any use. Encourage and cheer the patient as much as possible. As to local effects, if there be great pain, anodynes may be applied or administered, and antiseptic poultices to remove sloughs; collections of matter must be opened.

Other symptoms to be treated on general surgical principles.

This, I believe, is the sum and substance of what we can do in snake-bite. If the person be not thoroughly poisoned, we may help him to recover. If he be badly bitten by one of the more deadly snakes, we can do no more.

I take the following account of the snake-stone from Sir E. Tennent's work on Ceylon :—

"They are of the size and appearance of small black almonds, highly polished, and of an extremely light substance. They are said to attach themselves closely when applied to the bitten part, the blood that oozes from the bite being rapidly imbibed by the porous substance of the so-called stone. They adhere tenaciously for three or four minutes. Meanwhile, the bitten limb is well rubbed downwards from the shoulder towards the fingers. At length they drop off, and the bitten person is said to be free from danger. Instances are narrated where happy result occurred. A bit of root is at the same time passed over the stone. One bit of root so used proved to be an aristolochia stem."

The snake-stone was examined by Professor Faraday, who expressed his belief that "it is a piece of charred bone, which had been filled with blood, perhaps, several times, and then carefully charred again. Evidence of this is afforded, as well by the apertures of cells or tubes in its surface as by the fact that it yields and breaks under pressure and exhibits an organic structure within. When heated slightly, water rises from it, and also a little ammonia; and if heated still more highly in the air, carbon burns away, and a bulky white ash is left, retaining the shape and size of the stone." This ash, as is evident from inspection, cannot have belonged to any vegetable substance, for it is almost entirely composed of phosphate of lime. Mr. Faraday adds that "if the piece of matter has ever been employed as a spongy absorbent, it seems hardly fit for that purpose in its present state; but who can say to what treatment it has been subjected since it was fit for use, or to what treatment the natives may submit it when expecting to have occasion to use it?"

Tennent goes on to say: "The probability is that the animal charcoal, when instantaneously applied, may be sufficiently porous and absorbent to extract the venom from the recent wound, together with a portion of the blood, before it has time to be carried into the system; and that the blood which Mr. Faraday detected in the specimen submitted to him was that of the Indian on whose person the effect was exhibited. The snake-charmers from the Coast, who visit Ceylon, profess to prepare the snake-stones for themselves, and to preserve the composition a secret. Dr. Davy, on the authority of Sir A. Johnston, says the manufacture of them is a lucrative trade carried on by the monks of Manilla, who supply the merchants of India; and his analysis confirms that of Mr. Faraday. Of the three different kinds which he examined, one being of partially burnt bone, and another of chalk, the third consisting chiefly of vegetable matter resembling bezoar, all of them (except the first, which possessed a slight absorbent power) were quite inert, and incapable of having any effect except in the imaginations of the patient. Thunberg was shown the snake-stone used by the boors at the Cape in 1772, which was imported for them from the Indies, especially from Malabar, at so high a price that few of the farmers could afford to possess themselves of it. He describes it as convex on one side, black, and so porous, that, when thrown into water, it caused bubbles to rise, and hence, by its absorbent qualities, it served, if speedily applied, to extract the poison from the wound."

In a foot-note, Tennent gives the following further particulars since the foregoing account was published: "I have received a note from Mr. Hardy relative to the *piedra ponsona*, the snake-stone of Mexico, in which he gives the following account of the method of preparing and applying it: 'Take a piece of hart's horn of any convenient size and shape, cover it well round with grass or hay, enclose both in a thin piece of sheet copper well wrapped round them, and place the parcel in a charcoal fire till the bone is sufficiently charred. When cold, remove the calcined horn from its envelope, when it will be ready for immediate use. In this state it will resemble a solid black fibrous substance of the same shape and size as before it was submitted to this treatment. *Use*. The wound being slightly punctured, apply the bone to the opening, to which it will adhere firmly for the space of two minutes, and when it falls, it should be received into a basin of water; it should then be dried in a cloth, and again applied to the wound. But it will not adhere longer than about one minute. In like manner it may be applied a third time; but now it will fall almost immediately, and nothing will cause it to adhere any more.'

"These effects I witnessed in the case of a bite of a rattle-snake at Oposura, a town in the Province of Sonora, in Mexico, from whence I obtained my recipé; and I have given other particulars respecting it in my travels in the interior of Mexico, published in 1830-31.—R. W. Hardy, Bath, 30th January 1860."

There is a germ of possible truth in the idea that these stones can be of use; for, if they absorb as they are said to do, no doubt some blood and poison mixed are taken up by their pores.

But when we reflect on the quantity of poison and the force and depth with and to which it is injected through the fang of either cobra or viper, and the extreme rapidity with which it is hurried along in the vascular system to the nerve centres, I think it is obvious that this can be of little use in a *real bite* of a deadly snake, and that it is a dangerous delusion, as it may be the cause of the loss of the first two or three seconds, which are so precious to the sufferer, for on what is done in them, his life may depend. I may add that I have found the snake-stone as powerless for good as any of the so-called antidotes.

MEMORANDUM by Dr. V. Richards, *Civil Medical Officer, Balasore, dated 12th December 1872, on Dr. Halford's Treatment in Snake-bite, communicated to Dr. Fayrer.*

In a letter to E. C. Bayley, Esq., C. S. I., Secretary to the Government of India, Professor Halford of Melbourne defends his mode of treatment. I purpose showing, in the following lines, with what success.

The question at issue is this:—Is the injection of ammonia into the veins a remedy for the bite of an Indian venomous snake?

Dr. Halford asserts that, reasoning by analogy, his opinion is that, if "ammonia be as freely injected into men's veins in India (instead of dogs) as it has been in Victoria, it will become as great a favourite there (in India) as it is here (in Victoria)."

I will first proceed to examine the grounds on which Professor Halford has founded his opinion. On the statement of Dr. Fayrer—to the effect that "the injection of ammonia into a vein fails to counteract the action of the virus of the deadly snakes of India on the lower animals—" Dr. Halford remarks that "the actual experiments on human subjects prove its efficacy." The basis, therefore, upon which Dr. Halford seeks to establish the efficacy of his mode of treatment, is actual observation on human beings. But he remarks in the 9th paragraph of his letter to Mr. Bayley—"no one, I suppose, will deny that a bite that ends fatally is a really severe one. *But who is to know whether any bite is going to end fatally?*" Again in the 11th paragraph—"all experience, and all the literature of snake-poisoning, tells us *we cannot say what is and what is not a severe bite until the result;* and if we wait for that, of course it will be too late for treatment." And yet it is on these very conditions that the efficacy of his treatment is sought to be established—actual observation in cases in which it is absolutely impossible to tell whether the bites were *legitimate* or not. Strange as it may appear, it is nevertheless true that nearly all those who come under treatment for snake-bite *recover under very different modes of treatment,* and it is due to this fact that so many reputed antidotes exist. This being the case, adopting the line of argument introduced into the 10th paragraph of Dr. Halford's latter—*If* liquor ammoniæ had been injected into the veins in all these cases of recovery, it would have been "set down" to the treatment. In fact, had any one universal mode of treatment been adopted (as appears to be the case in Victoria) that treatment would have been regarded as a panacea, an antidote, no matter how much "beside the truth" it would have been. The futility of seeking to establish the value of any treatment upon such uncertain conditions as these "observations made on human subjects" being acknowledged, it becomes necessary to consider what other procedure is more valuable as a means of enabling us to draw reliable deductions.

It is manifestly impossible to experiment with snakes on human beings (in the true sense of the word "experiment"—that is, where all the conditions are in the power of the experimenter); we must, therefore, do so on the lower animals.

Dr. Halford admits, with regard to the poison, that "it is perfectly true in a broad sense that the effects of snake-poison are similar in man and in the lower animals," and states that it was "from seeing the beneficial effects of injected ammonia in snake-poisoning *in dogs,* that he recommended its use in similar cases in men." All the arguments regarding the injection into the veins of large quantities of morphia and atropine are therefore beside the question. The result of a snake-bite, whether in the lower animals or in man, is death, and the result of Dr. Halford's treatment, according to his shewing, both in the lower animals and in man bitten by venomous snakes, is recovery. These being Dr. Halford's own convictions, it is very remarkable to find him ignoring the experiments made on the lower animals in this country, especially as he "concludes that there is little difference between the Australian tiger-snake and the Indian cobra as regards the power of the poison."

Like Dr. Fayrer, I have carefully tested the injection of ammonia into the veins of the lower animals bitten by Indian venomous snakes, and unhesitatingly assert that it has failed to prevent death even in a single instance. I think, therefore, considering all the circumstances, we are justified in concluding that Dr. Halford's treatment "has no power in saving life in the bite of an Indian venomous snake."

So much for the efficacy of the treatment: now for its utility and general applicability, *presuming* its efficacy established.

Dr. Halford is no doubt little acquainted with India. How many of the "20,000 who die annually in India from snake-bite" come under the treatment of European medical men, or natives educated in the science of medicine? It will probably astonish him to find that not 20 do. Granting him, then, "the one in twenty saved," "*the fact remains*" that one life out of 20,000 would be saved. Professor Halford's procedure is much too complicated: *instruments, professional skill,* besides immediate action, are necessary. The action of the cobra and other snake-poison is rapid, death occurring from fifteen minutes to a few hours. Does Dr. Halford suppose that each village has its educated medical man, and, even if it had, the villagers would apply to him, instead of to their native snake-charmers? It would appear so. Although I resided for five years in the District of Bancoorah (one of the worst in India for snakes), in which 100 people die annually from snake-bite, not one of them during the whole five years came under my treatment, but eight, who recovered under various treatment, did. Now, had I injected ammonia into the veins in each instance, and claimed for that treatment absolute success in my hands, "*it would have been beside the truth.*" What would Professor Halford say of the application of hot sealing-wax as a remedy to snake-poisoning? He would in all probability laugh at it as an absurdity, and he would be right. But there is a gentleman who advocates it, and moreover declares that he has proof of its efficacy from *observations on human beings.* A Bordeaux newspaper, "*Le Mouvement,*" of the 30th of October 1871, has the following:—"*M. Hélidore, Ruiz, de Colombié (Nouvelle-Grenade) écrit au Gouvernement de cette contrée, qu'il a traité avec le plus grand succès un grand nombre de morsures de serpents par la cautérisation. La province abonde en serpents dont la venin est mortel; or M. Ruiz a déjà guéri soixante-dix personnes mordues, en faisant couler simplement, sur chaque morsure quelques gouttes de cire à cacheter.*"

To the very same "undoubted facts," on which Dr. Halford assumes the efficacy of his treatment, do numerous other persons, none the less truthful, appeal, as confirmatory evidence in favour of their separate *antidotes.* How, then, can deductions based upon such data be considered anything but fallacious?

I trust Dr. Halford will regard this criticism of his mode of treatment in the light it is intended, *viz.,* as one of the means of ascertaining the truth. Dr. Halford has alluded to success having attended his experiments on dogs. Is he certain? Did he satisfy himself, beyond the possibility of a doubt, that in each case, from which he drew any deductions, the bite was a legitimate one? Did he hold, or have held, the snake and make it bite some soft vulnerable part of the dog? If not, his experiments, as a test of the efficacy of his treatment, are unreliable.

I hold it to be a *sine quâ non,* in testing the value of any remedy for snake-bite, that the bite shall be beyond all doubt a legitimate one; and so long as any doubt under this head exists, so long must the test as such be regarded as worthless.

Experiments on the influence of snake poison and on the injection of certain fluids into the venous circulation as antidotes and on the application of the ligature and actual cautery.

By J. Fayrer, M. D., C. S. I.

Present—Dr. Fayrer, Dr. Ewart, Professor of Physiology, and Mr. Sceva.—June 12th, 1869.

Experiment No. 1.

A fowl was bitten in the thigh by a spectacled cobra that had been kept in confinement for some weeks, had bitten before, and was, therefore, not fresh. The fowl was bitten at 3 P. M.

At 3-1-50.—Fowl staggering; fifteen drops of strong Condy's solution, furnished by Messrs. Scott, Thompson and Company, was injected with the hypodermic syringe into the fowl's thigh.

3-2-50.—Fell down paralysed.

3-4.—Lies almost dead; just breathing.

3-5.—Convulsed.

3-7.—Dead.

Death occurred in seven minutes; but the bird was evidently unconscious after the first 2½ minutes. I could not recognise any good effect from the injection.

Experiment No. 2.

The left crural vein of a dog was exposed, ready to receive the injection. The dog was then bitten by a cobra in the right thigh at 3-20 P. M. The cobra was not fresh, it had been in captivity for some time, and had bitten before; but it was tolerably vigorous.

3-23.—Dog is excited and restless.

3-24.—Same condition; whining.

3-27.—Much excited; trying to break loose; is salivated; breathing hurried.

3-37.—Is beginning to show signs of the influence of the poison; is slightly convulsed; falls over.

3-37-30.—Injected 60 drops of liquor ammoniæ sp. gr. ·959 into the crural vein; followed immediately by convulsive twitchings of mouth and limbs.

3-42.—Lying down, very low, almost motionless; irregular action of the heart; injected 40 drops more of the liquor ammoniæ.

3-43.—No change; heart's action very feeble.

3-44.—Lies perfectly still, as though dead: no respiration; heart beats very irregularly; 35 pulsations in 30 seconds.

3-45.—Dead.

Post-mortem examination of body at 4-20 P. M. Lungs pallid; no congestion. Heart right side much distended with black clots. Left ventricle contained a little dark fluid blood. The viscera generally were pallid; but the liver was somewhat congested. Brain—cerebral substance free from congestion; vessels on surface slightly distended with blood. The blood generally coagulated firmly.

EXPERIMENT No. 3.

The external jugular vein of a dog was exposed at 3-34 P. M.; 40 drops of the liquor potas permanganat (Condy's) was injected into the vein at 3-35.

No effect produced at the time; the dog did not appear to take any notice of the injection.

3-40.—Dog apparently not affected.

3-45.—Seems rather depressed, but this is not marked; it may be fear.

3-48.—Bitten by a large cobra (not fresh, for it has been some time in captivity, and has bitten before) in the thigh. The fang punctures were at once washed with the Condy's solution, which was well rubbed in.

3-49.—Bitten leg partially paralysed.

3-50.—Lying down; when raised can stand, but quickly lies down again; is quite intelligent.

3-51.—Droops his head.

3-52.—60 more drops of the fluid injected into the vein.

3-54.—Two drams injected into the bowel; is able to sit or stand, but is very weak.

The injection of the Condy was not followed by convulsions, as in the case of the liquor ammoniæ.

3-58.—Lies down; head falls over; breathing hurried; rises and staggers a little and sits down again.

4 P. M.—Lies sluggish and dejected; can walk when raised, but staggers and soon sits down again.

4-5.—Can still stand and walk with staggering gait.

4-7.—Lying down, but gets up and walks a few steps; head drooping, and look dejected; twitching of muscles generally.

4-8.—When put on his legs can still stand; breathing hurried; coat staring.

4-12.—40 more drops injected into jugular vein.

Slight twitching of muscles generally; lies down on his side; cannot rise; limbs paralysed; pupils dilated; slight convulsions of extremities and muscular system generally; breathing catching and rather slow.

4-22.—Motionless; heart still beats 50 in the minute; no respiration.

4-24.—Heart still felt.

4-25.—Dead.

Bitten at 3-48; dead at 4-25; in 37 minutes.

Death occurred in about the usual time, and with the usual symptoms in which it occurs when a dog is bitten by a cobra. I do not believe the effects of the poison were in any way influenced by the permanganate.

Post-mortem at 4-40 P. M.—Lungs much collapsed and very pallid. Both sides of heart full of fluid blood; great vessels distended. The blood coagulated firmly when let out of the heart and vessels. Abdominal viscera not so pallid as in the other dog. Brain vessels on surface full of blood: cerebral substance pale, scarcely any puncta.

EXPERIMENT No. 4.

A fowl bitten by a cobra (not fresh) in the thigh at 4-45 P. M.; 20 drops of liquor ammoniæ having previously, at 4-43, been hypodermically injected into the thigh, no apparent effect produced by the ammonia thus injected. Bitten by the cobra at 4-45 P. M.; in 30 seconds it was in violent convulsions.

4-46.—20 more drops injected.

Dead before it could be placed on the ground.

EXPERIMENT No. 5.

The following experiments were tried with the object of again testing the effect of the Cobra poison on itself, or on another cobra.

A cobra was bitten sufficiently near the tail to avoid the chance of injuring any of the viscera by another full-grown, fresh, and vigorous cobra. The snake bit deeply, plunging its fangs twice or thrice into the flesh of the other cobra, which was then put aside in a separate cage, and watched.

13th, 6 A. M.	...	...	...	...	No change.
,, 7 P. M.	...	...	...	...	do.
14th, 6 A. M.	...	...	...	...	do.
,, 6 P. M.	...	...	...	...	do.
15th, 6 A. M.	...	...	...	...	do.

The snake evidently has not suffered.

EXPERIMENT No. 6.

A vigorous and fresh full-grown cobra, with one occellus in the hood (Keutiah of the natives) was made to bite himself three or four times near the tail at 4-48 P. M. He bit himself quite as freely as he would have bitten another snake, brought blood, and smeared the surface with poison; put into a cage and watched.

Was not the least affected on the 15th, three days after the bite.

These two experiments, which were very carefully performed, tend to prove that the cobra cannot poison itself or its own species.

Present—DRS. FAYRER, EWART, WALLER, and MR. SCEVA.— June 19th, 1869.

EXPERIMENT No. 7.

A full-grown cat was bitten at 2-43 P. M. in the right thigh by a large Daboia. The snake had been long in captivity, and was therefore most probably not vigorous, though active and vicious.

2-49.—Twitching of the muscles; restless.

3-12.—The cat appears to be unaffected.

3-15.—The Daboia again made to close his jaws on the cat's thigh, though evidently unwilling to bite.

3-44.—The cat seems sluggish, and is evidently now feeling the poison.

3-45.—Bitten by a cobra on the thigh.

3-46.—The cat is unsteady in its gait; breathes hard; looks distressed.

4-7.—Cat is restless; tries to rise, and staggers.

4-10.—Tries to stand, but falls over.

4-18.—Respiration very hurried; cannot stand; twitching of the muscles.

4-24.—Lies quite paralysed; pupils dilated; breathing hard.

4-27.—Convulsed.

4-30.—Dead.

The cat was bitten by the Daboia at 2-43 P. M., and again at 3-15. The snake was old and feeble; it has been in captivity for more than six months, during which time it has touched neither food nor water, and yet it was active and vicious, hissing fiercely at any one who came near it; that it was capable of secreting poison was evident in later experiments.

The cobra bit at 2-45; and death occurred at 4-30; that is, in one hour and forty-seven minutes. The cobra was also not fresh, and its poison was weak, perhaps scanty. There was nothing whatever in this experiment to make us think that the cobra's poison proved antidotal to that of the Daboia; on the contrary, it rather expedited death.

EXPERIMENT No. 8.

A fowl was bitten in the thigh by the same Daboia at 3-40. The snake would not bite until his jaws were closed on the bird's thigh.

3-44.—The fowl, whilst walking about with rather a sluggish gait, suddenly sprang off the ground, and fell over in convulsions. It was immediately bitten in the thigh by a cobra. It continued unconscious and convulsed, and was dead at 3-46; that is, in six minutes after it was bitten by the viper. Had this viper been fresh, the bird would probably not have lived one minute.

EXPERIMENT No. 9.

Another fowl bitten by the same Daboia at 3-56 P. M.

3-58.—It limps; has a depressed look, and its comb droops.

3-59.—Bitten by a cobra in the thigh; lies down.

4-2.—Slight convulsions.

4-3.—Comb livid; convulsed and unconscious.

4-5.—Dead in nine minutes.

These three experiments, I think, dispose of the question of the poison of one family of venomous snakes being antidotal to the other.

In these cases the viper was old and exhausted, and yet his poison was deadly. The poison of the cobra, which was also a partially exhausted snake selected on purpose, had no counteracting effect. The only thing proved is the terribly deadly nature of the Daboia, which, after such long confinement without food or water, yet retained the power of causing death.*

These experiments were made in reference to certain suggestions that have appeared in the journals, but not with any expectation on my part that any other result than that which occurred could take place. The poison of the deadly snakes, of whatever family, kills by paralysing the nerve centres, and it appears as reasonable to expect prussic acid to prove antidotal to aconite, as the cobra poison to be so to that of any other form of venomous snake.

EXPERIMENT No. 10.

A fowl was bitten by the same Daboia in the thigh at 4-7 P. M.

4-10.—Sitting down; looks sluggish.

4-15.—Rises and runs about, but is lame.

4-27.—Walks, but is very lame on the bitten leg.

4-45.—Still walks about, but is sluggish and lame, and looks very dejected.

---

* The Daboia was not intentionally deprived of food or water; it would take neither.

The fowl, after this, began to recover, and on the 21st, two days later, was quite well. The snake was evidently all but quite exhausted when he bit this bird.

EXPERIMENT No. 11.

The external jugular vein of a dog was exposed at 3-6 P. M., and four drops of cobra-poison were injected; at least one drop was lost, the other three entered the vein.

3-10.—Dog looks dejected, and ears drooping; he lies down.

3-33.—Beyond being sluggish, no symptoms of poisoning.

3-46.—Very sluggish; lies down.

3-47.—Liquor ammoniæ, sp. gr. ·959, 60 drops, injected into jugular vein; dog lies quiet. Heart beating rapidly; respiration very feeble.

3-54.—Heart's action very rapid; breathing rapid; muscular twitchings.

3-57.—Injected 60 more drops into the vein; muscular twitchings continue.

3-59.—Dead.

Poison injected at 3-4; death at 3-59. Death in 55 minutes. The quantity of poison was very small from a weakened snake; no effect was produced by the ammonia.

EXPERIMENT No. 12.

The jugular vein was exposed in a dog; it was then bitten in the thigh by a fresh cobra at 3-27.

3-28.—Staggering; excited; springing; howling violently, and trying to break the cord by which it is tied.

3-29.—Quiet; sitting down.

3-30.—Head drooping.

3-33.—Lying on its side, slightly convulsed; sixty drops of a solution of quinine, of the strength of one grain in eight drops, was injected into the jugular vein.

3-34.—The dog lies on its side, still slightly convulsed.

3-35.—Dead.

Bitten at 3-27; dead at 3-35, in eleven minutes. The quinine evidently did no good.

EXPERIMENT No. 13.

Equal parts of cobra-poison and liquor ammonia, sp. gr. ·959, were mixed together, and fifteen drops of the mixed fluid were injected with the hypodermic syringe into a pigeon's thigh at 4-30 P. M. Pigeon crouched immediately; at 4-31 was unable to stand; the beak resting on the ground.

4-32.—Convulsed: peculiar convulsive movements of the tail continuing.

4-32.—Dead.

Injected at 4-30; death at 4-32, in two minutes. This experiment is very unfavorable to the theory of the antidotal action of liquor ammoniæ.

EXPERIMENT No. 14.

The external jugular vein of a large and powerful dog having been exposed, 10 drops of fresh cobra-poison were injected into it at 4-24 with the hypodermic syringe.

4-24-30.—The dog staggered, was convulsed, and fell over foaming at the mouth.

4-25.—Violently convulsed, but with no outcry or sign of suffering.

Sixty drops of liquor ammoniæ, sp. gr. ·959, injected. Dead.

Death occurred in about 70 seconds, showing the frightful virulence of the poison when it finds entry by a large blood vessel.

How can such a death be explained otherwise than by exhaustion of the nerve centres? Any theory of blood-change is surely totally inapplicable here.

Present—DR. FAYRER, DR. EWART, Professor of Physiology, and DR. SCEVA.—June 26th, 1869.

EXPERIMENT No. 15.

A pariah dog was bitten in the fore-arm by a cobra (Kalla Keutia) at 3-2 P. M.

A ligature had been thrown round the limb above the bitten part, which was immediately tightened; a pointed steel, heated to a red heat, was then, at 3-3 P. M., inserted into the punctures, and the wounds were thoroughly cauterized.

3-7.—The dog is restless, and is apparently under the influence of the poison.

3-12.—Staggers as he walks.

3-14.—Forty drops of liquor ammoniæ, sp. gr. ·959, diluted with three parts of water, were injected into the jugular vein.

3-17.—The dog runs about excited; he was partially convulsed during the injection of the ammonia; now sits up, and then falls over backwards, breathing quickly.

3-20.—Lies down; is salivated.

3-27.—Sits down; paws the air; muscular twitchings.

3-38.—Lying on his side; convulsed.

3-44.—Lies paralysed; heart still beats, but no respiration.

3-45.—Dead.

Notwithstanding the ligature, which was tightened immediately, the actual cautery, which also immediately followed the cobra's fangs, and the injection of ammonia into the venous circulation, the snake-poison proved fatal to a full-grown dog in forty-three minutes.

EXPERIMENT No. 16.

A dog was bitten by a fresh cobra (Kalla Keutia) in the fore-arm at 3-38 P. M.; a ligature was immediately tightened round the limb above the wound. The actual cautery was at once applied, until the fang wounds and the adjacent parts were completely disorganized.

3-42.—The dog is sitting, but reels as though he would fall over.

3-49.—Rises and walks with a staggering gait.

3-54.—Sits down; attempts to get up, and falls over backwards.

3-57.—Is convulsed; falls over; cannot stand; hurried breathing.

4-4.—Cannot move; lies paralysed; heart still beating; respiration almost ceased; pupils widely dilated.

4-6.—Lies on his side; convulsed.

4-12.—No respiration; but heart still beats feebly.

4-13.—Dead.

In this case also, notwithstanding the ligature, which was applied as tightly as two persons could pull it round the leg, and the deep and thorough actual cauterization, immediately after the bite, the snake-poison found entry into the system, and proved fatal in thirty-five minutes. The dog was much smaller than that of the first experiment.

Nothing, it seems to me, can more strongly demonstrate the extremely subtle and virulent nature of the cobra-poison than those experiments; nothing, I think, is more significant of the improbability of anything proving to be an antidote. If the poison find entry into the blood vessels, and be carried to the nerve centres, I am inclined to believe that nothing can prove of any avail, excepting in those cases where the bite is imperfect, the quantity or the quality of the poison diminished or deteriorated, or the snake itself is young, weak, exhausted, or is one of less poisonous family; such, I believe, are the only cases in which recovery occurs through the inherent vigour of the animal or person bitten, perhaps, aided by stimulants and excitement. The favourable result is attributed, and naturally enough, by those who do not understand the *modus lædendi* of the venom, to the treatment and the so-called antidote. That we can aid in such recoveries, and that we may do much to help the sufferer through the troubles arising from general disorder and secondary blood poisoning, I have no doubt; and I would offer every encouragement to all to persevere in their attempts. But I must state my conviction that nothing that can properly be called an antidote to cobra or viper poison exists; and the more this is known the better, for mistaken notions on such an important matter can only do harm, and may be the cause of losing rather than of saving life.

My belief is that, if an animal, and probably a man, be fairly bitten by a fresh and vigorous cobra or Daboia, it, or he, will inevitably succumb, unless some immediate and direct method of arresting the entry of the poison into the circulation be practised.

That such may be done, I will not deny; but the two experiments just recorded, performed with the greatest care and speed by two Surgeons accustomed to such operations, show that, at the least, it is very difficult. The moment of time that intervenes between the injection of the snake-poison by the powerful maxillary muscles through the tube-like fang into the minute blood vessels of the part, and the application of the ligature and actual cautery, is sufficient to allow of the entry of the poison into the circulation, and this reaching the nerve centres even in a small quantity may prove fatal. The ligature is evidently very unreliable when applied to large parts of the body, such as the limbs; for it is almost physically impossible to compress the part so tightly as to stop the circulation; and unless this be done to the depth of the penetration of the snake's fangs, it is obvious that it can only be of very partial effect in preventing the entry of the poison. On a finger or a toe the ligature might be of more service, as the smaller part might be thoroughly strangulated; but unless the ligature were applied immediately, it is obvious that it would be useless even there, for the poison would have already entered, and be on its course towards the nerve-centres. How quickly this occurs is proved by those experiments in which the poison was injected directly into the jugular vein. What took place there, with the hypodermic needle inserted into the jugular vein, has its exact counterpart in the case of the cobra's fang, inserted, as it must be, when it penetrates a vascular part, into the minute veins.

The same may be said of the actual cautery. Unless the hot iron enter the puncture directly after the fang has been withdrawn, the poison is already far on its way towards the centre, and the burning, though it destroys the tissues and such of the poison as may not yet have entered the circulation, can have no influence on that which is already beyond its reach.

But as the ligature, if tightly and quickly applied, and the actual cautery, if promptly and and thoroughly inserted, must limit to a certain extent the entrance of the poison, both should be had recourse to as speedily and efficaciously as possible, in the hope that the amount of poison left to find, or that may have already found its way into the system, may be less than is sufficient to cause death.

To conceive of an antidote in the true sense of the term, to snake-poison, one must imagine a substance so subtle as to follow, overtake, and neutralize the venom in the blood, or that shall have the power of counteracting and neutralizing the deadly influence it has exerted on the vital forces. Such a substance has still to be found, and our present experience of the action of drugs does not lead to hopeful anticipation that we shall find it.

But I repeat that, where the poisonous effects are produced in a minor degree, or when the secondary consequences are to be dealt with, we may do much to aid the natural forces in bringing about recovery. This is not, however, what is meant by an antidote.

Experiment No 17.

A large and powerful dog had the right external jugular vein exposed. Twenty drops of a mixture of fresh cobra-poison, taken from the snake the same day, one part, and liquor ammoniæ, sp. gr. ·959, forty drops or two parts, was then injected with the hypodermic syringe into the vein. The time of the insertion of the fluid was 4-27-30. The effect was instantaneous; the dog struggled, howled, and was convulsed on the table; he was immediately released and placed on the ground, but was already almost unconscious and convulsed. He made an effort to rise on his legs, and fell prone on his belly. Within one minute respiration had ceased, though the heart's action continued faintly. This ceased, and at 4-30 A. M. he was quite dead. The action of the poison with the ammonia was frightfully rapid in this case. Death occurred in two minutes and a half; complete unconsciousness within a minute; and only by the faint beating of the heart, which only continued for two and a half minutes, was any sign of life manifested. This surely is fatal to the theory of ammonia injected into the circulation being of any benefit in snake-poisoning. In this case the poison and the so-called antidote were injected synchronously; the result was almost instant death.

The experiment was performed by Dr. Ewart and myself, with the greatest care, and certainly no air entered the vein.

Experiment No. 18.

The cobra that bit the dog in the first experiment bit a fowl in the thigh at 3-46 P. M. The bird immediately began to limp, and then crouched, and then fell over.

3-47.—Head fallen over, beak resting on the ground.

3-49.—Convulsed; dead.

Death occurred in three minutes.

A second fowl was bitten by the same snake, at 3-50 P. M., in the thigh.

3-51.—Drooping his wings.

3-55.—Sits down, beak resting on the ground.

3-57.—Is convulsed.

4. P. M.—Dead in ten minutes.

A third fowl bitten by the same snake in the thigh at 3-51 P. M., shortly after drooped.

3-58.—Convulsed.

4-2.—Dead.

Dead in 11 minutes.

A fourth and larger fowl bitten in the thigh by the same cobra at 4-3 P. M.

4-8.—Crouching; wings spread out; gets up; tries to run, and falls; head droops, beak resting on the ground.

4-10.—Convulsed, 4-17.—Still convulsed; comb livid.

4-20.—Dead in 17 minutes.

A fifth fowl bitten in the thigh by the same cobra at 4-13 P. M. 4-20.—Crouches; comb drooping.

4-24.—Head drooping, resting on beak. 4-29.—Quite paralysed; convulsed.

4-35.—Dead in 22 minutes.

A pigeon was bitten in the thigh by the same cobra at 4-37 P. M.

4-47.—The pigeon is drooping, and, when he stands, it is on one leg, and then falls over again.

5-22.—Dead in 45 minutes.

This was the ninth animal bitten by the cobra in rapid succession, and still it is apparently not quite exhausted.

A sixth fowl bitten in the thigh by the same cobra at 4-32 P. M.

4-35.—Crouching. 4-47.—Staggers.

5-45.—Lying down insensible.

6-5.—Dead in 99 minutes.

A seventh fowl bitten by the same cobra in the thigh at 4-34 P. M.

4-37.—Crouches. 4-47.—Seems sluggish, and limps.

27th June, 5-30 A.M.—Lying down, and eyes half closed; unable to walk.

28th June, 6 A. M.—Is recovering; walks sluggishly and limps, but is evidently regaining strength.

The object of this experiment was to test the extent of power possessed by the cobra. It destroyed one dog, six fowls, and a pigeon in rapid succession, but the intervals between the bite and the death of each was prolonged, showing the gradual diminution of power at each bite. The seventh fowl poisoned was only slightly so, and recovered.

The cobra was neither a very large nor a very vigorous one, and yet how deadly! Eight creatures destroyed by a rapid succession of bites. The experiment proves that the snake becomes weaker by biting until quite exhausted.

Experiment No. 19.

A Daboia was bitten by a fresh cobra (Kalla Keautia) near the tail, sufficiently far from the viscera. The scales were previously scraped off. The snake bit fiercely and repeatedly at 4-54 P. M.

6 P. M.—No change.

On the 28th June, at 6 A. M., there was no change.

The object of this experiment was to repeat the test of the influence of the cobra-poison on the viper. The result tends to show that it is innocuous.

Dr. Shortt, Superintendent General of Vaccination, Madras, who had interested himself in the treatment of snake-bites for several years, was asked by the Government of Madras to give his opinion on the subject. The following are his remarks :—

From the ancient repute that ammonia and its preparations have had as an antidote, I tested it repeatedly and carefully on several occasions in the following manner :—

I. By mixing liquor ammoniæ with the cobra poison, and injecting it hypodermically into animals.

II. By injecting liquor ammoniæ itself, hypodermically, into snake-bitten animals.

III. By administering the liquor ammoniæ by the stomach and bowels to snake-bitten animals.

IV. By the injection of liquor ammoniæ, as suggested by Professor Halford, into the veins of snake-bitten animals, and I regret to state that, notwithstanding the utmost care and repeated experiments on the lower animals, the ammonia failed completely to restore such animals to life.

In addition to the various experiments conducted by myself at different times and places, on the 14th January at my house in Madras, before Dr. Mackenzie, the late Inspector General, Indian Medical Department, and some twenty Medical Officers, and at the Madras Medical College Theatre, on the 29th January 1870, in the presence of most of the Professors of the College, several Medical Officers, students, and other gentlemen, I demonstrated to their satisfaction, I believe, by experiment on animals the complete failure of the liquor ammoniæ as an antidote by injection into a vein.

My experience of the liquor ammoniæ as an antidote by injection into the veins is simply confined to the lower animals, as I have not had the opportunity of testing it in man; but the uniform evidence given of its success by some twenty medical men after trial on the human subject in Australia, as given in this pamphlet, startles me at the miraculous cures said to be effected, as moribund patients have not only recovered, but were, upon their legs, able to partake of food and walk off to their houses after recovery from the snake-poison in an incredibly short time.

Dr. Halford, in the pamphlet alluded to, enters largely on the hypothetical action of ammonia in the human system; and however ingeniously argued, this is a mere matter of theory, into which it is not my province to enter, as I prefer confining myself to practical facts, the result of my personal experiments.

The result of my experiments on the poisoned blood in testing it, both physically and chemically, proves that the poison enters the system and destroys the integrity of the blood in snake-bitten animals when they have been fairly bitten and a due proportion of poison injected into the wound, and any antidote to prove effective must be capable of overtaking the poison in the blood as it circulates in the living system and there neutralize it chemically, for this is the only way in which both facts and experiments tend to confirm.

The liquor ammoniæ has universally been used as a diffusable stimulant generally, and therefore recommended in snake-poison; but, as far as my personal experience extends, it does not seem to be of any particular value, as I consider brandy a more reliable remedy; from being a powerful stimulant, it tends to support the system where freely administered, and rapidly enters the circulation, rouses up the nervous energy rendered dormant by the poison, and admits of time for the administration of a chemical remedy, should such exist.

Dr. Halford states at page 11 of his pamphlet that "ammonia and brandy thrown into the system is not absorbed;" this is contrary to my experience in the cases that have come under my immediate notice. I have had no difficulty in bringing the system under the influence of brandy by frequent doses administered by the mouth and bowels where necessary, so as to bring the snake-bitten patient rapidly under its influence; and at page 18 Dr. Halford admits "that liquor ammoniæ has no chemical action over snake-poison."

It further strikes me that, if even the ammonia really proves so valuable a remedy, the injection of it into the veins can be undertaken by very few non-professional persons in the absence of a Surgeon, as they will not possess the *nerve* or the skill to free a vein and introduce the nozzle of a syringe into it, and it is stated that "the parts slough if the ammonia be spilt."

Liquor ammoniæ and brandy have been fairly tested in the human subject for the snake-bite, and the hypodermic injection of the ammonia also, but it has never as yet been injected into a vein; this has yet to be tried in man, whilst it completely failed in the lower animals, not only in my own experiments, but in that of other medical men in Calcutta.

In conclusion, I would remark, with reference to that part of Dr. Halford's experiments as given in the above pamphlet, where the ammonia was injected into the heart of dogs, not only to prove its innocuousness, but also its power of counteracting the narcotic effects of chloroform, that these experiments appear to me inconclusive, as the animals were not permitted to live sufficiently long to ascertain any deleterious action the liquor ammoniæ may have produced on them: this is absolutely necessary ere pronouncing so confident an opinion as that given by Dr. Halford.

The following is the abstract of the opinions of certain Medical Officers in the Punjab, who were consulted on the subject by the local Government.

Dr. Willmot, Medical Officer of Gurgaon, states that during the month of September 1871 a case of snake-bite came under his observation. It was that of a tailor boy, about 14 years of age, who had been bitten in the finger by a small brown-colored snake, called by the natives "Haffai," but most probably a "Krait." No treatment was of any avail, and the boy died about 20¾ hours after he had been bitten. Ammonia and other stimulants were given with milk, and, after parts affected had been punctured, was also applied to the skin. A ligature was tied round the wound when the boy was admitted, and he was kept awake as long as possible. Dr. Willmot is of opinion that all treatment in this case was useless, and inclines to the belief that the only treatment likely to be useful in similar cases would be to exhaust the air external to the wound by cupping-glasses, or, better still, by sucking the wound immediately after infliction. In the present case cupping-glasses could not be applied, as the part bitten was the finger.

Dr. Cooper states that he has not had an opportunity of testing Professor Halford's method of treatment in cases of snake-bite, but will do so when he has, as he believes that the injection of ammonia into the blood will prove successful.

Dr. Massey, of Jullundur, holds that the numerous experiments made by Dr. Fayrer at Calcutta prove that there is no known antidote for the poison of a venomous snake. He considers that the safest, and probably the only reliable, remedy in snake-bite is immediate excision, and application of strong nitric acid to the wound, together with stimulants, and all other remedies calculated to support the system while throwing off the poison.

Dr. Cox, of Muzaffurgarh, states that he has no opinion to offer, as the plan of treatment advocated has not been tried; but from the fact that slight cases of snake-bite were relieved by the internal use of liquor ammoniæ, he believes that the hypodermic use of the medicine would effect all the results attributed to it by Professor Halford.

Dr. Castello, of Derah Ismael Khan, has no opinion to offer, as he has not tried the treatment advocated. He, however, states that he has tried advantageously the internal use of ammonia after excision and cauterization of the bitten part and neighbourhood.

The Resident at Hyderabad consulted Dr. J. C. Howard of Oomraotee and Dr. A. Porter of Akola, and the following is an abstract of their opinions:—

Dr. Howard states that, since the receipt of the circular and pamphlet, no cases of snake-bite have been brought to any of the dispensaries in Oomraotee, and that, consequently, no special report can be made from practice there. He, however, adds, from his own experimnts and observations, that neither ammonia nor liquor potassa administered internally, nor transfusion, will be found a specific for the cobra bite. What liquor potassa or ammoniæ may do for the bite of the diamond or tiger-snake of Australia he cannot say; it may be that the virus of these snakes is less deadly than the Indian cobra, but it is certain that all the experiments with these two drugs in India by Dr. Shortt and many other medical men have had little success. Given by a young, strong, 15 months' cobra, with his poison sac well filled, himself thoroughly aroused through irritation, his fangs entire and his bite perfect, with a twist of his neck and head, and a delay of from 5 to 7 or 10 minutes, before excision, cupping, and stimulants can be adopted, Dr. Howard asserts most positively the bitten individual will be a dead man. The so-called cure for snake-bites (cobra) is purely a myth, and may be attributed—1*st*, to the reptile having had its fangs broken or destroyed by fighting or biting some tough objects; 2*nd*, to the poison sac being empty, the virus having been expended, and the reptile exhausted.

The cobra (supposing the bite to be from a reptile of that class, which is in numerous cases supposed, and not substantiated by fact) may bite, but not effectually; the cobra may raise its hood and head, and, darting forward, strike the object, and most probably nip without ejecting the poison, which fact can

only be judged by the vicious mouthful the reptile takes, and the twisting of its head and neck generally to the right side, at which moment the poison is ejected by pressure on the sac, along the duct through the hollow fangs into the wound. The only remedy is excision, free and full, ligatures between the heart and the wound, suction by the mouth or cupping, the application of ammonia or liquor potassa to the wound, and free stimulants even to semi-intoxication, *but these measures must be adopted before the poison has completed the round of the circulation*, and the delay will considerably affect the results.

Dr. Howard adds that he has had no experience in the hypodermic measures and transfusion of remedial agents, such as ammonia and liquor potassa, and he is not therefore prepared to give a satisfactory opinion, but, judging from analogy, he says that any great delay in the adoption of these measures must be fatal to the bitten individual, and their action must be stimulant, and not specific. The backwoodsmen of America, when bitten by a poisonous snake, make up gunpowder with water into what is commonly designated a "devil," which, like the surgical "Mosca," is placed over the part and set fire to, thereby destroying a considerable portion of flesh and the poison always, provided the measure is used quickly and in time.

Dr. Porter, of Akola, states that a number of recoveries from snake-bite are recorded in this pamphlet after the injection of ammonia into the veins, but there is nothing to show that the persons bitten would have died if left without treatment. On the other hand, Dr. Fayrer of Calcutta and Dr. Shortt of Madras have shown by repeated experiments that animals effectually bitten by the poisonous snakes of India die as surely under the above treatment as if left alone.

No. $\frac{3366}{756}$, dated the 23rd August 1872.

From—The Hon'ble E. W. RAVENSCROFT, Acting Chief Secretary to the Government of Bombay,

To—The Officiating Secretary to the Government of India, HOME DEPT.

With reference to Mr. Under-Secretary Wellesley's letter No. 2935, dated 19th ultimo, I am directed to state, for the information of the Government of India, that the Inspector General, Indian Medical Department, has reported that no opinions on the subject of Dr. Halford's treatment of snake-bite have yet been received from the Medical Officers of this Presidency.

In Bombay itself, very few cases have been admitted into the hospitals for treatment, the natives having no faith in our remedies, and preferring recourse to charms. In one instance, Professor Halford's plan of injecting ammonia into the veins was tried without success. As, however, instructions have been issued to treat every case of snake-bite by injecting ammonia, it is hoped that further proofs of its effects may hereafter be collected.

No. 349A, dated the 7th February 1872.

From—C. A. ELLIOTT, Esq., Officiating Secretary to the Government of the North-Western Provinces,

To—The Secretary to the Government of India, HOME DEPT.

In reply to your letter No. 3153, dated the 27th June last, I am directed to state that the 25 copies of the pamphlet by Professor Halford, of the Melbourne University, on the treatment of snake-bite, therewith forwarded, were distributed to the gentlemen named on the margin, who were requested to report whether, in their opinion, the remedy proposed would be efficacious in this country.

Dr. Hilson, Bijnour.
Mr. Edwards, Commissioner, Jhansie.
Dr. Tomkyns, Bareilly.
" Watson, Almorah.
" Planck, Sanitary Commissioner.
" Jameson, Allahabad.
" Grant, Futtehgurh.
" Garden, Saharunpore.
" Waghorn, Mirzapore.
" Hinton, Moozuffernuggur.
" Prentis, Goruckpore.
" Sherlock, Etawah.
" Loch, Bareilly.

Dr. Jones, Allahabad.
" Christison, Agra.
" Cockburn, Benares.
" Harris, Shahjehanpore.
" Collison, Moradabad.
" Condon, Cawnpore.
" W. Moir, Meerut.
" Smith, Nynee Tal.
" McDermott, Banda.
" Milne, Bareilly.
" Hooper, Benares.
" Pilcher, Agra.

2. These officers have now replied, but none of them have any practical knowledge of the subject, except Drs. Hilson and W. Moir, whose reports I am to submit for the information of the Right Hon'ble the Governor General in Council.

3. The other gentlemen consulted refer generally to the failure of the experiments made by Dr. Fayrer to test the same remedy, and to the difficulty of applying the proposed remedy, f found beneficial, by any but practical hands, on account of the delicacy of the instruments iequired, but they all think that further experiments on its efficacy should be tried.

No. 254, dated the 6th December 1871.

From—A. H. HILSON, Esq., M. D., Officiating Civil Surgeon, Bijnour,

To—The Officiating Secretary to the Govt., N. W. Provinces.

I have the honor to acknowledge receipt of your letter No. 4547 A, dated 16th October 1871, together with a copy of a paper read by Professor Halford before the Medical Society of Victoria, on a new remedy for snake-bite, on which you desired to have my opinion.

2. I have not had any opportunity of trying it on the human subject, but have recently made some experiments on the lower animals, with a view to test the efficacy in cases of cobra bite, and the result I now beg to submit.

3. My observations have been limited entirely to the bites of the cobra di capello, which, besides being the best known, and, perhaps, the most deadly of all the venomous snakes in the North-Western Provinces, is the cause of more mortality than any other species.

4. The krait (bungarus cœrulous) and one or two others, though reputed to be almost as deadly as the cobra, are seldom met with, and are not well known to the natives generally.

5. Ammonia in some form or other, but chiefly as eau de luce, has been the standard antidote for all kinds of snake-bites for upwards of a century, and has hitherto been administered internally by the mouth. Dr. Richardson, of London, a few years ago showed that it could be injected with safety directly into the circulation; but it is to Professor Halford that belongs the merit of having first suggested this mode of administration to counteract the influence of snake-poison on the system.

6. Judging from the number of successful cases recorded as having occurred in Australia, it was to be expected that some benefit would follow the application of the remedy in India; but, as far as I have been able to try its effects by experiments on the lower animals, including the dog, the goat, and the ass, it does not seem to have any power of averting, or even of retarding, the accession of fatal symptoms after cobra bite.

7. In some of these experiments, an account of which is appended, the ordinary liquor ammoniæ of the British Pharmacopœa was used, and in others the liquor ammoniæ, *à fortiori*, of specific gravity, 891, procured for the purpose from the Medical Depôt at Allahabad.

8. It was injected both before and after the toxic action of the poison had manifested itself on the system, and sometimes the injection was repeated several times before death, yet the only effect ever produced was a temporary acceleration of the heart's action.

9. I have also been unable to verify Professor Halford's observations on the changes said to take place in the blood from the presence of the snake-poison.

10. He alleges, 1*st*, that the blood loses its power of coagulating, and argues from this that the poison causes a decrease of one of its constituents, the fibrine; 2*nd*, that the white cells of the blood become more numerous, enlarged, and nucleated.

11. Dr. Fayrer's recent experiments have demonstrated that the coagulability of the blood is only destroyed by the poison of the viperine class of snakes, while that of the colubrine class, to which the cobra belongs, does not possess this power.

12. This accords with my own experience, for I invariably found that the blood coagulated firmly after exposure to the air, showing that the cobra poison at least exercises little influence in diminishing to any appreciable extent either the quantity or the vitality of the fibrine.

13. But even if the blood remained fluid, it would scarcely be possible to found any special argument on such a coincidence, because a similar fluidity is often observed after death from lightning, from many narcotic poisons, and, in fact, from any obstruction of the respiration.

14. The changes which the white cells of the blood are said by Professor Halford to undergo *after cobra bite* have been described by him in the *British Medical Journal* (July 20th, 1867), where a diagram of them is also given. But the metamorphosed condition of these cells, he says, is not easily seen, and often escapes the eye of good microscopists.

15. In all my experiments the blood was carefully examined with a microscope magnifying 530 diameters, sometimes during the life of the animal, sometimes immediately after its death, and sometimes several hours subsequently, yet I must confess that any enlarged or nucleated white cells I never could detect.

16. On the contrary, these bodies could nearly always be seen presenting their normal appearance and dimensions, and existing in their proper numerical proportion to the red corpuscles. In only one instance did they ever seem to be slightly increased in numbers. I failed also to see any change in the blood of the goat, the white cells of which are very conspicuous objects in the field of the microscope, owing to the small comparative size of the red corpuscles in that animal ($\frac{1}{6500}$ of an inch in diameter.)

17. Regarding the *modus operandi* of the remedy, Professor Halford does not explain his views very clearly. While admitting that it is not a chemical antidote, he suggests that by acting as a powerful central and peripheral stimulus, it puts a stop to certain molecular changes which he supposes to be going on in the blood.

18. That any such changes occur at all is an hypothesis, in support of which no facts are adduced, and it is evident, from the importance which he attaches to the stimulation of the heart or central organ, that he regards this as the main object to be attained in effecting a cure.

19. The question, therefore, arises—does a person bitten by a snake die from the paralysing influence of the poison on the heart? Because, if not, it seems superfluous to stimulate that organ.

20. That the heart's action is depressed when the patient becomes comatose cannot be doubted; but it appears to me that the *cobra poison* exercises its baneful influence chiefly on that part of the cerebro-spinal system from which proceed the molos nerves of the voluntary muscles, including those concerned in the act of respiration.

21. Any one who watches attentively an animal dying from cobra bite cannot fail to observe that paralysis of the voluntary muscles first sets in, and that the pulse, although it may intermit, beats with considerable force almost to the last, and for some minutes after the respiration has completely stopped. Moreover, when the thoracic viscera are subsequently examined, they present all the characteristic signs of death from asphyxia in a most marked degree.

22. In the case of the Keeper at the Zoological Gardens, London, who was bitten by a cobra in 1852, the Medical Officers of the University College Hospital, where he was brought for treatment, regarded the paralysis of the limbs and the difficulty of breathing as the most alarming of all the symptoms, and at once resorted to galvanism and artificial respiration.

23. This man was bitten on the bridge of the nose. "When brought to the hospital about half an hour after the accident, he was apparently dying, being unable to speak, livid, the heart's action feeble, and he was scarcely conscious. After death, which took place in little more than an hour, the right cavities of the heart were loaded with dark blood, the left being empty; indeed, all the phenomena of asphyxia were strikingly marked."—(Erichsen's Science and Art of Surgery, page 146.)

24. It is the same in the lower animals, in which paralysis of the voluntary muscles, and consequent difficulty of breathing, commences long before consciousness is obliterated, and before the heart is enfeebled to such a degree as to be incapable of performing its functions with economy.

25. Viewing, therefore, the rapidity of the action of the cobra poison on the medulla oblongata and spinal cord as the chief characteristic of that poison, while the higher encephalic ganglia are only secondarily involved, let us see how the bite of an Australian snake affects the system.

26. I have had no experience with the snakes of that country; but, judging from the 20 cases recorded in Professor Halford's paper, it is evident that the influence of their poison is excited chiefly on the cerebrum, producing deep insensibility or coma. It will be observed that in only one of these 20 cases, the 14th, is any mention made of paralysis; and Professor Halford, at page 9, in describing the symptoms, does not allude to any action of the poison on the medulla oblongata or spinal cord. "In all the cases," he says, "brought before you to-night, the functions of the cerebral ganglia and higher sensorium were completely in abeyance, or for a time extinct;" in other words, the functional activity of the cerebrum and ganglia of the special sense was entirely suspended.

27. It is doubtless this difference in the action of the two poisons that accounts for the success that has followed the ammonia treatment in Australia, and its failure in this country.

28. Professor Halford asserts his belief that equal quantities of snake-poisons are equally virulent, no matter to what species the snake may belong; but the fact remains that the cobra-bite usually proves fatal in less than three hours, while persons bitten by Australian snakes generally survive 8, 12 or even 27 hours (*vide* cases 8, 18, and 19), and sometimes the symptoms of poisoning do not supervene for 12 hours after the bite has been inflicted (*vide* case 19).

29. We may infer, too, that the various kinds of snake-poisons differ not only in point of virulence, but also in their mode of affecting the system; for we find the cobra unable to poison itself, or one of its own species, while the rattlesnake possesses this power; besides, the train of symptoms which ensue from the bite of the latter are essentially different from those produced by the cobra.

30. The stimulation of the heart by injecting ammonia into the veins cannot possibly be of the least service if the respiration is in any way obstructed; for it is well known that unoxydised blood passes with great difficulty through the pulmonary capillaries, and for this reason I think the remedy will never prove successful in cases of cobra-bite. We must always bear in mind the maxim of Cullen—"to obviate the tendency to death,"—and the tendency to death by cobra-bite is undoubtedly by asphyxia.

31. But even were the remedy of undoubted efficacy, it is not likely that it would ever be of much practical utility in a country like India, because its administration requires the use of a delicate instrument handed with some professional skill, and the great mass of the people are a long way removed from proper surgical assistance; besides, the cobra-bite proves so rapidly fatal (generally in less than three hours and often in one) that the sufferer has little time to seek medical aid.

32. All the antidotes which have hitherto been proposed for this dangerous affection are essentially empirical, and aim at neutralising the poison while it is circulating in the blood. The injection of ammonia is also intended to effect this end indirectly by stimulating the heart.

33. With the exception of arsenic, when given in ceslum skin diseases, we scarcely possess any therapeutic agent that has the power of destroying a poison circulating in that fluid, and in nearly all diseases in which the blood is contaminated with a *materies morbi*, we endeavour to eliminate it from the system by stimulating the excretory organs to increased action. This, however, cannot be done in most cases of snake-bite in India, because the powers of life are so rapidly overwhelmed that there is no time for the natural efforts of the system to come into play.

34. Local treatment, such as excision of the bitten part, or the application of a powerful escharotic when speedily resorted to, may be attended with some degree of success, as Professor Fayrer has shown; but all internal remedies have hitherto failed.

35. Experiments Nos. 7 and 11 were made with a view to test the efficacy of two so-called antidotes which were sent to me,—one by a Native, and the other by a European: both were found perfectly inert.

36. If ever any remedy is discovered, it will probably be found to consist of some substance producing on the nerve centres an effect directly antagonistic to that of the snake-poison, and there can be little doubt that recent researches on the action of opium in cases of poisoning by *datura*, and of the calabar bean in poisoning by strychnine, point out the right path to be pursued by any one in search of the much-desired antidote.

Experiments to test the efficacy of injecting liquor ammonia into the veins in cases of snake-bite, by A. H. HILSON, ESQ., M. D., *Officiating Civil Surgeon,—dated Bijnour, the 6th December* 1871.

1st experiment, 18th September 1871.—At 8-19, a healthy, young full-grown pariah dog was bitten on the nose by a large and vigorous spectacle-marked cobra. On being taken away from the snake he stood for about a minute, and then lay down and commenced licking the bite with his tongue. He remained in this state for about 12 minutes, apparently quite unaffected by the poison, but never attempting to rise.

8-33 A. M.—He became restless, frequently changing his position, but never rising on his feet.

8-35 A. M.—Restlessness much increased, and occasional convulsive twitches of the tail.

8-38 A. M.—Limbs paralysed, cannot stand.

8-39 A. M.—Tried to rouse himself when called on, but, being unable to stand, fell over on his side.

8-40 A. M.—Convulsions of the limbs and mouth; pupil much dilated.

8-41 A. M.—Micturated and fœces involuntarily passed.

8-43 A. M.—Injected 25 drops of liquor ammonia* into the saphena vein of the right thighs.

8-44 A. M.—Convulsions continue.

8-47 A. M.—Again injected 25 drops of liquor ammonia into the saphena vein.

8-47½ A. M.—Dead in 28½ minutes.

The cobra was captured on the 31st August in my fowl-house, where it had regaled itself upon three ducks' eggs after killing a hen that was hatching them.

The blood was examined immediately after death and found to be fluid, but no change could be noticed with the microscope. The white cells presented their normal appearance, and were not found in greater numbers than in healthy blood; the red corpuscles were not altered in shape or colour, but showed little tendency to become piled in rows. About two ounces of dark fluid blood were taken from the right side of the heart about 10 minutes after death and placed in a small unglazed earthenware pot; in seven or eight minutes it coagulated firmly, the clot adhering so tenaciously to the vessel that it did not fall out when inverted. The blood which escaped into the cavity of the thorax also coagulated. The venous system seemed gorged with dark fluid blood, which showed no tendency to coagulate until exposed to the air. Both sides of the heart were distended with dark fluid blood, and the liver and kidneys were also much congested and of a darker tint than usual. Rigor mortis occurred two-and-a-half hours after death. Scarcely any trace of the bite could be seen externally after death.

Temperature at the time of experiment 83° Fah.

2nd experiment at 7-25 A. M. *on the 21st September* 1871.—A large spectacle-marked cobra struck at a full-grown pariah dog and inflicted a wound on its nose. A portion of the outer skin was torn off, and blood was seen to flow immediately after the cobra struck; yet the dog remained quite unaffected beyond appearing somewhat lazy and inclined to be down. Next day it was alive. The cobra struck also at the dog's leg, but did not inflict any wound. The snake had been confined for about three weeks in a *gurrah*, and during that time had not eaten nor drank anything. He did not appear very lively, but when irritated, raised his head, expanded the neck, and struck vigorously.

Luckily the remedy was not applied in the case, otherwise erroneous conclusions might have been drawn.

3rd experiment at 7-59 A. M. *on the 24th September* 1871.—A full-grown, healthy pariah dog was bitten on the side by the same cobra as in No. 1. The bite left scarcely any mark externally, and was discovered with difficulty. For 10 minutes afterwards the dog showed no signs of anything being wrong, not even when walked about.

8-12 A. M.—However, he appeared to be lazy and lay down.

8-16 A. M.—Legs partially paralysed, and unable to control their movements.

8-19 A. M.—Making water involuntarily; injected 20 drops of liquor ammonia B. P. into the saphena vein of the left leg; this produced no apparent effect; the dog remained lying on its side, breathing slowly.

8-21 A. M.—Pupils widely dilated; dog cannot stand.

---

* The liquor ammonia was that supplied by the Government to the Charitable Dispensaries, and is the ordinary liquor ammonia of the British Pharmacopœa.

8-24 A. M.—Convulsed; injected into the same vein 20 drops of liquor ammonia B. P.; no apparent effect produced.

8-29 A. M.—Injected 20 drops of same solution into the right saphena vain; no effect produced.

8-31 A. M.—Laid bare the external jugular vein on the right side of the neck and injected 20 drops of same solution; no effect apparently.

8-33 A. M.—Dog apparently lifeless; he lay quite motionless and could not be roused; no movement of the muscles of respiration could be noticed; the pupil was widely dilated, and the eyelids did not respond when the eye was pricked, but the heart was found to be beating feebly and irregularly.

8-38 A. M.—Commenced artificial respiration.

8-42 A. M.—Injected 17 drops of liquor ammonia into the right jugular vein; heart's action slightly increased.

8-45 A. M.—Heart still beating irregularly.

8-48 A. M.—Ditto ditto.

8-53 A. M.—Ditto ditto.

8-57 A. M.—Heart still beating.

9-4 A. M.—Heart beating feebly.

9-5 A. M.—Artificial respiration being still continued, I made an aperture in the left side of the thorax, through which I could see the heart beating slowly and irregularly.

9-6 A. M.—Injected 20 drops of liquor ammonia into the right ventricle. This was followed by vigorous and greatly accelerated action of the heart; the blood being propelled with some force along the arteries.

9-8 A. M.—Put an end to the experiment by opening the femoral artery, from which blood of a dark colour spouted in considerable quantity.

The blood coagulated quickly and firmly on exposure to the air. Temperature of air in the shade 84° Fah. The blood, however, remained fluid for some time, if not exposed to the air. All the blood vessels of the heart having been ligatured, and organ having been detached, the blood it contained was found to be quite fluid at 9-34 A. M.

The lungs were somewhat congested, and did not crepitate on pressure. A quantity of frothy blood oozed from them when cut, the cut surface showing dark points where veins of any size had been cut. The liver was of a very dark colour, and the membranes of the brain were slightly congested, but the other organs of the body did not present any change worthy of notice. Rigor mortis set in 2½ hours after death. No abnormal appearance could be noticed in the blood, which was examined immediately after death and also eight hours afterwards.

4th experiment at 7-10 A. M. *on the 28th September* 1871.—At 10 minutes past 7 A. M. a large spectacle-marked cobra bit a fine healthy pariah dog (full-grown) savagely on the tail.

7-14 A. M.—Dog appears unaffected.

7-17 A. M.—Ditto; pupils not dilated.

7-19 A. M.—Ditto ditto.

7-20 A. M.—Emptied the bowels voluntarily.

7-21 A. M.—Has lost the power of controlling the movements of his limbs; staggers like a drunken man when walking, and places his legs wide apart when standing.

7-22 A. M.—Urinated voluntarily.

7-23 A. M.—Breathing slowly; slight frothing at the mouth.

7-26 A. M.—Slight convulsions.

7-26½ A. M.—Injected 20 drops of liquor ammonia B. P. into the external jugular vein.

7-27 A. M.—Convulsions continue; movements of respiration not perceptible.

7-29 A. M.—Injected an additional 20 drops into jugular vein.

7-29½ A. M.—Commenced artificial respiration, which was not discontinued until death.

7-33 A. M.—Slight convulsion; heart beating with considerable force, but somewhat irregularly.

7-35 A. M.—Slight convulsion; heart still beating.

7-40 A. M.—Heart still beating.

7-43 A. M.—Ditto.

7-47 A. M.—Ditto.

7-52 A. M.—Ditto.

7-58 A. M.—Ditto with considerable force.

8-4 A. M.—Injected 20 drops of liquor ammonia; no effect.

8-5 A. M.—Heart stopped; dead.

Blood coagulated as soon as taken out of the body and exposed to the air.

Microscopically it presented its normal characteristics. No change whatever could be noticed either in the contour or numbers of the white cells.

Rigor mortis supervened 2½ hours after death. Temperature of the air 80°.

5th experiment. No treatment.—At 7-33 A. M. a full-grown pariah dog was bitten on the foreleg by a small spectacle-marked cobra.*

* This was a fresh newly-caught cobra.

7-40 A. M.—Unaffected, except that he walks lame with the bitten leg.

7-46 A. M.—Holding up the wounded limb, in which he seems to suffer a little pain; no signs of the poison acting on the system.

8-1 A. M.—Lies down, and has lost control over the muscles of his limbs; staggers much when made to walk.

8-2 A. M.—Lying down and cannot be persuaded to move.

8-4 A. M.—Changes his position.

8-5 A. M.—Legs appear paralysed; respirations 28 per minute, regular.

8-6 A. M.—Appears to be sensible, and endeavours to get up when called upon.

8-7 A. M.—Appears sensible, and wags his tail when called on; respirations 32 per minute; expirations somewhat prolonged and forced.

8-8 A. M.—Appears sensible; wags his tail when called on.

8-9 A. M.—Micturated involuntarily.

8-10 A. M.—Respirations, laboured, 28 per minute.

8-11 A. M.—Again micturated involuntarily.

8-12 A. M.—Frothing at the mouth; wags his tail when called on; eyelids contract when the eye is touched.

8-13 A. M.—Gurgling noise in the throat at each inspiration; convulsive twitching of the mouth.

8-16 A. M.—Micturates, and passes fœces involuntarily.

8-18 A. M.—Respirations 20 per minute, laboured; pupils widely dilated.

8-19½ A. M.—Pulse 74, regular and of fair strength.

8-20 A. M.—Eyelids do not contract on application of a stimulus.

8-21 A. M.—Respiratory movements almost imperceptible.

8-22 A. M.—Pulse 60°, somewhat irregular and weaker; respiration ceased.

8-24 A. M.—Apparently quite dead; heart's action imperceptible.

8-26 A. M.—An aperture was made in the chest and the heart exposed. Its contractions had ceased, and both the auricles and ventricles were distended with blood. The pulmonary arteries were also distended. The blood in all the cavities had the same dark fluid appearance and coagulated firmly soon after exposure to the air. The lungs were of a light scarlet colour, and on making a section of them, dark venous blood oozed from the divided pulmonary vessels. There was no congestion of the blood vessels of the scalp or duramater, but the arachnoid contained a considerable quantity of effused serum.

Arborescent streaks of venous congestion were noticed following the sulci between the convolutions of the cerebrum. On making a section of the substance of the brain, no abnormal appearance was observable. All the abdominal viscera were healthy looking. On examining the blood immediately after death, no abnormal appearance could be detected. The red corpuscles were of their usual size and numbers, and also the white cells.

Rigor mortes occurred about three hours after death.

Temperature at the time of experiment 79°.

In this case no treatment was adopted, so that the action of the unalloyed poison might be observed, and it will be noticed that the symptoms were identical with those observed in other experiments when ammonia was injected.

6th experiment, October 16th, 1871.—At 7-46 A. M. a medium-sized cobra* bit a full-grown pariah dog on the leg (left hind).

7-47 A. M.—Runs lame on the bitten leg, which it holds up.

7-52 A. M.—Injected 20 drops of liquor ammonia into the right external jugular vein, which was exposed for the purpose.

7-53 A. M.—Heart's action accelerated, but otherwise the animal is apparently unaffected; no symptoms of poisoning.

7-56 A. M.—Bowels opened voluntarily.

7-57 A. M.—With the exception of the lameness, dog is apparently quite unaffected.

8-4 A. M.—Injected again into the same vein 20 drops of the liquor ammonia, which produced acceleration of the pulse, but no other visible effect.

8-6 A. M.—Appears quite unaffected.

8-7 A. M.—Frothing a little at the mouth.

8-9½ A. M.—Micturated copiously and voluntarily.

8-10 A. M.—Lay down; staggers when walking.

8-11 A. M.—Heart beating irregularly.

8-12 A. M.—Injected 50 drops of liquor ammonia B. P. into the same vein.

8-13 A. M.—On being released tried to stand, but cannot.

8-14 A. M.—Eyelids close on touching the eye.

8-15 A. M.—Gasping for breath; heart's action very irregular; eyelids still retain their sensibility to impression.

8-16 A. M.—Injected 20 drops liquor ammonia B. P. into the same vein.

8-18 A. M.—Breathing very irregularly and in gasps; convulsive movements of the trunk; extremeties remaining motionless.

8-21 A. M.—Pulse 118.

8-22 A. M.—Respiratory movements quite imperceptible.

* Fresh newly-caught cobra from Dhanpore.

8-23 A. M.—Heart beating.
8-24 A. M.—Ditto rapidly.
8-25 A. M.—Ditto feebly and irregularly.
8-26 A. M.—Dead. Temperature 77°.
Examined blood corpuscles and found no change.

7th experiment to test the efficacy of secret remedy furnished by a Native.—Native remedy administered. Symptoms supervened in 29 minutes. Dead in 46 minutes.

Healthy, full-grown pariah dog bitten on the right forefoot at 8 A. M. on the 17th by a large cobra,—the same used in experiment No. 1. At 8-2 A. M. a secret medicine, consisting of a yellowish green powder, composed evidently of sulphur and sulphate of iron, with some pounded herb, was mixed with some warm water and administered to the dog by a Native hukeem who has some reputation in Bijnour as a curer of snakebites. After the medicine was given the animal appeared quite unaffected, except that it walked very lame on the bitten leg.

8-6 A. M.—He administered a small bolus, about the size of a bean, containing some medicine mixed with sugar.
8-10 A. M.—Dog apparently quite unaffected; growls when approached; some warm water administered.
8-15 A. M.—Walking very lame on the bitten leg.
8-22 A. M.—No symptoms indicating that the poison was acting on the system.
8-27 A. M.—Micturated voluntarily.
8-29 A. M.—Lay down; appears disinclined to move about.
8-30 A. M.—Passed fœces; walks unsteadily.
8-32 A. M.—Cannot walk, endeavours to rise, but cannot stand; apparently quite sensible and shuts the eyelids when anything is put suddenly in front of the eye.
8-34 A. M.—Respirations 26 per minute.
8-36 A. M.—Appears choked; a rattling noise accompanies each expiration; heart's action irregular; eyelids still sensitive to impressions.
8-43 A. M.—Respiratory movements imperceptible.
8-45 A. M.—Heart beating rapidly, 80 per minute.
8-46 A. M.—Dead in 44 minutes.

Post-mortem examination.—No change in appearance, or numbers of blood corpuscles, or white cells. Heart distended on both sides with dark fluid blood, which coagulates on exposure to air. The penslaltic movements of the intestines were plainly observable ten minutes after death. All the venous system was engorged with blood. Temperature of air 76°. Bitten part somewhat swollen, and a good deal of ecchymosis round the wound. No effect whatever was produced by the medicine.

8th experiment on the 1st November 1871.—Symptoms supervened in 2 hours 25 minutes. Dead in 2 hours 53 minutes.

At 8-40 A. M.—A full-grown donkey was bitten on the side of the belly by a large cobra (the same used on the 17th). A little blood oozed from the wound, which became somewhat swollen and plainful on pressure, but no toxic symptoms set in until 11-5 A. M., when the animal became drowsy and lay down quietly without resting his head on the ground.
11-15 A. M.—The drowsiness increased somewhat and the forelegs trembled; on being urged he made several efforts to rise, but did not succeed; on being placed on his legs he remained standing with the forelegs trembling and the head slightly depressed.
11-20 A. M.—Remains standing; some stringy saliva oozing from the mouth; lower lip hanging down; eyelids sensible to impressions, and, when a piece of chappatee was placed near the mouth, he seized, but did not masticate it; heart beating slowly, but regularly; breathing slow, and expiration forced by the action of abdominal muscles; slight convulsive movement of the muscles of the neck.
11-20½ A. M.—Fell down heavily, all his legs seeming to give way at once; made no attempt to get up, and rested the head on the ground.
11-21 A. M.—Breathing laboriously with expanded nostrils.
11-23 A. M.—Injected* 20 drops of liquor ammonia into the saphena vein, which did not produce any effect whatever.
11-25 A. M.—Breathing very heavily.
11-27 A. M.—Injected 20 drops of liquor ammonia into the left jugular vein, which had been previously laid bare; no effect produced.
11-29 A. M.—Breathing imperceptible; heart still beating, but slowly and feebly.
11-30 A. M.—Apparently dead, but heart still beating.
11-33 A. M.—Heart ceased to beat.
11-33½ A. M.—Made an opening rapidly in the thorax, and exposed the heart, which contracted when scratched with the nail, or pricked with a needle.

* Used liquor ammonia *fortior*, British Pharmacopiæ, specific gravity ·891. Obtained from Medical Depôt, Allahabad.

11-34 A. M.—Injected 20 drops of liquor ammonia into the right ventricle, which caused one or two feeble contractions.

11-36 A. M.—Injected an additional 20 drops of liquor ammonia into the right ventricle, which was followed by no result. The blood was examined microscopically immediately after death, and one or two of the six or eight samples examined seemed to have rather more than the usual number of white cells; but these were not swollen, nor could there be seen any of the appearances alleged by Professor Halford to occur in the blood after cobra-poisoning,—*vide* Aitkins' *Science and Practice of Medicine*, page 713, vol. I. The condition of the internal organs was the same as that seen in dogs after cobra bite; but in this case, the effusion of serum on the surface of the brain was greater than usual. Blood coagulated on exposure to air; temperature at the time of experiment 81°.

Death did not take place in this case until nearly three hours had elapsed, which is attributable to the snake having been used about fourteen days before, and having eaten nothing in the interval. Besides this, it bit the rope by which the donkey was fastened about three minutes before biting the donkey itself, and, probably in doing so, a portion of the poison was expended. A cobra is capable of killing a much larger animal than a donkey in less than three hours. Mr. LeMaistre, a resident of this station, assures me that on one occasion *he saw* a cobra bite a cow belonging to him, and that the latter died before he could get an iron heated with which he intended to cauterise the wound, so that death most probably ensued within one hour. It is worthy of notice, too, how long the animal in this case remained apparently quite unaffected, and how rapidly it died after the toxic symptoms first showed themselves.

9th experiment on the 4th November 1871.

8-50 A. M.—A young and almost full-grown goat was bitten on the left ear by a small cobra.

9-1 A. M.—Much inclined to lie down, but rises when food is offered to it; heart beating regularly; hind legs trembling.

9-6 A. M.—Injected 20 drops of liquor ammonia into the external jugular vein; no apparent effect.

9-9 A. M.—Lies down.

9-11 A. M.—Refuses to eat.

9-12 A. M.—Can still walk.

9-18 A. M.—Frothing at the mouth; respiration embarrassed.

9-19 A. M.—Injected 20 drops of liquor ammonia* into the same vein; no effect produced.

9-20 A. M.—Unable to stand.

9-22 A. M.—Again injected 20 drops of liquor ammonia; no effect produced.

9-23 A. M.—Convulsive movements of limbs and tail; breathing carried on almost entirely by the diaphragm; eyelids still sensible to impressions; heart beating slowly and irregularly.

9-27 A. M.—Injected 20 drops of liquor ammonia into the same vein.

9-28 A. M.—Heart beating slowly; eyelids still sensible to impression.

9-31 A. M.—Respiratory movements imperceptible.

9-34 A. M.—Heart ceased to beat; dead.

9-34½ A. M.—Opened the thorax rapidly, and, on scratching the heart, it beat feebly once or twice.

9-35 A. M.—Injected 20 drops of liquor ammonia into the left ventricle; no effect produced. The blood was fluid, and coagulated on exposure. Internal *post-mortem* appearances similar to those seen in dogs and donkey. No changes could be noticed in the appearance of the white cells of the blood. In the goat the red corpuscles are very small, being about one-half the size of man's, while the white corpuscles are of nearly the same dimensions as in other vertebrate animals, and are very conspicuous in the field of the microscope. I examined them minutely, but could not detect any abnormal appearance.

10th experiment, November 8th, 1871.—At 8-46 A. M. a full-grown dog was bitten on the inside of the thigh by the same cobra which bit the donkey on the 1st November. The snake bit with much reluctance and riot, until he had been irritated for about ten minutes.

Until 9-30 the dog appeared quite unaffected, with the exception that he seemed inclined to lie down. The respirations at the time were 22 per minute. The bitten part did not swell much, and the dog did not show any signs of pain. I then left him.

10-22 A. M.—I returned, having been informed that the toxic symptoms had set in.

10-24 A. M.—The pulse was 96 and regular, and the animal was lying quietly on his side; he could stand when raised, but could not walk.

10-26 A. M.—The respirations were 28 per minute, and the movements of the chest appeared unembarrassed.

10-28 A. M.—Injected 20 drops of liquor ammonia *fortior*, British Pharmacopiæ, specific gravity ·891, into the jugular vein after laying it bare. This produced no effect, or at most a temporary acceleration of the heart's action, which did not last longer than a minute.

10-30 A. M.—Pulse 82, regular and full.

10-32 A. M.—Respirations 36 per minute, unembarrassed.

10-33 A. M.—Cannot stand when put upon his legs.

* Liquor ammonia *fortior* of the British Pharmacopiæ, specific gravity 0·891.

10-36 A. M.—Injected 20 drops of liquor ammonia into the jugular vein; no effect produced beyond some acceleration of the heart's action.

10-37 A. M.—Opened the jugular vein, and abstracted about six ounces of blood.

10-40 A. M.—Injected 20 drops of liquor ammonia into the vein of the opposite side, after which the heart's action increased in force and frequency, and the dog struggled a good deal.

10-41 A. M.—The breathing becoming embarrassed, artificial respiration was resorted to.

10-45 A. M.—Moves the ear by reflex action when a stimulus is applied to it.

10-48 A. M.—Pulse 64, irregular.

10-49 A. M.—Respirations 22 per minute, and expirations forced, tongue hanging out of the mouth, from which saline is flowing.

10-52 A. M.—Poured 15 drops of liquor ammonia, diluted with an ounce of water, into the throat; but it is questionable if any found its way into the stomach, as the animal was unable to swallow.

10-55 A. M.—Breathing imperceptible; laid bare the wall of the chest over the heart, and injected 20 drops of liquor ammonia into that organ. As soon as the point of the syringe touched the heart, vigorous contractions followed. The ammonia also excited strong contractions. The animal is apparently dead, but the heart still continues to beat.

10-59 A. M.—Dead; heart stopped acting.

11 A. M.—Injected 20 drops into the heart; no result. On opening the chest the venous system was, as usual, found gorged with dark fluid blood, but both sides of the heart contained large, firm, darkly-coloured clots, when examined five minutes after death. Ammonia has the property of retarding the coagulation of blood, so in this case probably the presence of the tube of the syringe in the cavities of the heart may have caused the coagulation. It is possible, too, that a very small quantity of air may have been injected with the ammonia. On examining the blood microscopically, no abnormal appearances could be detected.

In this case the snake bit feebly and reluctantly. It had not eaten anything for a month, and had bitten thrice or four times in that period, so it is possible there was a deficiency of poison in the fangs. The toxic symptoms did not come so rapidly, or with such severity as in the other experiments, yet the injection of ammonia seemed to produce no effect beyond exciting the heart's action for about a minute.

Six ounces of blood were taken from the jugular vein to relieve the heart from distension at 10-37, and, at 10-40, 20 drops of ammonia were injected without any good result, even when accompanied with artificial respiration. When the remedy was injected into the heart itself, it did not seem to have any better power of averting the fatal termination, and when the heart's action had stopped, ammonia failed to renew it, although injected within a minute after cessation of cardiac movements.

11th experiment, November 18th, 1871.—At 8-40 A. M. a full-grown pariah dog was bitten very savagely on the hind leg by a small spectacle-marked cobra.

8-43 A. M.—Five pills of a snakebite remedy, furnished by Mr. A. M. Cameron, of Agra, and alleged by him to have cured "upwards of 1,600 persons bit by every variety of snakes," were administered in a small quantity of ghee.

8-57 A. M.—The dog began to stagger and show other signs of the poison affecting the system.

8-58 A. M.—Five more pills were given in a little ghee; the dog swallowing them with some difficulty.

8-59 A. M.—Cannot stand.

9 A. M.—Breathing with difficulty, and occasional convulsive movements of the limbs.

9-6 A. M.—Respiratory movements of the chest imperceptible.

9-10 A. M.—Heart ceased to beat; dead.

The medicine was administered according to directions furnished by Mr. Cameron. The stomach of the dog was examined after death, and the pills were found broken up and mixed with the contents of the viscus. One pill only was found in the esophagus. The medicine had apparently no effect whatever.

12th experiment, November 22nd, 1871.—At 8-5 A. M. a strong, old pariah dog was bitten on the hind foot by the same cobra used in the last experiment.

8-20 A. M.—Made a deep incision on the cardiac side of the bite, and applied strong nitric acid freely to both the incision and bite after scarifying the latter.

8-25 A. M.—Administered 15 drops of liquor ammonia by the mouth, after which the dog was chased about an enclosure, and kept constantly on the move.

8-30 A. M.—Appears somewhat lazy and disinclined to move, otherwise quite unaffected. He did not appear to suffer much pain in the bite, and never held up the leg when walking; but the temperature of the bitten limb was much higher to the touch than the other.

8-32 A. M.—Administered 15 drops of liquor ammonia again by the mouth; no perceptible effect.

8-48 A. M.—Administered 15 drops again; no effect; dog kept continually on the move.

8-52 A. M.—Appears very lazy and inclined to lie down.

8-55 A. M.—Cannot control the movements of his limbs, and staggers when walking.

8-56 A. M.—Administered again 15 drops of the ammonia; no effect.

8-58 A. M.—Cannot stand, appears quite conscious, and tries to rise when urged, but cannot; pupils somewhat dilated.

9-5 A. M.—Cut down on the carotid artery and exposed it. The blood which flowed from the wound was crimson, and coagulated in two or three minutes after exposure to the air, and it was noticed that the blood never assumed a dark tinge until the respiration became impeded. Some of the blood taken fresh from the body was now examined with the microscope, but no abnormal appearance could be observed.

9-25 A. M.—Injected 20 drops of ammonia directly into the heart, which was followed by acceleration of the pulse for a short time (about a minute): the dog also struggled a good deal for the same period.

9-27 A. M.—Respirations 16 per minute.

9-29 A. M.—Pulse 120, regular, and of moderate strength.

9-32 A. M.—Winks the eye when touched.

9-46 A. M.—Pulse 98.

9-47 A. M.—Respirations 12 per minute.

9-53 A. M.—Breathing stertorous.

9-55 A. M.—Respirations 9 per minute, laboured.

9-56 A. M.—Pulse 98, intermitting.

10-3 A. M.—Respirations 9 per minute.

10-4 A. M.—Pulse 94, intermitting.

10-9 A. M.—Gasping for breath and struggling.

10-10 A. M.—Pulse 88.

10-12 A. M.—Movements of respiration not perceptible.

10-15 A. M.—As the dog was almost dead, an end was put to the experiment by severing the carotid artery, from which blood of a dark colour spouted with force.

10-16 A. M.—The chest was opened, and the heart found beating, and it continued to beat for a minute, the right auricle contracting after all movement had ceased in other parts of the heart.

The snake bit very effectively, keeping its fangs fixed in the skin for some seconds; but it had been used in an experiment four days previously, and probably it did not possess a large supply of poison. To this it was due without doubt that the dog lived longer than usual, because neither the application of nitric acid nor the administration of ammonia seemed to produce any beneficial effect. On opening the heart the left ventricle was found empty, while the right side contained some frothy blood. The lungs and all the organs of the body presented an ex-sanguine appearance owing to the loss of blood; but the chief points to be noticed in the experiment are, that the blood did not assume a dark colour until the breathing became impeded, and that the heart preserved the power of contracting to the very last, even although deprived of the stimulus, which the presence of a proper quantity of blood in its cavities affords.

The ammonia in this case was administered by the mouth.

No. 92, dated 10th November 1871.

From—W. MOIR, Esq., M. B., A. M., Civil Surgeon, Meerut.

To—The Offg. Secy. to Govt., N.-W. Provinces.

I have the honor to acknowledge receipt of Mr. Mackintosh's letter No. 884, dated 28th August 1871, forwarding a pamphlet by Professor Halford on the treatment of snake-bite for the expression of my opinion on the subject.

2. Before offering any remarks on it, I was desirous of trying one or two experiments illustrating the effects of the treatment recommended by him in snake-bite, and it was only a few days ago that I succeeded in obtaining a poisonous snake, and was enabled to test the efficacy of his mode of treatment; hence the delay in submitting this letter.

3. Professor Halford records in the pamphlet 20 cases of snake-bite, out of which 17 were successfully treated by the injection of liquor ammonia into the vein, and three proved fatal.

4. I observe that his 1st, 16th, 18th, and 19th cases are the only ones where the interval between the bite and the application of the remedy is given; it was four hours in the 1st and 16th, between seven and eight hours in the 18th case, and about twelve hours in the 19th, which proved fatal; and as it was only a "supposed" case of snake-poison, it ought not to have appeared in this list at all. The 20th case also proved fatal, which is accounted for by the fact that brandy had been freely employed in the first stages of the treatment, and the ammonia only in the last. The 8th case, he says, is doubtful, and the 10th showed symptoms of drunkenness rather than of snake-poisoning.

5. With the exception of these first five cases, no information whatever is given regarding the interval that elapsed between the infliction of the bite and the application of remedial measures; nor is it stated in any one instance what part of the body was bitten, nor is any instance noted of the marks of teeth having been observed by the operators, nor of the escape of blood from the wounds.

6. Neither is any account given of the behaviour of the patients until they are described as being "comatose," "sinking," "insensible," "cold," "totally paralysed," &c., &c. No idea is imparted as to the time when these symptoms manifested themselves, nor what were the progressive symptoms, nor the physical signs of the action of the poison.

7. In only three of the 20 cases is the species of snake noted, and only one of the 20 patients was seen by Professor Halford himself.

8. The omission of these points is so important that it is impossible to form a correct judgment of the true nature of the cases, and it deprives the record of much of its value and interest, both physiologically and pathologically. Had these omissions been supplied, one could have formed some notion of the severity of the bite, and of the influence of the medicine employed in the treatment, but the grounds for enabling one to arrive at certain conclusions on these points are entirely wanting.

9. Were it possible to make strict investigation into all the circumstances connected with these alleged recoveries from snake-poisoning by the injecting of liquor ammonia into the venous blood, one would not be surprised to find that in more instances than one the patients had never actually been bitten by a snake at all, and that in others, though bitten, the snake had been of a harmless species.

10. Such cases occur in the practice of almost every medical man. While at dinner one evening a few years ago I was suddenly called away by the cries of a punkah-coolie in my verandah, who had, he stated, just been bitten by a cobra on the dorsum of the foot. He had been lying asleep, and felt a prick which awoke him, and, looking up, he saw a snake running away. At once his cries became so loud and piteous that in two minutes he had all the servants standing in a circle round him, lamenting his fate, which they believed was death. I found him looking most anxious and depressed; his breathing laboured and abdominal.

I carefully examined the foot and all the exposed parts of his body, but could see not a trace of the bite, nor abrasion of the skin anywhere.

I assured him the snake had done him no harm, and showed him he had not been bitten; but to make his assurance doubly sure, I had some liquor ammonia applied to the part, and by degrees his mental anxiety and depression subsided. Next morning he was at his work as usual.

Here imagination produced some of the symptoms and physical signs of the introduction of serpentine virus into the human system; and, had the coolie's statement been relied on, and liquor ammonia been injected, a cure might have been reported from its use.

11. From the data furnished by Professor Halford, it is impossible to decide whether any, or, if any, how many, of his recoveries are due to imaginary bites, or to bites from harmless species, or to partial bites from really venomous snakes; but that the effects of the ammonia treatment are attributable to one or other of these causes, I am unable to see any reason for doubt.

12. Careful experiments made in India have, in the hands of Dr. J. Fayrer, C. S. I., been attended with very different results. The liquor ammonia when injected into the veins seemed to him to do rather harm than good, so far was it from effecting a cure.

This was not Dr. Fayrer's opinion alone; the different medical men who were present and assisted him in his experiments arrived at the same conclusions as to the complete inability of liquor ammonia, when injected into the venous blood, to counteract in any degree the effects produced by the poison of venomous snakes on the bodies of living animals.

13. Professor Halford would have done much to establish the soundness of his practice had he experimented on the lower animals with the poison of snakes as others have done, and restored them to health when evidently under the influence of the virus which others have failed to do by following his mode of treatment. He contents himself by saying at page 18 of this pamphlet "a great series of experiments on apparently dying people had been done all over the colony at his suggestion and with remarkable success." This is unsatisfactory and inconclusive, as *apparently dying* is a delusive expression.

14. That I might test for myself in some measure the conclusions obtained by others, I performed two experiments with cobra poison, and would here note the details. I was assisted by Sub-Assistant Surgeon Troyluckonath Ghose and Hospital Assistant Roheemoollah in making these experiments.

15. *First experiment on a dog of ordinary size.*—Snake, a well-grown cobra, fresh, and full of vigour, bit most freely the inside of both thighs of a dog at 1-32 P. M.

1-35 P. M.—Dog convulsed; eyes staring.

1-36 P. M.—Pupils dilating.

1-37 P. M.—Biting at the rope by which he was bound.

1-39 P. M.—Lies depressed from the effects of the poison.

1-43 P. M.—Defecating and micturating quite unconsciously.

1-44 P. M.—Dead, just 12 minutes after he was bitten.

Second experiment on a young, lively dog about a year old.—Bit at 2-31 P. M. on the thorax by the same cobra.

2-32 P. M.—Struggling as if in pain; fifteen minims of liquor ammonia, British Pharmacopiæ, were injected into the left femoral vein.

2-36 P. M.—Greatly excited; breathing hurried and panting; walking about with unsteady gait.

2-39 P. M.—Lies down.

2-45 P. M.—Rises up; gait very unsteady.
2-46 P. M.—Staggers greatly.
2-47 P. M.—Lies down, over-powered; breathing forced and almost entirely abdominal.
2-48 P. M.—Is conscious when spoken to, but cannot rise.
2-50 P. M.—Breathing stertorous; convulsed; fifteen minims of liquor ammonia were again injected into the right femoral vein; no effect produced.
2-52 P. M.—Micturating unconsciously.
2-55 P. M.—Limbs moving; pupils much dilated; dying.
3 P. M.—Dead in 29 minutes.—(*Dated Meerut, the 3rd November* 1871.)

16. The first dog was furiously bitten, and was so speedily and so completely under the influence of the venom that he never raised his head nor attempted to stand up, but began to sink instantaneously. My object in this case was chiefly to prove the virulence of the poison.

The second dog was less freely bitten and only in one place; not more than an hour had elapsed since the cobra had expended a large quantity of his poison, yet death resulted in 29 minutes. In the course of a minute after the bite 15 minims of liquor ammonia, British Pharmacopiæ strength, were injected into the femoral vein, which I had exposed before the cobra was brought out; it produced much excitement for about five minutes, followed by depression, and when stertorous breathing began, the injection was repeated without any visible effect.

It was at this stage of paralysis that Professor Halford's cases usually began to be treated, and the results were very different from mine; his apparently dying men immediately getting up and walking about, while the dog continued unconscious to the last.

17. The results I obtained accorded so well with those recorded by Dr. Fayrer in his numerous experiments that I deemed it unnecessary to multiply mine. I think it is proved that the injection of liquor ammonia into the veins of an animal thoroughly under the influence of snake-poison is quite useless, if not hurtful. Even were it a complete antidote, practically the boon would have little value. So deadly is the cobra-poison that any remedy to save life would have to be applied the moment the unfortunate creature was bitten; but, while I think it proved that in severe cases this mode of treatment is quite useless, yet in slight cases, where only a very small quantity of the poison has been inserted, the injection of liquor ammonia into the veins may have some specific value as a remedy, but it would require a considerable number of experiments to determine this point. Had I succeeded sooner in finding poisonous snakes, I should have carried out more experiments to solve this and some other doubts.

18. At page 12 Professor Halford refers to objections raised to his plan of treatment on the supposition that Australian snakes are less venomous than Indian, and he quotes two cases of snake charmers, which proved fatal in less than an hour, and a third in less than half an hour; and on the next page he says: "In one instance one of my tiger-snakes killed a dog in seven minutes;" further adding: "I feel certain from my own actual experiments that equal amounts of poison from either American, Indian, or Australian snakes, are equally pernicious." But in this pamphlet he does not record a single one of his experiments on animals, nor of the effects of his ammonia treatment on an animal bitten in his presence by a venomous snake. This is a great desideratum. Had he supplied it, people at a distance could easily have formed a judgment as to the amount of virulence in the poison of Australian snakes. As it is, this cannot be done with certainty by any reader of this pamphlet; but if the bites prove fatal to human beings in half an hour, or even in one hour, as stated, and to a dog, in seven minutes, little doubt is left as to the power of the poison, and it would be most interesting to know if Professor Halford succeeded in saving the life of men or animals similarly bitten, as it would be entirely contrary to experience in India.

19. I do not suppose it is the wish of Government that I should offer any remarks on the hypothetical views entertained by Professor Halford, as to the changes produced in the blood by the introduction into it of the venom of snakes. They do not seem to me of much importance, and I have not a sufficiently powerful microscope at my disposal to enable me either to support or oppose them.

20. From the perusal of this pamphlet I see that the Professor complains of unfair criticism in the *Lancet:* what is there written is unknown to me. I do not take in the *Lancet*, nor have I seen its remarks on this subject, and none of my home journals refer to him.

21. The observations which I have ventured to make are such as have suggested themselves to me on a careful perusal of the Professor's pamphlet, and are, I trust, justly and candidly expressed.

No. 5344, dated 22nd November 1871.

From—H. B. HARINGTON, Esq., M. A., Offg. Secy. to the Chief Commissioner of Oudh,
To—The Secretary to the Government of India, HOME DEPT.

With reference to your letter No. 3155, dated the 27th June last, I am directed to forward the accompanying abstract of correspondence on the subject of Professor Halford's pamphlet on the treatment of snake-bites, and to say that the Officiating Chief Commissioner trusts that, by the judicious measures suggested by Dr. Archer, Deputy Inspector General of Hospitals, Indian Medical Service, the experiment may be fairly tested in this snake-infested province.

2. A copy of Dr. Archer's instructions to the Medical Officers in Oudh is also submitted.

Circular No. 40, dated 15th November 1871.

The Chief Commissioner having sanctioned the experimental employment in Oudh of Professor Halford's method of treating snake-bites, the Deputy Inspector General requests that Civil Medical Officers in the province will indent on the Medical Store-keeper, Allahabad, through this office, for hypodermic syringes to be used according to the instructions contained in page 10 of Professor Halford's pamphlet, a copy of which has been sent to each civil station.

These instructions are not intended to supersede the ordinary remedies applied in recent cases, such as excision, &c., but to be used when the patient is exhausted, or in the comatise state.

C. ARCHER, M. D.,
Depy. Inspr. Genl. of Hospitals,
Indian Medical Service, Lucknow Circle.

No 1889-97, dated 20th May 1872.

From—J. MUIR, Esq., Offg. Asst. Secy. to the Chief Commr., Central Provinces.
To—The Secretary to the Government of India, HOME DEPARTMENT.

I am directed to reply to your letter No. 3156 of 27th June 1871, forwarding copies of a pamphlet by Professor Halford, of the Melbourne University, on the treatment of snake-bite, for distribution among the Medical Officers in these provinces, and requesting that any valuable opinions received from them might be forwarded to Government.

2. The treatment for the bite of the more poisonous snakes by injection of ammonia has never been tried by any of the Medical Officers in these provinces. In the cases of persons bitten by the less venomous kinds, such as the Chittee and Dhummy or Bungari snakes, Assistant Surgeon Harrison of Sambalpur has found *Eau de Luce* and *Liquor Ammonia* to have a decided effect when applied to the wound by incisions, and at the same time given internally.

3. Dr. Brake, Inspector General of Dispensaries, states that, when danger is immediate and urgent, he would not hesitate to advise recourse to Professor Halford's treatment in preference to all others with which he is acquainted. He thinks lives might be saved thereby, and that no harm could be done by the treatment.

4 Dr. Townsend, the Sanitary Commissioner, states as follows :—

The efficacy of this treatment is not, I believe, generally allowed, even in Australia, and Dr. Fayrer, in the course of a long series of experiments on snake-poisons, has not found it effectual when tried on lower animals. The probable explanation of the difference in the action of the remedy here and in Australia is that the venom of the Australian snakes is not so deadly as that of the Indian varieties.

Dr. Fayrer has, I believe, had no opportunity of testing Professor Halford's treatment on a human subject, and it might be advisable to do so, should a favorable opportunity occur; but as the operation of injecting fluid into the veins is attended with considerable danger, it should not be attempted excepting by properly qualified persons.

There is not, I believe, any officer in these provinces who has given special attention to the subject of snake-poisons.

5. And Dr. Rice, Civil Surgeon of Jabalpur, reports as follows :—

In the face of Dr. Fayrer's experiments on the lower animals, in view of elucidating this very point, I do not think I would be justified in treating a man, so circumstanced, with the injection of ammonia *only*, and unless it is the *only* treatment pursued, the results will be of very impaired value ; combined with any other, the most I should be able to say is, that it did not succeed in saving life ; if the patient happened to recover, I could not say he recovered because of the use of ammonia when another line of treatment was at the same time pursued.

There is no other conclusion open to me, without throwing doubt on Dr. Halford's statements, than that the snakes of the southern continent are not nearly so venomous, nor their poisonous secretion nearly so active in its fatal effects as those of the snakes of this country.

I believe it is received amongst naturalists as a general aphorism, that the nearer we approach the tropics the more venomous is the poison of snakes ; perhaps this will account for the difference between the results of the experiments before referred to.

6. There is nothing further that the Officiating Chief Commissioner considers worthy of notice in the reports received.

No. 1361-237, dated 7th August 1872.

From—C. B. COOKE, Esq., Offg. Asst. Secy. to the Chief Commissioner, British Burma,
To—The Officiating Secretary to the Government of India, HOME DEPARTMENT

I am directed to acknowledge the receipt of your letter No. 3157, dated 27th June 1871, forwarding copies of a pamphlet by Professor Halford on the treatment of snake-bite, and requesting that any valuable opinions received on the subject may be submitted for the information of the Government of India.

2. In reply, I am to say that the pamphlets in question were circulated through Commissioners of Divisions to Civil Surgeons and District Officers, and all the reports which have been received up to the present time are to the effect that they have not yet had any opportunity of testing the efficacy of the treatment proposed by Dr. Halford.

No. 1342-7G, dated the 17th June 1872.

From—J. PUCKLE, Esq., Offg. Secy. to the Chief Commr. of Mysore and Coorg,
To—The Secretary to the Government of India, HOME DEPARTMENT.

With reference to your letter No. 3158, dated the 27th June 1871, forwarding copies of a pamphlet on the treatment of snake-bites, and to your subsequent reminder of the 11th April 1872, I am directed by the Chief Commissioner to forward, for the information of His Excellency the Viceroy and Governor General in Council, the accompanying copy of a letter* from the Deputy Inspector General, Indian Medical Department, reporting the result of the enquiries instituted by him on the subject, from which it will be seen that none of the Medical Officers in Mysore and Coorg seem to have had any practical experience in the treatment of snake-bite by the method advocated by Dr. Halford.

* No. 183 of the 2nd May 1872.

2. The Revd. Mr. Desaint, a Roman Catholic Clergyman at Sethulli in the Hassan District, but now on leave in Europe, forwarded the results of his experiments with ammonia and other remedies in the case of snake-bites, to the Chief Commissioner on the 17th January 1868. He claims to have been successful in several instances, and his paper was published as a supplement in the *Mysore Gazette*, a copy of which I am instructed to forward, with an expression of Colonel Meade's regret that he is unable to obtain any more satisfactory opinions on the subject.

No. 183, dated 2nd May 1872.

From—J. L. RANKING, Esq., Depy. Inspr. Genl., Indian Medical Dept., Mysore Divn. and Ceded Dists.,
To—The Secretary to the Chief Commissioner of Mysore.

I have the honor, with reference to your numbers as per margin, to report that none of the Medical Officers of the Mysore Commission have any practical experience in the treatment of snake-bite by the method advocated by Dr. Halford.

No. [illegible], dated 20th July 1871.
No. [illegible], dated 20th April 1872.

2. I may state that Dr. Fayrer of the Bengal, and Dr. Shortt of the Madras, Medical Services, instituted a series of most careful experiments as to the efficacy of liquor ammonia when injected in a vein in bites from venomous Indian snakes.

3. I do not think it necessary to lay before the Chief Commissioner the evidence adduced by those officers in support of the inefficacy of the treatment as applies to the bites of Indian snakes, as those officers have doubtless contributed to the enquiry set on foot by the Government of India. But I may add that the evidence is generally accepted by the profession as conclusive of the inefficacy of the treatment.

Dated the 17th January 1868.

From—The REV. C. DESAINT, Missionary Apostolic, Mysore,
To—L. B. BOWRING, Esq., C. S. I., Commissioner of Mysore.

For more than ten years I have been engaged in treating snake-bites, and in the different countries which I have traversed, I have made particular researches into the remedies employed by the natives, and I have often paid dearly for a knowledge of certain plants, or pretended secrets, said to be infallible; but I was far from being satisfied with anything I discovered. Many persons boasted greatly of particular infallible pills, as they called them, and cited various cases of cure, but they could not tell me when and how I could procure these pills.

Every year I have many cases of snake-bites, and in a single year have known twelve cases, though this year I have had only four. I have employed almost all the remedies recommended by Europeans and natives.

I am no medical man, my intention being simply to explain to you as clearly as possible the result of my researches, and the treatment which has hitherto appeared to me to answer best against snake-bites. But first let me explain as briefly as possible the various remedies upheld and employed by European and native doctors.

When a person has been bitten, in order to prevent the absorption of the venom, all are unanimous in recommending a strong ligature above the bite. This is a good but an insufficient means, for the poison can only be arrested for a while, and if it is not promptly annihilated, it will not be slow in making its ravages.

In order to destroy the venom in the wound, cauterization, either by a red hot iron, or nitrate of silver, or antimony, is proposed; but these violent remedies only affect the poison in the wound, and are useless against that which is already absorbed into the circulation.

To eliminate the latter, stimulants are generally given, and in certain cases real benefit has been derived from the use of Ammoniac, Madeira wine, Sherry, &c. I believe such remedies to be good when the quantity of poison is inconsiderable, but I am persuaded that ammoniac, even if administered in powerful and repeated doses, is insufficient in cases where a great quantity

of poison has been injected. Never having had occasion to employ Madeira, I cannot say any thing about it, but nevertheless I cannot imagine it to be a better specific than ammoniac.

Among the plants which natives use, the greater part have no effect, but some appear to me deserving of attention, and of being used. Those which seem to me to have real efficacy against snake-bites are ordinarily the *aristolochies* and *asclepiades*. Among the *aristolochies* of India the *aristolochia bracteata*, known in Canarese by the name *adûmuttada gida* seems to hold the first rank. A European planter near Munjerabad assures me that he himself saw this year a person of his plantation, bitten and insensible, thoroughly cured by the juice of this plant, which they made him take interiorly.

Near Bangalore and in Coimbatore they esteem greatly the root of the *asclepias volubilis* known in Tamil by the name of *palai*. It is considered sufficient to make the person who has been bitten eat the root. Many cases of cure by the use of this medicine have been mentioned to me, but it is also admitted that it does not *always* succeed.

Others use the *asclepias acidasindi kodi*, in Tamil). They give the root, powdered, in doses of 15 to 20 grains, and repeat the dose three times every 10 or 20 minutes.

The root of the *ophioxylon serpentinum*, found in the bazaars under the name of *sûtira-nâbi*, is much used against snake-bites, the powder of it being applied to the wound, and a decoction of it to the interior.

The Konkanees have great confidence in the root of a plant which they call *nari visha*, of which they grind on a stone the root with a little liquor, and apply it to the wound and also administer it internally; and if the patient becomes insensible, a pot containing fire is placed on his head.

I do not possess facts to enable me to pronounce an opinion on the efficacy of these plants, and therefore content myself with mentioning them.

They esteem also a porous stone called "serpent stone," which is reputed to absorb all the poison on being applied to the wound. I am acquainted with the composition of this stone, but I do not think it worth mentioning.

As regards the remedies employed by jugglers and snake-charmers, I have always assumed that they were frauds skilfully played to deceive the credulous, and to sell dearly unimportant remedies.

Orfila, in his *General Toxicology*, vol. II, p. 536, appears to place arsenic at the head of the list of specifics against snake-bites, and says that the arsenic of potassium and arsenic acid have been employed with the greatest success against the bites of venomous snakes, citing in support of this fact many observations, which may be read in volume 2 of the *Medical Chirurgical Transactions of London*.

Russell, in his famous work on Indian serpents (*An Account of Indian Serpents collected on the Coast of Coromandel*, by Patrick Russell: London, 1796, 2 vols.) reports the experiments that he made with arsenic acid, and refers to the pills of Tanjore as an Indian preparation much in vogue for healing the bites of venomous animals. He does not mention their composition, but he says that the white oxide of arsenic (arsenic acid) is the basis of it, and that a pill of six grains contains rather less than three-fourths of a grain of it.

Are not these pills the same as those which have been recommended to me so highly, and of which so many cases of cures have been reported, which I have so long sought for, and of which I am now about to give you the composition? I am disposed to think so. However the following is the composition of these celebrated pills:—

Tamil Names.	*Latin Names.*	*English Names.*
Nari visham	(Erythronium Indicum?)	
Sûtira nâbi	Ophioxylon serpentinum	Opioxylon of serpents.
Aridalum	Arsenicum flavum	Yellow orpiment.*
Manosile	Arsenicum rubrum	Arsenic realgar.
Kipashana	Arsenicum album	White oxide of arsenic.
Panjam palai	Aristolochia bracteata	Floral leaved birthwort.
Marukarankai	Gardenia dumetorum	Emetic nut.

An equal portion (in weight) is taken of each of these ingredients, which are mixed and pounded for three hours in betel juice (betel leaves), a little *ganji* is then added, and pills are made of the size of a grain of *dolichos catiang*. One or two of these pills are broken over the wound, and one or two are taken in the juice of betel leaves. At least three may be given for the interior.

I could mention numerous cases of cure worked by these pills. Our Venerable Pro Vicar, M. Jarrige, who has passed more than 40 years in India, and who has often tried them, can testify to this. As for myself, permit me to mention the last serious case which I have had to treat.

At the end of July, a woman of Mandra, a village near Suthulli, was returning home towards evening, bearing a bundle of herbs on her head. In passing along the little road which leads to the village, and which is bordered by an aloe hedge, she put her foot on an enormous cobra which twined itself round her leg and bit her deeply. The frightened woman was obliged to seize and pull away the snake by her hand to get free from it. She was brought to me about three quarters of an hour after the accident. A ligature had been attached above the wound. The leg was much swollen, but the woman did not suffer violent pain, though there was sensible numbness and weakness in all the body. She seemed stupefied and dull, her responses

* Native sulphurs of arsenic to be used.

being slow, but as I did not know her, I supposed this to be her ordinary character. I made her take 20 drops of ammoniac in about an ounce of water, and cauterized the wound with ammoniac, as I shall mention hereafter.

Perceiving nothing extraordinary, I left the woman in my verandah and went to supper. Scarcely had I sat down, when I was told that the woman had experienced shiverings and tremblings. She then lost all consciousness, though I was not told of this. I finished my repast and returned to visit her. I found her insensible, the head bent on the stomach, the teeth firmly closed and the extremities of the limbs cold. I then thought that all was over, and took out my watch to see exactly in what time she would expire. Being desirous, however, not to have any ground to reproach myself with, I got her jaw opened by two men, and made her swallow a pill with a little betel juice. Ten minutes afterwards, not observing any change for the better, I broke a second pill in betel juice, and tried to make her swallow it. But the pill thus broken seemed to stick in her mouth, so that I took at once a third pill, which I got slipped down her throat with a little juice of betel leaves. In about two minutes the woman sighed, and after a few moments she seemed to open her eyes. I then ordered two men to raise her up and to make her walk. She was thus forced to move about ten paces. She then opened her eyes widely and looked round her with a vacant air. I told the men to let her move cautiously. She supported herself with difficulty, and at my request returned to me slowly and staggering. She then asked what had happened to her, and seemed to recover her senses perfectly. During the night she vomitted twice, and the next morning returned home perfectly well.

I cannot guarantee that these pills will always succeed infallibly, but I think I can state with assurance that they are the best and most certain remedy hitherto known; for we perceive in their ingredients three kinds of arsenic, a substance recognized by the most learned medical men, who have written regarding the venom of snakes, to be most efficacious, as well as those plants which are most stimulant and most recommended against snake-bites.

But to ensure the efficacy of these pills, we must, at starting, be certain of the purity of the ingredients and be very careful about their manipulation. The ingredients must be mixed and boiled together for at least three hours, and the pills must be administered in the juice of betel-nut, and never in water, it being asserted that water destroys their properties.

Moreover I believe that one could not draw any conclusion from experiments made with these pills on fowls or dogs which had been bitten, and which nevertheless died; for it is evident that, *cæteris paribus*, a much greater quantity of poison is required to kill a man than a fowl. A remedy, therefore, which may give a man sufficient strength to overcome the poison, may fail completely with weaker animals. Again, it appears that three pills are ordinarily required to destroy the poison of a snake, whereas this quantity administered to a fowl would kill it.

Permit me now to inform you of the course I take in treating snake-bites.

All serpents may be divided into two great classes :—1*st*, those whose bite causes death speedily, and 2*nd*, those whose bite is followed by gangrene, and only causes death some months after the accident, generally, that is, in four or six months. Among snakes of the first class, the *cobra di capella* and the *viper elegans* or painted snake, known in Canarese by the name of *bale katuka*, are the most formidable. Their bite rarely causes much pain, but is followed by numbness of the bitten part, weakness and faintness, while the jaws contract and are set, the tongue becomes thick, the mouth becomes covered with foam, and death often ensues in two or three hours.

The snakes of the second class are generally called in Canarese *mandalada hàvu*, in consequence of the zones or circles on their backs. Their bite causes extreme and burning pain and shiverings and tremblings of the entire body, while the bitten part swells. These appearances diminish in 24 hours, the swelling disappears, but the gangrene commences and makes frightful ravages. The bitten person sees his flesh become putrid, until the gangrene gaining the vital parts causes death.

Treatment of Snake-bites.

The treatment of snake-bites is both interior and exterior.

1. As soon as a person is bitten, a ligature lightly tied should be fastened above the wound. It should not be of cord nor of very small fastenings which might irritate the skin. It should also not be continued too long, lest it increase the livid tint and favor the development of gangrene. Indians generally make their ligature a great deal too tight, but if the swelling is considerable, and the pains severe, &c., I dispense with the ligature.

2. I lose no time in at once treating the wound. I take a little glass tube, made to cut at the end and filled with ammoniac, and force it down as deep as possible into the wound. I remove the edges, and scrape gently the interior of the wound, pressing lightly and letting it bleed as much as possible. During this operation, the ammoniac contained in the tube descends by degrees, and penetrates to the bottom of the wound. I scrape the blood which flows with ammoniac, and I have often seen, during this operation, the poison contained in the wound adhere to the extremity of the tube in an oily and viscous form. I wipe the tube impregnated with blood, steep it again in ammoniac, and recommence the operation two or three times. Having thus cleansed and thoroughly cauterized the wound with ammoniac, I take a small dressing of pure ammoniac and apply it to the wound. The ammoniac acts as a blister, and bubbles rise up here and there, which greatly aid, I believe, in destroying the effects of the

poison. Formerly I used to cauterize with butter of antimony, but I have found out that ammoniac thus applied is far preferable.

3. As for interior treatment, as soon as a patient is brought to me, I make him take 20 drops of ammoniac in about an ounce of water, and attend to the wound as I have described. The wound having been cauterized and dressed, if the effects of the poison diminish, I give another dose of ammoniac, 20 drops internally; but if the effects have increased, I give no more ammoniac, but I administer three pills in the juice of betel leaves, one every five minutes. After the second or third pill the symptoms ordinarily greatly diminish, and the patient is out of danger.

Such is my usual method of treating the bites of snakes of the first class, but I am assured that the pills alone properly administered succeed perfectly. As I have said above, one or two are broken over the wound, and one or two or even three are taken interiorly in betel juice.

In respect to snakes the bite of which brings on gangrene, and only causes death some time after the accident, I treat the wound in exactly the same manner that I have above described. I then make a mixture of one part of ammoniac to five or six parts of water, and steeping dressings in this ammoniacal water, I apply them to the wound, recommending the patient to keep them continually moistened with the ammoniacal water during 24 hours. I administer also interiorly 20 drops of ammoniac in an ounce of water, repeating the dose two or three times, should this be necessary. I do not give pills for this class of snakes.

For old and gangrened wounds I follow the same course, and under the influence of the dressings of ammoniacal water, one soon sees the gangrene cease and the wound become cicatrized.

By the help of this simple and easy remedy, I have healed old and very severe wounds, and I may affirm that this simple treatment succeeds perfectly in all cases of bites by these kinds of snakes. But it is insufficient for bites by cobras and snakes of the first class.

Such is the treatment, Sir, that I wish to make known to you. May it succeed with others as it has hitherto succeeded with me, and should I have the consolation of contributing to save the lives of some persons, I shall consider myself well rewarded for my trouble and labour.

DEPARTMENT OF AGRICULTURE, REVENUE, AND COMMERCE.

EXTINCTION OF TYPHOID FEVER IN THE MILLBANK PRISON BY THE DISUSE OF THAMES WATER.

The Millbank Prison was first opened for the reception of convicts in 1816. It is built on the cellular system, each convict having a cell to himself of a cubic capacity of about 900 feet. The number of convicts confined there has ranged from about 600 in the earlier years of occupation to upwards of 1,200. For very many years the prison had a bad reputation for unhealthiness. Its inmates from the first suffered a very high rate of mortality, phthisis being the disease most productive of casualties, but epidemics of typhoid fever, diarrhœa, and dysentery were of frequent occurrence. Of the four epidemics of cholera that have visited England, the first three—*viz.*, those of 1833, 1849, and 1853-55—were very fatal in the prison. In the fourth epidemic—that of 1866—the convicts entirely escaped. In the month of August 1854 the health of the convicts began to exhibit a very marked improvement, which has continued up to the present time. Typhoid fever has become extinct, and diarrhœa and dysentery have ceased for many years to appear as causes of death. Nor has the disappearance of these diseases been followed by the appearance of other causes of death. From the year 1862 to the present time not a single convict has contracted typhoid or any other form of fever in the prison. There were only three cases of the disease altogether treated in that interval; but the patients had the disease upon them at the time of admission to the prison. One of these three cases was admitted and proved fatal in 1865. For the next six years there was not a single case of typhoid in the prison. The other two cases were admitted recently from another prison, and are now convalescent.

From August 1854 to April this year—a period of nearly eighteen years—there have been only three deaths altogether from typhoid, *viz.*, one in 1855, one in 1860, and one in 1865. As already stated, the last case was an imported one. In the same period of eighteen years there has been only one death from dysentery and diarrhœa.

A change in the health of the prison, so sudden, so marked, and permanent, is of great interest in relation to some moot questions in preventive medicine; for our knowledge of the circumstances under which the change occurred is so full and precise that we can hardly err in attributing it to its true cause. In preventive medicine it is hardly possibe to exaggerate the value of an accurate precise knowledge of the mode in which zymotic diseases spread; for without such light our preventive measures must be empirical, roundabout, and unnecessarily costly.

But it will be well to state in more detail the grounds of the assertion that the health of the prisoners has undergone a radical change since 1854. I shall then discuss the cause of the change. The extent and reality of this change will be established by information taken from the reports of two Select Committees of the House of Commons, which were appointed to investigate the cause of the sickness in 1822, '23, '24, and by quotations of the opinions of the medical officers of the prison as recorded in their official reports, and by official statistics of sickness and mortality.

From the report of the Select Committee of 1823 I find that for some time previous to 1822 the convicts had been subject to an "intestinal" flux, which the medical officer supposed to be due to overfeeding and insufficient exercise. In consultation with Sir James McGrigor, the head of the Army Medical Department, the Managing Committee of the prison adopted a reduced dietary. Three months after the introduction of the new dietary a great epidemic of diarrhœa, dysentery, and fever, accompanied with symptoms of scurvy, began. There were nearly 500 convicts sick at one time, out of 880. The opinions of the College of Physicians, and of Sir Henry Halford, Sir Gilbert Blane, Drs. Roget and Latham, and other eminent medical men were taken as to the cause of the epidemic. With the exception of Sir Jas. McGrigor, they were all agreed in thinking "that the main cause of the sickness was attributable to the new dietary being insufficiently nutritious, subsidiary causes being the depressing influences incidental to protracted imprisonment on the solitary system, insufficient exercise, defective ventilation, cold, and possibly some influence peculiar to the locality." But, although the diet was improved, a very large amount of sickness continued to prevail; and even convicts who had not been on the reduced diet at all, who were admitted after its abolition, contracted the diarrhœa and fever peculiar to the place. These circumstances led to the opinion that the disease was contagious, and measures of prevention were taken accordingly. Sir Humphry Davy was requested to report on the ventilation of the prison, and Faraday was employed to disinfect it; and every suggestion that the science of the day could offer was availed of. There is no precise information to show when or how the epidemic came to an end, and for many years the sanitary records are extremely meagre, but there is enough to show that the prison continued unhealthy. In 1833 the convicts suffered very severely from cholera. In the Prison Report for 1839 the Inspectors of Prisons are quoted as saying that "these circumstances lead us to regard the situation of the prison as decidedly unhealthy." In 1841 the late Dr. Baly, afterwards Physician to the Queen, was appointed to the medical charge of the prison. At his recommendation great alterations were made in the discipline of the prison, and from that time the data available

for judging of its sanitary condition are much more ample. In the year 1842 there was a great epidemic of dysentery and fever. At one time there were 110 cases in the infirmary, nearly all being dysentery and fever. In 1847 there was much continued fever—"in the fifteen months ending 31st March 1849 there was a great increase of sickness and unprecedented mortality," fever and cholera being very fatal. The death-rate for 1849 was 82·23 per 1,000. In 1853 and 1854 there were again epidemics of fever and cholera, attended with much mortality. We have now reached the turning point in the history of the prison. In 1855, notwithstanding the occurrence of five deaths from cholera, the death-rate sank to 11·3 per 1,000. From that year up to 1870, the highest death-rate was 19·3. In 1862 it was as low as 3·92 per 1,000, and in nine years out of the sixteen it was under 12 per 1,000.

The following table shows, in a concise form, the sanitary state of the prison since 1843:—

Date.	No of prisoners received.	Average daily number.	Deaths per 1,000.
1843	1,961	741	18
1844	4,102	906	18
1845	3,523	990	15
1846	3,657	998	13
1847	2,762	1,151	28
1848	3,141	1,373	53
1849	3,047	1,053	82
1850	2,247	1,154	23
1851	2,570	1,091	18
1852	2,351	1,202	30
1853	1,599	1,038	28
1854	1,513	752	69
1855	—	967	11
1856	2,640	928	19
1857	2,497	1,109	11
1858	2,306	1,068	8
1859	2,234	993	5
1860	2,386	1,003	8
1861	2,496	984	9
1862	2,859	1,018	3
1863	2,584	1,013	10
1864	2,015	985	18
1865	1,851	898	14
1866	1,608	918	13
1867	1,889	942	18
1868	1,502	935	10
1869	1,333	1,011	13
1870	925	712	15

In studying these statistics, it should be remembered that the death-rate of a year depends to a considerable extent on the state of health of the convicts admitted in that time. And in order to fully understand their meaning, it is further necessary to remember that, owing to the revolutionary change effected in the health of the prison, it is now customary to use the institution as a kind of sanitarium for other prisons—the reverse having been the practice in former days, when convicts in infirm health were removed from Millbank, those only being retained who, from their robust health, were supposed to be capable of resisting the unhealthy influences of the place.

In the ten years from 1845 to 1854 there were 57 deaths recorded under the head of typhoid, or 5·7 per annum, and there was no year without a death from typhoid. In the eighteen years from 1855 to 1872 there were altogether three deaths from typhoid, and in fifteen years of the period there was no typhoid death at all. In the twelve years from 1843 to 1854 inclusive the death-rate was 33 per 1,000. In the sixteen years from 1855 to 1870 it was only 12 per 1,000.

The reality, extent, and permanence of the change in the health of the prison being thus clearly established, it remains to investigate the cause of this change. The following enumeration of possible causes will probably be considered sufficiently comprehensive as a basis of discussion—*viz.*, improvements in (1) drainage, (2) ventilation, (3) diet, (4) clothing, (5) discipline, (6) water-supply. The observations I have to offer on each of these heads will, I think, prove to demonstration that the cessation of typhoid in the prison was in no degree whatever due to any changes under the first five heads, and that it was due solely and exclusively to the change in the water-supply.

Drainage.—As regards drainage, two improvements have occurred. The prison was formerly surrounded by a wet ditch, which communicated with the Thames, and which was believed to render the site damp. The ditch, however, was filled up many years ago, and has not existed within the memory of the present generation; and as fever prevailed in the prison with great intensity from time to time for at least a quarter of a century after the ditch was filled up, we may eliminate this cause as entirely unconnected with the cessation of the sickness. Indeed the health of the prison appeared to be steadily deteriorating for some ten or twelve years before the sudden improvement in 1854; epidemics were becoming more frequent and more fatal. The other improvement in drainage was the connection of the main sewer of the prison with the intercepting sewer of London. This change occurred in 1869; but as

the fever had become extinct years before this cause came into operation, we may eliminate it, too, as irrelevant. A few further remarks on the drainage may be of interest. The prison formerly drained direct into the Thames, and the mouth of the sewer, being under the level of high-water mark, was furnished with a sluice to prevent flooding of the drains. Thus the sewage of the prison was kept stagnant in the drains every day for several hours. Occasionally, too, when a fall of rain happened to coincide with an unusually high tide, the basement of the prison was flooded, and the sewer gases forced out into the prison corridors. The drains are well constructed, but, owing to the low position of the prison on the banks of the river, they have very little fall; so that silt accumulates in them rapidly, and they have to be opened out constantly to be cleansed. It appears, too, that the drains have no ventilation whatever. At present they form a long blind end in connection with the main sewer of London, and I am informed there is no communication of any sort between the general atmosphere and the interior of the prison main drain in the interval between its connection with the London sewer and the prison waterclosets. The waterclosets, too, on the day of my inspection of the prison were by no means free from offensive smell, and appeared to be insufficiently ventilated. There was a strong sewer atmosphere in them. I do not mention these facts for the purpose of contending that typhoid is never caused by bad drainage, but the case appears to show conclusively that perfect immunity from typhoid may co-exist with very indifferent drainage. Some eminent authorities have lately described the water-removal of excreta as *necessarily* involving serious danger to the public health by favouring the propagation of typhoid, diarrhœa, scarlatina, &c. The facts here recorded may help to moderate such fears. Before leaving the subject of drainage, I would mention that there is not a particle of evidence for supposing that the extinction of typhoid in Millbank was in any way connected with a change in the "ground water." Prof. Pettenkofer's hypothesis is demonstrably inapplicable to this case.

Ventilation.—As regards ventilation, there is little to be said. It is substantially the same as it was when the prison was unhealthy—the same as it was left nearly fifty years ago by Sir Humphry Davy, under whose advice the arrangements for ventilation were carried out. A complaint, indeed, occurs in Dr. Baly's report for 1849, p. 12, "of the prison courts being surrounded on all sides by the buildings, so that the body of air within them, which supplies the cells and wards, is changed with difficulty; and this evil has within the last few years been aggravated by the erection of a long and continuous range of higher houses on the south-west and western sides of the prison, by which the access of the most frequently prevailing winds to the prison is greatly impeded." As this impediment to ventilation, *quantum valeat*, is common to the two states of the prison, it may be eliminated as irrelevant.

Dietary.—The dietary was altered in 1864, but as typhoid had ceased nine years previously there can be no causal relation between the two events. The nutritive value of the diet was reduced, and the solid food allowed per week was reduced from 306 to 284 oz. Long experience proves that the new diet is sufficient to maintain health, but there is no reason to believe that its adoption has made zymotic disease less prevalent.

Clothing.—There has been no change in the clothing.

Discipline.—The discipline was somewhat changed in 1864 in a sense not favourable to health. While the prison was unhealthy the medical officers thought it dangerous to the health of the convicts to carry out the solitary system with the strictness enforced in other prisons, and they recommended that the cell-doors should be left open a few hours each day. But in 1864 the prison had been healthy for so many years that orders were given to have the cell-doors closed all day, as in other prisons, and the practice has been kept up ever since.

Water-supply.—The water-supply was changed on the 10th of August 1854. Up to that date the prison had been supplied with water pumped from the Thames as it flows by the institution, and purified by filtration. The new source of supply was the artesian well in Trafalgar Square. The change was carried into effect in the midst of the cholera epidemic which so severly visited London that year, and the prison was suffering from cholera at the time. Six days after the change, the disease suddenly ceased, and a marked improvement took place in the health of the prison. From the date of the introduction of the new water-supply up to April of the present year—a period of nearly eighteen years—there have been only three deaths from typhoid, *viz.*, one in 1855, one in 1860, and one in 1865. Of these the last occurred in a convict who was suffering from the disease at the time of his admission. In the first half of 1854, and before the change of water-supply, there had been three deaths from fever and two from diarrhœa. In the nineteen years since the change of water-supply there has been only one death from diarrhœa and dysentery. It is thus shown conclusively that the disappearance of typhoid coincided exactly with the disuse of Thames water; and, as this change occurred while in all other respects the sanitary condition of the prison remained unaltered, there can be no doubt the two events were not coincidences only; there must have been a causal relation between them. In further confirmation of this conclusion, I would mention that, in the twenty-one years for which we have mortuary statistics for the Pentonville Prison, there has not been a single death from typhoid in that institution. There have been only three deaths from diseases of the bowels, of which all were contracted before the patients were imprisoned. The Pentonville Prison drew its water-supply exclusively, until very recently, from a deep well in the chalk. It has been singularly free from epidemics of every kind and remarkably healthy, its death-rate rarely exceeding 6 per 1,000. It has never

suffered from cholera, though three epidemics of that disease have visited London since the prison was established in 1843.

The exact study of the causation of diseases among a free population is beset with great difficulties, owing to the infinite variety of the conditions under which diseases occur; so that it is impossible to eliminate the inert accompaniments from the causal accompaniments. But in the case of Millbank, the conditions are so few, and the facts so definite and well authenticated, that the process is easy. The facts are all beyond dispute or cavil. Medical reasoning is too often unavoidably based on data of very questionable accuracy. Either all the facts of a case are not known, or they are exhibited in a light which prevents their true meaning from being observed. In the present instance the whole facts of the case are so clearly established on unimpeachable testimony that if Father Thames could be indicted on a charge of wholesale poisoning no Judge and Jury could hesitate to convict. The history of the institution, in the last fifty years, may be regarded as a great physiological investigation, in which the effects of filtered Thames water on the human constitution have been determined with almost the precision of a chemical experiment. It is instructive, as an illustration of the difficulty of discovering the true cause of sickness, to note that, of all the many distinguished physicians and men of science who were consulted from time to time about Millbank, no one appears for the first thirty years of its existence to have had a suspicion that the water-supply was in any degree answerable for the epidemics of fever, diarrhœa, and dysentery that visited the institution so frequently. During the inquiry conducted for many months by the two Select Committees of the House of Commons in 1823 and 1824 the state of the water-supply was not once mentioned. When Dr. Snow in 1849 suggested that the cholera epidemic was caused by the use of Thames water the idea was received with ridicule. The earliest mention of any suspicion of the water-supply occurs in the Report of the Directors of Convict Prisons for 1852. At page 123, Dr. Baly says: "It was determined to put to the test of experiment an opinion more than once mooted respecting the cause, not only of the cholera, but also of the other kinds of bowel complaint which, in a mitigated degree, are almost constantly present in the Millbank Prison. It had been suggested, namely, that these diseases are produced by the Thames water, which the prisoners drink; and although for some years this water has been *well filtered* within the prison and freed from all obvious impurity, it was still possible that matters in solution in it produced a deleterious effect." It is evident from his later reports that this opinion had little weight with Dr. Baly; but, notwithstanding, he strongly recommended that it should be put to the test of experiment. His own opinion, which appears to have been shared by every physician who was consulted about the prison, was expressed as follows in his report for 1849, and repeated in several later reports:—"The causes of the general liability of the prisoners to fever," he says, "appear to be the low site of the prison, the proximity of low and ill-drained ground, open sewers and manufactories which fill the air with impurities, the construction of the building which impedes the free circulation of air through it, and the proneness to suffer from general causes of disease which is produced by the state of imprisonment." Dr. Baly was evidently surprised at the remarkable results that followed the introduction of a pure water-supply in August 1854. He could not believe that the sudden cessation of cholera that followed in six days was due to the change of water-supply, but the continued healthiness of the prison in after years gradually shook his scepticism, though some traces of it remain apparent to the last. In his report for 1855 he writes: "One of the special tests of the health of Millbank Prison is the degree of prevalence of diarrhœa, and there have been fewer complaints on account of this disease than in former years. This improvement in the health of the establishment began towards the close of 1854. It followed quickly upon the substitution of the artesian well-water for the Thames water, and it is, most probably, in great part due to the greater purity of the water at present in use. It may be hoped, therefore, that this improved health of the establishment will at all events to some extent be permanent. But *it is not to be expected that the convicts in Millbank Prison will suffer as little from diarrhœa, dysentery, and fever as the convicts in prisons differently situated.*"* In his report for 1856 a further advance of opinion appears. He says: "I have again to report that the health of the prison is satisfactory, and that those diseases which have hitherto appeared to be inseparably connected with locality have been less frequent. These favourable results are, I believe, attributable in great part to the purity of the water with which the prisoners are now supplied. I have, therefore, a strong hope that they will be permanent." It may here be stated that Dr. Baly mentions no other cause to which the improvement in the health of the prison could be attributed, and I inquired personally from Dr. Guy, and from the clerk of the works, who has been upwards of 30 years employed in the prison, whether there were any alterations of any kind not mentioned in the reports to which the change in the state of health could be referred, but they were not aware of any.

Dr. Guy, who succeeded Dr. Baly in the medical charge of the prison, expresses his surprise that, although the Thames was unusually offensive in 1859, the prison was unprecedentedly free from sickness. In 1862 Dr. Guy reports that "the male convict population are at least as healthy as any other population with which it can be compared, and that the female convict population suffers but little by comparison with the population out of doors." In 1871 the present able medical officer, Mr. Gover, reports that "the prisoners have continued to be free from every form of disease which could call the sanitary arrangements into question—

* The experience of eighteen years shows how groundless this apprehension was.

as free as if the prison occupied the healthiest site in the kingdom." These extracts show very strikingly the permanence and the thoroughness of the change that has taken place in the health of the prison. Another proof of the change is furnished by the fact that the military authorities have decided to build barracks for troops near the prison—a measure long desired on strategic grounds, but considered inexpedient on account of the unhealthiness believed to be inseparable from the locality.

The sanitary history of Millbank appears to me to warrant the following conclusions :—

1. That the extinction of typhoid fever, and other diseases of the same class, is quite within the range of practicability.

2. That the extinction of one class of zymotic diseases is not necessarily followed by zymotic diseases of a different class. For example, it is supposed that the increased prevalence of scarlatina and measles of late years is due to the partial displacement of small-pox by vaccination. The case of Millbank shows that it is practicable to protect a community against every kind of zymotic disease. Ignorance of sanitary science is the great obstacle to the extension of this protection to the free population.

3. That since some of the ablest physicians in London failed for many years to detect the true cause of the unhealthiness of Millbank Prison, and assigned causes for it which later experience has found to be unconnected with it, the probability is that a similar error is frequently made elsewhere, and that the prevalence of some zymotic diseases is ascribed to locality, malaria, heat, cold, variations of temperature, moral depression, and other intangible influences which would be entirely removed by the general disuse of impure water.

4. That as it required long years of observation to establish the noxious influence of Thames water even when well filtered, under conditions very favourable for detection, we should be cautious in accepting the opinion, based on the results of chemical analysis, that the use of that water by the population of London is free from danger.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

(IRRIGATION.)

REVENUE REPORT OF THE IRRIGATION DEPARTMENT, NORTH-WESTERN PROVINCES, FOR 1871-72.

Nos. 83—96 I, dated the 15th February 1873.

RESOLUTION—By the Government of India, P. W. DEPT.

Read :—

Revenue Report of the Irrigation Department, North Western Provinces, for 1871-72.

Resolution by the Government of the North Western Provinces, No. 2600 I—C of the 2nd November 1872, reviewing the same.

OBSERVATIONS.—The date fixed for the submission of these Reports in Government of India Resolution Nos. 340—2 I of 20th September 1869, and re-affirmed by Resolution Nos. 470—4 of 17th June 1872, was early in November of each year; reckoning from the middle of that month, the following table shows the dates of submission of the Reports for the past five years, and the number of months of arrears :—

Year.	Date of submission.	Months after close of the year.	Months after date fixed for submission.
1867-68 ...	30th August 1869	17	9½
1868-69 ...	15th May 1871	25½	18
1869-70 ...	5th September 1871	17	9½
1870-71 ...	12th June 1872	14½	7
1871-72 ...	30th December 1872	9	1½

2. The above table shows the marked improvement which has taken place since 1868-69. The comparatively punctual submission of this Report is satisfactory, as showing an earnest endeavour on the part of the Officers under the Government of the North Western Provinces to overcome the difficulties in their way. The result attained seems to be due in a great degree to the arrangements ordered to be introduced by Colonel Greathed (now on leave), and favourably commented on in paras. 3 and 4 of the Resolution which issued on the Report for 1870-71.

3. It may be hoped that next year's Report will be submitted by the date prescribed, as two of the Superintending Engineers (1st and 2nd Circles) did submit their returns within the period fixed by Government, and the other two (3rd and 4th Circles) were only one week behind time; and, indeed, it is not very clear why there was any delay this year, for it is to be observed that the Chief Engineer's Report, and the Resolution of the North Western Provinces Government, are dated, respectively, the 22nd October and the 2nd November; and it has not been explained why two months should have intervened between the review of the Report by the Local Government, and its submission to the Government of India. It is satisfactory to note that in no one case was it found necessary to return the Circle Reports for revision, as almost invariably had to be done in previous years. This is creditable to the Superintending and Executive Engineers.

4. The year under review was even more remarkable than the previous year, as being one of abundant and evenly distributed rain-fall. Such a state of things, however beneficial to the country at large, is necessarily adverse to the growth of canal revenue, and it is not therefore surprising that there should have been a considerable diminution in the area irrigated, and in the amount of water-rent realized.

5. The following table shows the number of acres irrigated on the different canals for the past five years :—

Year.	Ganges Canal.	Eastern Jumna Canal.	Dhoon Canals.	Rohilkhund Canals.	Bijnour Canals.	Bundlekhund Canals.	Totals.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1867-68	533,456	182,544	11,998	31,043	1,656	793	761,480
1868-69	1,078,399	274,101	14,223	70,803	3,052	1,340	1,441,918
1869-70	780,406	251,067	10,429	45,433	1,376	962	1,089,613
1870-71	766,614	212,715	12,419	56,233	1,882	916	1,050,808
1871-72	606,555	192,750	11,039	39,331	1,635	1,184	852,494

6. The decrease, therefore, in area irrigated amounts to no less than 198,314 acres, and in revenue to Rs. 3,75,435 ; this is at first sight scarcely accounted for by the heavy rain-fall, because an examination of Table I of the North Western Provinces Resolution shows that an increase in rain-fall of 8 inches in 1870-71, over the quantity which fell in 1869-70, led to a diminution of only 38,865 acres in area irrigated, and of Rs. 18,624 in revenue ; while an increase of 3·4 inches in 1871-72 has resulted in a decrease of nearly 200,000 acres in area, and $3\frac{3}{4}$ lakhs in revenue. The explanation, however, is that in 1870-71 the increased rain-fall occurred chiefly during the rainy season ; while during 1871-72 considerable falls of rain occurred just about the sowing seasons for each crop, a circumstance unfavourable for the use of water from the canals. The consequence has been that while in 1870-71 the decreased breadth of autumn crop irrigation was in a great measure compensated for by the increased breadth of the spring crop irrigated, in 1871-72 there has been a marked diminution in the area irrigated during both seasons.

7. It is to be noted that whereas during the wet year under review the irrigated area has been diminished by 12 per cent. on the Ganges Canal, the diminution on the older Eastern Jumna Canal is only 7 per cent.

8. The following table summarizes the crops and areas irrigated, arranged in classes :—

Class of Crop.	Areas.
	Acres.
Gardens and orchards	12,817
Sugar-cane	94,810
Cereals	557,640
Pulses	33,083
Fodder crops	2,444
Fibres	22,082
Dyes	120,149
Drugs	5,451
Oil-seeds	2,613
Land once watered	1,405
Total	852,494

9. Under the head "Cereals," the three principal grains, Wheat (336,851 acres), Barley (99,436 acres), and Rice (58,935 acres), aggregate no less than 495,222 acres out of the total of 557,640 acres, Wheat alone being more than one-half of the whole. Among "Pulses," Gram occupies the chief place, the area irrigated amounting to rather more than one-half of the whole class Cotton is prominent among "Fibres," 20,365 acres having been irrigated out of a total under this head of 22,082 acres. Indigo is the most prominent among "Dyes," the area being 119,617 acres out of a total of 120,149. The spread of this crop is remarkable, especially in the Allygurh District, and is no doubt due to the security which the canals afford. As it is sown almost entirely during March and April, irrigation can rarely be dispensed with. By far the greatest breadth put down is in the Allygurh District.

10. The following table gives the number of acres irrigated, for the six principal crops during the past five years :—

Year.	Sugar.	Rice.	Indigo.	Cotton.	Wheat.	Barley.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres
1867-68	87,050	97,867	77,976	8,265	339,657	92,252
1868-69	97,555	111,019	76,687	52,992	597,036	257,509
1869-70	104,596	117,548	130,248	55,883	388,533	183,601
1870-71	112,141	96,479	118,897	35,070	461,538	134,220
1871-72	94,810	58,935	119,617	20,365	366,851	99,436

11. This table is chiefly remarkable for the decline in the rice and cotton area and the steady increase of indigo. The decline of rice is rather a matter for congratulation, as it consumes a great deal of water, and there is in many places an excess of moisture in the lands bordering upon the canals in the North Western Provinces. There will probably be a still greater reduction in the area of this crop next year in consequence of the enhanced water-rates just notified by the North Western Provinces Government. The breadth of wheat and barley will, of course, vary from year to year with the seasons.

12. The proportion which the autumn crops bear to the spring crops is shown below—

Year.	Autumn area.	Spring crop.	Proportion of autumn to spring.	
			Percentage autumn.	Percentage spring.
	Acres.	Acres.		
1867-68	289,910	471,570	29·97	72·03
1868-69	484,485	957,413	33·60	66·40
1869-70	501,625	588,048	46·03	53·97
1870-71	396,399	654,049	37·72	62·28
1871-72	333,120	519,374	39·74	60·26

13. There is, therefore, a steady rise in the comparative area of the autumn crops, which is this year chiefly due to the great increase in the breadth of Indigo.

14. The following table exhibits the gross and net revenue realized from the different canals *in operation* :—

Name of Canal.	Gross income.	Working expenses.	Net profit.	Loss.
	Rs.	Rs.	Rs.	Rs.
Ganges Canal	15,79,040	9,16,699	6,62,341	...
Eastern Jumna Canal	5,27,825	1,99,008	3,28,816	...
Dhoon Canals	43,854	26,358	17,496	...
Rohilkhund Canals	19,199	78,650	...	59,450
Bijnour Canals	3,677	1,965	1,712	...
Agra Irrigation Works	...	512	...	512
Bundelkhund Irrigation Works	2,138	5,204	...	3,066
Totals ...	21,75,733	12,28,396	10,10,365	63,028
Total, net ...	...	...	9,47,337	...

15. It is to be observed that while the gross revenue has decreased from Rs. 25,51,169 in the previous year to Rs. 21,75,733 in the year under review, the working expenses have increased from Rs. 11,66,423 to Rs. 12,28,396, this has reduced the percentage of net profits from 5·10 per cent. last year to 3·47 this, and the aggregate of the *net* profits from Rs. 13,84,746 to Rs. 9,47,337, a falling off of no less than Rs. 4,37,409; whereas the falling off in the *gross* revenue is only Rs. 3,75,435.

Year.	Maintenance, repairs and plantations.	Share of Direction and Executive Establishments.	Total working expenses.
	Rs.	Rs.	Rs.
1862-63	4,03,708	3,53,572	7,57,280
1863-64	3,67,172	3,32,819	7,08,991
1864-65	5,27,047	4,63,933	9,90,980
1865-66	4,35,874	5,05,271	9,41,145
1866-67	5,05,065	4,35,996	9,41,061
1867-68	5,17,481	5,14,405	10,31,886
1868-69	4,59,865	5,61,952	10,21,737
1869-70	5,50,301	6,52,456	12,02,757
1870-71	4,23,480	7,43,243	11,66,423
1871-72	4,61,676	7,66,720	12,28,396

16. It will be observed from the foregoing table that, whereas, the cost of Maintenance and Repair charges have remained pretty constant for the last 10 years, having varied only between 3¾ and 5¼ lakhs, the cost of Direction and of Executive Establishments has more than doubled itself within that period, having risen from 3½ lakhs in 1862-63 to more than 7½ lakhs in 1871-72. This is, no doubt, partly due as regards direction charges to the restriction of capital expenditure, pending the commencement of work on the Lower Ganges Canal; and possibly also, as urged by the Local Government, to an inequality in the rules by which the shares of establishment is apportioned between Capital and Revenue. But the revenue has during the same time increased from Rs. 8,15,693 to Rs. 21,75,733, or 2½ times; there is not much difference, therefore, between the rates of progress of receipts and expenditure. This matter requires most vigilant attention. After eliminating the share of this result due to the causes above mentioned, every item of the Establishment charges should be carefully scrutinised and separately reported on. Unless carefully watched, it is quite possible that these charges may absorb the growth of profits expected from the works.

17. The canals* in progress and not earning revenue, are not included in the above statement.

* The principal are the—
Lower Ganges Canal.
Eastern " "
Agra Canal.

18. There is an error in Table II of the Resolution, the decrease in the gross khurreef revenue should be Rs. 1,64,451, and not Rs. 74,346 as there shown.

19. The gross earnings of the Ganges Canal for each cubic foot of supply entering the canal at its head amounted to Rs. 340 as shown in Table N of Superintending Engineer's Report, and para. 22 of Chief Engineer's, of which Rs. 159 was earned during the khurreef, and Rs. 181 during the rubbee. In the Tabular Statement to be found at para. 5 of Chief Engineer's Report, it is however given as Rs. 376. On the Eastern Jumna Canal, the figures were—

Khurreef, Rs. 259 } total Rs. 531,
Rubbee " 272 }

as per Table N attached to Superintending Engineer's Report. The Chief Engineer, however, in Table D, para. 5 of his Report, enters it as Rs. 537, while at para. 22 it is given as Rs. 507. These discrepancies should be cleared up. The figures for the previous year were Rs. 411 on the Ganges, and Rs. 571 on the Eastern Jumna Canal.

20. If the gross earnings be calculated on the supply of water *utilized*, the value of the cubic foot per second is raised from Rs. 340 to Rs. 442 in the case of the Ganges Canal, and from Rs. 531 to Rs. 541 in the case of the Eastern Jumna Canal,

if the Superintending Engineer's table be taken, or from Rs. 507 to Rs. 541 if the Chief Engineer's. Considerable ultimate improvement in the earnings of the Ganges Canal may be reasonably expected as it should work up to the older established Eastern Jumna Canal.

21. The discrepancies noticed in the foregoing paras. are apparently due to the different data assumed in the calculations—sometimes the gross revenue, and sometimes only the revenue from water-rent, is taken; sometimes the supply entering the head of the Canal, and sometimes only the supply utilized. This is confusing unless properly explained, and it will be better in future to tabulate separately the results obtained from the different data employed.

22. The duty performed by each cubic foot of water entering at the head was 145 acres in the case of the Ganges, and 196 acres in the case of the Eastern Jumna Canal. If, however, deductions are made on account of unutilized supply, the duty rises to 188 and 205½ acres, respectively. This again shows that the Ganges Canal must still make considerable progress before it attains to the standard of the Eastern Jumna Canal. The mode of comparison of the working of canals by "duty" done is for some purposes a fairer one than that of "earnings" per cubic foot of supply. The value of the "earnings" must vary according to the rates of water-rent, which are different in different localities, but the "duty" performed by each cubic foot of water is independent of prices.

23. It is to be observed that, though there has been a decrease both in area of irrigation and in gross revenue realized, yet that the rent per *acre irrigated* is higher on both the Ganges and Eastern Jumna Canals than in any year previous up to 1868-69, the latest for which the returns are given. This seems to show that the more valuable staples are displacing the ordinary crops. It is probable that the limit of such displacement has not yet been reached.

24. The proportion of "flow" to "lift" is progressing steadily from year to year. The table given at page 13 of the Chief Engineer's Report shows that the rise in "flow" has been from 68 per cent. in 1867-68 to 76 per cent. in 1871-72, while the fall in "lift" has been from 32 to 24 per cent. in the same years. In no one year since 1867-68 has there been any retrogression in this respect. This seems to be a necessary consequence of the gradually increasing proportion of wet to dry season irrigation, as shown in para. 12.

25. The indirect revenue (augmentation of the land revenue due to the canals) earned by the different canals is tabulated according to districts in para. 4 of the North Western Provinces Resolution, and amounts to Rs. 4,27,836 in all; the aggregate sum for which credit was taken last year amounted to Rs. 4,39,988, but it was explained at the time that the figures were not entirely accurate. The difference may be accepted as due to corrected statements.

26. It is to be remarked that out of the 16 districts in which canals are in operation, in two only are the calculations of "indirect" revenue reported as complete. In eight districts the returns are still imperfect, and in no less than six districts (rather more than one-third of the whole) no credit whatever is taken under this head; a considerable increase in amount may therefore be looked for as the settlements proceed.

27. The addition of the indirect returns raises the net profits on the capital invested in all the canals in operation in the North Western Provinces to 5·02 per cent.

28. The remarks of the Chief Engineer at para. 62 of his Report on this source of revenue are interesting. It is worthy of remark that the proportion credited to the Ganges and Eastern Jumna Canals varies very much in the different districts; thus in Zillah Saharunpoor the assessment is 12·29 annas per acre irrigated for the Ganges Canal, and 15·5 annas for the Eastern Jumna Canal, this is as 8 : 10. In Mozuffernuggur the rate is as 6 : 10; in Meerut as 9 : 10. These discrepancies seem to show that the value of land within the influence of irrigation does not rise, as might have been imagined, suddenly, but the rise is apparently the slow growth of years.

29. The average assessment assumed for all canals amounts to 10·09 annas per acre irrigated. The limit, judging from the oldest canal, the Eastern Jumna, would seem to be about one rupee per acre.

30. The net returns of the Ganges Canal are 2·74 per cent. on capital expended; this is excluding increase of land revenue, and debiting the

canal with interest at 5 and 4½ per cent. Retaining the high debit of interest, and crediting the increase of land revenue, the net return on the Ganges Canal is 3·69 per cent.; on the Eastern Jumna, in spite of the decrease in irrigated area and revenue, the amount is no less than 16·66 per cent.

31. A report is promised by the Local Government as soon as "all replies to references have been received," regarding the practical abandonment of the contract system on the Eastern Jumna Canal, which was commented on last year. This will be awaited, but the Governor General in Council takes this opportunity of remarking that he agrees with His Honour the Lieutenant Governor in condemning the Superintending Engineer's proposal to introduce a system of forced contracts.

32. The Governor General in Council observes with much satisfaction the reduced amount paid away during the year under review as compensation on account of damage done by breaches of rajbuha banks, which speaks well for the improvements in the distributaries, and for the Canal Subordinate Establishment.

33. From Table O at para. 46 of the Chief Engineer's Report, it is seen that the water-rent collections on the Dhoon Canals have fallen short of the amount realized in the previous year by Rs. 4,247, yet this loss has been more than covered by the increase of Rs. 4,733 obtained from the sale of water-power; this item has been increasing steadily for some years on these canals, and they have now almost equalled in amount the sums obtained from water-rent, hitherto the chief source of income. This is a highly successful feature in the operations of these small canals, and it is observed that the Executive Engineer considers that the increase in the mill rents is likely to be maintained.

34. The alteration in the water-rates for the Dhoon Canals is reported to have caused a loss of Rs. 1,530, which seems to have been chiefly attributable to the late date at which the new rates were published.

35. The aggregate charge for interest from the commencement including all the canals in the North Western Provinces to the close of 1871-72 is shown to be Rs. 2,24,93,460, of which Rs. 1,10,23,910 has been paid off, this leaves Rs. 1,14,69,550 as the balance still to be paid; if, however, the indirect revenue of Rs. 27,77,623 be considered, then the balance is reduced to Rs. 86,91,927 f(*all* canals; for those *in operation* it would amount in such case to only Rs. 83,57,692.

36. The balance above given of Rs. 1,14,69,550, exclusive of indirect revenue, exhibits an increase over the year previous of Rs. 24,39,849; this includes the interest chargeable on works not in operation and therefore not earning revenue; but an examination of Statement No. III of the Appendix shows that on all the canals which *are* earning revenue, except the Eastern Jumna, there is a deficit, if the interest charges are taken into account, thus—

	Rs.
Ganges Canal	4,31,046
Dhoon Canals	7,298
Agra Irrigation Works	10,434
Bundelkhund Irrigation Works	6,195
Rohilkhund Canals	82,956
Bijnour Canals	1,436
Total ...	5,39,365

37. The Eastern Jumna Canal earned, however, a clear profit of Rs. 2,39,665, so that the net *deficit* for the year on all canals *in operation* is reduced to just 3 lakhs. But taking into account the increase of land revenue Rs. 4,27,836, there is a surplus of 1¼ lakhs.

38. This result is unfavorable, and the hope expressed in last year's Resolution, para. 22, that "the balance of interest should be cleared off in ten years," is not likely to be realized, unless the growth of revenue accelerates.

39. Several administrative improvements are recorded in Section VII of the Chief Engineer's Report, the most important is perhaps that mentioned in para. 73, by which Government undertakes the construction and repair of irrigation

outlets, which have hitherto been paid for by the people. This is merely following up the principle on which the construction of the chief minor distributaries was undertaken by Government some years ago.

40. The table given at para. 15 of the Superintending Engineer's Report (1st Circle) shows that there has been a satisfactory decrease of remissions of water-rate on the Ganges Canal.

41. Paragraph 18 of the Superintending Engineer's Report (2nd Circle) gives some interesting information with reference to appeals against irrigation assessments; out of a total of 228 appeals, no less than 217 were preferred before Canal, and only 11 before Revenue, Officers. As it is optional with the cultivator to prefer his complaints before either Courts, it is indicative of general satisfaction with the decisions of Canal Officers.

42. At page 19, para. 47, the Chief Engineer states that the charges against "Revenue" on the Dhoon Canals amounted to Rs. 26,358; the Superintending Engineer, however, at page 5 B, para. 26, puts it at Rs. 20,914; the difference of Rs. 5,444 should be explained.

43. Table F of Appendix shows that the outstandings of revenue collections amounted to only 0·73 per cent. of the total demand, which aggregated upwards of 19½ lakhs; this result is not so good as last year, when the arrears amounted to only 0·49 per cent., but is nevertheless satisfactory. The actual amount of the outstandings was Rs. 14,386 for 1871-72, and only Rs. 281 for previous years.

44. The cost of collection is very high in some districts, but it is observed that the subject has attracted the attention of His Honour the Lieutenant Governor, and it will no doubt be fully enquired into; it varied from 9·53 per cent. (the highest) in the Furruckabad District, to 0·81 per cent. (the lowest) in the Meerut District.

Navigation.

45. The following table exhibits the revenue from this source for the past three years:—

Year.	Revenue.	Increase.	Decrease.
	Rs.	Rs.	Rs.
1869-70	33,796	...	...
1870-71	32,861	...	935
1871-72	58,929	26,068	...

There is a difference in the amount of navigation dues shown at pages 2 and 11 of Chief Engineer's Report, being Rs. 78,267 at the former, and Rs. 58,929 at the latter; this is apparently due to a clerical error. It is the smaller sum which agrees with the figures shown by the Superintending Engineer and Traffic Manager in their respective reports, and which has therefore been adopted above. The figures given by Superintending Engineer for 1870-71 are Rs. 33,919, but in both the tables before mentioned the navigation dues are shown as Rs. 32,861; this discrepancy should be cleared up.

46. The following are the particulars of the navigation revenue:—

	Rs.
Tolls from private boats	11,620
„ from divisional boats	824
„ on rafts	25,388
Carrying operations for Government Officers	15,181
„ „ for private parties	2,164
Profits on sleeper contract	3,764
Sundry receipts	370
Total ...	59,311

of which sum Rs. 37,832 was realized as above for "tolls," and Rs. 21,479 for "carrying operations." The working expenses amounted to Rs. 46,221, so that the nett profit amounted to Rs. 13,090.

47. The increase of gross profits compared with the previous year is Rs. 25,010. The Superintending Engineer does not seem to think that this comparatively high rate of return will be maintained, as so much of it is due to Government work, but this is not likely to lessen for many years to come, if at all. The falling off in the receipts from private traffic is unsatisfactory, but, as the hindrances to navigation are removed year by year, it is to be hoped it will spring up again. Estimates have been sanctioned for the construction of landing stages at Cawnpoor; a wharf wall has also been sanctioned at Nanoon, in the Allygurh District, one of the largest traffic centres on the canal. The Jaoli Lock is being re-built; the velocity of the current of the canal is being reduced by the interpolation of locks; the head-way of the bridges in the Cawnpoor Branch is being raised, and other improvements are in contemplation, one of which is the introduction of a new kind of traffic boat.

48. The cost of establishment is shown at para. 8 of the Traffic Manager to be Rs. 5,610, but, in the abstract attached to his Report, the figures given are Rs. 6,115, a difference of nearly Rs. 500, which is not apparently accounted for.

Plantations.

49. The whole of the Eastern Jumna and Agra Canals were inspected by Dr. Jameson during 1871-72, as also the Northern and Futtehgurh Divisions of the Ganges Canal. The advantage of placing the Canal plantations under an officer specially qualified for the duty is abundantly manifested in the reports received.

50. The total increase in the number of trees and seedlings since last year amounts to 366,649, in that year there was an increase of 353,057 over the year before, or upwards of 600,000 in the two years.

51. The profits from Canal plantations are shown in the Appendix to the Report to amount to Rs. 20,655, an increase over last year of Rs. 5,540.

52. The necessity for carefully fencing off the trees and seedlings to prevent injury from cattle is dwelt upon by Dr. Jameson, and, at his suggestion, it has been decided to appropriate one-third of the budget allotment annually to this purpose for some time to come. The decision seems to be a judicious one.

53. The only point in these reports calling for remark is the objection of Dr. Jameson, page 9, that the young trees on the Agra Canal are being planted out "too far apart to be of any use to the canals, *viz.*, 20 feet." He adds "that such kind of planting will, through time, afford some shade is true, but, owing to the young trees having no support or shelter, they die in large numbers, or become mis-shapen," and he accordingly recommends that they should be planted out "5 feet apart," because, "by so doing, the young plants give support and shelter to each other, and draw each other up, and thus form good boles." On this it is remarked by the Lieutenant Governor, that "His Honour has recently decided this question on a separate reference, the limited allotments available necessitating the planting out at considerable intervals."

54. But possibly the object of the Inspector General of Plantations could be fulfilled without exceeding the allotments by reducing the number of miles to be planted out in any one year. Financially it will be better to have one mile planted with good trees that will be of value hereafter, than to have 4 miles planted with trees of reduced value; and desirable as it is to obtain shade all along the canal as soon as possible, it should not be forgotten that Government expect income to be derived from this expenditure.

55. The Revenue Report and Tables attached to it have been most carefully compiled, and the mass of information furnished is very great; the only thing wanting is some calculation to show the value of the produce raised by the canals. This information used to be given in the older Reports, but it has been omitted for some years past, it is not known for what reason, as no orders have been issued by the Government of India for its discontinuance.

56. The Governor General in Council considers that the results attained are creditable to the Officers of the Irrigation Department, North Western Provinces.

ORDER.—Ordered, that a copy of the Report and of this Review be forwarded to the Secretary of State for information.

Also, that copies be forwarded to the Financial Department and to the Department of Agriculture, Revenue, and Commerce for information.

Also, that the Review be communicated to the several Governments and Administrations in the Public Works Department, Irrigation Branch, for information.

And further, that the Review be forwarded to the Home Department for publication in the *Gazette of India.*

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP 67.

The Council met at Government House on Tuesday, the 18th February 1873.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
The Hon'ble Sir Richard Temple, K. C. S. I.
The Hon'ble B. H. Ellis.
Major General the Hon'ble H. W. Norman, C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble F. S. Chapman.
The Hon'ble R. Stewart.
The Hon'ble J. R. Bullen Smith.
The Hon'ble R. E. Egerton.
His Highness the Mahárájá of Vizianagram, K. C. S. I.

The Hon'ble R. A. Dalyell.
The Hon'ble Rájá Ramánáth Thákur.

NORTH-WESTERN PROVINCES AND OUDH MUNICIPAL BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill to provide for the appointment of Municipal Committees in the North-Western Provinces and Oudh. He had a very few observations to make. Oudh stood thus in respect to Municipal Committees. By an Act (XV of 1867) which was passed to establish Municipal Committees in the Panjáb, it was provided that the arrangements then made for the Panjáb might be extended by the Government of India to any town in Oudh. The term for which the Act, when extended, was to run was five years from the date of extension. In the Panjáb, the Act was to run for five years from the date of the Act, but in Oudh the date of extension was to be the commencement of the term of five years. Several orders had been made extending the Act to various towns in Oudh, and the terms of extension were now in the course of running out. Now the Council would remember the manner in which they had dealt with the Panjáb. The Act was further extended for one year; a term which would expire on the first of March next. So we had taken the Panjáb Act, made some alterations in it, and perpetuated it, but for the Panjáb alone. Now the Government of Oudh found that, in so far as the municipal law of the North-Western Provinces differed

from the municipal law of the Panjáb, the law of the North-Western Provinces was more suitable to the circumstances of Oudh. Of course the geographical connection of Oudh with the North-Western Provinces was much closer than that with the Panjáb; and it seemed that the political and social condition of the country also resembled that of the North-Western Provinces more than it resembled the Panjáb. And the Oudh Government therefore thought that their municipal law had better be assimilated to that of the North-Western Provinces. It would be observed that the notice of motion included the North-Western Provinces as well as Oudh. In the North-Western Provinces, their Act (No. VI of 1868) had worked, he believed, in a very satisfactory manner. But it had been at work for some five years, and as was always the case when a new Act was brought into actual operation, experience had shown some small matters in which alteration or amendment was required. The opportunity would be taken to pass a single Act for the two Provinces. He need not say any thing more of the contents of the Bill than that it would be the same as the law which existed in the North-Western Provinces, with one or two small alterations suitable for those Provinces and for Oudh also.

The Motion was put and agreed to.

CENTRAL PROVINCES MUNICIPAL BILL.

The Hon'ble MR. HOBHOUSE also moved for leave to introduce a Bill to provide for the appointment of Municipal Committees in the Central Provinces. He said that the Central Provinces bore precisely the same relation to the Panjáb in point of municipal law as Oudh did, and several orders had been passed under the Panjáb Municipal Act for the purpose of extending that Act to places in the Central Provinces, and therefore there were municipal institutions in many places to which the Act was thus extended for five years, and which were now in the course of running out. The Government of the Central Provinces found that the Panjáb municipal law was suited to the state of the Central Provinces. It had been at work there for different periods of time in different places, and the Government found that it worked in a satisfactory way. They had therefore come to the conclusion that it would be best to apply the new Panjáb Municipal Act to the Central Provinces, and that would be the nature of the Bill for which he now moved for leave to introduce.

The Motion was put and agreed to.

BURMA PAPER CURRENCY BILL.

The Hon'ble SIR RICHARD TEMPLE asked the permission of His Excellency the President to postpone the motion for leave to introduce a Bill to amend the law relating to Paper Currency in British Burma. Since the motion had been placed on the paper, a doubt had suggested itself to him on an important point, and he therefore must ask for further time before bringing in the Bill.

Leave was granted.

BILLS OF LADING BILL.

The Hon'ble SIR RICHARD TEMPLE regretted that he must also ask leave to postpone the introduction of the Bill to authorize the use of adhesive stamps for Bills of Lading. In the speech he had intended to make in support of this Bill, it would have been his duty to reply to the remarks made on the Bill by His Honour the Lieutenant Governor. But as he saw that His Honour was not in his place, and was not expected to be in his place that day, he believed it would be hardly suitable to reply in His Honour's absence. Therefore he must forego the satisfaction he had anticipated; and as there was no special urgency, he believed His Lordship and the Council would willingly permit him to postpone the motion.

Leave was granted.

NORTH-WESTERN PROVINCES RENT BILL.

The Hon'ble MR. INGLIS introduced the Bill to consolidate and amend the law relating to Rent in the North-Western Provinces, and moved that it be referred to a Select Committee with instructions to report in a month. He said that this Bill consolidated the law relating to rent in the North-Western Provinces, now contained in Acts X of 1859, XIV of 1863 and XXII of 1872, and amended some of the provisions of Act X of 1859 which experience had shown were unsuited to that part of India. The amendments proposed related to the classification of tenants having a right of occupancy; to the rules for the determination of the rent payable by them; to the resumption by the proprietor of an estate of rent-free grants made by himself or his predecessors; to the payment of compensation to a tenant, who might be ejected from his holding, for the value of any improvement made by him; and to the jurisdiction of the Courts established under the Act.

MR. INGLIS had already explained fully, in connection with the Revenue Bill now before the Council, the reasons which had led the Government of the North-Western Provinces to advocate the recognition of ex-proprietary cultivators as a separate class of occupancy-tenants, and need not repeal them now; but it might be as well to state more clearly than he did on that occasion, that there was no intention whatever of proposing that a tenant should be allowed to claim any abatement of the rent previously paid by him, on the ground that he had been classed as a privileged tenant. All that was proposed was, that those ex-proprietary cultivators who, in accordance with the ancient custom and feeling of the country, still held at a rent somewhat lower than the prevailing rent, should be saved from the enhancement they were now liable to, in consequence of the mistake made in Act X of 1859, of including all tenants with a right of occupancy in one class, thus making no distinction between the tenant who had a right of occupancy based on ancient custom, and the tenant who had acquired a right of occupancy by mere lapse of time under section 6 of Act X. Sections 7, 18 and 19 of the Bill he had now to introduce related to this class of ex-proprietary tenants, and were the same as section 75 of the Revenue Bill which was now under consideration.

The next section MR. INGLIS had to notice, was section 20, which related to the determination of the rent payable by tenants who had acquired a right of occupancy by prescription. This section differed somewhat from section 17 of Act X of 1859. Under that section, the rent payable by a tenant of this class might be enhanced, if it were below the prevailing rate of rent paid by tenants of the same class for similar land with similar advantages in places adjacent; or, if the value of the produce, or the productive powers of the land had been increased otherwise than by the agency, or at the expense, of the tenant.

MR. INGLIS believed that very few suits for enhancement, if any, had been brought in the North-West on the second ground, namely, that the value of the produce or the productive powers of the land had been increased otherwise than at the expense of the tenant, at all events there were no rulings of the High Court on this clause of the section. But in Bengal, considerable discussion, with no very satisfactory result, had taken place as to the manner in which the principle laid down in this clause should be applied; it was, in fact, a rule which it was utterly impossible for the Courts to work. It was proposed to omit this clause and to make the rent paid by tenants of the same class for similar land the standard in all future cases. This standard would be kept up to the fair value of the land by the constant acquisition of occupancy rights by tenants at will, under the twelve years rule. In order to set at rest the questions that had been raised as to the meaning to be attached to the word "class," it was proposed to lay down distinctly that it did not include caste, unless it could be proved that, by local custom, caste was taken into account in the determination of rent. For the same reason, instead of requiring that the land for comparison should be taken from "places adjacent"—words which had caused so much difficulty—it was provided that, when the settlement officer should have

formed the villages of a district into circles for the purpose of assessment, the land for comparison should be selected from similar villages, with similar advantages, in such circle; and that, in the absence of any such guide, the standard villages should be selected from the same tahsíl or from some tahsíl immediately adjacent.

In consequence of no term being laid down in Act X of 1859 for the duration of rents fixed under its provisions, tenants were now subjected to yearly suits for enhancement, and much hardship and injustice had been thereby caused. It was therefore proposed that the rent of a tenant having a right of occupancy, having been once fixed by a competent Court, should not be liable to further enhancement for a period of ten years from the date of the decree, unless the productive powers of the land in the tenant's holding had been increased otherwise than at his expense, or unless the area of his holding had been added to. In such cases the rent paid for similar land, with similar advantages, might be applied.

Section 36 related to rent-free grants made by proprietors of land to their dependents or others. Regulations XIX of 1793, XLI of 1795, XXXI of 1803, and VIII and XII of 1805, declared all such grants illegal and invalid, and empowered any proprietor of an estate to resume them of his own authority, to dispossess the grantee, and to collect the rent himself. Section 28 of Act X of 1859 repealed so much of those Regulations as enabled the proprietor of an estate to resume these grants of his own authority, and made it necessary for him to apply to the Collector of the District, leaving untouched the sections which declared all such grants to be illegal and invalid. The clause at the latter part of the section, however, which laid down that every such suit should be instituted within the period of twelve years from the time when the title of the person claiming to assess the land or dispossess the grantee, or of some person claiming under him, first accrued, had the effect of making all grants of this nature permanent rent-free holdings, not even responsible for the payment of revenue, except in case of a sale for arrears, should the proprietor from neglect or ignorance fail to sue within the time allowed. This result was altogether opposed to the custom of the country. These grants were constantly made by the proprietors of estates to Bráhmans, servants, retainers and others, on the full understanding that they were resumable at the will of the donor, or that some service or duty in return was to be performed. It would seem, indeed, from the fact that the provisions of the Regulations Mr. Inglis had just now named, which declared all such grants illegal and invalid, and therefore liable to resumption at any time, had been left unrepealed when Act X of 1859 was passed, that the limitation-clause added to the concluding part of section 28 of that Act had had an effect not intended. It was proposed to modify the provisions of this section so as to bring them more into accordance with the general custom of the country, as in section 36 of the Bill he now introduced, which, while securing the rent-free holding to the tenant for the term of the settlement, if he held under a written grant, or in perpetuity if he had held for fifty years, including two successions, gave to the proprietor in all other cases, at each fresh succession to the property, power to resume, within twelve years, lands granted rent-free by his predecessors; but maintained in all cases the liability of the land to the payment of land-revenue.

Sections 37 to 40 provided for the payment of compensation to a tenant, who might be ejected from his holding, for the value of any improvement made by him. Under the law at present in force, a tenant who might have received an advance of two or three hundred rupees from Government under the Land Improvement Act, and sunk a *pakka* well in his holding, was liable, should he fall into arrear with his rent, to be ejected without receiving anything for the improvement he had made on the land. It was proposed that, in future, the tenant should be entitled to receive from the landlord compensation calculated on the present value of the improvement, and that the Collector should have power to refer disputed cases to arbitration.

Sections 102, 103 and 104, in chapter 5, laid down the powers of the Courts constituted under the Act. At present, an officer invested with powers

under Act X of 1859, and placed in charge of a sub-division, had power to try and determine suits of all and every kind under the Act. It had, for the last ten or twelve years, been the practice in the North-West to place an officer, when first invested with power, in charge of a tahsílí, restricting him to the trial of the simpler classes of cases. It was proposed to legalize this practice. Accordingly, all suits coming under the Act had been divided into three classes. The first class would be tried by officers of the second grade under the Act. The second class, in which were included the more difficult cases, would be heard by officers of the first grade; while the most important and difficult suits, namely, those relating to the enhancement and determination of rent, would be triable only by officers specially empowered by the Local Government to entertain them.

The other chapters of this Bill, 3, 6 and 7, relating to distraint, procedure and execution of decrees, re-enacted the provisions of Acts X of 1859 and XIV of 1863, and therefore needed no comment.

The Hon'ble RÁJÁ RAMÁNÁTH THÁKUR said it was true that Act X of 1859 had not worked satisfactorily in the North-Western Provinces, because the circumstances and the position of those Provinces were quite different from those of Bengal, and therefore an alteration in the law was necessary. The Bill, no doubt, was substantially the same as Act X of 1859, but there were several new provisions which ought to be taken into consideration by the Select Committée, such, for instance, as the provision in section 7, which gave too much indulgence to ex-proprietors, whilst it gave very little consideration to the rights of the present proprietors. One might suppose that there was something repugnant to sound principle in that provision; but he should think that when the hon'ble Mover of the Bill had introduced that provision, there must be some good reason for doing so. He had no doubt the subject would be carefully discussed in Committee, and if there was anything wrong in that provision of the nature he had described, it would, he hoped, be remedied. Then, again, by section 8, clause 2 a tenant holding under an ex-proprietor, who is called in the Bill a privileged tenant, would not acquire a right of occupancy. This provision, he was of opinion, should also be considered by the Committee, for if the law was that an ordinary tenant or tenant-at-will acquired an occupancy right after twelve years' possession at the same rate of rent, he did not see why the same right should be denied to him under an ex-proprietor. He had thought it proper to bring these important points to the notice of the Council, because he had no doubt that the gentlemen who would be appointed on the Committee would take them into consideration.

His Highness THE MAHÁRÁJÁ OF VIZIANAGRAM wished to say a few words in regard to this Bill, though perhaps it was premature to say anything on the subject, as the matter would be amply discussed, and justice done to the various provisions of importance in this Bill, which was brought in at the instance of the Government of the North-Western Provinces. It struck THE MAHÁRÁJÁ that this Bill, and the other Bill relating to land-revenue which had been recently introduced, were very nearly related to each other; and although the settlement of the Lower Provinces of Bengal was permanent, and it was not so in the North-Western Provinces, still one of the most important points in the Bill was the distinction between an occupancy tenant and a privileged tenant. But, as he had said before, these important matters would be carefully considered in Select Committee. He thought that the improvements which had been suggested in the Bill (although he had not had time to go carefully through it, but had only taken a cursory view of it), were of a most beneficial character, and well worth the attention of the Council. In expressing these views he entirely concurred with his hon'ble friend Mr. Inglis in all that he had said with regard to the several provisions of the Bill.

The Motion was put and agreed to.

The Hon'ble MR. INGLIS moved that the Bill and Statement of Objects and Reasons be published in English and Hindústání in the Gazette of the North-Western Provinces.

The Motion was put and agreed to.

The Hon'ble MR. INGLIS also moved that the Bill be referred to the same Select Committee as that which was sitting on the Bill to consolidate and amend the law relating to land-revenue in the North-Western Provinces of Bengal.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE moved that the Hon'ble Rájá Ramánáth Thákur be added to the Select Committee on the Bill to consolidate and amend the law relating to land-revenue in the North-Western Provinces of Bengal and to that on the Bill to consolidate and amend the law relating to Rent in the same Provinces.

The Motion was put and agreed to.

The Council then adjourned to Tuesday, the 25th February 1873.

FORESTS.

The 28th February 1873.

No. 385.—Mr. G. W. Strettell, Deputy Conservator of Forests in British Burma, having returned from leave and rejoined his appointment on the 18th January 1873, the following Officers officiating in higher grades will revert to their substantive appointments from that date :—

Mr. J. Adamson, to his appointment of Assistant Conservator of Forests of the 1st Grade in British Burma.

Mr. E. A. Down, to his appointment of Sub-Assistant Conservator of Forests in the North-Western Provinces.

GENERAL.

The 28th February 1873.

No. 194.—Mr. A. O. Hume, C. B., Secretary to the Government of India in the Department of Agriculture, Revenue, and Commerce, is allowed privilege leave of absence for one month from the 1st March 1873.

Mr. J. Geoghegan, Under Secretary in the Department of Agriculture, Revenue, and Commerce, will officiate as Secretary to the Government of India in the same Department during Mr. Hume's absence, or until further orders.

A. O. HUME,
Secy. to the Govt. of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

REVENUE.

Fort William, the 25th February 1873.

No. 35 *R.*—The following Regulation for the conservancy of trees and forest lands in Hazara is published for information :—

Preamble.

Whereas by the Forest Rules sanctioned by the Government of India on the 21st May 1855, and by the supplementary rules for Hazara sanctioned by the Chief Commissioner of the Punjab on the 19th January 1857, Government assumed to itself the right to conserve all trees and forest lands in the said district.

And whereas, consequent on the increased demand for timber and fuel, it is necessary to make better arrangements for the said conservancy, and to define more exactly the matters in which that conservancy consists, the following Regulation for the conservancy of trees and forest lands in the Hazara district, having been proposed by the Lieutenant-Governor of the Punjab, and having been taken into consideration and approved by the Governor-General of India in Council, and having received the Governor-General's assent, is now published with reference to 33 Vic., cap. 3, sec. 1.

PRELIMINARY.

Definitions. Forest land.

1. In this Regulation *forests or forest land* includes all uncultivated hill land, except public ways, grave-yards, sacred places, banks and corners of fields, habited sites, and the land immediately attached to such sites.

Uncultivated.

No land shall be considered "uncultivated" within the meaning of the preceding clause which may be entered as "*cultivated*" or "*fallow*" in the faired records of the settlement now being made.

Zemindars.

The word *Zemindars* means persons who have a prescriptive right to the user of forest land; but this Regulation shall in no case be construed so as to give any person a greater right of user than he possesses independently of this Regulation.

Hazara.

This Regulation shall not apply to the hereditary territory of the Nawab of Umb.

So much of the Regulation published in Notification No. 31 P., dated 5th January 1872, as relates to the conservancy of trees and forest lands in Hazara, is hereby repealed.

DIVISION OF THE FOREST LANDS INTO RESERVED AND UNRESERVED TRACTS.

Reserved and unreserved tracts defined.

2. At the present settlement, the forest land shall be divided by the Settlement Officer into reserved and unreserved tracts. The reserved tracts shall include all valuable forests and all forest land, the close conservancy of which is called for in the public interests, and can be effected without unduly restricting the necessary usances of the agricultural population. All forest land not included in the reserved tracts is referred to in this Regulation as the unreserved tracts.

Exceptional provisions in reserved tracts.

3. If in any case it may be found impossible to carry out this division without excluding from the "*reserved*" tract a valuable and important forest, the Settlement Officer may reserve the forest, subject to such exceptions from the sections of this Regulation applicable to the reserved tracts as may be necessary to secure to the zemindars the due supply of their domestic, agricultural, and grazing wants and other necessary usances: the said exceptions to be recorded in a settlement proceeding, and in all other respects such tracts are to be treated as "*reserved.*"

Also necessary rights of way through reserved tracts, or to drinking places therein, shall be maintained to the zemindars; but no rights of this description shall be claimable unless they are recorded in the settlement demarcation proceedings.

Boundaries of reserved tracts.

4. The limits of the reserved tracts shall be indicated by conspicuous boundaries. The boundaries to be erected by the Settlement Officer, and thereafter to be maintained by the Forest Department.

CONTROL AND MANAGEMENT.

Control.

5. Both the reserved and the unreserved tracts will be alike under the control of the Forest Department, as regards all matters of forest administration and forest revenue dealt with by this Regulation, except so far as is hereinafter otherwise expressly provided.

A.—UNRESERVED TRACTS.

Prohibited acts in unreserved tracts.

6. In these tracts the following acts are prohibited :—

Breaking up land for cultivation except after consent of Deputy Commissioner obtained as provided in section 8.

Setting fire to grass tracts, or negligently permitting fire to extend thereto.

Setting fire to brushwood, trees, or stumps of trees.

Girdling, lopping, barking, boring for turpentine, or otherwise injuring growing trees.

Removing soil or dead leaves from under trees.
Felling standing trees of the descriptions included in the seignorage list [see section 12] or burning kilns, without a valid order under section 16 or 17.
Cutting young trees under any circumstances.
Felling for fuel trees included in the seignorage list [see section 12].

Rights of the zemindars in the unreserved tracts defined.

7. The zemindars' rights in the unreserved tracts are maintained to the following extent and no further:—

(1). They shall not use the waste products for the purpose of lime, surkhi, or charcoal burning.

(2). They may within reasonable limits apply to their own uses, domestic and agricultural, any tree included in the seignorage list [section 12] with the permission previously obtained of the Deputy Commissioner or of such other officer as the Deputy Commissioner may appoint for this purpose. No seignorage fees shall be charged in respect of trees so used.

(3). Subject to the payment to the zemindars of half the seignorage fees as provided in section 13, and subject to the claims of the zemindars provided for in the preceding clause, the trees included in the seignorage list are the property of the State. And the right to sow, plant out, and reproduce trees included in the seignorage list is reserved to the State: provided that no land be fenced pursuant to this reservation, except for the purpose of protecting young trees; and such fencing shall not be maintained longer than is required for the safety of the young trees.

(4). Land shall not be brought under cultivation except as provided in section 8.

(5). Subject to the exceptions and restrictions aforesaid, the unreserved tracts are the property of the zemindars; and no forest fees shall be charged to the zemindars on account of the use and enjoyment thereof, except so far as is warranted by the foregoing reservations.

Procedure for bringing under cultivation land in the unreserved tracts.

8. If the zemindars desire to bring under cultivation any portion of the unreserved tracts, they shall first apply to the Deputy Commissioner for permission to do so. If the land mentioned in the application is covered with valuable forest trees, permission to cultivate it shall ordinarily be refused. Neither shall permission be granted, if the contemplated cultivation would on any other grounds be injurious to forest conservancy. In the absence of such objections, an order shall be passed permitting the cultivation of the land applied for, and the said land shall cease to be forest land from the date of the said order.

If the zemindars fail to bring the land under cultivation pursuant to this permission within three years from the date of the order granting it, the permission shall lapse, and the land will revert to the forests. *Bonâ fide* cultivation of trees for marketable purposes is cultivation within the meaning of this section. Notice of all permissions to cultivate, granted or revoked under this section, shall be sent to the local Forest Officer.

Unreserved tracts subject to the same provisions as the reserved tracts, with stated exceptions.

9. Saving such rights as are maintained to the zemindars by sections 7 and 8, and excepting the special prohibitions prescribed in section 10, the unreserved tracts shall be subject to the same provisions as are prescribed in this Regulation for the reserved tracts.

B.—OF RESERVED TRACTS.

Prohibited acts in reserved tracts.

10. All the prohibitions, except the first detailed in section 6 for unreserved tracts, will also apply to reserved tracts *mutatis mutandis*. In addition thereto, the following acts are prohibited in reserved tracts:—

Grazing or driving cattle or flocks.
Cutting grass or brushwood, or collecting fodder.
Collecting or selling fallen timber.
Collecting gums, resin, honey, wax, or other minor forest produce.
Carrying or kindling fire.
Carrying any implement to cut wood, except it is carried in pursuance of a permit to cut.
Cultivating land or preparing it for cultivation.
Squatting or building.

And it is to be distinctly understood that the zemindars may not exercise in the reserved tracts the rights maintained to them in unreserved tracts by section 7, except where, and so far as, special provision to that effect may be made by the Settlement Officer under section 3.

Reserved tracts to be the property of the State.

11. Subject only to the rights maintained under section 3, and to the payment to the zemindars of their share of the seignorage dues, as prescribed in section 13, the reserved tracts shall be the property of the State. And the whole of the forest income accruing from them, other than the said seignorage share due to the zemindars, shall be credited to the State as forest revenue.

FELLINGS, SEIGNORAGE, AND FOREST INCOME.

Assessment of seignorage.

12. The existing list of seignorage fees for trees felled and kilns burnt is hereby maintained, and it shall be open to revision by the local Government after the lapse of five years from the date of its promulgation. Subsequent schedules shall be similarly revised from time to time, but not oftener than once

in every five years, provided that trees may be at any time added to, or excluded from, the list.

The seignorage list may include all valuable timber trees, and the fees denoted in it shall be levied in respect of all such trees felled or kilns burnt on forest land other than fellings exempted by clause 2 of section 7.

The fees may be uniform throughout the district or vary for different tracts.

Zemindars' share of the seignorage.

13. Half of the seignorage fees levied under section 12 shall be credited to forest revenue, the other half shall be paid to the zemindars, within whose bounds the trees are felled.

In cases in which the Forest Department may fell trees or burn kilns on its own account, or in which Government may direct that its own share of the seignorage fees shall not be levied, the share due to the zemindars shall be paid notwithstanding.

The Forest Department shall from time to time remit to the Deputy Commissioner the sums due to the zemindars under this rule, specifying in each remittance the amount due to each village. And the sums thus received by the Deputy Commissioner shall be distributed by him to the zemindars entitled to receive them once a year as soon after the 1st day of January as is practicable.

To enable the Deputy Commissioner to check the correctness of the remittances made, duplicates of all felling orders and of all orders to burn kilns shall be sent to the Deputy Commissioner by the officer issuing them the same day as they are issued.

Regulation of fellings, &c.

14. The tender of the prescribed seignorage fees by any person shall not entitle him as of right to an order for felling the trees or burning the kilns covered by the fees, unless the fees be accepted by an officer competent to issue such orders. But the fellings and kiln-burnings shall be regulated by the Forest Department subject to the general instructions of the local Government.

Seignorage fees shall be paid in advance.

15. Seignorage fees shall in every case be paid in full in advance prior to the issue of any order to fell trees or burn kilns.

Felling orders and their conditions.

16. Every order to fell trees or burn kilns shall be in writing.

Such orders shall state the amount of fees paid, and the village within the bounds of which the order shall be executed. They shall not be transferable, nor may they be executed in any other village than that originally named in the order.

Such orders shall be subject to such rules as regards cancellation and refund of fees paid; as regards the selection of the timber to be felled, or the site of the kilns to be burnt; as regards the manner and time of felling the timber or of burning the kilns; and as regards the time within which the timber or the outturn of the kilns shall be removed from the forest lands, as the Conservator of Forests may from time to time prescribe with the sanction of the local Government. For any breach of such conditions the felling order or kiln order, in respect of which the breach has occurred, may be revoked by the Forest Officer who issued it, and the timber kiln and kiln-burnings, acquired pursuant to the order, which are then still within forest bounds, may be forfeited; nor shall any claim lie for the refund of the fees paid in respect of the revoked order: provided always that a printed copy of the said conditions in the Urdu language was annexed to the order at the time of its issue.

Felling orders issued to zemindars, sec. 7, clause 2.

17. Felling orders issued under clause 2 of section 7 shall not be subject to the provisions of the preceding section. But they shall be in writing, and a duplicate of each shall be sent at the time of issue to the Executive Forest Officer. Such orders shall lapse if the trees covered by them are not felled within three months from their date.

OFFENCES.

Breach of this Regulation.

18. Any person who commits, or [within the meaning of the Indian Penal Code] abets the commission of any of the acts prohibited by sections 6, 10, and 26 in the tracts respectively concerned, or who voluntarily neglects the duties imposed on him by section 21, shall, on conviction before a Magistrate, be punished with fine that may amount to Rs. 100, or to ten times the value of the forest produce injured or illicitly taken, and in default of payment with imprisonment of either description for a term not exceeding six months. In the case of a second conviction, rigorous imprisonment not exceeding six months may be awarded instead of fine: provided that no sentence of fine or imprisonment shall be awarded by any Magistrate in excess of that which he is competent to award in the exercise of the powers with which he has been invested under the Criminal Procedure Code.

Forfeiture of implements, &c.

19. The penalty contained in the preceding section may, in the discretion of the adjudicating Magistrate, be accompanied by the forfeiture of all implements, cattle, or conveyances used in the commission or furtherance of the offence adjudicated, and by the forfeiture of all wood or other forest produce obtained thereby.

Treatment of illicit cultivation.

20. When the offence found is the illicit cultivation of forest land, the forfeiture authorized in the preceding section may extend to all the produce [growing or reaped] found on the said cultivation, as well as any huts or sheds erected on the land; and the sentence may further direct that the cultivator be ousted forthwith.

Responsibilities of zemindars.

21. It shall be the duty of all zemindars to aid in the extinguishing of forest fires and in the prevention of forest offences in their vicinity.

Communities may be proceeded against.

22. In cases of serious conflagration occurring in the forest lands, or in any case in which it may appear that any community of zemindars neglects to render reasonable assistance to the Forest Officers in the prevention and prosecution of forest offences, it shall be lawful for the Deputy Commissioner to treat the zemindars in whose vicinity the conflagration has occurred, or the community so defaulting, jointly or severally, as themselves guilty of the said acts, and to sentence them to the fine prescribed in section 18, and in default of payment to imprisonment as therein laid down. Every such conviction may, in the discretion of the Deputy Commissioner, carry with it the deprivation of all forest dues at the time outstanding to the credit of the convicted zemindars under section 13.

Cattle trespasses in reserved tracts.

23. All cattle found straying or unlawfully grazing in any reserved forest may be seized by any forest official, and when so seized shall be driven forthwith to the nearest pound, to be there dealt with in the manner provided by law for cattle impounded for trespassing on cultivated land.

But where cultivation now recorded in the settlement papers closely adjoins the boundary of a reserved tract, no cattle straying from such cultivation or its neighbourhood into the adjoining reserved forest shall be seized under this section, unless the boundary line adjoining the cultivation has been efficiently fenced by the Forest Department.

And where a right of way through a reserved tract is maintained, it shall be held to protect from seizure under this section all cattle lawfully driven along the road or track indicated, even though they stray off into the forest, so long as the driver uses reasonable diligence to prevent the cattle from straying, and to drive back such as stray.

Appeals.

24. Convictions under section 22 shall be appealable to the Commissioner; all other criminal proceedings under this Regulation shall be appealable or otherwise in the manner provided in the Criminal Procedure Code.

MISCELLANEOUS.

Voluntary conservancy.

25. In any case in which not less than two-thirds of the zemindars having rights in the particular piece of land in question may so desire, it shall be lawful for the Settlement Officer or for the Deputy Commissioner, after the conclusion of the settlement operations, to set aside out of the unreserved tracts a given portion for strict conservancy, and to record such rules in connection therewith as the zemindars may desire and are not objectionable on general grounds; the arrangement to hold good for the period of settlement, or for such shorter period as not less than two-thirds of the zemindars may desire. Breaches of such rules shall be punished in the manner provided under sections 18 to 24.

Injury to trees generally prohibited.

26. The following acts are prohibited irrespective of their connection [or otherwise] with forest lands:—

Injuring or allowing cattle or flocks to injure any trees, groves, or gardens on the sides of roads in cantonments or elsewhere: provided that the said acts be not committed in exercise of a private right.

Cutting or injuring trees, which fringe or overshadow natural streams or springs.

Cutting or injuring trees, or brushwood, or gardens situate in any grave-yard, *ziárát*, or other sacred place.

Copies of maps, &c., to be made for Forest Department.

27. The Settlement Officer shall cause to be prepared for the Forest Department such vernacular copies of his maps and records as shall be necessary to enable that Department to give effect to this Regulation, without the necessity of constant reference to the settlement records; and when any subsequent alterations are made in the area of forest lands, similar documents shall be supplied to the Forest Department. The cost of preparing these records shall be paid by the Forest Department.

Date of operation of this Regulation.

28. Such provisions of this Regulation as are not already in force shall come into force from the 1st day of April 1873. As regards forest land reserved subsequently to that date, the provisions relating to reserved tracts shall have effect therein from the date of the Settlement Officer's order reserving them.

29. This Regulation shall cease to be in force on and after the 1st day of April 1874.

MILITARY.

The 25th February 1873.

No. 31*M.*—PROMOTION.—Havildar Jeyteea, in the Infantry Branch of the Erinpoora Irregular Force, to be Jemadar, with effect from the 1st of October 1872, *vice* Jemadar Kana, transferred to the Invalid Establishment.

POLITICAL.

The 27th February 1873.

No. 394*P.*—His Excellency the Viceroy and Governor General in Council is pleased to recognize the appointment of Mr. H. Reinhold as Consul for the Austro-Hungarian Empire at Calcutta.

The 28th February 1873.

No. 407*P.*—APPOINTMENT.—Mr. C. E. R. Girdlestone, Officiating Resident in Nepal, is confirmed in that appointment, with effect from the 18th instant, the date on which Lieutenant Colonel R. C. Lawrence, C. B., vacated his appointment on admission to Colonel's allowance.

GENERAL.

The 27th February 1873.

No. 509*G.*—Surgeon F. W. A. DeFabeck, in medical charge of the Jeypore Political Agency, has been granted by the Officiating Agent to the Governor General for Rajpootana privilege leave of absence for one month from the 14th February 1873.

No. 511*G*—TRANSFERS.—Colonel T. Clerk, Commissioner of the Nagar Division, to officiate as Commissioner of the Ashtagram Division, with effect from the forenoon of the 26th ultimo, the date on which he relieved Major J. A. Campbell.

The 28th February 1873.

No. 518*G.*—LEAVE.—Captain J. H. L. Greenfield, Officiating 2nd in Command, Deolee Irregular Force, has been granted thirty days' subsidiary leave from the 20th of February 1873, to enable him to proceed to Bombay, preparatory to embarking on furlough to Europe.

C. U. AITCHISON,
Secretary to the Govt. of India.

FINANCIAL DEPARTMENT.

NOTIFICATIONS.

ACCOUNTS.

Fort William, the 24th February 1873.

No. 1417.—In continuation of Notification No. 700, dated the 27th January 1873, the following Statement of Cash Balances, as reported up to this date, in the Government Treasuries in India, at the close of the month of January last, contrasted with that of the previous years, is published for general information:—

	January 1871.	January 1872.	January 1873.
	Rs.	Rs.	Rs.
Government of India	2,84,18,697	4,49,52,342	2,02,05,834
Bengal	1,75,89,650	2,12,77,826	2,63,97,091
British Burmah	21,54,993	26,23,504	20,28,920
North-Western Provinces	2,66,91,640	2,92,46,124	2,83,71,281
Oudh	65,27,100	57,44,680	84,05,022

TOTAL ...	15,27,03,438	21,33,77,268	18,31,46,633

The 25th February 1873.

No. 1376.—In exercise of the power conferred by Section 4 of the Local Public Works Loan Act XXIV of 1871, the Governor General in Council is pleased to direct that the following Rule be substituted for Rule X of the Rules published with Notification by the Government of India in the Financial Department, No. 2987, dated 25th April 1872:—

Rule X.—The interest charged on such loans shall be 4½ per cent. a year. Interest upon the outstanding principal debt shall be payable half-yearly, and the principal shall be paid in such instalments that not less than one-fifth of the whole shall be repaid within ten years, not less than one-half within twenty years, and the whole within thirty years at most. Payments of interest and repayments of principal shall be made to the Treasury from which the loan is taken, or with the consent of the local Government to any other Government Treasury.

LEAVE AND ALLOWANCES.

The 26th February 1873.

No. 1410.—The Governor General in Council directs that the following Rule be substituted for Rule 5 in Chapter VIII of the Civil Leave Code, and that Rule 8 under Section 24 be cancelled :—

5. Unless for some special recorded reason, the Government or other authority under whose orders the transfer takes place permits or requires it to be made in any particular case elsewhere or otherwise, the charge of an office must be made over at its head quarters, both the relieving and relieved officers being present.

As a general rule, and subject to any special orders to the contrary in particular cases, the head quarters of an officer on the staff of a Government, as, for instance, a Secretary to a Government, the Sanitary Commissioner with the Government of India, or a clerk in a Government Secretariat, are the head quarters for the time being of the Government to which he is attached.

The head quarters of any other officer are either the station which has been declared to be his head quarters by the authority which appoints him, or in the absence of such declaration the station where the records of his office are kept.

SEPARATE REVENUE.

POST OFFICE.

The 27th February 1873.

No. 1441.—Mr. C. A. Stuart, Post Master, Bombay, was on subsidiary leave from the 23rd to the 25th May 1872 inclusive, prior to his availing himself of the furlough granted to him in Notification of this Department, No. 3580, dated 17th idem.

No. 1443.—Mr. E. C. George, Officiating Post Master, Bombay, is appointed to officiate as Post Master, Calcutta. He will, however, continue to officiate as Post Master, Bombay, until the return from leave of Mr. C. A. Stuart; and meanwhile Mr. E. A. Roussac, Supernumerary Inspecting Post Master in the Bengal Postal Circle, is appointed to officiate as Post Master of Calcutta.

Mr. Roussac received charge of the Calcutta Post Office on the forenoon of the 10th February 1873.

The 28th February 1873.

No. 1445.—Under the provisions of Sections 13, 19, 20 and 63 of "The Indian Post Office Act, 1866," the Governor General in Council is pleased to make the following orders in respect of articles which may be posted, on or after the 1st April 1873, at any Indian Post Office for transmission to any place in India.

2. Covers open at the ends and not exceeding 10 tolas in weight shall be forwarded by letter post at the same postage rate (one anna) as provided for unregistered newspapers; but no such cover may contain any letter or communication of the nature of a letter unless the whole of such letter or communication be printed.

3. The scale of postage chargeable on parcels and packets sent by banghy post shall commence with the rate chargeable on a parcel or packet not exceeding 20 tolas in weight, and shall progress by limits of 10 tolas each according to the following table, *viz.* :—

	Parcels.	Packets
For a cover not exceeding 20 tolas in weight ...	4 annas.	2 annas.
For a cover exceeding 20 tolas and not exceeding 30 tolas in weight	6 "	3 "
For every additional 10 tolas or fraction thereof	2 "	1 anna.

4. The full prepayment of postage chargeable on packets shall be compulsory, and every unpaid or insufficiently paid packet shall be treated and charged as a parcel.

5. There shall be no separate registration of packets, but any packet may be transmitted by the sender as a parcel under the system of registration applicable to parcels.

6. Any person tendering a parcel at a post office within the prescribed hours shall be entitled to receive a receipt for it, provided that the parcel so tendered is securely packed in cloth, wax-cloth or tin; and if it is packed in cloth or wax-cloth, provided further that it bears seals with distinct impressions of some device (not that of a current coin) at intervals not exceeding five inches along the lines of sewing.

7. Cash shall not be received at any post office in prepayment of parcel postage.

8. Annexed is a summary of the postage chargeable on, and the principal conditions appertaining to, the several classes of correspondence as modified by the above orders.

SUMMARY OF POSTAGE RATES AND CONDITIONS FOR INLAND CORRESPONDENCE.

Prepaid Postage Rates.

	Letter Post.						Bangy Post.			
	Letters.		Registered Newspapers and Proof Sheets. Open covers. Prepayment compulsory.		Unregistered Newspapers, &c. Open covers. Prepayment compulsory.		Parcels.		Packets. Open covers. Prepayment compulsory.	
	A.	P.	A.	P.	A.	P.	A.	P.	A.	P.
Not exceeding ½ tola in weight ...	0	6	.....		.....		.....		.....	
Exceeding ½ tola and not exceeding 1 tola in weight	1	0	.....		.....		.....		.....	
Exceeding 1 and not exceeding 2 tolas in weight	2	0	.....		.....		.....		.....	
For every additional tola ...	1	0	.....		.....		.....		.....	
Not exceeding 10 tolas in weight ...	.....		0	6	1	0	.....		.....	
Ditto 20 ditto ...	.....		1	0	.....		4	0	2	0
Exceeding 20 and not exceeding 30 tolas in weight	.....		1	6	.....		6	0	3	0
For every additional 10 tolas.	.....		0	6	.....		2	0	1	0

Note.—(1). Postage can be prepaid only by means of a proper stamp, or stamps adhesive or embossed.
(2). Any article sent by letter post can be registered under the regulations applicable to the registration of letters.

LETTERS.

What articles treated as letters.

2. Any article, not coming under the condition prescribed for registered newspapers, proof sheets, or unregistered newspapers, which does not exceed ten tolas in weight, and which is not specially superscribed for transmission as a parcel or a packet, is treated as a letter, and any article, not coming under the conditions prescribed for registered newspapers or proof sheets, which exceeds ten tolas in weight, and which is superscribed for transmission by letter post, or is prepaid at the letter post rate, or is judged from outward appearance or other considerations to be intended for transmission by letter post, is also treated as a letter.

Unpaid or insufficiently paid letters.

3. The postage chargeable on a letter, if not prepaid, is double the amount which would have been chargeable if prepaid, and if the prepayment is insufficient, double the deficiency is charged.

REGISTERED NEWSPAPERS.

What articles treated as registered newspapers.

4. Periodical publications, published at intervals not exceeding 31 days, which have been registered for transmission by post in the office of the Post Master General (or officer exercising the powers of Post Master General) of the postal circle in which they are published, and which fulfil the under-mentioned conditions, are treated as registered newspapers.

N. B.—The registration of a paper expires at the close of the calendar year following that in which the registration was effected, and must be renewed if a continuance of the privilege beyond that time is desired.

Each registered newspaper charged separately.

5. The postage rates given above are chargeable upon *each* registered newspaper; but an extra or supplement to any registered newspaper bearing the same date as the newspaper, and transmitted therewith under the same cover, is deemed part of the newspaper.

Prepayment of registered newspapers compulsory.

6. Registered newspapers can be forwarded by the letter post at the above-mentioned rate only if the postage be fully prepaid. A registered newspaper posted unpaid or insufficiently paid will be forwarded to the Dead Letter Office.

Conditions to be observed in respect of registered newspapers.

7. Registered newspapers can be forwarded by letter post at the above-mentioned rates only if the following conditions be observed, *viz.* :—

(1).—It shall be without a cover or in a short cover open at the ends.

(2).—There shall be no word printed on such newspaper after its publication, or upon the cover thereof, nor any writing or mark upon it, or upon the cover of it; except the name and address of the person to whom it is sent, and the name and address of the sender.

(3).—There shall be no paper or thing enclosed in or with any such newspaper.

(4).—The newspaper must bear in print immediately above the address the word "registered" followed by the registration number given by the Post Master General.

N. B.—The word "registered" followed by the number may be printed on the paper itself or on its cover, but must in all cases be *immediately above the address.*

(5).—The newspaper must be posted at the place of publication.

N. B.—It is immaterial whether the paper is posted by the publisher or by any one else, or whether it is posted on the day of publication or on a subsequent date. When a registered newspaper is re-directed, "forward" postage is charged at the lower rate, even though the re-direction may take place at an office other than that of the place of publication. Registered newspapers when re-posted are treated as if posted for the first time, and are entitled to transmission at the lower rate only if the conditions be fulfilled.

PROOF SHEETS

May be sent by letter post at registered newspaper rates under certificate.

8. Proof sheets, marked as such, may be sent by the letter post either without covers or in covers open at the ends at the rates prescribed for registered newspapers, provided that the contents be correctly certified on the cover by the signature in full of the sender.

UNREGISTERED NEWSPAPERS, &c.

What articles treated as unregistered newspapers.

9. Any cover not exceeding ten tolas in weight which is posted with the ends open (so as to admit of examination of contents) and prepaid with one anna postage, and which does not contain any letter or communication of the nature of a letter, unless the whole of such letter or communication be printed, is treated as an unregistered newspaper.

PARCELS AND PACKETS.

What articles treated as parcels or packets.

10. All articles committed to the post office, which are superscribed for transmission as parcels or packets or which do not fall to be treated as letters, registered newspapers, proof sheets, or unregistered newspapers under the preceding paragraphs, are transmitted by banghy post as parcels or packets.

Distinction between parcels and packets.

11. The distinction between parcels and packets is (1) that packets must be packed in open covers, while parcels may, at the option of the sender, be packed in closed covers; (2) that parcels are transmitted under a system of registration, while packets are not; and (3) that for parcels prepayment of postage is optional, while for packets full prepayment is compulsory. Any article of this class, which is posted fully prepaid at parcel rates, or superscribed by the sender for transmission as a parcel, or presented at the post office for that purpose, or which, owing to deficient prepayment or excess of size, or mode of packing, cannot be forwarded as a packet, is treated as a parcel, and all other articles of this class are treated as packets.

Contents of Parcels and Packets.

12. Not more than one letter, or communication of the nature of a letter, may be enclosed in any parcel, and no letter or communication of the nature of a letter may be enclosed in a packet, nor may a packet contain anything closed against inspection; but with these exceptions, and with the exception also of dangerous substances and other articles which cannot be sent by post in any form, there are no restrictions as to the contents of parcels and packets.

Unpaid and insufficiently paid parcels.

13. Unpaid parcels are charged on delivery at the same rates as would have been chargeable if the postage had been prepaid: insufficiently paid parcels are charged on delivery with the deficiency.

Receipts given for parcels when properly packed.

14. A person tendering a parcel at a post office within the prescribed hours is entitled to get a receipt for it, provided that the parcel so tendered is securely packed in cloth, wax-cloth, or tin; and if it is packed in cloth or wax-cloth, provided further that it bears seals with distinct impressions of some device (not that of a current coin) at intervals not exceeding five inches along the lines of sewing.

Receipts to be signed by addressee on delivery of parcels.

15. The addressees of parcels are required to sign receipts for them on delivery.

Limit of weight of parcels.

16. No parcel exceeding 25 seers (2,000 tolas) in weight can be received at any post office for despatch.

Parcels received by post from seaward, exceeding the above weight, are made over to the Collector of Customs for publication in his list of unclaimed packages.

Limit of size of packets.

17. No packet may exceed one foot and a half in length, or one foot in width or depth, and if any such packet be posted, it will be treated as a parcel and charged accordingly.

Parcels between places connected by railway.

18. Between places connected by railway, where the railway authorities may have intimated their readiness to undertake the conveyance and delivery of parcels, the post office does not convey parcels, except such as may be sent on the public service. Of course, if either the place of address or the place of despatch be not on the line of railway, the above rule does not apply.

No. 1446.—The Governor General in Council is pleased to prescribe the following rules for the treatment of official correspondence which may be posted on or after the 1st April 1873.

The principal change is the withdrawal of the privilege under which certain public offices have been allowed to send and receive official correspondence through the post without payment of postage, the rates of postage chargeable on letters and parcels being at the same time reduced, and the postage charges regulated by a scale, which, for all weights over half a tola, rises by limits of 10 tolas.

OFFICIAL CORRESPONDENCE RULES.

Official Postage Rates.

	Letter Post.				Bangh Post			
	Letters. Closed covers.		Registered Gazettes Open covers.		Parcels Closed covers		Packets. Closed covers	
	Prepayment optional.		Prepayment compulsory		Prepayment optional		Prepayment compulsory.	
	A.	P	A.	P.	A.	P.	A.	P.
Covers not exceeding ½ tola	0	6	0	0	0	0	0	0
" exceeding ½ and not exceeding 10 tolas .	1	0	0	6	0	0	0	0
" " 10 " " " 20 " ..	5	0	1	0	4	0	2	0
" " 20 " " " 30 " .	10	0	1	6	6	0	3	0
" " 30 " " " 40 " ...	15	0	2	0	8	0	4	0
For every additional 10 tolas	5	0	0	6	2	0	1	0

Note.—The following rule may facilitate the calculation of postage on letters exceeding 10 tolas:—Find the weight in tolas, take the next lower multiple of 10 and divide it by 2, the result will be the number of annas chargeable Thus, for a cover weighing (say) 38 or 40 tolas, the next lower multiple of 10 will be 30, which, divided by 2, gives 15, being the number of annas chargeable.

Prepayment by means of service labels.

2. Official covers from Government offices should be prepaid by means of service postage stamps purchased at the Government Treasury or other local stamp depôt. These stamps, when used in payment of postage, must be supported by the superscription on the cover "On Her Majesty's Service," under the full signature and official designation of the Government officer who sends the cover, or of the head clerk or superintendent of his office, or of other responsible officer, to whom the duty of despatching is confided. The particular officer who signs the cover must enter in full his own official designation, in order that his individual responsibility may be enforced in cases of doubt or fraud. The superscription and signature should be entered in the form marginally given. Service stamps affixed to a cover without the above superscription will not be recognised by the post office in payment of postage. Treasury officers are enjoined not to sell service stamps to any but Government officials.

On Her Majesty's Service.	Service labels.
To (*Here enter address*).	
(*Signature of Sender*). (*Official designation*).	

3. Official Gazettes should be registered at the Post Master General's Office, and when so registered are eligible for transmission at the lower rates above given under the same rules and conditions as apply to ordinary registered newspapers.

Unpaid official covers.

4. Official letters and parcels properly superscribed under Rule (2), but without stamps, are charged with postage on delivery at prepaid rates.

In cases where it is not thought advisable to entrust postage stamps to a subordinate official, who has to correspond with, or send returns to, a superior, he may be allowed by his superior to address official covers to him under this rule, and the same course may be adopted in other cases, where it is found convenient or proper to make the postage charge fall on the receiving office.

Economy to be observed in the use of the post.

5. Government officials should be careful not to incur needlessly the higher charge on account of the transmission of heavy covers by letter post. Similarly, the transmission of heavy covers as parcels (which are conveyed by post under a system of registration) is more expensive than their conveyance as packets, and the parcel post should not therefore be needlessly used by Government officials.

Limits of weight and size.

6. No official cover exceeding 600 tolas in weight can be received by the Post Office, and no official cover exceeding the limit of size* prescribed for ordinary packets can be forwarded as a packet, though it may be forwarded as a parcel, if within the limit of weight above-mentioned.

* One foot and a half in length by one foot in width or depth.

Letters and parcels superscribed "Service Bearing" by Government Officers.

7. Letters and parcels sent by Government officers in their official capacity, which relate nevertheless to the private interests and concerns of the individuals addressed, may be endorsed according to the specimen form given on the margin, under the full signature and official designation of the person by whom they are sent. Letters and parcels so addressed are regarded by the Post Office as private covers, but are charged, on delivery, with bearing postage at "forward" (*i. e.*, pre-paid) rates, and not at double rates as in the case of ordinary letters. Under this head come replies sent to communications of the kind noted in the margin, as well as any other communications of a like kind which Government Officers may make to individuals (whether private persons or Government officers) relating to the private interests of the addressees.

Service Bearing.
To
A. B.,
C. D., CALCUTTA.
Accountant General.

Petitions, applications for appointments, requests for transfer, enquiries about title to leave, &c.

Letters and parcels superscribed "Service Bearing" addressed to Government Officers.

8. Letters and parcels sent by private persons to Government officials relating to the affairs of Government, and endorsed according to the specimen form given on the margin, under the full signature of the sender (the address, including the full official designation of the public office to which the cover is sent), are charged, on delivery, at the rate to which they would have been liable if pre-paid by stamps, and not at double rates as in the case of ordinary letters. This rule is intended to provide for cases of zemindars reporting the occurrence of crime to a police officer, of employers of laborers sending returns required by the Protector, and of any similar reports or returns authorized to be so sent.

Service Bearing.
To
THE DISTRICT SUPERINTENDENT OF POLICE,
LUCKNOW.
Signature of sender.

Official covers not liable to re-direction charge.

9. Official communications addressed to Government officers "On Her Majesty's Service" or "Service Bearing" under the prescribed superscription and signature, are not liable to additional postage on account of re-direction.

Postage due on official covers to be initialed in Post Office.

10. The amount of postage marked as due on covers delivered under the superscriptions of "Service Bearing" or "On Her Majesty's Service," will be initialed by the Post Master or Deputy Post Master of the office of delivery.

Government Officers bound to receive and pay for covers under official superscription.

11. Government officers are bound to receive and pay any postage which may be due on covers addressed to them under the superscription "On Her Majesty's Service."

Registration.

12. The rules and conditions for the registration of ordinary covers sent by letter post govern the registration of similar official covers, the service labels affixed to them being supported by the prescribed superscription and signature.

Post Telegrams.

13. Officers in charge of Telegraph Offices, when posting telegraph messages for onward transmission by post, are entitled to get receipts for them. Such receipts must be presented ready written in the form ordinarily used by the Telegraph Offices when delivering telegraph messages to the addressees. The Post Master will compare the receipt so presented with the address of the cover accompanying it, and, if correct, will affix the Post Office stamp in acknowledgment of receipt. All covers for which receipts are claimed under this rule must be superscribed with the word "Telegram" (in addition to the usual official superscription), and must be fully pre-paid.

Government Officers on leave.

14. Government officers, when on leave, and those who have retired from the service of Government, can correspond only as private individuals.

Irregularities of address, &c.

15. Any irregularity or incompleteness of the address, superscription, or signature on a cover renders it liable to be treated as an ordinary unpaid cover, any service stamps which it may bear not being recognized.

Official correspondence with places abroad or between Indian Post Offices when conveyed by British or French Mail Packets.

16. The rules contained in the preceding paragraphs relate exclusively to official inland correspondence, *i. e.*, correspondence conveyed between one Indian Post Office and another by Her Majesty's Indian Post.

Official correspondence with places abroad, or between Indian Post Offices when conveyed by British or French Mail Packets (*e. g.*, between Bombay and Aden), is governed by the same rules as ordinary private correspondence, and must either be pre-paid by service stamps (under the superscription and signature prescribed by Rule 1), or, where pre-payment is optional, be forwarded as unpaid, subject to the levy of postage on delivery.

The only exception to the above has reference to official letters (not newspapers or book or pattern packets) sent by British packet to or from the public functionaries or departments in London having special accounts for overland letter postage with the London Post Office. Official letters intended for such offices need not be pre-paid if superscribed as "On Her Majesty's Service" under the full signature and official designation of the sender. The public functionaries or departments in London which have accounts with the London Post Office are—Adjutant General's Office (Horse Guards), Admiralty (Somerset House and Whitehall), Audit and Exchequer Department (Somerset House), Board of Trade (Whitehall), Census Office (Craig's Court), Chancellor's Office (Downing Street), Charity Commission (York Street, St. James), Chelsea Hospital (Chelsea), Civil Service Commission (Cannon Row, Westminster), Colonial Office (Downing Street), Colonial Land and Emigration Office (Park Street, Westminster), Commander-in-Chief's Office (Horse Guards), Council of Military Education (Great George Street), Council Office (Downing Street), Court of Bankruptcy (Basinghall Street), Courts of Chancery (Lincoln's Inn Fields and Chancery Lane), Court of Probate (Doctors Commons), Crown Agents for the Colonies (Spring Gardens), Duchy of Cornwall (Buckingham Palace Gate), the Customs (Lower Thames Street), Ecclesiastical Department (Whitehall Place), Endowed Schools Commission (Victoria Street), Exhibition Commissioners, 1851 (Westminster), Foreign Office (Downing Street), Her Majesty's Home Office (Whitehall), House of Commons, India Office (Charles Street, Westminster), Irish Office (Great Queen Street, Westminster), Inland Revenue (Somerset House), Local Government Act Office (Richmond Terrace, Whitehall), Merchant Seamen's Office (Adelaide Place, London Bridge), Metropolitan Police Office (Whitehall Place), Pay Master General (Whitehall), Local Government Board (Gwyder House, Whitehall), Post Office, Prisons Office (Parliament Street), His Royal Highness the Prince of Wales, Quarter Master General's Office (Horse Guards), Registrar of Friendly Societies (Abingdon Street), Registrar General's Office (Somerset House), Royal Artillery, Royal Marines (New Street), Science and Art Department, Warden of Standards, Stationery Office (Princes Street, Storey's Gate), Tithe Copyhold and Enclosure Commissioners (St. James Square), Treasury Office (Whitehall), Tower, Veterinary Department of the Privy Council (Prince's Street, Westminster), War Office (Pall Mall), Woods, Forests and Land Revenues Office (Whitehall Place), Works and Public Buildings Office (Whitehall Place).

Published by order of His Excellency the Governor General in Council.

R. B. CHAPMAN,
Secretary to the Govt. of India.

MILITARY DEPARTMENT.

Fort William, the 24th February 1873.

No. 194 *of* 1873.—Ensign C. Halford, of the Calcutta Volunteer Rifle Corps, is allowed leave of absence to proceed to England on medical certificate for one year from the 27th February 1873.

PUBLIC NOTICE.

1.—A sale by public auction of the Government timber, lying at the Forest Depôt, Byram Ghât, specified below, will be held on Thursday, the 27th of March 1873, to commence at 7 o'clock in the morning.

2.—A deposit of Rs. 10 per cent. of the price will have to be paid at the time of sale, and the remainder within one month of the day of sale, failing which the deposit money will be forfeited and the lot resold.

3.—Delivery of the timber will not be given until payment in full has been made. The timber will be at the risk of the purchaser from the moment it is sold.

4.—Timber must be removed within a month from the date of sale, failing which ground rent will be charged at the rate of 4 annas per log per mensem.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th February 1873, and is hereby promulgated for general information :—

ACT No. VII OF 1873.

An Act for the levy of Port-dues in the Ports of British Burma.

Preamble.

WHEREAS it is expedient from time to time to bring ports in British Burma under the provisions of Act No. XXII of 1855 *(for the regulation of Ports and Port-dues)* and to make regulations for the levy of dues in such ports without the necessity of passing a new Act for each occasion; It is hereby enacted as follows :—

Short title.

1. This Act may be called "The Burma Port-dues Act, 1873":

Local extent.

It extends only to the ports of British Burma which shall have been declared subject to the said Act No. XXII of 1855 :

To be read with Act XXII of 1855.

It shall be read with and taken as part of the same Act ;

Commencement.

And it shall come into force on the first day of March 1873.

Power to declare maximum amount of port-dues leviable in Burma.

2. In every case in which the Chief Commissioner of British Burma, with the previous sanction of the Governor General in Council, has declared or hereafter declares any port in British Burma to be subject to the said Act, he may, with the like sanction, by the same or any subsequent declaration, and notwithstanding anything contained in section forty-one of the said Act, further declare—

(*a*.) the maximum amount of dues to be levied in such port,

(*b*.) the conditions and modifications under which such dues shall be levied,

and may also from time to time, with the like sanction, vary such maximum amount, conditions and modifications.

What vessels chargeable.

Limitation of rate.

3. Provided that the dues so authorized shall be charged only on sea-going vessels of the burden of ten tons and upwards, and shall not exceed the rate of four annas for every ton of burden.

WHITLEY STOKES,

Secy. to the Govt. of India.

[Third Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th February 1873, and is hereby promulgated for general information :—

ACT No. VIII OF 1873.

THE NORTHERN INDIA CANAL AND DRAINAGE ACT, 1873.

CONTENTS.

PREAMBLE.

38. Amount of owner's rate.
39. Owner's rate not chargeable in respect of land temporarily assessed to land-revenue at irrigation-rates.
40. When occupier is to pay both owner's rate and occupier's rate.
41. Power to make rules for apportioning owner's rate.
42. When owner is to pay owner's rate.
43. Effect of introduction of canal-irrigation on landlord's right to enhance.
44. Water-rate by whom payable when charged on land held by several owners.

Recovery of Charges.

45. Certified dues recoverable as land-revenue.
46. Power to contract for collection of canal-dues.
47. Lambardárs may be required to collect canal-dues.
48. Fines excluded from sections 45, 46, 47.

PART VI.

OF CANAL-NAVIGATION.

49. Detainer of vessels violating rules.
Liability of owners of vessels causing damage.
50. Recovery of fines for offences in navigating canals.
51. Power to seize and detain vessel on failure to pay charges.
52. Power to seize cargo or goods, if charges due thereon are not paid.
53. Procedure for recovery of such charges after seizure.
54. Procedure in respect of vessels abandoned and goods unclaimed.
Disposal of proceeds of sale.

PART VII.

OF DRAINAGE.

55. Power to prohibit obstructions or order their removal.
56. Power to remove obstructions after prohibition.
57. Preparation of schemes for works of improvement.
58. Powers of persons employed on such schemes.
59. Rate on lands benefited by works.
60. Recovery of rate.
61. Disposal of claims to compensation.
62. Limitation of such claims.

PART VIII.

OF OBTAINING LABOUR FOR CANALS AND DRAINAGE-WORKS.

63. Definition of "labourer."
64. Power to prescribe number of labourers to be supplied by persons benefited by canal.
65. Procedure for obtaining labour for works urgently required.
66. Liability of labourers under requisition.

SECTIONS.

PART IX.

OF JURISDICTION.

67. Jurisdiction under this Act of Civil Courts.
68. Settlement of differences as to mutual rights and liabilities of persons interested in water-course.
69. Power to summon and examine witnesses.

PART X.

OF OFFENCES AND PENALTIES.

70. Offences under Act.
Penalty.
71. Saving of prosecution under other laws.
72. Compensation to person injured.
73. Power to arrest without warrant.
74. Definition of 'Canal.'

PART XI.

OF SUBSIDIARY RULES.

75. Power to make, alter and cancel rules.
Publication of rules.

SCHEDULE—Enactments repealed.

An Act to regulate Irrigation, Navigation and Drainage in Northern India.

Preamble.

WHEREAS, throughout the territories to which this Act extends, the Government is entitled to use and control for public purposes the water of all rivers and streams flowing in natural channels, and of all lakes and other natural collections of still water; and whereas it is expedient to amend the law relating to irrigation, navigation and drainage in the said territories; It is hereby enacted as follows:—

PART I.

PRELIMINARY.

Short title.

1. This Act may be called "The Northern India Canal and Drainage Act, 1873":

Local extent.

It extends to the territories for the time being respectively under the government of the Lieutenant Governors of the North-Western Provinces and the Panjáb, and under the administration of the Chief Commissioners of Oudh and the Central Provinces; and applies to all lands whether permanently settled, temporarily settled, or free from revenue;

Commencement.

And it shall come into force on the passing thereof.

Repeal of Acts.

2. The Acts mentioned in the schedule hereto annexed are repealed to the extent specified in the third column of the said schedule.

Interpretation-clause.

3. In this Act—unless there be something repugnant in the subject or context—

"Canal."

(1) "Canal" includes—

(a) all canals, channels and reservoirs constructed, maintained or controlled by Government for the supply or storage of water;

(b) all works, embankments, structures, supply and escape-channels connected with such canals, channels or reservoirs;

(c) all water-courses as defined in the second clause of this section;

(d) any part of a river, stream, lake or natural collection of water, or natural drainage-channel, to which the Local Government has applied the provisions of Part II of this Act;

"Water-course."

(2) "Water-course" means any channel which is supplied with water from a canal, but which is not maintained at the cost of Government, and all subsidiary works belonging to any such channel;

"Drainage-work."

(3) "Drainage-work" includes escape-channels from a canal, dams, weirs, embankments, sluices, groins and other works for the protection of lands from flood or from erosion, formed or maintained by the Government under the provisions of Part VII of this Act, but does not include works for the removal of sewage from towns;

"Vessel."

(4) "Vessel" includes boats, rafts, timber and other floating bodies;

"Commissioner."

(5) "Commissioner" means a Commissioner of a Division, and includes any officer appointed under this Act to exercise all or any of the powers of a Commissioner;

"Collector."

(6) "Collector" means the head revenue officer of a district, and includes a Deputy Commissioner or other officer appointed under this Act to exercise all or any of the powers of a Collector;

"Canal Officer."

(7) "Canal Officer" means an officer appointed under this Act to exercise control or jurisdiction over a canal or any part thereof;

"Superintending Canal Officer" means an officer exercising general control over a canal or portion of a canal;

"Divisional Canal Officer" means an officer exercising control over a division of a canal;

"Sub-Divisional Canal Officer" means an officer exercising control over a sub-division of a canal;

"District."

(8) "District" means a district as fixed for revenue purposes.

Power to appoint officers.

4. The Local Government may from time to time declare, by notification in the official Gazette, the officers by whom, and the local limits within which, all or any of the powers or duties hereinafter conferred or imposed shall be exercised or performed.

All officers mentioned in section three, clause (7), shall be respectively subject to the orders of such officers as the Local Government from time to time directs.

PART II.

OF THE APPLICATION OF WATER FOR PUBLIC PURPOSES.

Notification to issue when water-supply is to be applied for public purposes.

5. Whenever it appears expedient to the Local Government that the water of any river or stream flowing in a natural channel, or of any lake or other natural collection of still water, should be applied or used by the Government for the purpose of any existing or projected canal or drainage-work, the Local Government may, by notification in the official Gazette, declare that the said water will be so applied or used after a day to be named in the said notification, not being earlier than three months from the date thereof.

Powers of Canal Officer.

6. At any time after the day so named, any Canal Officer, acting under the orders of the Local Government in this behalf, may enter on any land and remove any obstructions, and may close any channels, and do any other thing necessary for such application or use of the said water.

Notice as to claims for compensation.

7. As soon as is practicable after the issue of such notification, the Collector shall cause public notice to be given at convenient places, stating that the Government intends to apply or use the said water as aforesaid, and that claims for compensation in respect of the matters mentioned in section eight may be made before him.

Damage for which compensation shall not be awarded.

8. No compensation shall be awarded for any damage caused by—

(a) stoppage or diminution of percolation or floods,

(b) deterioration of climate or soil;

(c) stoppage of navigation, or of the means of drifting timber or watering cattle;

(d) displacement of labour.

Matters in respect of which compensation may be awarded.

But compensation may be awarded in respect of any of the following matters:

(e) Stoppage or diminution of supply of water through any natural channel to any defined artificial channel, whether above or under ground, in use at the date of the said notification:

(f) Stoppage or diminution of supply of water to any work erected for purposes of profit on any channel, whether natural or artificial, in use at the date of the said notification:

(g) Stoppage or diminution of supply of water through any natural channel which has been used for purposes of irrigation within the five years next before the date of the said notification:

(h) Damage done in respect of any right to a water-course or the use of any water to which any person is entitled under the Indian Limitation Act, 1871, Part IV:

(i) Any other substantial damage, not falling under any of the above clauses *(a)*, *(b)*, *(c)* or *(d)*, and caused by the exercise of the powers conferred by this Act, which is capable of being ascertained and estimated at the time of awarding such compensation.

In determining the amount of such compensation, regard shall be had to the diminution in the market-value, at the time of awarding compensation, of the property in respect of which compensation is claimed; and where such market-value is not ascertainable, the amount shall be reckoned at twelve times the amount of the diminution of the annual nett profits of such property, caused by the exercise of the powers conferred by this Act.

No right to any such supply of water as is referred to in clause *(e)*, *(f)* or *(g)* of this section, in respect of a work or channel not in use at the date of the notification, shall be acquired as against the Government, except by grant or under the Indian Limitation Act, 1871, Part IV.

And no right to any of the advantages referred to in clauses (a), (b) and (c) of this section shall be acquired, as against the Government, under the same Part.

Limitation of claims.

9. No claim for compensation for any such stoppage, diminution or damage shall be made after the expiration of one year from such stoppage, diminution or damage, unless the Collector is satisfied that the claimant had sufficient cause for not making the claim within such period.

Enquiry into claims and amount of compensation.

10. The Collector shall proceed to enquire into any such claim, and to determine the amount of compensation, if any, which should be given to the claimant; and sections nine to twelve (inclusive), fourteen and fifteen, eighteen to twenty-three (inclusive), twenty-six to forty (inclusive), fifty-one, fifty-seven, fifty-eight and fifty-nine of the Land Acquisition Act, 1870, shall apply to such enquiries:

Provided that, instead of the last clause of the said section twenty-six, the following shall be read: "The provisions of this section and of section eight of the Northern India Canal and Drainage Act, 1873, shall be read to every assessor in a language which he understands, before he gives his opinion as to the amount of compensation to be awarded."

Abatement of rent on interruption of water-supply.

11. Every tenant holding under an unexpired lease, or having a right of occupancy, who is in occupation of any land at the time when any stoppage or diminution of water-supply, in respect of which compensation is allowed under section eight, takes place, may claim an abatement of the rent previously payable by him for the said land, on the ground that the interruption reduces the value of the holding.

Enhancement of rent on restoration of water-supply.

12. If a water-supply increasing the value of such holding is afterwards restored to the said land, the rent of the tenant may be enhanced, in respect of the increased value of such land due to the restored water-supply, to an amount not exceeding that at which it stood immediately before the abatement.

Such enhancement shall be on account only of the restored water-supply, and shall not affect the liability of the tenant to enhancement of rent on any other grounds.

Compensation when due.

13. All sums of money payable for compensation under this Part shall become due three months after the claim for such compensation is made in respect of the stoppage, diminution or damage complained of,

Interest.

and simple interest at the rate of six per cent. per annum shall be allowed on any such sum remaining unpaid after the said three months, except where the non-payment of such sum is caused by the wilful neglect or refusal of the claimant to receive the same.

PART III.

OF THE CONSTRUCTION AND MAINTENANCE OF WORKS.

Power to enter and survey, &c.

14. Any Canal Officer or other person acting under the general or special order of a Canal Officer,

may enter upon any lands adjacent to any canal, or through which any canal is proposed to be made, and undertake surveys or levels thereon;

and dig and bore into the sub-soil;

and make and set up suitable land-marks, level-marks, and water-gauges;

and do all other acts necessary for the proper prosecution of any enquiry relating to any existing or projected canal under the charge of the said Canal Officer:

Power to clear land.

and, where otherwise such enquiry cannot be completed, such officer or other person may cut down and clear away any part of any standing crop, fence or jungle;

Power to inspect and regulate water-supply.

and may also enter upon any land, building or water-course on account of which any water-rate is chargeable, for the purpose of inspecting or regulating the use of the water supplied, or of measuring the lands irrigated thereby or chargeable with a water-rate, and of doing all things necessary for the proper regulation and management of such canal:

Notice of intended entry into houses.

Provided that, if such Canal Officer or person proposes to enter into any building or enclosed court or garden attached to a dwelling-house not supplied with water flowing from any canal, he shall previously give the occupier of such building, court or garden at least seven days' notice in writing of his intention to do so.

Compensation for damage caused by entry.

In every case of entry under this section, the Canal Officer shall, at the time of such entry, tender compensation for any damage which may be occasioned by any proceeding under this section; and in case of dispute as to the sufficiency of the amount so tendered, he shall forthwith refer the same for decision by the Collector, and such decision shall be final.

Power to enter for repairs and to prevent accidents.

15. In case of any accident happening or being apprehended to a canal, any Divisional Canal Officer or any person acting under his general or special orders in this behalf may enter upon any lands adjacent to such canal, and may execute all works which may be necessary for the purpose of repairing or preventing such accident.

Compensation for damage to land.

In every such case, such Canal Officer or person shall tender compensation to the proprietors or occupiers of the said lands for all damage done to the same. If such tender is not accepted, the Canal Officer shall refer the matter to the Collector, who shall proceed to award compensation for the damage as though the Local Government had directed the occupation of the lands under section forty-three of the Land Acquisition Act, 1870.

Application by persons desiring to use canal-water.

16. Any persons desiring to use the water of any canal, may apply in writing to the Divisional or Sub-Divisional Canal Officer of the Division or Sub-Division of the canal from which the water-course is to be supplied, requesting such officer to construct or improve a water-course at the cost of the applicants.

The application shall state the works to be undertaken, their approximate estimated cost, or the amount which the applicants are willing to pay for the same, or whether they engage to pay the actual cost as settled by the Divisional Canal Officer, and how the payment is to be made.

Contents of application.

When the assent of the Superintending Canal Officer is given to such application, all the applicants shall, after the application has been duly attested before the Collector, be jointly and severally liable for the cost of such works to the extent mentioned therein.

Liability of applicants for cost of works.

Any amount becoming due under the terms of such application, and not paid to the Divisional Canal Officer, or the person authorized by him to receive the same, on or before the date on which it becomes due, shall, on the demand of such officer, be recoverable by the Collector as if it were an arrear of land-revenue.

Recovery of amount due.

17. There shall be provided, at the cost of Government, suitable means of crossing canals constructed or maintained at the cost of Government, at such places as the Local Government thinks necessary for the reasonable convenience of the inhabitants of the adjacent lands.

Government to provide means of crossing canals.

On receiving a statement in writing, signed by not less than five of the owners of such lands, to the effect that suitable crossings have not been provided on any canal, the Collector shall cause enquiry to be made into the circumstances of the case, and if he thinks that the statement is established, he shall report his opinion thereon for the consideration of the Local Government, and the Local Government shall cause such measures in reference thereto to be taken as it thinks proper.

18. The Divisional Canal Officer may issue an order to the persons using any water-course to construct suitable bridges, culverts, or other works for the passage of the water of such water-course across any public road, canal or drainage-channel in use before the said water-course was made, or to repair any such works.

Persons using water-course to construct works for passing water across roads, &c.

Such order shall specify a reasonable period within which such construction or repairs shall be completed;

If they fail, Canal Officer may construct,

and if, after the receipt of such order, the persons to whom it is addressed do not, within the said period, construct or repair such works to the satisfaction of the said Canal Officer, he may, with the previous approval of the Superintending Canal Officer, himself construct or repair the same;

and if the said persons do not, when so required, pay the cost of such construction or repairs as declared by the Divisional Canal Officer, the amount shall, on the demand of the Divisional Canal Officer, be recoverable from them by the Collector, as if it were an arrear of land-revenue.

and recover cost.

19. If any person, jointly responsible with others for the construction or maintenance of a water-course, or jointly making use of a water-course with others, neglects or refuses to pay his share of the cost of such construction or maintenance, or to execute his share of any work necessary for such construction or maintenance, the Divisional or Sub-Divisional Canal Officer, on receiving an application in writing from any person injured by such neglect or refusal, shall serve notice on all the parties concerned that, on the expiration of a fortnight from the service, he will investigate the case; and shall, on the expiration of that period, investigate the case accordingly, and make such order thereon as to him seems fit.

Adjustment of claims between persons jointly using water-course.

Such order shall be appealable to the Commissioner, whose order thereon shall be final.

Any sum directed by such order to be paid within a specified period, may, if not paid within such period, and if the order remains in force, be recovered by the Collector from the person directed to pay the same, as if it were an arrear of land-revenue.

Recovery of amount found due.

20. Whenever application is made to a Divisional Canal Officer for a supply of water from a canal, and it appears to him expedient that such supply should be given and that it should be conveyed through some existing water-course, he shall give notice to the persons responsible for the maintenance of such water-course to show cause, on a day not less than fourteen days from the date of such notice, why the said supply should not be so conveyed; and, after making enquiry on such day, the Divisional Canal Officer shall determine whether and on what conditions the said supply shall be conveyed through such water-course.

Supply of water through intervening water-course.

When such officer determines that a supply of canal-water may be conveyed through any water-course as aforesaid, his decision shall, when confirmed or modified by the Superintending Canal Officer, be binding on the applicant and also on the persons responsible for the maintenance of the said water-course.

Such applicant shall not be entitled to use such water-course until he has paid the expense of any alteration of such water-course necessary in order to his being supplied through it, and also such share of the first cost of such water-course as the Divisional or Superintending Canal Officer may determine.

Such applicant shall also be liable for his share of the cost of maintenance of such water-course so long as he uses it.

21. Any person desiring the construction of a new water-course may apply in writing to the Divisional Canal Officer, stating—

Application for construction of new water-course.

(1) that he has endeavoured unsuccessfully to acquire from the owners of the land through which he desires such water-course to pass a right to occupy so much of the land as will be needed for such water-course;

(2) that he desires the said Canal Officer, in his behalf and at his cost, to do all things necessary for acquiring such right;

(3) that he is able to defray all costs involved in acquiring such right and constructing such water-course.

Procedure of Canal Officer thereupon.

22. If the Divisional Canal Officer considers—

(1) that the construction of such water-course expedient, and

that the statements in the application are

shall call upon the applicant to make such as the Divisional Canal Officer considers ary to defray the cost of the preliminary dings, and the amount of any compensation he considers likely to become due under on twenty-eight;

and, upon such deposit being made, he shall cause inquiry to be made into the most suitable alignment for the said water-course, and shall mark out the land which, in his opinion, it will be necessary to occupy for the construction thereof, and shall forthwith publish a notice in every village through which the water-course is proposed to be taken, that so much of such land as belongs to such village has been so marked out, and shall send a copy of such notice to the Collector of every district in which any part of such land is situate.

Application for transfer of existing water-course.

23. Any person desiring that an existing water-course should be transferred from its present owner to himself, may apply in writing to the Divisional Canal Officer, stating—

(1) that he has endeavoured unsuccessfully to procure such transfer from the owner of such water-course;

(2) that he desires the said Canal Officer, in his behalf and at his cost, to do all things necessary for procuring such transfer;

(3) that he is able to defray the cost of such transfer.

Procedure thereupon.

If the Divisional Canal Officer considers—

(*a*) that the said transfer is necessary for the better management of the irrigation from such water-course, and

(*b*) that the statements in the application are true,

he shall call upon the applicant to make such deposit as the Divisional Canal Officer considers necessary to defray the cost of the preliminary proceedings, and the amount of any compensation that may become due under the provisions of section twenty-eight in respect of such transfer;

and, upon such deposit being made, he shall publish a notice of the application in every village, and shall send a copy of the notice to the Collector of every district through which such water-course passes.

Objections to construction or transfer applied for.

24. Within thirty days from the publication of a notice under section twenty-two or section twenty-three, as the case may be, any person interested in the land or water-course to which the notice refers may apply to the Collector by petition, stating his objection to the construction or transfer for which application has been made.

The Collector may either reject the petition or may proceed to inquire into the validity of the objection, giving previous notice to the Divisional Canal Officer of the place and time at which such inquiry will be held.

The Collector shall record in writing all orders passed by him under this section and the grounds thereof.

When applicant may be placed in occupation.

25. If no such objection is made, or (where such objection is made) if the Collector over-rules it, he shall give notice to the Divisional Canal Officer to that effect, and shall proceed forthwith to place the said applicant in occupation of the land marked out or of the water-course to be transferred, as the case may be.

Procedure when objection is held valid.

26. If the Collector considers any objection made as aforesaid to be valid, he shall inform the Divisional Canal Officer accordingly; and, if such officer sees fit, he may, in the case of an application under section twenty-one, alter the boundaries of the land so marked out, and may give fresh notice under section twenty-two; and the procedure hereinbefore provided shall be applicable to such notice, and the Collector shall thereupon proceed as before provided.

Procedure when Canal Officer disagrees with Collector.

27. If the Canal Officer disagrees with the Collector, the matter shall be referred for decision to the Commissioner.

Such decision shall be final, and the Collector, if he is so directed by such decision, shall, subject to the provisions of section twenty-eight, cause the said applicant to be placed in occupation of the land so marked out or of the water-course to be transferred, as the case may be.

Expenses to be paid by applicant before receiving occupation.

28. No such applicant shall be placed in occupation of such land or water-course, until he has paid to the person named by the Collector such amount as the Collector determines to be due as compensation for the land or water-course so occupied or transferred, and for any damage caused by the marking out or occupation of such land, together with all expenses incidental to such occupation or transfer.

Procedure in fixing compensation.

In determining the compensation to be made under this section, the Collector shall proceed under the provisions of the Land Acquisition Act, 1870; but he may, if the person to be compensated so desire, award such compensation in the form of a rent-charge payable in respect of the land or water-course occupied or transferred.

Recovery of compensation and expenses.

If such compensation and expenses are not paid when demanded by the person entitled to receive the same, the amount may be recovered by the Collector as if it were an arrear of land-revenue, and shall, when recovered, be paid by him to the person entitled to receive the same.

Conditions binding on applicant placed in occupation.

29. When any such applicant is placed in occupation of land or of a water-course as aforesaid, the following rules and conditions shall be binding on him and his representative in interest:—

First.—All works necessary for the passage across such water-course, of water-courses existing

previous to its construction and of the drainage intercepted by it, and for affording proper communications across it for the convenience of the neighbouring lands, shall be constructed by the applicant, and be maintained by him or his representative in interest to the satisfaction of the Divisional Canal Officer.

Second.—Land occupied for a water-course under the provisions of section twenty-two shall be used only for the purpose of such water-course.

Third.—The proposed water-course shall be completed to the satisfaction of the Divisional Canal Officer within one year after the applicant is placed in occupation of the land.

In cases in which land is occupied or a water-course is transferred on the terms of a rent-charge,

Fourth.—The applicant or his representative in interest shall, so long as he occupies such land or water-course, pay rent for the same at such rate and on such days as are determined by the Collector when the applicant is placed in occupation.

Fifth.—If the right to occupy the land cease owing to a breach of any of these rules, the liability to pay the said rent shall continue until the applicant or his representative in interest has restored the land to its original condition, or until he has paid, by way of compensation for any injury done to the said land, such amount and to such persons as the Collector determines.

Sixth.—The Collector may, on the application of the person entitled to receive such rent or compensation, determine the amount of rent due or assess the amount of such compensation; and if any such rent or compensation be not paid by the applicant or his representative in interest, the Collector may recover the amount, with interest thereon at the rate of six per cent. per annum from the date on which it became due, as if it were an arrear of land-revenue, and shall pay the same, when recovered, to the person to whom it is due.

If any of the rules and conditions prescribed by this section are not complied with,

or if any water-course constructed or transferred under this Act is disused for three years continuously,

the right of the applicant, or of his representative in interest, to occupy such land or water-course shall cease absolutely.

Procedure applicable to occupation for extensions and alterations.

30. The procedure hereinbefore provided for the occupation of land for the construction of a water-course shall be applicable to the occupation of land for any extension or alteration of a water-course, and for the deposit of soil from water-course clearances.

PART IV.

OF THE SUPPLY OF WATER.

In absence of written contract, water-supply to be subject to rules.

31. In the absence of a written contract, or so far as any such contract does not extend, every supply of canal-water shall be deemed to be given at the rates and subject to the conditions prescribed by the rules to be made by the Local Government in respect thereof.

Conditions as to—

32. Such contracts and rules must be consistent with the following conditions:—

power to stop water-supply;

(*a*) The Divisional Canal Officer may not stop the supply of water to any water-course, or to any person, except in the following cases:—

(1) whenever and so long as it is necessary to stop such supply for the purpose of executing any work ordered by competent authority, and with the previous sanction of the Local Government:

(2) whenever and so long as any water-course is not maintained in such proper customary repair as to prevent the wasteful escape of water therefrom:

(3) within periods fixed from time to time by the Divisional Canal Officer:

claims to compensation in case of failure or stoppage of supply;

(*b*) No claim shall be made against the Government for compensation in respect of loss caused by the failure or stoppage of the water in a canal, by reason of any cause beyond the control of the Government, or of any repairs, alterations or additions to the canal, or of any measures taken for regulating the proper flow of water therein, or for maintaining the established course of irrigation which the Divisional Canal Officer considers necessary; but the person suffering such loss may claim such remission of the ordinary charges payable for the use of the water as is authorized by the Local Government:

claims on account of interruption from other causes;

(*c*) If the supply of water to any land irrigated from a canal be interrupted otherwise than in the manner described in the last preceding clause, the occupier or owner of such land may present a petition for compensation to the Collector for any loss arising from such interruption, and the Collector may award to the petitioner reasonable compensation for such loss:

duration of supply;

(*d*) When the water of a canal is supplied for the irrigation of a single crop, the permission to use such water shall be held to continue only until that crop comes to maturity, and to apply only to that crop; but if it be supplied for irrigating two or more crops to be raised on the same land within the year, such permission shall be held to continue for one year from the commencement of the irrigation, and to apply to such crops only as are matured within that year:

sale or sub-letting of canal-water;

(*e*) Unless with the permission of the Superintending Canal Officer, no person entitled to use the water of any canal, or any work, building or land appertaining to any canal, shall sell or sub-let or otherwise transfer his right to such use: Provided that the former part of this clause shall not apply to the use by a cultivating tenant of water supplied by the owner of a water-course for the irrigation of the land held by such tenant:

transfer, with land, of contracts for water;

But all contracts made between Government and the owner or occupier of any immovable property, as to the supply of canal-water to such property, shall be transferable therewith, and shall be presumed to have been so transferred whenever a transfer of such property takes place:

(f) No right to the use of the water of a canal shall be, or be deemed to have been, acquired under the Indian Limitation Act, 1871, Part IV, nor shall Government be bound to supply any person with water, except in accordance with the terms of a contract in writing.

No right acquired by user.

PART V.

OF WATER-RATES.

33. If water supplied through a water-course be used in an unauthorized manner, and if the person by whose act or neglect such use has occurred cannot be identified,

Liability when person using unauthorizedly cannot be identified.

the person on whose land such water has flowed if such land has derived benefit therefrom,

or if such person cannot be identified, or if such land has not derived benefit therefrom, all the persons chargeable in respect of the water supplied through such water-course,

shall be liable, or jointly liable, as the case may be, to the charges made for such use.

34. If water supplied through a water-course be suffered to run to waste, and if, after enquiry by the Divisional Canal Officer, the person through whose act or neglect such water was suffered to run to waste cannot be discovered, all the persons chargeable in respect of the water supplied through such water-course shall be jointly liable for the charges made in respect of the water so wasted.

Liability when water runs to waste.

35. All charges for the unauthorized use or for waste of water may be recovered in addition to any penalties incurred on account of such use or waste.

Charges recoverable in addition to penalties.

All questions under section thirty-three or section thirty-four shall be decided by the Divisional Canal Officer, subject to an appeal to the head revenue officer of the district, or such other appeal as may be provided under section seventy-five.

Decision of questions under sections 33 and 34.

36. The rates to be charged for canal-water supplied for purposes of irrigation to the occupiers of land shall be determined by the rules to be made by the Local Government, and such occupiers as accept the water shall pay for it accordingly.

Charge on occupier for water how determined.

A rate so charged shall be called the "occupier's rate."

'Occupier's rate.'

37. In addition to the occupier's rate, a rate to be called the "owner's rate" may be imposed, according to rules to be made by the Local Government, on the owners of canal-irrigated lands, in respect of the benefit which they derive from such irrigation.

'Owner's rate.'

38. The owner's rate shall not exceed the sum which, under the rules for the time being in force for the assessment of land-revenue, might be assessed on such land, on account of the increase in the annual value or produce thereof caused by the canal-irrigation. And for the purpose of this section only, land which is permanently settled or held free of revenue, shall be considered as though it were temporarily settled and liable to payment of revenue.

Amount of owner's rate.

39. No owner's rate shall be chargeable either on the owner or occupier of land temporarily assessed to pay land-revenue at irrigation rates, during the currency of such assessment.

Owner's rate not chargeable in respect of land temporarily assessed to land-revenue at irrigation rates.

40. If such land is occupied by the owner,

When occupier is to pay both owner's rate and occupier's rate.

or if it is occupied by a tenant whose rent is not liable to enhancement on the ground that the value of the produce of the land or the productive powers of the land has or have been increased by irrigation,

such owner or tenant shall pay the owner's rate as well as the occupier's rate.

41. In the case of a tenant with a right of occupancy, the Local Government shall have power to make rules for dividing the owner's rate between such tenant and his landlord, proportionately to the extent of the beneficial interest of each in the land.

Power to make rules for apportioning owner's rate.

42. If the owner of the land is not the occupier, but has power to enhance the rent of the occupier on the ground that the value of the produce or the productive powers of the land has or have been increased by irrigation;

When owner is to pay owner's rate.

or if, when the amount of rent was fixed, the land was irrigated from the canal,

the owner shall pay the owner's rate.

43. If a revision of settlement is a ground for entertaining a suit for the enhancement of rent, the introduction of canal-irrigation into any land shall have the same effect on the landlord's right to re-enhance the rent of a tenant with a right of occupancy of such land, as if a revision of settlement had taken place, under which the revenue payable in respect of such land had been increased.

Effect of introduction of canal-irrigation on landlord's right to enhance.

44. Where a water-rate is charged on land held by several joint owners, it shall be payable by the manager or other person who receives the rents or profits of such land, and may be deducted by him from such rents or profits before division, or may be recovered by him from the persons liable to such rate in the manner customary in the recovery of other charges on such rents or profits.

Water-rate by whom payable when charged on land held by several owners.

Recovery of Charges.

45. Any sum, lawfully due under this Part, and certified by the Divisional Canal Officer to be so due, which remains unpaid after the day on which it becomes due, shall be recoverable by the Collector from the person liable for the same as if it were an arrear of land-revenue.

Certified dues recoverable as land-revenue.

Power to contract for collection of canal-dues.

46. The Divisional Canal Officer or the Collector may enter into an agreement with any person for the collection and payment to the Government by such person of any sum payable under this Act by a third party.

When such agreement has been made, such person may recover such sum by suit as though it were a debt due to him, or an arrear of rent due to him on account of the land, work or building in respect of which such sum is payable, or for or in which the canal-water shall have been supplied or used.

If such person makes default in the payment of any sum collected by him under this section, such sum may be recovered from him by the Collector under section forty-five; and if such sum or any part of it be still due by the said third party, the sum or part so due may be recovered in like manner by the Collector from such third party.

Lambardárs may be required to collect canal-dues.

47. The Collector may require the lambardár or person under engagement to pay the land-revenue of any estate, to collect and pay any sums payable under this Act by a third party, in respect of any land or water in such estate.

Such sums shall be recoverable by the Collector as if they were arrears of land-revenue due in respect of the defaulter's share in such estate;

and for the purpose of collecting such sums from the subordinate zamíndárs, ryots, or tenants, such lambardár or person may exercise the powers, and shall be subject to the rules, laid down in the law for the time being in force, in respect to the collection by him of the rents of land or of shares of land-revenue.

The Local Government shall provide

(a) for remunerating persons collecting sums under this section; or

(b) for indemnifying them against expenses properly incurred by them in such collection; or

(c) for both such purposes.

Fines excluded from sections 45, 46, 47.

48. Nothing in sections forty-five, forty-six, or forty-seven applies to fines.

PART VI.

OF CANAL-NAVIGATION.

Detainer of vessels violating rules.

49. Any vessel entering or navigating any canal contrary to the rules made in that behalf by the Local Government, or so as to cause danger to the canal or the other vessels therein, may be removed, or detained, or both removed and detained, by the Divisional Canal Officer, or by any other person duly authorized in this behalf.

Liability of owners of vessels causing damage.

The owner of any vessel causing damage to a canal, or removed or detained under this section, shall be liable to pay to the Government such sum as the Divisional Canal Officer, with the approval of the Superintending Canal Officer, determines to be necessary to defray the expenses of repairing such damage, or of such removal or detention, as the case may be.

Recovery of fines for offences in navigating canals.

50. Any fine imposed under this Act upon the owner of any vessel, or the servant or agent of such owner or other person in charge of any vessel, for any offence in respect of the navigation of such vessel, may be recovered either in the manner prescribed by the Code of Criminal Procedure, or, if the Magistrate imposing the fine so directs, as though it were a charge due in respect of such vessel.

Power to seize and detain vessel on failure to pay charges.

51. If any charge due under the provisions of this Part in respect of any vessel is not paid on demand to the person authorized to collect the same, the Divisional Canal Officer may seize and detain such vessel and the furniture thereof, until the charge so due, together with all expenses and additional charges arising from such seizure and detention, is paid in full.

Power to seize cargo or goods, if charges due thereon are not paid.

52. If any charge due under the provisions of this Part in respect of any cargo or goods carried in a Government vessel on a canal, or stored on or in lands or warehouses occupied for the purposes of a canal, is not paid on demand to the person authorized to collect the same, the Divisional Canal Officer may seize such cargo or goods and detain them until the charge so due, together with all expenses and additional charges arising from such seizure and detention, is paid in full.

Procedure for recovery of such charges after seizure.

53. Within a reasonable time after any seizure under section fifty-one or section fifty-two the said Canal Officer shall give notice to the owner or person in charge of the property seized that it, or such portion of it as may be necessary, will, on a day to be named in the notice, but not sooner than fifteen days from the date of the notice, be sold in satisfaction of the claim on account of which such property was seized, unless the claim be discharged before the day so named:

And if such claim be not so discharged, the said Canal Officer may, on such day, sell the property seized or such part thereof as may be necessary to yield the amount due, together with the expenses of such seizure and sale:

Provided that no greater part of the furniture of any vessel or of any cargo or goods shall be so sold than shall, as nearly as may be, suffice to cover the amount due in respect of such vessel, cargo or goods.

The residue of such furniture, cargo or goods, and of the proceeds of the sale, shall be made over to the owner or person in charge of the property seized.

Procedure in respect of vessels abandoned and goods unclaimed.

54. If any vessel be found abandoned in a canal, or any cargo or goods carried in a Government vessel on a canal or stored on or in lands or warehouses occupied for the purposes of a canal, be left unclaimed for a period of two months, the Divisional Canal Officer may take possession of the same.

The officer so taking possession may publish a notice that, if such vessel and its contents, or such cargo or goods, are not claimed previously to a day to be named in the notice, not

sooner than thirty days from the date of such notice, he will sell the same; and, if such vessel, contents, cargo or goods be not so claimed, he may, at any time after the day named in the notice, proceed to sell the same.

Disposal of proceeds of sale.

The said vessel and its contents, and the said cargo or goods, if unsold, or, if a sale has taken place, the proceeds of the sale, after paying all tolls, charges and expenses incurred by the Divisional Canal Officer on account of the taking possession and sale, shall be made over to the owner of the same, when his ownership is established to the satisfaction of the Divisional Canal Officer.

If the Divisional Canal Officer is doubtful to whom such property or proceeds should be made over, he may direct the property to be sold as aforesaid, and the proceeds to be paid into the district treasury, there to be held until the right thereto be decided by a Court of competent jurisdiction.

PART VII.

OF DRAINAGE.

Power to prohibit obstructions or order their removal.

55. Whenever it appears to the Local Government that injury to any land or the public health or public convenience has arisen or may arise from the obstruction of any river, stream or drainage-channel, such Government may, by notification published in the official Gazette, prohibit, within limits to be defined in such notification, the formation of any obstruction, or may, within such limits, order the removal or other modification of such obstruction.

Thereupon so much of the said river, stream or drainage-channel as is comprised within such limits, shall be held to be a drainage-work as defined in section three.

Power to remove obstructions after prohibition.

56. The Divisional Canal Officer, or other person authorized by the Local Government in that behalf, may, after such publication, issue an order to the person causing or having control over any such obstruction to remove or modify the same within a time to be fixed in the order.

If, within the time so fixed, such person does not comply with the order, the said Canal Officer may himself remove or modify the obstruction; and if the person to whom the order was issued does not, when called upon, pay the expenses involved in such removal or modification, such expenses shall be recoverable by the Collector from him or his representative in interest as an arrear of land-revenue.

Preparation of schemes for works of improvement.

57. Whenever it appears to the Local Government that any drainage-works are necessary for the improvement of any lands, or for the proper cultivation or irrigation thereof,

or that protection from floods or other accumulations of water, or from erosion by a river, is required for any lands,

the Local Government may cause a scheme for such drainage-works to be drawn up and published, together with an estimate of its cost and a statement of the proportion of such cost which the Government proposes to defray, and a schedule of the lands which it is proposed to make chargeable in respect of the scheme.

Powers of persons employed on such schemes.

58. The persons authorized by the Local Government to draw up such scheme may exercise all or any of the powers conferred on Canal Officers by section fourteen.

Rate on lands benefited by works.

59. An annual rate, in respect of such scheme, may be charged, according to rules to be made by the Local Government, on the owners of all lands which shall, in the manner prescribed by such rules, be determined to be so chargeable.

Such rate shall be fixed as nearly as possible so as not to exceed either of the following limits :—

(1.) Six per cent. per annum on the first cost of the said works, adding thereto the estimated yearly cost of the maintenance and supervision of the same, and deducting therefrom the estimated income, if any, derived from the works, excluding the said rate :

(2.) In the case of agricultural land, the sum which, under the rules then in force for the assessment of land-revenue, might be assessed on such land on account of the increase of the annual value or produce thereof caused by the drainage-work.

Such rate may be varied from time to time within such maximum by the Local Government.

So far as any defect to be remedied is due to any canal, water-course, road or other work or obstruction, constructed or caused by the Local Government or by any person, a proportionate share of the cost of the drainage-works required for the remedy of the said defect shall be borne by such Government or such person as the case may be.

Recovery of rate.

60. Any such drainage-rate may be collected and recovered in manner provided by sections forty-five, forty-six and forty-seven, for the collection and recovery of water-rates.

Disposal of claims to compensation.

61. Whenever, in pursuance of a notification made under section fifty-five, any obstruction is removed or modified,

or whenever any drainage-work is carried out under section fifty-seven,

all claims for compensation on account of any loss consequent on the removal or modification of the said obstruction or the construction of such work, may be made before the Collector, and he shall deal with the same in the manner provided in section ten.

Limitation of such claims.

62. No such claim shall be entertained after the expiration of one year from the occurrence of the loss complained of, unless the Collector is satisfied that the claimant had sufficient cause for not making the claim within such period.

PART VIII.

OF OBTAINING LABOUR FOR CANALS AND DRAINAGE WORKS.

Definition of "labourer."

63. For the purposes referred to in this Part the word "labourer" includes persons who exercise any handicraft specified in rules to be made in that behalf by the Local Government.

Power to prescribe number of labourers to be supplied by persons benefited by canal.

64. In any district in which a canal or drainage-work is constructed, maintained or projected by Government, the Local Government may, if it thinks fit, direct the Collector

(a) to ascertain the proprietors, sub-proprietors or farmers, whose villages or estates are or will be, in the judgment of the Collector, benefited by such canal or drainage-work, and

(b) to set down in a list, having due regard to the circumstances of the district and of the several proprietors, sub-proprietors or farmers, the number of labourers which shall be furnished by any of the said persons, jointly or severally, from any such village or estate, for employment on any such canal or drainage-work when required as hereinafter provided.

The Collector may, from time to time, add to or alter such list or any part thereof.

Procedure for obtaining labour for works urgently required.

65. Whenever it appears to a Divisional Canal Officer duly authorized by the Local Government, that, unless some work is immediately executed, such serious damage will happen to any canal or drainage-work as to cause sudden and extensive public injury,

and that the labourers necessary for the proper execution thereof cannot be obtained in the ordinary manner within the time that can be allowed for the execution of such work so as to prevent such injury,

the said officer may require any person named in such list to furnish as many labourers (not exceeding the number which, according to the said list, he is liable to supply) as to the said officer seem necessary for the immediate execution of such work.

Every requisition so made shall be in writing, and shall state

(a) the nature and locality of the work to be done,

(b) the number of labourers to be supplied by the person upon whom the requisition is made, and

(c) the approximate time for which and the day on which the labourers will be required;

and a copy thereof shall be immediately sent to the Superintending Canal Officer for the information of the Local Government.

The Local Government shall fix, and may from time to time alter, the rates to be paid to any such labourers: provided that such rates shall exceed the highest rates for the time being paid in the neighbourhood for similar work. In the case of every such labourer, the payment shall continue for the whole period during which he is, in consequence of the provisions of this Part, prevented from following his ordinary occupation.

The Local Government may, with the previous sanction of the Governor General in Council, direct that the provisions of this Part shall apply, either permanently or temporarily (as the case may be), to any district or part of a district for the purpose of effecting necessary annual silt-clearances, or to prevent the proper operation of a canal or drainage-work being stopped or so much interfered with as to stop the established course of irrigation or drainage.

Liability of labourers under requisition.

66. When any requisition has been made on any person named in the said list, every labourer ordinarily resident within the village or estate of such person shall be liable to supply, and to continue to supply, his labour, for the purposes aforesaid.

PART IX.

OF JURISDICTION.

Jurisdiction under this Act of Civil Courts.

67. Except where herein otherwise provided, all claims against Government in respect of anything done under this Act may be tried by the Civil Courts; but no such Court shall in any case pass an order as to the supply of canal-water to any crop sown or growing at the time of such order.

Settlement of differences as to mutual rights and liabilities of persons interested in water-course.

68. Whenever a difference arises between two or more persons in regard to their mutual rights or liabilities in respect of the use, construction, or maintenance of a water-course, any such person may apply in writing to the Divisional Canal Officer stating the matter in dispute. Such officer shall thereupon give notice to the other persons interested that, on a day to be named in such notice, he will proceed to enquire into the said matter. And, after such enquiry, he shall pass his order thereon, unless he transfers (as he is hereby empowered to do) the matter to the Collector, who shall thereupon enquire into and pass his order on the said matter.

Such order shall be final as to the use or distribution of water for any crop sown or growing at the time when such order is made, and shall thereafter remain in force until set aside by the decree of a Civil Court.

Power to summon and examine witnesses.

69. Any officer empowered under this Act to conduct any inquiry may exercise all such powers connected with the summoning and examining of witnesses, as are conferred on Civil Courts by the Code of Civil Procedure; and every such inquiry shall be deemed a judicial proceeding.

PART X.

OF OFFENCES AND PENALTIES.

Offences under Act.

70. Whoever, without proper authority and voluntarily, does any of the acts following, that is to say,—

(1) damages, alters, enlarges or obstructs any canal or drainage-work;

(2) interferes with, increases or diminishes the supply of water in, or the flow of water from, through, over or under, any canal or drainage-work;

(3) interferes with or alters the flow of water in any river or stream, so as to endanger, damage or render less useful any canal or drainage-work;

(4) being responsible for the maintenance of a water-course, or using a water-course, neglects to take proper precautions for the prevention of waste of the water thereof, or interferes with the authorized distribution of the water therefrom, or uses such water in an unauthorized manner;

(5) corrupts or fouls the water of any canal so as to render it less fit for the purposes for which it is ordinarily used;

(6) causes any vessel to enter or navigate any canal contrary to the rules for the time being prescribed by the Local Government for entering or navigating such canal;

(7) while navigating on any canal, neglects to take proper precautions for the safety of the canal and of vessels thereon;

(8) being liable to furnish labourers under Part VIII of this Act, fails, without reasonable cause, to supply or to assist in supplying the labourers required of him;

(9) being a labourer liable to supply his labour under Part VIII of this Act, neglects, without reasonable cause, so to supply, and to continue to supply, his labour;

(10) destroys or moves any level-mark or water-gauge fixed by the authority of a public servant;

(11) passes, or causes animals or vehicles to pass, on or across any of the works, banks or channels of a canal or drainage-work contrary to rules made under this Act, after he has been desired to desist therefrom;

(12) violates any rule made under this Act, for breach whereof a penalty may be incurred,

Penalty.

shall be liable, on conviction before a Magistrate of such class as the Local Government directs in this behalf, to a fine not exceeding fifty rupees, or to imprisonment not exceeding one month, or to both.

Saving of prosecution under other laws.

71. Nothing herein contained shall prevent any person from being prosecuted under any other law for any offence punishable under this Act: Provided that no person shall be punished twice for the same offence.

Compensation to person injured.

72. Whenever any person is fined for an offence under this Act, the Magistrate may direct that the whole or any part of such fine may be paid by way of compensation to the person injured by such offence.

Power to arrest without warrant.

73. Any person in charge of or employed upon any canal or drainage-work, may remove from the lands or buildings belonging thereto, or may take into custody without a warrant and take forthwith before a Magistrate or to the nearest police-station, to be dealt with according to law, any person who, within his view, commits any of the following offences:

(1) wilfully damages or obstructs any canal or drainage-work;

(2) without proper authority interferes with the supply or flow of water in or from any canal or drainage-work, or in any river or stream, so as to endanger, damage or render less useful any canal or drainage-work.

Definition of 'Canal.'

74. In this Part the word 'Canal' shall (unless there be something repugnant in the subject or context) be deemed to include also all lands occupied by Government for the purposes of canals, and all buildings, machinery, fences, gates and other erections, trees, crops, plantations or other produce, occupied by or belonging to Government, upon such lands.

PART XI.

OF SUBSIDIARY RULES.

Power to make, alter and cancel rules.

75. The Local Government may, from time to time, with the previous sanction of the Governor General in Council, make rules to regulate the following matters:—

(1) the proceedings of any officer who, under any provision of this Act, is required or empowered to take action in any matter;

(2) the cases in which, and the officers to whom, and the conditions subject to which, orders and decisions given under any provision of this Act, and not expressly provided for as regards appeal, shall be appealable;

(3) the persons by whom, the time, place or manner at or in which, anything for the doing of which provision is made in this Act, shall be done;

(4) the amount of any charge made under this Act;

(5) and generally to carry out the provisions of this Act.

The Local Government may from time to time, with the like sanction, alter or cancel any rules so made.

Publication of rules.

Such rules, alterations and cancelments shall be published in the local official Gazette, and shall thereupon have the force of law.

SCHEDULE.

(See section 2.)

Number and year.	Title.	Extent of repeal.
VII of 1815.	An Act for regulating the Levy of Water-rent, Tolls, and Dues on certain Canals for Irrigation and Navigation, constructed by Government in the North-Western Provinces, and for the Protection of the said Canals from Injury.	The whole.
XIV of 1863.	An Act to amend Act X of 1859 (to amend the law relating to the Recovery of Rent in the Presidency of Fort William in Bengal).	Section fifteen.
XII of 1866.	An Act to provide for the compulsory taking of rights to form and maintain private water-courses from public works of irrigation.	The whole.
XXX of 1871.	An Act to regulate Irrigation, Navigation and Drainage in the Panjáb.	The whole.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 19.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th February 1873, and was referred to a Select Committee with instructions to make their report thereon in a month :—

No. 4 of 1873.

THE NORTH-WESTERN PROVINCES RENT BILL, 1873.

CONTENTS.

PREAMBLE.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
2. Acts repealed.
3. Interpretation-clause.

CHAPTER II.

RIGHTS AND LIABILITIES OF LANDLORD AND TENANTS.

4. Persons holding land at fixed rent without change since permanent settlement to continue to hold at such rates.
5. Tenants holding land at fixed rates to have right of occupancy at those rates.
6. Presumption where rent of land not changed for twenty years.
7. Tenants with right of occupancy at privileged rates.
8. Right of occupancy of tenant cultivating or holding land for twelve years.
   Tenants barred from such right.
9. Rights under sections 5, 7 and 8 when transferable.

I.—Leases.

10. Lease to which tenant is entitled.
11. Leases to which tenants having right of occupancy are entitled.
12. Leases to which tenants not having right of occupancy are entitled.
13. Landlord granting lease entitled to counterpart engagement.
14. Relinquishment of land by tenant.
15. Service of notice through tahsíldár, if landlord or agent refuse to receive it.
16. Mode of serving notice.
    Determination of class of tenure of tenant.

II.— Enhancement and Abatement of Rent.

17. Bar to enhancement of rent of tenants with right of occupancy at fixed rates.
18. Enhancement in case of tenants with privileged right of occupancy.
19. Enhancement after decree fixing rent.

SECTIONS.

20. Enhancement in case of tenants with right of occupancy under section 8.
Ground for enhancement.
Selection of villages for comparison.
21. Enhancement, in case of tenant with right of occupancy, after fixing of rent by decree.
Cases excepted.
22. Time for instituting suits for enhancement.
Decrees when to take effect.
23. Bar to enhancement except by agreement or under decree.
24. Grounds of claim to abatement by tenant with right of occupancy.

III.—On Commutation of Rent and Payment in Kind.

25. Commutation of rents in kind to fixed money payment.
Power to apply provisions of section to districts;
to empower officers to decide suits, and to lay down rules.
26. Application by tenant for deputation of officer to divide produce or appraise crop, when landlord neglects to attend.
27. Procedure on such application.

IV.—Ejectment.

28. Liability of tenant to pay interest on arrear and to be ejected.
Bar to ejectment without decree.
Ejectment not to be decreed for certain breaches of lease.
29. Procedure for ejectment of tenant with right of occupancy, or holding under unexpired lease.
30. In case of tenant for limited period, landlord may serve notice.
31. Contents of notice.
32. Mode of serving notice.
33. Effect of failure of tenant to institute suit to contest liability to ejectment.
34. Procedure to enforce ejectment.
Saving of tenant's right to sue.
Notice of ejectment when void.
35. Right of ejected tenant to value of growing crops or ungathered produce.
36. Application for assessment of rent-free land.
Limitation.
Written deed of grant valid against applicant.
Possession for 50 years to vest proprietary right.
Saving of liability for Government revenue.

V.—Compensation for Improvements made by Tenants.

37. Tenants' right to compensation for improvements.
38. Basis of, and mode of making, compensation.
39. Settlement of difference as to amount or value of compensation.
40. Reference to arbitration.
41. Right of tenant to damages for exactions in excess of rent or for withholding receipt.
Contents of receipt.

SECTIONS.

42. Damages for extorting payment of rent by duress.
Liability to punishment for extortion not affected.

VI.—Deposit of Rent in Government Treasury.

43. Deposit of amount tendered by tenant and refused.
44. Form and verification of application.
Penalty for false statement.
45. Notice to issue on deposit being made.
46. Mode of serving notice.
47. Payment to person served with notice on his application.
48. Refund to depositor.

CHAPTER III.

DISTRAINT.

49. Produce of land hypothecated for rent.
Recovery of arrears by distraint.
Bar to distraint of produce covered by security.
Sharer not entitled to distrain.
50. No distraint for over-due arrear, nor, without agreement, for excess over past year's rent.
51. Distraint by managers under Court of Wards, &c.
Liability to damages for illegal act.
52. Persons empowered to distrain to give written authority to servants employed to make distress.
53. Standing crops, and crops gathered liable to distraint.
Exception.
54. Defaulter to be served with written demand and account.
Mode of service.
55. Distress to be proportionate to arrear.
List of property to be prepared, and copy served on owner.
56. Standing crops, &c., when attached, may be reaped and stored by cultivator, or, if he neglect, by distrainer.
Sale of products which cannot be stored.
57. Assistance to distrainer opposed or apprehending resistance.
58. Distress to be withdrawn on tender of arrear and expenses before sale.
59. Application for sale.
60. Contents of application.
Deposit of cost of service of notice.
61. Procedure by Amín, &c., on receipt of application.
62. Amín to suspend sale on receipt of Court's certificate of institution of suit.
63. Suit to contest distrainer's demand before issue of notice of sale.
64. Distress when to be withdrawn.
65. When sale may be proceeded with.
66. Place of sale.
Manner of sale.
Withdrawal of distress when demand and costs satisfied.
67. If fair price be not offered, sale may be postponed and shall be then completed.
68. Payment of purchase-money.
Re-sale on default.
Certificate to purchaser.
69. Deduction, from proceeds, of costs of sale.
Payment of distrainer's expenses.

SECTIONS.

Discharge of arrear with interest.
Surplus.
70. Sale-officers and employees prohibited from purchasing.
71. Report of irregularities by distrainer.
Postponement of sale, and report to Court when defaulter has not received due notice.
Order of Court.
72. Levy of charge when sale-officer attends and no sale takes place.
Recovery from owner.
Recovery from distrainer.
Limit to charge.
73. Proceedings of Amíns, &c., subject to revision and orders of Collector.
Power to call for reports and statements.
74. Order of sale when amount adjudged due.
Second proclamation of sale.
Sale on failure to pay debt and costs.
75. In suit to contest his demand, distrainer to prove arrear.
Recovery of amount decreed in favour of distrainer.
Compensation in case of vexatious distress.
76. Suit by person claiming property distrained for arrears alleged to be due from another.
Release of property on security being given.
Order of Court when claim dismissed.
Decree for release and compensation when claim upheld.
Saving of prior claim of person entitled to rent of land.
77. Procedure where right to distrain is claimed by other than distrainer.
Saving of right to sue in Civil Court.
78. Persons prevented from suing in time to save property from sale, may sue for damages.
79. Wrongful acts of distrainer.
80. Suit by owner against person distraining or selling without authority.
Penalty in addition to damages.
81. Limitation of suits under sections 78, 79, 80.
82. Procedure in case of resistance to distraint.

CHAPTER IV.

OF PROCESS.

83. Mode of serving process.
Deposit before issue.
Power to direct service free of charge.
84. Punishment for resistance of process.
Power to issue summons and warrant.
Orders under this section appeal against.

CHAPTER V.

JURISDICTION OF COURTS AND APPEALS.

Suits cognizable under the Act.

85. Suits cognizable by Revenue Courts only.
Bar to cognizance by other Courts.

IV.—Suits by, and against, Lambardárs, Co-sharers and Muafúdárs.

V.—Appeals.

Investigation of plea of set-off.
86. Judgment of Collector final where amount, or value of property, in suit, does not exceed 100 rupees,
unless certain questions determined.
Appeal in such cases.
87. In suits not open to appeal, Collector may grant re-hearing upon discovery of new evidence, &c.
88. Appeal from decision of Collector of second class.
89. Time for presentation.
Time to be excluded from reckoning.
90. Procedure in appeal.
91. Re-admission of appeal.
92. Judgment in appeal.
93. Appeal to District Judge.
Appeal to High Court.
94. Rules as to time of presentation, &c., to apply.
95. Special appeal to High Court from decisions of District Judge.
96. Rules as to last day for presentation, deposit or payment, when Court is closed on such day.

VI.—Limitation of Suits.

97. Limitation of suits.

VII.—Applications and Appeals.

98. Applications cognizable by Revenue Courts only.
99. Notice to defendant.
100. Time for presenting appeals from orders.
Power to Board to call for cases.

VIII.—Jurisdiction of Courts.

101. Local Government may invest officers with Collector's powers, and withdraw them.
102. Suits and applications cognizable by Collectors.
103. Additional suits and applications cognizable by Collector, first class.
104. Additional suits cognizable by Collector, first class, specially empowered.

CHAPTER VI.

ON PROCEDURE UP TO JUDGMENT.

105. Mode of instituting suits. Contents of plaint or statement of claim.
106. Statement by whom to be presented.
107. Verification of statement.
108. Document relied on by plaintiff to be presented with statement.
Admission afterwards.
109. Procuring production of document in possession of defendant.
110. Contents of statement in suits for arrears of rent.
111. Contents of statement in suits for ejectment,
or for recovery of occupancy or possession.
112. Return or amendment of statement.
113. Issue of summons; order for personal attendance or appearance by agent.
114. Fixing of day to be specified in the summons,
order to produce documents,
and to bring witnesses.
115. Mode of serving summons.
116. Endorsement on summons as to mode of service.
117. Service of summons in another district.
118. Deposit of cost of serving summons or warrant.
Effect of failure to deposit.

SECTIONS.

119. Procedure when plaintiff desires issue of warrant of arrest.
120. Procedure after arrest of defendant.
121. Procedure when defendant is brought before Court under warrant.
Form of security-bond.
122. Procedure when defendant cannot be arrested under warrant.
123. Compensation for arrest applied for without reasonable cause.
124. Consequence of neither party appearing on day fixed.
125. If defendant only appear, Court shall pass judgment by default; or decree upon admission of claim.
Proviso.
126. If plaintiff only appear, Court may proceed *ex parte*.
127. If defendant appear on adjourned hearing, Court may allow him to be heard in answer.
128. No appeal from judgment *ex parte* or by default;
but Court may revive suit and alter or rescind decree.
Adverse party to be summoned.
129. Examination and cross-examination of parties and agents.
Defendant may file written statement.
130. Mode of examination.
131. Witness produced may be examined.
132. Document relied on by defendant to be produced at first hearing.
133. Decree after examination, if no further evidence is required.
134. Party to attend in person when his agent is unable to answer.
Judgment or order, if he fail to appear.
135. Procedure when parties at issue on question requiring evidence.
136. Parties to produce witnesses or procure attendance by summons.
137. Provisions regarding attendance, examination, &c., of witnesses.
138. Case to be struck off if neither party appears;
Trial of issue *ex parte*.
139. Provisions to apply when suits are instituted or defended on behalf of landholders by their employees.
Processes served on such employees.
140. Personal attendance of female plaintiff or defendant when not required.
141. Parties may employ agents or mukhtárs; but personal attendance not excused.
Fee for agent not chargeable as costs.
142. Court may grant time or adjourn hearing.
143. Court may cause local enquiry and report, or may itself enquire.
Provisions applied to such enquiry.
Record in case of enquiry by Court.
144. Defendant may pay admitted debt and costs into Court.
Plaintiff chargeable with subsequent costs if he proceed and recover no further sum.
145. No interest to plaintiff after date of deposit by defendant.
146. In suits for rent, third person who has enjoyed it to be made a party.
Saving of right to sue in Civil Court to prove title to rent.

SECTIONS.

147. Provisions of Civil Procedure Code as to arbitrations applied.
148. Court may order tenant to repair damage caused by breach of contract or lease, for which ejectment or cancelment of lease is decreed.
149. Delivery of judgment.
Language and contents.
When it may be in English.

CHAPTER VII.

PROCEDURE IN EXECUTION OF DECREE.

150. Mode of executing decree for ejectment or re-instatement of ryot.
Magistrate to give it effect in case of opposition.
151. Mode of executing decree for cancelment of lease or for ejectment or re-instatement of farmer or tenant.
152. Power to order detention in, or commitment to, civil jail, in certain cases.
153. Process against surety on failure to deliver judgment-debtor into custody.
154. Process of execution against person or property, but not both.
Applications on which it may issue.
Form of process.
155. Execution against movable property.
Articles excepted from attachment.
156 Date and duration of warrant.
157. Second and successive warrants.
158. After one year execution not to issue without notice to party concerned.
159. Execution not to issue against heir or representative of deceased party without notice.
160. No process of execution after three years, if judgment be for sum not exceeding five hundred rupees.
Regulation of period in such cases.
161. Procedure in execution of warrant against person.
Limit of imprisonment.
162. No person to be imprisoned a second time under same judgment.
When further liability extinguished.
When not extinguished.
163. Diet-money to be deposited at time of issue of warrant.
164. Effect of non-payment of diet-money in advance during imprisonment.
165. Diet-money spent to be costs in suit.
Refund of remainder.
166. Procedure in executing writ against movable property.
167. Time to elapse before sale of movable property.
Custody meanwhile.
Provisions applied to sales.
168. Examination of third party claiming interest in property.
Stay of sale.
169. Adjudication of such claims.
Rules applied.
170. Compensation awardable against claimant failing to establish right.
171. No appeal from order under sections 169, 170.
Right to sue in Civil Court.
Proviso.
172. Sale not vitiated by irregularity in publishing or conducting it.

SECTIONS.

Right to sue for damage.
Limitation.

173. Sale of transferable undertenures in execution of decrees for arrears of rent due in respect thereof.
Exception.
Process for recovery of portion of decree remaining unsatisfied after sale of tenure.

174. If third party claim land, share or interest to be sold, Court to stay sale and enquire into and adjudicate upon the claim.

175. Rules applied to adjudication of such claims.
No appeal.
Right to sue in Civil Court.

176. In execution decrees for money, if judgment not otherwise satisfied, execution may be applied for against immovable property.

177. Mode of executing process if immovable property be a house or other building.

178. Procedure in case of objection offered before sale.

A Bill to consolidate and amend the law relating to the recovery of Rent in the North-Western Provinces.

Preamble.

WHEREAS it is expedient to consolidate and amend the law relating to the recovery of Rent in the North-Western Provinces of the Presidency of Fort William in Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. This Act may be called "The North-Western Provinces Rent Act, 1873:"

Local extent.

It extends to the territories under the government of the Lieutenant Governor of the North-Western Provinces, except the Jhánsí Division, the Province of Kumaon, the Terai Parganas, the Parganas of Agori, Singrauli and Bichipúr, and the tract of country known as Jaunsár Báwar;

Commencement.

And it shall come into force on the passing thereof.

Acts repealed.

2. Act No. X of 1859 (*to amend the law relating to the recovery of Rent in the Presidency of Fort William in Bengal*), Act No. XIV of 1863 (*to amend Act X of* 1859) and Act XXII of 1872 (*to explain and amend Act* No. X of 1859) are hereby repealed.

Interpretation-clause.

3. In this Act, unless there be something repugnant in the subject or context—

'Land.'

(1.) 'Land' means land assessed, or liable to be assessed, and land the revenue whereof has been assigned or released by Government:

'Rent.'

(2.) 'Rent' means whatever is payable by the tenant on account of the use or occupation of land:

'Tenant.'

(3.) 'Tenant' means any occupant of land, who is, or, but for a special contract, would be, liable to pay rent therefor:

'Landlord.'

(4.) 'Landlord' means the person to whom a tenant is liable to pay rent:

'Seer.'

(5.) For the purposes of this Act, 'Seer' means—

(*a.*) land which was recorded as seer at last settlement, and has been continuously so recorded since; or,

(*b.*) land continuously cultivated by the proprietor himself, with his own stock or by hired labour, for twelve years; or,

(*c.*) land which is recognized by village-custom as the special holding of a co-sharer, and is treated as such in the distribution of profits or charges among the co-sharers:

'Arrear of rent or revenue.'

(6.) An 'arrear of rent or revenue' means any instalment of rent or revenue which is not paid on or before the day when the same became due, whether under written engagement, or according to law or local usage:

'Collector of the District.'

(7.) 'Collector of the District' means the Officer in charge of the Revenue Administration of the District:

'Civil Jail.'

(8.) 'Civil Jail' means the civil jail of the District, and includes any place appointed by the Local Government for the confinement of prisoners under sentence of any Court constituted under this Act:

'Názir.'

(9.) 'Názir' includes any officer of a Court who is authorised to serve or execute its process.

CHAPTER II.

RIGHTS AND LIABILITIES OF LANDLORD AND TENANTS.

Persons holding land at fixed rent without change since permanent settlement to continue to hold at such rates.

4. Persons possessing a permanent transferable interest in land, intermediate between the proprietor of an estate and the tenants, and who, in the permanently-settled districts, hold (otherwise than under a terminable lease) at a fixed rent which has not been changed from the time of the permanent settlement, shall continue to hold at such rent.

Tenants holding land at fixed rates to have right of occupancy at those rates.

5. Tenants who, in the permanently-settled districts, hold lands at fixed rates which have not been changed since the permanent settlement, shall have a right of occupancy at those rates, and shall be called 'tenants with a right of occupancy at fixed rates.'

Presumption where rent of land not changed for 20 years.

6. Whenever, in any suit under this Act, it is proved that the rent at which land is held by a tenant, or person mentioned in section four, has not been changed for a period of twenty years next before the commencement of the suit, it shall be presumed that the land has been held at that rent from the time of the permanent settlement, unless the contrary be shown, or unless it be proved that such rent was fixed at some later period.

Tenants with right of occupancy at privileged rates.

7. All tenants in a village who have lost their proprietary rights in such village, or whose ancestors have lost such rights since the introduction of British Rule, and all persons who may lose such rights hereafter, in any of the ways following, namely:—

(1.) by sale for arrears of revenue:

(2.) by sale in execution of a decree of a Civil or Revenue Court:

(3.) by private agreement, sale or mortgage:

(4.) by confiscation under Act No. XI of 1857 or Act No. XIV of 1857,

shall have a right of occupancy at privileged rates in any lands, situated in such village, cultivated by them at the time of the passing of this Act, or at the date of their ceasing to be proprietors, if such date is subsequent to the passing of this Act.

Right of occupancy of tenant cultivating or holding land for 12 years.

8. Every tenant who has held or cultivated land continuously for twelve years has a right of occupancy in the land so held or cultivated by him.

The holding of the father or other person from whom the tenant inherits, shall be deemed to be the holding of the tenant within the meaning of this section:

Tenants barred from such right.

Provided, that no right of occupancy shall be acquired under this section after the passing of this Act—

(1.) by any tenant in land sub-let by him to others:

(2.) by any tenant in land which he holds from an occupancy or privileged tenant, or tenant holding at fixed rates:

(3.) by any tenant in seer land:

(4.) by any tenant in land held by him under a written contract, expressly stipulating that he shall acquire no right of occupancy in such land:

(5.) by any tenant in land held by him on condition of service.

Rights under sections 5, 7 and 8 when transferable.

9. All rights of occupancy acquired under sections five, seven and eight, shall be heritable, but not transferable *inter vivos*, except when they are transferable by local custom.

1.—*Leases.*

Lease to which tenant is entitled.

10. Every tenant is entitled to receive from the person to whom the rent of the land held or cultivated by him is payable, a lease containing the following particulars:—

(*a.*) the quantity of such land; and, where the fields have been numbered in a Government survey, the number of each field:

(*b.*) the amount of annual rent:

(*c.*) the instalments in which the same is to be paid:

(*d.*) any special conditions of the lease:

(*e.*) if the rent is payable in kind, the proportion to be delivered and mode of valuation, and the time and manner and place of delivery.

Leases to which tenants having right of occupancy are entitled.

11. Tenants having a right of occupancy are entitled to receive leases at rates of rent determined in accordance with the provisions contained in sections eighteen and twenty.

Leases to which tenants not having right of occupancy are entitled.

12. Tenants not having a right of occupancy are entitled to leases only on such terms as may be agreed upon between them and their landlord:

Provided that no lease shall be granted, and no rent of land shall be fixed, by any landlord, for any period exceeding the term of his own engagements with Government for his land; and that, in case any lease is granted, or the rent of the land be fixed for any longer period, the lease or engagement shall be null and void for the excess beyond such term.

Landlord granting lease entitled to counterpart engagement.

13. Every landlord who grants a lease is entitled to receive a reciprocal engagement from the tenant, executed by the tenant, and conformable with the terms of the lease.

The tender to any tenant of a lease, such as the tenant is entitled to receive, shall entitle the person to whom the rent is payable to receive a reciprocal engagement from such tenant.

Relinquishment of land by tenant.

14. Every tenant holding from year to year shall continue liable for the rent of the land in his holding for the ensuing year, unless on or before the first day of May in any year he gives notice in writing to the landlord, or his recognized agent, of his desire to relinquish such land at the close of the agricultural year, and relinquishes it accordingly:

or unless it has been let to any other person by such landlord or agent.

Service of notice through tahsíldár, if landlord or agent refuse to receive it.

15. If the landlord or his agent refuse to receive such notice, and to sign a receipt for the same, the tenant may make an application to the tahsíldár, who shall cause the notice to be served on such landlord or agent, the tenant paying the costs of service.

Mode of serving notice.

16. The notice shall, if practicable, be served personally on the landlord or agent; but if he cannot be found, service may be made by affixing the notice at his usual place of residence, or if he does not reside in the district wherein the land is situated, at the *chaupál*, or other conspicuous place in the village where the land is situate.

Determination of class of tenure of tenant.

On the application of any tenant to have his class of tenure determined the Collector shall determine the class to which he belongs, namely,

whether he has a right of occupancy at fixed rates

or a right of occupancy at privileged rates,

or a right of occupancy only,

or whether he is a tenant without a right of occupancy.

2.—*Enhancement and Abatement of Rent.*

Bar to enhancement of rent of tenants with right of occupancy at fixed rates.

17. The rent paid by tenants with right of occupancy at fixed rates shall not be liable to enhancement.

Enhancement in case of tenants with privileged right of occupancy.

18. The rent paid by tenants having a privileged right of occupancy shall not be enhanced except by decree passed in a suit brought under this Act, or by an order passed by a Settlement Officer under the law for the time being in force;

and such rent shall be raised to a rate which shall be two annas in the rupee less than the rate which they would have to pay under section nineteen, if they were occupancy tenants.

Enhancement after decree fixing rent.

19. After the passing of such decree or order, the rent so fixed shall not be liable to enhancement during the term of settlement in the temporarily-settled districts;

or, in the permanently-settled districts, for thirty years from the date of such decree or order.

Enhancement in case of tenants with right of occupancy under section 8.

20. The rent paid by tenants with right of occupancy under section eight shall not be liable to enhancement, except—

(1.) by a written agreement, to be attested before the Kánungo:

(2.) by order of a Settlement Officer passed under the North-Western Provinces Revenue Act, section seventy-six:

(3.) by suit under this Act.

Ground for enhancement.

Enhancement shall be decreed or ordered only on the ground that the rate of rent paid by such tenant is below the prevailing rate payable by the same class of tenants for land of a similar quality, with similar advantages in villages of a similar quality, with similar advantages.

The word 'class' shall not be deemed to include caste, unless it is proved that, by the local custom, caste is taken into account in the determination of the rate of rent:

Selection of villages for comparison.

Provided that, whenever the district or tahsíl, or other local area in which such land is situated, shall have been divided by the Settlement Officer into circles of like capacity and soil, the villages of similar quality, with like advantages, for the purpose of this section, shall be selected from the villages in such circles.

When the Settlement Officer has not divided the district or other local area as aforesaid, the Court shall select, for the purpose of comparison, villages of similar quality and with similar advantages, from the tahsíl in which the land to be enhanced is situated, or a tahsíl immediately adjacent.

Enhancement, in case of tenant with right of occupancy, after fixing of rent by decree.

21. After the rent of any tenant with right of occupancy under section eight has been fixed by any decree under this Act, such rent shall not be liable to enhancement for the period of ten years after passing of such decree, or until the period of settlement of the district shall lapse, whichever term shall first expire:

Cases excepted.

Nothing in this section applies—

(1.) to cases in which land has been gained by alluvion after the date of such decree;

(2.) to cases in which the area of the tenant's holding has been added to since the date of such decree;

(3.) to cases in which the productive powers of the land have been increased, otherwise than by the agency or at the expense of the tenant, after the date of such decree.

Time for instituting suits for enhancement.

22. Suits for enhancement must be brought on or before the fifteenth day of November preceding the agricultural year for which enhancement is sought,

Decrees when to take effect.

and all decrees for enhancement passed under the last preceding section shall take effect from the first day of July next following the date of the decree.

Bar to enhancement except by agreement or under decree.

23. No tenant shall be liable to pay rent in excess of that payable in the last preceding year,

unless the parties have agreed as to the rent to be paid, and have attested their agreement before the Kánungo of the pargana,

or unless the rent has been enhanced by decree of Court.

Grounds of claim to abatement by tenant with right of occupancy.

24. Every tenant having a right of occupancy shall be entitled to claim an abatement of the rent previously paid by him on either of the following grounds:—

1*st*,—That the area of the land has been diminished by diluvion or otherwise:

2*nd*,—That the productive powers of the land have been decreased by any cause beyond the power of the tenant.

3.—*On Commutation of Rent and Payment in Kind.*

Commutation of rents in kind to fixed money payment.

25. In all cases in which rents have heretofore been paid in kind, or on the estimated value of a portion of the crop, any officer employed in making or revising the settlement of the land-revenue, may, on a suit instituted, either by the tenant, not being a tenant-at-will, or by the landlord, make a decree commuting such rent into a fixed money payment.

The rate or amount of rent thus fixed shall be binding upon the parties concerned, subject to the provisions of this Act, and shall take effect from the first day of July next following the date of the decree.

Power to apply provisions of section to districts;

The Local Government may, by a notification in the official Gazette,

(*a*.) declare the provisions of this section applicable to any district or portion of a district, whether under settlement or not,

to empower officers to decide suits,

(*b*.) declare what officers are empowered to hear and decide suits for the commutation of rents in kind, or rents paid by an estimated value of a portion of the crop, to fixed money payments; and

and to lay down rules

(*c*.) lay down rules determining the circumstances under which such suits may be heard or refused, and the principles to be followed in their adjudication.

Application by tenant for deputation of officer to divide, produce or appraise crop, when landlord neglects to attend.

26. Wherever rent is taken by division of the produce in kind, or by estimate or appraisement of the standing crop, or other procedure of a similar nature, requiring the presence both

of the cultivator and proprietor, either personally or by a representative,

if the landlord or his agent neglect to attend at the proper time,

the tenant may present an application to the tahsíldár, requesting that a proper officer be deputed to make the division, estimate or appraisement.

Procedure on such application.

27. On receiving such application, the tahsíldár shall issue a written notice to the landlord to attend on the date and at the time specified in the notice, and shall depute an officer before whom such division, estimate or appraisement, shall be made.

If the landlord fails to attend, the officer shall call in three other tenants of the estate, as assessors, to divide the grain or appraise the crops, and shall decide the amount of rent payable by the tenant according to their award, and shall give the tenant a written authority to divide the grain or cut the crops.

Such decision shall be final, and any suit brought to set it aside shall be dismissed with costs.

4.—*Ejectment.*

Liability of tenant to pay interest on arrear and to be ejected.

28. When an arrear of rent remains due from any tenant on the thirtieth day of June, such tenant shall be liable to pay interest on such arrear at twelve per cent. per annum, and to be ejected from the land in respect of which the arrear is due:

Bar to ejectment without decree.

Provided that no tenant having a right of occupancy, or holding under a lease the term of which has not expired, shall be ejected otherwise than in execution of a decree or order under the provisions of this Act.

Ejectment not to be decreed for certain breaches of lease.

No ejectment of a tenant or cancelment of a lease shall be decreed on account of any breach of the lease which is not detrimental to the land demised, or which is not inconsistent with the purpose for which the land was demised.

Procedure for ejectment of tenant with right of occupancy, or holding under unexpired lease.

29. If the landlord desire to eject a tenant with right of occupancy, or a tenant holding under an unexpired lease, against whom a decree for arrears has been passed and remains unexecuted, he may, after the end of the agricultural year in which such arrears accrued, apply to the Court, and the Court on receiving such application shall (subject to the provisions of the Indian Limitation Act, 1871, and of section one hundred and sixty of this Act) cause a notice to be served on the tenant directing him to pay the amount due by the decree into Court within fifteen days from receipt of the notice. If such amount be not so paid, the Court shall eject the tenant.

In case of tenant for limited period, landlord may serve notice.

30. If the landlord desire to eject a tenant not having a right of occupancy, or any other tenant holding only for a limited period, after the determination of his lease or tenancy, he shall serve a written notice on such tenant under the provisions of this Act.

Contents of notice.

31. The notice of ejectment shall be written in the vernacular language and character of the village;

it shall specify the land from which the tenant is to be ejected;

and it shall inform him that he must vacate the land on or before the first day of May next following; or that, if he means to dispute the ejectment, he must institute a suit for that purpose on or before that date.

Mode of serving notice.

32. The notice shall be served through the tahsíldár on or before the first day of April in each year, and the landlord shall pay the cost of service; it shall be served personally on the tenant, if practicable; but, if he cannot be found, service may be made by affixing the notice to his usual place of residence.

Effect of failure of tenant to institute suit to contest liability to ejectment.

33. If the tenant on whom such notice of ejectment has been served fail to institute a suit to contest his liability on or before the first day of May next after the service, his tenancy of the land in respect of which the notice has been served shall be held to cease on that date: unless, after the service, the landlord authorises him to continue in the occupation of the land.

Procedure to enforce ejectment.

34. If no such suit is brought, and the landlord require the assistance of the Collector to eject any person whose tenancy is alleged to have ceased under the provisions of section thirty, he may apply for such assistance before the ploughing for the *kharíf* harvest commences; and if the Court is satisfied that notice was served on such tenant, and that no subsequent agreement has been entered into between him and his landlord, it shall give such assistance accordingly:

Saving of tenant's right to sue.

Nothing done by the Court under the previous part of this section shall affect the right of any tenant to institute a suit against his landlord for illegal ejectment, and to recover compensation for the same.

Notice of ejectment when void.

If the landlord allow the tenant on whom the notice of ejectment has been served to remain in occupation of the land, and to prepare it for the *kharíf* harvest, the notice of ejectment shall be deemed void.

Right of ejected tenant to value of growing crops or ungathered produce.

35. Any tenant ejected in accordance with the provisions of this Act, shall be entitled to receive from the landlord the value of any growing crops or other ungathered products of the earth, belonging to the tenant, growing on the land at the time of his ejectment.

Application for assessment of rent-free land.

36. Any proprietor who desires to assess any land granted free of rent, shall apply to the Collector, and such application shall be dealt with as a suit under this Act.

Limitation.

Every such suit shall be instituted within the period of twelve years from the time when the person claiming the right to assess the land came into

the possession of the estate, by inheritance, or otherwise :

Written deed of grant valid against applicant.

Provided that a written instrument of grant, given by the applicant, and specifically covenanting that the grant shall not be resumed, shall be held valid as against such applicant during the currency of the settlement :

Possession for 50 years to vest proprietary right.

Provided, further, that rent-free possession for fifty years, including two successions, shall vest in the grantee or his representative a proprietary right in the land so held.

Saving of liability for Government revenue.

But no length of rent-free occupancy, nor any grant made by the proprietor, shall release such land from its liability to Government for the revenue assessable on the same.

5.—*Compensation for Improvements made by Tenants.*

Tenants' right to compensation for improvements.

37. If any tenant make, or the person from whom he inherits has made, any such improvements on the land in his possession as are specified in the Land Improvement Act, 1871, such tenant shall not be ejected from such land without payment of compensation for the outlay in money, labour, or both, expended in making such improvements.

Basis of, and mode of making, compensation.

38. Such compensation shall be based on the present value of such improvements; and may, at the option of the landlord or his representative, be made—

1*st*,—by payment in money;

2*nd*,—by the grant of a beneficial lease of the land, by the landlord or his representative, to the tenant or his representative;

3*rd*,—partly by payment in money, and partly by the grant of such lease as aforesaid.

Settlement of difference as to amount or value of compensation.

39. In case of difference as to the amount or value of the compensation tendered, either party may apply to the Collector stating the matter in dispute, and requesting a determination thereof.

On receiving such application, the Collector shall cause notice thereof to be served on the other party, and, after taking such evidence as the parties or either of them may adduce, and after such further inquiry as he may deem necessary, determine the amount of the payment, or the terms of the lease, or both.

In determining such amount, or the terms of such lease, the Collector shall take into account any assistance given to the tenant by the landlord, either directly in money, material or labour, for the purpose of making such improvements, or indirectly by subsequently allowing the tenant to hold at a rate of rent more favourable than the rate at which he otherwise would have held.

Reference to arbitration.

40. The Collector may refer any application brought under section thirty-nine to arbitration, in which case the proceedings shall be in accordance with the provisions of the North-Western Provinces Revenue Act.

Right of tenant to damages for exactions in excess of rent or for withholding receipt.

41. Every under-tenant or ryot, from whom any sum is exacted in excess of the rent specified in his pattá, or payable under the provisions of this Act, whether as *ábwáb* or under any other pretext, and every under-tenant, ryot or cultivator from whom a receipt is withheld for any sum of money paid by him as rent,

shall be entitled to recover, from the person receiving such rent, damages not exceeding double the amount so exacted or paid.

Contents of receipt.

Receipts for rent shall specify the year or years on account of which the rent is acknowledged to have been paid ;

and any refusal to make such specification shall be held to be a withholding of a receipt.

Damages for extorting payment of rent by duress.

42. If payment of rent, whether the same be legally due or not, is extorted from any under-tenant or ryot by illegal confinement or other duress, he shall be entitled to recover such compensation, not exceeding the sum of two hundred rupees, as the Court thinks reasonable.

Liability to punishment for extortion not affected.

An award of compensation under this section shall not bar or affect any penalty or punishment to which the person practising such extortion may be subject by law.

6.—*Deposit of Rent in Government Treasury.*

Deposit of amount tendered by tenant and refused.

43. If any tenant having a right of occupancy or holding under an unexpired lease, or under an agreement or decree, tenders to the person authorized to receive it full payment of the rent due from him, and if the amount so tendered be not accepted, and a receipt for the amount forthwith granted, the tenant may thereupon deposit such amount in the Collector's Court to the credit of the person authorized to receive it.

Form and verification of application.

44. The application to the Collector shall be drawn up in the form (A) annexed, and shall be verified in the manner prescribed for the verification of plaints under section one hundred and seven :

Penalty for false statement.

and the person making the verification shall be subject to the penalty therein laid down, if the application contain any averment which he knows or believes to be false, or does not know or believe to be true.

Notice to issue on deposit being made.

45. On receiving the money so deposited, the Collector shall issue to the person to whose credit it has been deposited a notice in the form (B) annexed.

Mode of serving notice.

46. Such notice shall be served through the tahsíldár upon the person to whom it is addressed, or upon his recognized agent.

In their absence, the notice shall be affixed at the *chaupál*, or other conspicuous place in the village in which the land for which the rent is due is situated.

Payment to person served with notice on his application.

47. If the person on whom such notice is served, or his recognized agent, appears, and applies that the money in deposit be paid to him, it shall be paid accordingly.

Refund to depositor.

48. If no application be made by the person on whom the notice was served, or by his agent, the sum shall be repaid to the depositor on the expiration of two years from the date of the deposit.

CHAPTER III.

DISTRAINT.

Produce of land hypothecated for rent.

49. The produce of the land is held to be hypothecated for the rent payable in respect thereof;

Recovery of arrears by distraint.

and when an arrear of rent, as defined in section three, is due from any cultivator of land, the zamíndár, lákhirájdár, farmer, dependent taluqdár, under-farmer or other person entitled to receive rent immediately from such cultivator, instead of suing for the arrear as hereinbefore provided, may recover the same by distress and sale of the produce of the land on account of which the arrear is due, under the rules contained in this Chapter:

Bar to distraint of produce covered by security.

Provided always, that, when a cultivator has given security for the payment of his rent, the produce of the land for the rent of which security has been given, shall not be liable to be distrained:

Sharer not entitled to distrain.

Provided also, that no sharer in any estate, who is not entitled to collect the whole rent from the tenant, shall have power to distrain.

No distraint for overdue arrear, nor, without agreement, for excess over past year's rent.

50. A Distress shall not be made for any arrear which has been due for a longer period than one year;

nor for the recovery of any sum in excess of the rent payable for the same land in the preceding year, unless a written engagement for the payment of such excess has been executed by the cultivator, and attested before the Kánungo.

Distraint by managers under Court of Wards, &c.

51. The power to distrain vested by section forty-nine in zamíndárs, and other persons entitled to receive rent from cultivators of land, may be exercised by managers under the Court of Wards, surbarakars, and managers of estates held under khás management, and other persons lawfully entrusted with the charge of landed property;

and also by the náibs, gumáshtas, and other agents, employed by such persons as aforesaid, in the collection of rent, if expressly authorized by power-of-attorney in that behalf:

Liability to damages for illegal act.

Provided that, if any wrongful act is committed by any such náib, gumáshta, or other agent, under colour of the exercise of the said power, the person employing such agent shall be liable, as well as the agent, for to make compensation for such act.

Persons empowered to distrain to give written authority to servants employed to make distress.

52. When any person, empowered to distrain property under section forty-nine or section fifty-one employs a servant or other person to make the distress, he shall give to such servant or person a written authority for the same, and the distress shall be made in the name and on the responsibility of the person giving such authority.

Standing crops and crops gathered liable to distraint.

53. Standing crops and other ungathered products of the earth, and crops or other products when reaped or gathered, and deposited in any threshing-floor or place for treading out grain or the like, whether in the field or within a homestead, may be distrained by persons invested with power to distrain under the provisions of this Act.

Exception.

But no such crops or products, other than the produce of the land in respect of which an arrear of rent is due, or of land held under the same engagement, and no grain or other produce after it has been stored by the cultivator, and no other property whatsoever, shall be liable to be distrained under this Act.

Defaulter to be served with written demand and account.

54. Before or at the time when a distress is made under this Act, the distrainer shall cause the defaulter to be served with a written demand for the amount of the arrear, together with an account exhibiting the grounds on which the demand is made.

Mode of service.

The demand and account shall, if practicable, be served personally on the defaulter; or, if he abscond or conceal himself, so that they cannot be so served, shall be affixed at his usual place of residence.

Distress to be proportionate to arrear.

55. Unless the amount of the demand is immediately paid or tendered, the distrainer may distrain property as aforesaid of value proportionate to the amount of the arrear, with costs of the distress;

List of property to be prepared and copy served on owner.

and shall prepare a list or description of the said property, and deliver a copy of the same to the owner, or, if he be absent, affix it at his usual place of residence.

Standing crops, &c., when attached, may be reaped and stored by cultivator, or, if he neglect, by distrainer.

56. Standing crops and other ungathered products may, notwithstanding the distress, be reaped and gathered by the cultivator, and may be stored in such granaries or other places as are commonly used by him for the purpose.

If the cultivator neglect to do so, the distrainer shall cause the said crops or products to be reaped or gathered, and in such case shall store the same either in such granaries or other places as aforesaid, or in some other convenient place in the neighbourhood.

In either case the distrained property shall be placed in the charge of some person appointed by the distrainer for the purpose.

Sale of products which cannot be stored.

Crops or products which from their nature do not admit of being stored, may be sold before they are cut or gathered, under the rules hereinafter provided; but in such case, the distress shall be made at least twenty days before the time when the crops or products or any part of the same would be fit for cutting or gathering.

Assistance to distrainer opposed or apprehending resistance.

57. If a distrainer is opposed, or apprehends resistance, and desires to obtain the assistance of a public officer, he may apply to the Court, and the Court may, if it thinks necessary, depute an officer to support the distrainer in making the distress.

Distress to be withdrawn on tender of arrear and expenses before sale.

58. If at any time after property has been distrained, and prior to the day fixed for its being put up to sale as hereinafter provided, the owner of the

property tender payment of the arrear demanded of him, and of the expenses of the distress, the distrainer shall receive the same, and shall forthwith withdraw the distress.

Application for sale.

59. Within five days from the time of the storing of any distrained crops or products,

or, if the crops or products do not from their nature admit of being stored, within five days from the time of making the distress,

the distrainer shall apply for sale of the same to the Amín, or other officer authorized to sell property in satisfaction of decrees of the Civil Court within the circle in which the distrained property is situate, or to such other public officer as the Local Government appoints for the purpose.

Contents of application.

60. The application shall be in writing, and shall contain—

(*a*) an inventory or description of the property distrained,

(*b*) the name of the defaulter and his place of residence,

(*c*) the amount due, and the date of the distress, and

(*d*) the place in which the distrained property is deposited.

Deposit of cost of service of notice.

Together with the application, the distrainer shall deliver to the Amín or other officer the amount necessary for the service of a notice upon the defaulter as hereinafter provided.

Procedure by Amín, &c., on receipt of application.

61. Immediately on receipt of the application, the Amín or other officer shall transmit a copy of it to the Court;

and shall serve a notice in the form (C) contained in the schedule to this Act, or to the like effect on the person whose property has been distrained, requiring him, either to pay the amount demanded, or to institute a suit to contest the demand before the Court, within the period of fifteen days from the receipt of the notice.

He shall at the same time send to the Court, for the purpose of being put up in his office and in the kachahrí of the tahsíldár, a proclamation fixing a day for the sale of the distrained property, which shall not be less than twenty days from the date of the application; and shall deliver a copy of the proclamation to the peon charged with the service of the notice, to be put up by him in the place where the distrained property is deposited.

The proclamation shall contain—

(*a*) a description of the property,

(*b*) the demand for which it is to be sold, and

(*c*) the place where the sale is to be held.

Amín to suspend sale on receipt of Court's certificate of institution of suit.

62. If a suit is instituted before the Court in pursuance of the aforesaid notice, the Court shall transmit to the Amín or other officer, and, if so requested, shall deliver to the owner of the distrained property, a certificate of the institution of such suit;

and on such certificate being received by, or presented to, the Amín or other officer, he shall suspend proceedings in regard to the sale of the distrained property.

Suit to contest distrainer's demand before issue of notice of sale.

63. A person whose property has been distrained in the manner hereinbefore provided, may institute a suit to contest the demand of the distrainer immediately after the distress, and before the issue of notice of sale.

When such suit is instituted, the Court shall proceed in the manner prescribed in the last preceding section.

If, thereafter, application for the sale of the property is made to the Amín or other officer, he shall send a copy of the application to the Court, and suspend further proceedings, pending the decision of the case.

Distress when to be withdrawn.

64. The person whose property has been distrained may, at the time of instituting any such suit as aforesaid, or at any subsequent period, execute a bond with a surety, binding himself to pay whatever sum may be adjudged to be due from him, with interest and costs of suit;

and when such bond is executed, the Court shall give to the owner of the property a certificate to that effect, and, if so requested, shall serve the distrainer with notice of the same;

and upon such certificate being presented to the distrainer by the owner of the property, or served on him by order of the Court, the property shall be released from distress.

When sale may be proceeded with.

65. On the expiration of the period fixed in the proclamation of sale, if the institution of a suit to contest the demand of the distrainer has not been certified to the Amín or other officer in the manner hereinbefore provided, he shall, unless the said demand, with such costs of the distress as shall be allowed by him, be discharged in full, proceed to sell the property or such part of it as may be necessary, in the manner following.

Place of sale.

66. The sale shall be held at the place where the distrained property is deposited, or at the nearest ganj, bázár, hát or other place of public resort, if the Amín or other officer is of opinion that it is likely to sell there to better advantage.

Manner of sale.

The property shall be sold by public auction, in one or more lots, as the officer holding the sale may think advisable;

Withdrawal of distress when demand and costs satisfied.

and if the demand with the costs of distress and sale be satisfied by the sale of a portion of the property, the distress shall be immediately withdrawn with respect to the remainder.

If fair price be not offered, sale may be postponed and shall be then completed.

67. If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) be not offered for it, and the owner of the property, or some person authorized to act on his behalf, apply to have the sale postponed until the next day, or the next market day, if a market be held at the place of sale, the sale shall be postponed

until such day and shall be then completed whatever price may be offered for the property.

Payment of purchase-money.

68. The price of every lot shall be paid for in ready money at the time of sale, or as soon thereafter as the officer holding the sale thinks necessary;

Resale on default.

and, in default of such payment, the property shall be put up again and sold.

Certificate to purchaser.

When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate, describing the property purchased by him and the price paid.

Deduction, from proceeds, of costs of sale.

69. From the proceeds of the sale of distrained property, the officer holding the sale shall make a deduction at the rate of one anna in the rupee on account of the costs of the sale, and shall send the amount to the Court, in order that it may be credited to Government.

Payment of distrainer's expenses.

He shall then pay to the distrainer the expenses incurred by the distrainer on account of the distress, and of the issue of the notice and proclamation of sale prescribed in section sixty-one, to such amount as, after examination of the statement of expenses furnished by the distrainer, he thinks proper to allow.

Discharge of arrear with interest.

The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale;

Surplus.

and if there be any overplus, it shall be delivered to the person whose property has been sold.

Sale officers and employees prohibited from purchasing.

70. Officers holding sales of property under this Act, and all persons employed by or subordinate to such officers, are prohibited from purchasing, either directly or indirectly, any property sold by such officers.

Report of irregularities by distrainer.

71. Amíns and other officers as aforesaid are required to bring to the notice of the Court any material irregularities committed by distrainers under colour of this Act;

Postponement of sale, and report to Court when defaulter has not received due notice.

and if, in any case, on proceeding to hold a sale of property, the Amín or other officer find that the owner of the property has not received due notice of the distress and intended sale, he shall postpone the sale and report the case to the Court,

Order of Court.

and the Court shall direct the issue of another notice and proclamation of sale under section sixty-one, or pass such other order as to it may seem proper.

Levy of charge when sale officer attends, and no sale takes place.

72. When an Amín or other officer has proceeded to any place for the purpose of holding a sale, under this Act and no sale takes place, either for the reason stated in the last preceding section, or because the demand of the distrainer has been previously satisfied, no intimation of such satisfaction having been given by the distrainer to the Amín or other officer, the charge of one anna in the rupee on account of expenses shall be leviable and shall be calculated on the estimated value of the distrained property.

Recovery from owner.

If the demand of the distrainer be not satisfied until the day fixed for the sale, the charge for expenses shall be paid by the owner of the property, and may be recovered by the sale of such portion thereof as may be necessary.

Recovery from distrainer.

In every other case it shall be paid by the distrainer and may be recovered by attachment and sale of his property under the warrant of the Court:

Limit to charge.

provided, that in no case shall a larger amount than ten rupees be recoverable under this section.

Proceedings of Amíns, &c., subject to revision and orders of Collector.

73. All proceedings under this Act of the Amíns and other officers as aforesaid, shall be subject to the revision and orders of the Collector of the District,

Power to call for reports and statements.

and the Collector of the District, with the sanction of the Board of Revenue, may require the submission of such periodical reports and statements of business done by the Amíns and other officers as may be thought necessary.

Order of sale when amount adjudged due.

74. When a suit has been instituted to contest the demand of a distrainer and the property has not been released on security, if the demand or any portion of it is adjudged to be due, the Court shall issue an order to the Amín or other officer authorizing the sale of the property;

Second proclamation of sale.

and on the application of the distrainer, within five days from the receipt of such order by the Amín or other officer, such Amín or officer shall publish a second proclamation in the manner prescribed in section sixty-one, fixing another day for the sale of the distrained property, which shall not be less than five nor more than ten days from the date of the proclamation;

Sale on failure to pay debt and costs.

and unless the amount adjudged to be due with the costs of distress be paid intermediately, shall proceed to sell the property in the manner hereinbefore provided.

In suit to contest his demand, distrainer to prove arrear.

75. In all suits instituted to contest the demand of a distrainer, the distrainer shall be required to prove the arrear in the same manner as if he had himself brought a suit for the amount under the foregoing provisions of this Act.

Recovery of amount decreed in favour of distrainer.

If the demand or any part thereof is found to be due, the Court shall make a decree for the amount in favour of the distrainer, and such amount may be recovered by sale of the property, as provided in the last preceding section, if the distress has not been withdrawn;

and, if any balance remain due after such sale, by execution of the decree against the person and any other property of the defaulter,

or, if the property have been released on security, by execution of the decree against the person and property of the defaulter and of his surety.

Compensation in case of vexatious distress.

If the distress is adjudged to be vexatious or groundless, the Court, besides directing the release of the distrained property, may award such compensation to the plaintiff as the circumstances of the case require.

Suit by person claiming property distrained for arrears alleged to be due from another.

76. If any person claim as his own, property which has been distrained for arrears of rent alleged to be due from any other person, the claimant may institute a suit against the distrainer and such other person, to try the right to the property, in the same manner and under the same conditions as to the time of instituting the suit and to the consequent postponement of sale, as a person whose property has been distrained for an arrear of rent alleged to be due from him, may institute a suit to contest the demand.

Release of property on security being given.

When any such suit is instituted, the property may be released upon security being given for the value of the same.

Order of Court when claim dismissed.

If the claim is dismissed, the Court shall make an order for the sale of the property, or for the recovery of the value thereof, as the case may be, for the benefit of the distrainer.

Decree for release and compensation when claim upheld.

If the claim is upheld, the Court shall decree the release of the distrained property with costs, and such compensation (if any) as the circumstances of the case require:

Saving of prior claim of person entitled to rent of land.

Provided always, that no claim to any produce of land liable to distress under this Act, which at the time of the distress may have been found in the possession of a defaulting cultivator (whether such claim be in respect of a previous sale, mortgage or otherwise,) shall bar the prior claim of the person entitled to the rent of the land, nor shall any attachment in execution of a judgment of any Civil Court prevail against such prior claim.

Procedure where right to distrain is claimed by other than distrainer.

77. If, in any case in which property has been distrained for an arrear of rent, and a suit has been instituted to contest the demand, the right to distrain for such arrears is claimed by or on behalf of any person other than the distrainer, on the ground of such other person being actually and in good faith in the receipt and enjoyment of the rent of the land, such other person shall be made a party to the suit, and the question of the actual receipt and enjoyment of the rent by him before and up to the time of the commencement of the suit shall be enquired into, and in deciding the suit the result of such inquiry shall be taken into consideration.

Saving of right to sue in Civil Court.

Provided always, that the decision of the Court shall not affect the right of either party who may have a legal title to the rent of the land, to establish his title by suit in the Civil Court if instituted within one year from the date of the decision.

Persons prevented from suing in time to save property from sale, may sue for damages.

78. If any person whose property has been distrained for the recovery of a demand not justly due, or of a demand due or alleged to be due from some other person, is prevented by any sufficient cause from bringing a suit to contest the demand or to try the right to the property as the case may be, within the period allowed by section ninety-seven, and his property is in consequence brought to sale, he may, nevertheless, institute a suit under this Act to recover compensation for the illegal distress and sale of his property.

Wrongful acts of distrainer.

79. If any person empowered to distrain property, or employed for the purpose under a written authority by a person so empowered, distrain or sell, or cause to be sold, any property for the recovery of an arrear of rent alleged to be due, otherwise than according to the provisions of this Act,

or if any distrained property is lost, damaged, or destroyed by reason of the distrainer not having taken proper precaution for the due keeping and preservation thereof,

or if the distraint is not immediately withdrawn when it is required to be withdrawn by any provision of this Act,

the owner of the property may institute a suit under this Act to recover compensation for any injury which he has thereby sustained.

Suit by owner against person distraining or selling without authority.

80. If any person not empowered to distrain property under sections forty-nine and fifty-one, nor employed for the purpose under a written authority by a person so empowered, shall distrain or sell or cause to be sold any property under colour of this Act, the owner of the property may institute a suit under this Act to recover compensation from such person for any injury which the plaintiff has sustained from the distraint or sale,

Penalty in addition to damages.

and the defendant shall be held to have committed criminal trespass, and shall be subject to the penalties for that offence, in addition to any damages which may be awarded against him in such suit.

Limitation of suits under sections 78, 79, 80.

81. Provided that any suit which may be instituted under any of the last three sections, shall be commenced within the term prescribed by section ninety-seven.

Procedure in case of resistance of distraint.

82. If any person resist a distraint of property duly made under this Act, or forcibly or clandestinely remove any distrained property, the Court, upon complaint being made within fifteen days from the date of such resistance or removal, shall cause the person accused to be arrested and brought before the Court with all convenient speed, and the Court shall, if possible, proceed forthwith to try the case.

If the case cannot be at once heard, the Court may, if it think fit, require the party arrested to give security for his person, and, in default of such

security, may commit him to the civil jail until the case is tried,

and if the offence be proved and the offender be the owner of the property concerned, the Court shall order him to be imprisoned in the civil jail for six months, or until the whole arrear due to the distrainer, with all expenses and costs, is paid or levied under warrant of the Court by distress and sale of the property of the offender.

If the offender be not the owner of the property, he shall make good to the distrainer the value of the same, and shall further be liable to a fine not exceeding one hundred rupees,

or, in default of payment thereof, to imprisonment in the civil jail for a period not exceeding two months.

CHAPTER IV.

OF PROCESS.

Mode of serving process.

83. Every process issued by a Court under this Act shall be under the seal and signature of the Court, and shall be served or executed by the Názir, or by such other officer as the Court may direct, at the cost of the party at whose instance it is issued.

Deposit before issue.

The amount of such cost, and, in the case of summons to a witness, any sum required for the travelling expenses of such witness, shall be deposited in Court before the process is issued:

Power to direct service free of charge.

Provided that, if in any case the Court is satisfied that a party is unable to pay the cost of any necessary process, it may direct such process to be served free of charge.

Punishment for resistance of process.

84. Any resistance or opposition to the lawful process of a Court under this Act may be punished by the Court according to the provisions of the law for the time being in force for the punishment of resistance or opposition to the processes of the Courts of civil justice.

Power to issue summons and warrant.

When, in any such case, the offender is not present, the Court may summon him to answer to the charge: and if after due service of the summons he fail to attend, may issue a warrant for his apprehension.

Appeal against orders under this section.

Orders passed by Collectors under this section shall be subject to appeal as provided by section one hundred.

CHAPTER V.

JURISDICTION OF COURTS AND APPEALS.

Suits cognizable under this Act.

Suits cognizable by Revenue Courts only.

85. Except in the way of appeal as provided in this Act, the Courts of Revenue alone shall take cognizance of the following descriptions of suits, and such suits shall be heard and determined in the said Courts in the manner provided in this Act, and not otherwise;

Bar to cognizance by other Courts.

and except in the way of appeal as provided in this Act, all other Courts are hereby prohibited from taking cognizance of any such suits, whether the claim be joined to a claim cognizable by such other Courts or not.

I.—Suits by a landlord—

(1.) for arrears of rent;

(2.) for enhancement of rent of a tenant having right of occupancy;

(3.) for the ejectment of a tenant or for cancelling any lease on account of a breach of the conditions of any contract by which a tenant may be liable to ejectment, or a lease may be liable to be cancelled;

(4.) for the resumption of rent-free grants, or the determination of the rent of land thitherto held free of rent.

II.—Suits by a tenant—

(5.) for contesting a notice of ejectment;

(6.) for the recovery of rent illegally exacted or extorted, and for damages on account of the illegal exaction or extortion of rent, or any unauthorised cess or impost, or on account of extortion of rent by any means not warranted by law;

(7.) for compensation for withholding receipt for rent paid;

(8.) for compensation for illegal ejectment;

(9.) for the recovery of the occupancy of any land from which a tenant has been illegally ejected by the landlord;

(10.) for contesting the exercise of the powers of distress conferred on landlords and others by this Act, or any thing purporting to be done in the exercise of the said power, or for compensation for illegal distress;

(11.) for abatement of rent;

III.—Suits by tenants or landlords—

(12.) for pattás or counterparts, and for the determination of the rates of rent at which such pattás or counterparts are to be delivered.

IV.—Suits by, and against, Lambardárs, Co-sharers and Muáfídárs.

(13.) Suits by lambardárs for arrears of Government revenue, payable through them by the co-sharers whom they represent, and for village-expenses and other dues for which the co-sharers may be responsible to the lambardár;

(14.) Suits by co-sharers for their share of the profits of an estate, or any part thereof, after payment of the Government revenue and village-expenses, or for a settlement of accounts;

(15.) Suits by muáfídárs, or assignees of the Government revenue, for arrears of revenue owing to them, as such muáfídárs or assignees;

(16.) Suits by taluqdárs and other superior proprietors, for arrears of revenue or otherwise, not being rent due to them as such taluqdárs or superior proprietors.

Investigation of plea of set-off.

Where, in reply to any suit under this Act, a set off is pleaded, the Court shall investigate such plea, notwithstanding that the matter of the set-off involves an inquiry beyond the ordinary jurisdiction of the Court under this Act.

V.—Appeals.

Judgment of Collector final where amount, or value of property in suit does not exceed 100 rupees.

86. In suits under this Act, tried and decided by a Collector of the First Class, if the amount sued for, or the value of the property claimed, does not exceed one hundred rupees,

the judgment of the Collector shall be final, and not open to revision or appeal, except as hereinafter provided,

unless in any such suit a question of right to enhance or otherwise vary the rent of a tenant, or any question relating to a title to land, or to some interest in land as between parties having conflicting claims thereto, has been determined by the judgment,

unless certain questions determined.

in such case the judgment shall be open to appeal in the manner provided in section ninety-three and following sections of this Act.

Appeal in such cases.

87. In suits in which the judgment of the Collector is final as provided in the last preceding section, the Collector may, upon the application of either party, if preferred within thirty days from the date of the decision, order the rehearing of a suit, upon the ground of the discovery of new evidence or matter material to the issue of the case, which the applicant had no knowledge of, or could not produce, at the time of trial.

In suits not open to appeal, Collector may grant re-hearing upon discovery of new evidence, &c.

88. When any such suit as aforesaid, in which, if tried and decided by a Collector of the first class, the judgment of such Collector would be final, is tried and decided by a Collector of the second class, an appeal from the judgment of the Collector of the second class shall lie to the Collector of the District.

Appeal from decision of Collector of second class.

89. The petition of appeal shall be presented to the Collector within fifteen days from the date of the decree;

Time for presentation.

provided that such time as may be requisite for procuring a copy of the decree appealed against shall not be reckoned as part of the fifteen days.

Time to be excluded from reckoning.

90. The Collector shall fix a day for hearing the appeal, and shall cause notice of the same to be served on the respondent in the manner hereinafter prescribed for the service of summons.

Procedure in appeal.

If, on the day fixed for hearing the appeal, or any other day to which the hearing may be adjourned, the appellant does not appear in person or by an agent, the appeal shall be dismissed for default.

If the appellant appears and the respondent does not appear in person or by an agent, the appeal shall be heard *ex parte*.

91. If an appeal be dismissed for default of prosecution, the appellant may, within fifteen days from the date of the dismissal, apply to the Collector for re-admission of the appeal,

Re-admission of appeal.

and if it be proved to the satisfaction of the Collector that the appellant was prevented by any sufficient cause from appearing when the appeal was called on for hearing, the Collector may re-admit the appeal.

92. After hearing the appeal, the Collector shall give judgment in the manner hereinafter prescribed for giving judgment in original suits, and the judgment of the Collector shall be final.

Judgment in appeal.

93. In all suits other than those in which, when tried and decided by a Collector of the first class, the judgment of such Collector is declared to be final, or when tried and decided by a Collector of the second class, an appeal is allowed to the Collector of the District, an appeal from the judgment of the Collector shall lie to the District Judge,

Appeal to District Judge.

unless the amount or value in dispute exceed five thousand rupees, in which case the appeal shall lie to the High Court.

Appeal to High Court.

94. The rules in force in regard to the time within which appeals from the decisions of Civil Courts may be received, and to the manner in which such appeals are heard and determined, and to all proceedings which may be had in respect of such appeals, shall be applicable to appeals to the District Judge or High Court under this Act.

Rules as to time of presentation, &c., to apply.

95. The decisions of District Judges passed in regular appeal under this Act, shall be open to special appeal to the High Court, in the same manner, and subject to the same rules, as the decisions of District Judges passed in regular appeal are open to special appeal under the Code of Civil Procedure and the Indian Limitation Act, 1871.

Special appeal to High Court from decisions of District Judge.

96. Whenever a Court is closed on the last day of any period provided in this Act for the presentation of any memorandum of appeal, or for the deposit or payment of any money in Court, the day on which the Court reopens shall be deemed to be such last day.

Rule as to last day for presentation, deposit or payment, when Court is closed on such day.

VI.—Limitation of Suits.

97. Suits for recovery of arrears of rent, revenue or share of profits, may be brought within two years from the date when the arrears became due:

Limitation of suits.

Suits relating to distress, or for recovery of rent in kind, where no application for appraisement has been given in under section twenty-six, may be brought within three months from the date of the cause of action:

All other suits may be brought within one year from the time that the right to sue accrues, unless otherwise specially provided for in this Act.

VII.—Applications and Appeals.

98. The Courts of Revenue alone shall take cognizance of the following descriptions of applications, and such applications shall be heard and determined in the said Courts in the manner provided under this Act:—

Applications cognizable by Revenue Courts only.

(1.) Application by landlord, or agent employed by a landlord, to compel the production of accounts by patwáris;

(2.) Application by tenant for assistance in the division or appraisement of standing crops, under section twenty-six;

(3.) Application from a landlord to eject a tenant with right of occupancy, under section twenty-nine;

(4.) Application from a landlord under section thirty-four for assistance to eject a tenant, on whom a notice of ejectment has been served and who has not brought a suit to contest such notice:

(5.) Application from a tenant to determine the value of any standing crops, or ungathered products of the earth, belonging to the tenant and being on the land at the time of his ejectment under section thirty-five;

(6.) Application for compensation for improvement, under section thirty-seven;

(7.) Application to determine the nature and class of a tenant's tenure, under section sixteen.

Notice to defendant.

99. On receipt of an application under section ninety-eight, notice thereof shall be served on the defendant in the manner laid down in section one hundred and fourteen.

Time for presenting appeals from orders.

100. Appeals against orders passed on applications by officers vested with the powers of a Collector of the first or second class under this Act, shall be presented to the Collector of the District within fifteen days of the date of the order.

An appeal from the order of the Collector of the District shall be presented to the Commissioner of the Division within thirty days from the date of the order, and his decision shall not be open to further appeal:

Power to Board to call for cases.

Provided that the Board of Revenue may call for any case and pass such orders on it as they think fit.

VIII.—Jurisdiction of Courts.

Local Government may invest officers with Collector's powers, and withdraw them.

101. The Local Government may invest any officer with the powers of a Collector of the first or second class under this Act, and may at any time deprive any officer of such powers.

Suits and applications cognizable by Collectors.

102. Collectors of the first and second class shall have as such, power to try suits and applications of the following descriptions:—

(1.) Suits for arrears of rent, clause one, section eighty-five;

(2.) Suits for compensation for withholding receipt for rent paid, clause seven, section eighty-five;

(3.) Suits to contest the exercise of the powers of distraint conferred on landlords and others by this Act, or anything purporting to be done in exercise of the said powers, or for compensation for illegal distraint, clause ten, section eighty-five;

(4.) Suits by lambardárs for arrears of Government revenue, payable through them by the co-sharers whom they represent, and for village-expenses and other dues, for which the co-sharers may be responsible to the lambardár, clause thirteen, section eighty-five;

(5.) Suits by muafídárs or assignees of the Government revenue, for arrears of revenue owing to them as such muafídárs or assignees, clause fifteen, section eighty-five;

(6.) Applications by a landlord, or by an agent employed by a landlord, to compel the production of accounts by patwáris, under clause one, section ninety-eight;

(7.) Applications by a tenant for assistance in the division or appraisement of standing crops, under section ninety-eight, clause two;

(8.) Applications by a tenant to determine the value of any standing crops or ungathered products of the earth, belonging to the tenant, and being on the land at the time of his ejectment, under section ninety-eight, clause five;

(9.) Suits by taluqdárs for arrears of revenue under clause sixteen, section eighty-five.

Additional suits and applications cognizable by Collector, first class.

103. Collectors of the first class, in addition to the suits and applications specified in section one hundred and two, shall have power to try suits and applications of the following descriptions:—

(1.) Suits to eject a tenant, or cancel a lease, on account of breach of the conditions of any contract by which a tenant may be liable to ejectment, or a lease may be liable to be cancelled, clause three, section eighty-five;

(2.) Suits to contest notices of ejectment, clause five, section eighty-five;

(3.) Suits to recover rent illegally exacted or extorted, and for compensation for such exaction or extortion of rent, or any unathorized cess or impost, or for extortion of rent by confinement or other duress, or by any other means not warranted by law, clause six, section eighty-five;

(4.) Suits to recover the occupancy of any land from which a tenant has been illegally ejected by the landlord, clause nine, section eighty-five;

(5.) Suits for compensation for illegal ejectment, clause eight, section eighty-five;

(6.) Suits by co-sharers for their share of the profits of an estate or any part thereof, after payment of the Government revenue and village-expenses, or for a settlement of accounts, clause fourteen, section eighty-five;

(7.) Applications by a landlord for assistance to eject a tenant, on whom notice of ejectment has been served, under section ninety-eight, clause three;

(8.) Applications by a landlord to eject a tenant with right of occupancy, under section ninety-eight, clause four;

(9.) Applications for compensation for improvements, under section ninety-eight, clause six;

(10.) Applications to determine the nature and class of a tenant's tenure, section ninety-eight, clause seven.

Additional suits cognizable by Collector, first class, specially empowered.

104. In addition to the powers specified in sections one hundred and two and one hundred and three, a Collector of the first class specially empowered by Government, shall have power to try the following suits:—

(1.) Suits for enhancement of rent of a tenant having right of occupancy, under clause two, section eighty-five;

(2.) Suits for abatement of rent, under clause 11, section eighty-five;

(3.) Suits for the resumption of rent-free grants, or for the determination of rent of land thitherto held rent-free, under clause four, section eighty-five;

(4.) Suits for pattás or counterparts, and for the determination of the rates of rent at which such pattás or counterparts are to be delivered, under clause twelve, section eighty-five.

CHAPTER VI.

ON PROCEDURE UP TO JUDGMENT.

Mode of instituting suits. Contents of plaint or statement of claim.

105. Suits under this Act shall be instituted by presenting to the Court a plaint or statement of claim, which shall contain

(*a*) the name, description and place of abode of the plaintiff;

(*b*) the name, description and place of abode of the defendant, so far as they can be ascertained;

(*c*) the substance of the claim, and its value estimated according to the law for the time being in force for the valuation of suits; and

(*d*) the date on which the right to sue accrued.

Statement by whom to be presented.

106. The statement of claim shall be presented by the plaintiff, or by an authorized agent of the plaintiff, who has personal knowledge of the facts of the case, or by an agent who shall be accompanied by a person who has such knowledge.

Verification of statement.

107. The statement of claim shall be subscribed and verified at the foot by the plaintiff or his agent in the manner following, or to the like effect:—

"I, *A. B.*, do declare that the above statement is true to the best of my knowledge and belief."

Document relied on by plaintiff to be presented with statement.

108. If the plaintiff rely in support of his claim on any document in his possession, he shall deliver the same to the Court at the time of presenting his statement of claim.

Admission afterwards.

Unless such document be so delivered, or its non-production be sufficiently excused, or unless the Court see fit to extend the time for producing the same, it shall not afterwards be admitted.

Procuring production of document in possession of defendant.

109. If the plaintiff require the production of any document in the possession or power of the defendant, he may, at the time of presenting his statement of claim, deliver to the Court a description of the document, in order that the defendant may be required to produce the same.

Contents of statement in suits for arrears of rent.

110. If the suit be for the recovery of an arrear of rent, the statement shall specify the name of the village and estate, and of the pargana or other local division in which the land is situate:

and, if the arrear is alleged to be due from any ryot, the quantity of land, and (where fields have been numbered in a Government survey) the number of each field, and yearly rent of the land; the amount (if any) received on account of the year for which the claim is made; the amount in arrear, and the time in respect of which it is alleged to be due.

Contents of statement in suits for ejectment,

111. If the suit be for the ejectment of a ryot, farmer or tenant, from any land, farm or tenure,

or for recovery of occupancy or possession.

or for the recovery of the occupancy or possession of any land, farm or tenure,

the statement shall describe (as circumstances may require) the extent, situation and designation of the same; and, if necessary for the identification of the land, shall set forth the boundaries of such land.

Return or amendment of statement.

112. If the statement of claim do not contain the several particulars hereinbefore required to be specified therein, or be not subscribed and verified as hereinbefore required, the Court may return the statement to the plaintiff, or, at its discretion, allow it to be amended.

Issue of summons; order for personal attendance or appearance by agent.

113. If the statement of claim be in proper form, the Court, except as otherwise hereinafter specially provided, shall direct the issue of a summons to the defendant,

and if the plaintiff require the personal attendance of the defendant, and satisfy the Court that such attendance is necessary, or the Court of its own accord require such attendance, the summons shall contain an order for the defendant to appear personally on a day to be specified in the summons,

otherwise, the summons shall order the defendant to appear personally or by an agent duly authorized on his behalf, who has personal knowledge of the subject, or who shall be accompanied by a person who has such personal knowledge.

Fixing of day to be specified in the summons,

114. The day to be specified in the summons shall be fixed with reference to the state of the file and the distance that the defendant may be or be supposed to be at the time from the place where the Court is held,

order to produce documents,

and the summons shall order the defendant to produce any document which he may have in his possession, of which the plaintiff demands inspection, or upon which the defendant may intend to rely in support of his defence.

and to bring witnesses.

It shall also enjoin him to bring with him his witnesses, if they are willing to attend without issue of process, and shall be in the form D contained in the schedule to this Act, or to the like effect.

Mode of serving summons,

115. The summons shall be served by delivering a copy thereof to the defendant personally when practicable;

or, if the summons cannot be served on the defendant personally, by affixing a copy of it to some conspicuous part of his usual residence

and also affixing a copy of the same in the Collector's office.

Endorsement on summons as to mode of service.

116. If the summons be served personally, the Názir shall endorse on the summons the fact of such service.

If personal service be not effected, the Názir shall endorse on the summons the reason of not serving it personally, and how it has been served.

Service of summons in another district.

117. If the usual residence of the defendant be in another district, the summons, together with the cost of the service thereof, shall be sent by the public post to the Collector of such district, who shall issue the summons, and return the same, after service, with the prescribed endorsement, to the officer by whom it was transmitted to him.

Deposit of cost of serving summons or warrant.

118. The amount of the cost of serving the summons,

or, if a warrant be issued as provided in the next succeeding section, of serving the warrant,

shall in all cases be deposited in Court upon the same day or the day next following that on which the plaint or statement of claim is presented to the Court.

Effect of failure to deposit.

If the said amount be not so deposited (except in cases in which the Court may allow the issue of summons free of cost under the discretion reserved to it in section eighty-three), the case shall not be brought on the file of suits;

but in such case the plaintiff may present another plaint at any time within the period allowed by the rules for the limitation of suits.

Procedure when plaintiff desires issue of warrant of arrest.

119. If in any suit against an under-tenant or ryot for the recovery of an arrear of rent, the plaintiff desires a warrant of arrest to be issued against the defendant, such defendant being resident within the district in which the suit is instituted, he shall present, with his statement of claim, an application for the issue of such warrant.

When such application is presented, the Court shall examine the plaintiff or his agent, on his oath or affirmation, or otherwise, according to the law for the time being in force in relation to the examination of witnesses, and inspect the documents adduced by him in support of his claim; and if *primâ facie* the claim appear to the Court to be well founded, and that, if a summons be issued, the defendant will abscond instead of appearing to answer the claim, the Court may issue a warrant for the arrest of the defendant.

The Court shall fix a reasonable time for the return of the warrant, and the officer entrusted with the service thereof shall, at the time of arresting the defendant, deliver to him a notice addressed to the defendant containing the particulars of the claim, and requiring the defendant, if he contest the claim, to bring with him any document upon which he may intend to rely in support of his defence.

But no such warrant shall be issued in a suit for arrears of rent due in respect of a dependent taluq, or other transferable tenure, which, as hereinafter provided, is liable to farm or transfer in execution of any decree which may be passed in the case.

Every warrant issued and notice delivered under this section, shall be respectively in the forms E and F in the schedule hereto annexed or to the like effect.

Procedure after arrest of defendant.

120. If a defendant be arrested under the warrant of arrest, he shall be brought with all convenient speed before the Court, and the Court shall commit him to custody, unless he deposit in Court such sum as may be specified in the notice.

Procedure when defendant is brought before Court under warrant.

121. When a defendant is brought before the Court under warrant; the Court shall with all convenient speed proceed to try the case in the manner hereinafter provided; and if the suit cannot be at once adjudicated, the Court may, if it think fit, require the defendant to give security for his appearance whenever the same may be required at any time whilst the suit is pending, or until execution of the final decree which may be passed thereon, and may commit him to the civil jail to be there detained until he shall furnish such security or deposit such sum as the Court shall order.

Form of security-bond.

The security-bond shall be in the form G contained in the schedule to this Act, or to the like effect.

Procedure when defendant cannot be arrested under warrant.

122. If the defendant cannot be arrested under the warrant, the Court, on the application of the plaintiff, shall either postpone the case for such period as to it may seem proper, in order that the plaintiff may apply within the said period for another warrant to be issued for the arrest of the defendant, or shall forthwith issue a proclamation, to be affixed in its own office and at the residence of the defendant, fixing a day for the hearing of the case, which shall not be less than ten days from the date of the publication of the notice, at the residence of the defendant.

If the defendant appear in pursuance of the proclamation, he shall be dealt with as provided in the last preceding section.

Compensation for arrest applied for without reasonable cause.

123. If it appear to the Court that the arrest of the defendant was applied for without reasonable cause, the Court may, in its decree, award to the defendant such sum not exceeding one hundred rupees as it may deem a reasonable compensation for any injury or loss which he may have sustained by reason of such arrest, or of his detention in jail during the pendency of the suit.

Consequence of neither party appearing on day fixed.

124. If on the day fixed by the summons or proclamation for the appearance of the defendant, or on any subsequent day to which the hearing of the case may be adjourned prior to the recording of an issue for trial as hereinafter provided, neither of the parties appear in person or by an agent, the case shall be struck off, with liberty to the plaintiff to bring a fresh suit, unless precluded by the rules for the limitation of suits.

125. If on any such day the defendant only appear, the Court shall pass judgment against the plaintiff by default, unless the defendant admit the right to sue, in which case the Court shall proceed to give judgment for the plaintiff upon such admission without costs:

If defendant only appear, Court shall pass judgment by default; or decree upon admission of claim.

Provided that such judgment, if there be more than one defendant, shall be only against the defendant who makes the admission.

Proviso.

126. If on any such day the plaintiff only appear, the Court, upon proof that the summons or proclamation has been duly served according to the provisions of this Act, shall proceed to examine the plaintiff or his agent, and after considering the allegations of the plaintiff, and any documentary or other evidence adduced by him, may either dismiss the case or postpone the hearing of it to a future day for the attendance of any witness the plaintiff may wish to call, or may pass judgment *ex parte* against the defendant.

If plaintiff only appear, Court may proceed *ex parte*.

127. If the defendant appear on any subsequent day to which the hearing of the suit may be postponed under the last preceding section, the Court may, upon such conditions, if any, as to costs or otherwise as it may think proper, allow the defendant to be heard in answer to the suit as if he had appeared on the day fixed for his attendance.

If defendant appear on adjourned hearing, Court may allow him to be heard in answer.

128. No appeal shall lie from a judgment passed *ex parte* against a defendant who has not appeared, or from a judgment against a plaintiff by default for non-appearance.

No appeal from judgment *ex parte* or by default;

But in all such cases if the party against whom judgment has been given shall appear, either in person or by agent, if a plaintiff, within fifteen days from the date of the Court's order, and, if a defendant, within fifteen days after any process for enforcing the judgment has been executed, or at any earlier period, and shall show good and sufficient cause for his previous non-appearance, and shall satisfy the Court that there has been a failure of justice, the Court may, upon such terms and conditions as to costs or otherwise as it thinks proper, revive the suit and alter or rescind the decree, according to the justice of the case.

but Court may revive suit and alter or rescind decree.

But no decree shall be reversed or altered without previously summoning the adverse party to appear and be heard in support of it.

Adverse party to be summoned.

129. When both parties appear in person or by agent on the day named in the summons, or upon any subsequent day to which the hearing of the case may be adjourned, for sufficient reason to be recorded by the Court, the Court shall proceed to examine such of the parties as may be present, and either party or his agent may cross-examine the other.

Examination and cross-examination of parties and agents.

If either of the parties be not bound to attend personally, any agent by whom he shall appear, or any person who shall accompany such agent, shall be examined and cross-examined in like manner as the party himself would have been if he had attended personally.

At the time of the examination, the defendant, if he think fit, may file a written statement of his defence.

Defendant may file written statement.

130. The examination of the parties or their agents or such other persons as aforesaid shall be upon oath or affirmation, or otherwise, according to the law for the time being in force relative to the examination of witnesses.

Mode of examination.

The substance of the examination shall be reduced to writing in the vernacular language of the Court, and shall be filed with the record.

131. If either of the parties bring forward a witness on such day, the Court may take the evidence of such witness.

Witness produced may be examined.

132. If the defendant rely on any document in support of his defence, he shall deliver the same into Court at the first hearing of the suit;

Document relied on by defendant to be produced at first hearing.

and unless such document be so delivered, or its non-production be sufficiently excused, or unless the Court see fit to extend the time for producing the same, it shall not afterwards be admitted.

133. If after the examination required by section one hundred and thirty, and also the examination of any witness who may attend to give evidence on behalf of either of the parties, and after a consideration of the documentary evidence adduced, a decree can be properly made without further evidence, the Court shall make its decree accordingly.

Decree after examination, if no further evidence is required.

134. If on such examination as aforesaid the agent of either party be unable to answer any material question relating to the case which the Court is of opinion that the party whom he represents ought to answer, and is likely to be able to answer if interrogated in person, the Court may postpone the hearing of the case to a future day, and direct that the party whose agent may have been unable to answer as aforesaid shall attend in person on such day;

Party to attend in person when his agent is unable to answer.

and if the party so directed to attend shall fail to appear in person on the day appointed, the Court may pass judgment as in case of default, or make such other order as it may deem proper in the circumstances of the case.

Judgment or order if he fail to appear.

135. If on such examination as aforesaid it appear that the parties are at issue on any question upon which it is necessary to hear further evidence, the Court shall declare and record such issue, and shall fix a convenient day for the examination of witnesses and the trial of the suit; and the trial shall take place on that day, unless there be sufficient reason for adjourning it, which reason shall be recorded by the Court.

Procedure when parties at issue on question requiring evidence.

Parties to produce witnesses or procure attendance by summons.

136. The parties shall bring forward their witnesses on the day of trial, and if either party require assistance to procure the attendance of a witness on such day, either to give evidence or to produce a document, he shall apply to the Court in sufficient time before the day fixed for the trial, to enable the witness to be summoned to attend on that day; and the Court shall issue a summons requiring such witness to attend.

Provisions regarding attendance, examination, &c., of witnesses.

137. The law and rules for the time being in force relating to the evidence of witnesses, for procuring the attendance of witnesses and the production of documents, and for the examination, remuneration, and punishment of witnesses, whether parties to the case or not, in cases before the Civil Courts of the Presidency of Bengal, shall, except so far as may be inconsistent with the provisions of this Act, apply to and be of equal force and effect in suits under this Act.

Case to be struck off if neither party appears.

138. If on the day fixed for the trial of any issue neither of the parties appear, the case shall be struck off under the conditions provided in section one hundred and twenty-four.

Trial of issue *ex parte*.

If on any such day one only of the parties appear, the issue may be tried and determined in the absence of the other party, upon such proof as may be then before the Court.

Provisions to apply when suits are instituted or defended on behalf of landholders by their employees.

139. When suits under this Act are instituted or defended by náibs, gumáshtas or other persons employed in the collection of rent or management of land, in the name and on the behalf of the landholders by whom they are so employed, all the provisions of this Act, by which the personal appearance or attendance of parties to a suit is or may be required, shall be applicable to such náibs, gumáshtas or other persons;

and anything which, by this Act, is required or permitted to be done by a party in person, may be done by any such person as aforesaid.

Processes served on such employees.

Processes served on any such person shall be as effectual for all purposes in relation to the suit, as if the same had been served on the landholder in person:

and all the provisions of this Act relative to the service of processes on a party to the suit shall be applicable to the service of processes on such person.

Personal attendance of female plaintiff or defendant when not required.

140. A female plaintiff or defendant shall not be required to attend in person, if she be of a rank or class which, according to the custom and manners of the country, would render it improper for her to appear in public.

Parties may employ agents or mukhtárs;

141. Any party to a suit may employ an authorized agent or mukhtár to conduct the case on his behalf,

but personal attendance not excused.

but the employment of such agent or mukhtár shall not excuse the personal attendance of the plaintiff or defendant, in cases where his personal attendance is required by the summons, or any order of the Court;

Fee for agent not chargeable as costs.

and no fee for any agent shall be charged as part of the costs of suit in any case under this Act.

Court may grant time or adjourn hearing.

142. The Court may in any case grant time to the plaintiff or defendant to proceed in the prosecution or defence of a suit,

and may also, from time to time, in order to the production of further proof, or for other sufficient reason to be recorded by the Court, adjourn the hearing or further hearing of any case, in such manner as to it may seem fit.

Court may cause local enquiry and report, or may itself enquire.

143. The Court may, at any stage of a case, cause a local inquiry and report respecting the matter in dispute to be made by any officer subordinate to it, or by any other officer of Government, with the consent of the authority to whom such officer is subordinate, or may itself proceed to the spot, and make such local inquiry in person.

Provisions applied to such enquiry.

The provisions of the law for the time being in force relative to local inquiries by Amíns or Commissioners, under orders of the civil courts, shall apply to any local inquiry made by any officer under this section,

and, so far as they are applicable, to inquiries made by the Court in person.

Record in case of enquiry by Court.

In the latter case the Court, after completing the inquiry, shall record on the proceedings such observations as appear to it appropriate, and the observations so recorded shall be received as evidence in the suit.

Defendant may pay admitted debt and costs into Court.

144. The defendant in any suit under this Act may pay into Court such sum of money as he thinks a full satisfaction for the demand of the plaintiff, together with the costs incurred by the plaintiff up to the time of such payment, and such sums shall be paid to the plaintiff.

Plaintiff chargeable with subsequent costs if he proceed and recover no further sum.

If the defendant deposit less than the sum claimed and the plaintiff elect to proceed in the case, and ultimately recover no further sum than has been paid into Court, the plaintiff shall be charged with any costs incurred by the defendant in the suit after such payment.

No interest to plaintiff after date of deposit by defendant.

145. No interest shall be allowed to a plaintiff on any sum paid by the defendant into the Court from the date of such payment, whether such sum be in full of the plaintiff's claim, or fall short thereof.

In suits for rent, third person who has enjoyed it to be made a party.

146. When in any suit between a landholder and a ryot or under-tenant under this Act, the right to receive the rent of the land or tenure cultivated or held by the ryot or under-tenant is disputed on the ground that some third

person has actually and in good faith received and enjoyed such rent before and up to the time when the right to sue accrued, such third person shall be made a party to the suit,

and the question of such receipt and enjoyment of the rent by such third person shall be enquired into, and the suit shall be decided according to the result of such enquiry:

Saving of right to sue in Civil Court to prove title to rent.

Provided always, that the decision of the Court shall not affect the right of either party, who may have a legal title to the rent of such land or tenure, to establish his title by suit in the Civil Court, if instituted within one year from the date of the decision.

Provisions of Civil Procedure Code as to arbitrations applied.

147. The provisions of chapter VI (relative to Arbitration) of the Code of Civil Procedure shall apply to suits and applications under this Act.

Court may order tenant to repair damage caused by breach of contract or lease, for which ejectment or cancelment of lease is decreed.

148. Whenever a decree is given for the ejectment of a tenant, or the cancelment of a lease, on account of any breach of a condition of the contract or lease, by which the land in the occupation of such tenant has been injured, the Court may order the tenant to repair the damage caused by such breach of contract or lease within one month,

and if such damage shall be so repaired, execution shall be stayed.

Delivery of judgment.

149. The Collector shall pronounce judgment in open Court.

Language and contents.

The judgment shall be written in the vernacular language of the Collector and shall contain the reasons for the same, and shall be dated and signed by the Collector at the time it is pronounced:

When it may be in English.

Provided that the judgment may be written in English, if the Collector is able to write a clear and intelligible decision in that language.

CHAPTER VII.

PROCEDURE IN EXECUTION OF DECREE.

Mode of executing decree for ejectment or re-instatement of ryot.

150. If the decree be for the ejectment of any ryot from land occupied by him, or for the re-instatement of any ryot in the occupancy of land from which he has been ejected, the decree shall be executed by giving the possession or occupancy of the land to the person entitled by the decree to such possession or occupancy.

Magistrate to give it effect in case of opposition

If any opposition is made to the execution of the order for giving such possession or occupancy, by the party against whom the order is made, the Magistrate, on the application of the Court, shall give effect to the same.

Mode of executing decree for cancelment of lease or for ejectment or re-instatement of farmer or tenant.

151. If the decree be for the cancelment of any lease or the ejectment of any farmer or other person (not being an actual cultivator),

or for the re-instatement of any farmer or other such person in the possession of a farm or tenure from which he has been ejected,

the decree shall be executed by proclaiming the substance of the decree to the cultivators or other occupants by beat of drum, or in such other manner as may be customary, and affixing the same in some conspicuous place within, or adjacent to, the farm or tenure.

Power to order detention in, or commitment to, civil jail, in certain cases.

152. If the decree be for arrears of rent, or for money, papers or accounts, and the defendant has been committed to jail, or appear, pursuant to the conditions of any security-bond given under section one hundred and twenty-one, the Court may order that he be detained in, or committed to, the civil jail, unless he immediately pay into Court the amount of the decree with costs, or otherwise comply with the terms of the decree.

Process against surety on failure to deliver judgment-debtor into custody.

153. If the judgment-debtor has given security for his appearance, and be not present when judgment is pronounced, and the surety fail to deliver him into custody when required so to do, process of execution may be taken out against the surety in the same manner as if a decree for the amount due by the debtor had been passed against the surety.

Process of execution against person or property, but not both.

154. Process of execution may be issued against either the person or the property of a judgment-debtor;

but process shall not be issued simultaneously against both person and property.

Applications on which it may issue.

Such process may be issued on the oral application of the judgment-creditor, his agent, or mukhtár, made at the time the decree is passed, or thereafter, upon the written application of the judgment-creditor, his agent, or mukhtár.

Form of process.

Process of execution against the person or movable property of a debtor shall be in form H or I contained in the schedule to this Act, or to the like effect.

Execution against movable property.

155. Any movable property required to be seized under an execution shall, if practicable, be described in a list to be furnished by the judgment-creditor;

but, if the creditor is unable to furnish such list, he may apply for a general attachment of the debtor's effects, to the amount of the judgment and costs.

In either case, the property to be seized shall be pointed out to the officer entrusted with the execution of the process, by the creditor, or his agent:

Articles excepted from attachment.

Provided that no implements of husbandry, or cattle actually employed in agriculture, or tools of artisans, shall be attached under this section.

Date and duration of warrant.

156. Every warrant of execution shall bear date on the day on which it is signed by the Court, and shall continue in force for such period as the Court may direct (not being more than sixty days), calculated from such date.

Second and successive warrants.

157. Second and successive warrants of execution may be issued by order of the Court on the application of the judgment-creditor, after the expiration of the period fixed for the continuance in force of a previous warrant.

After one year execution not to issue without notice to party concerned.

158. Process of execution shall not be issued upon any judgment, without previous notice to the party against whom execution is applied for, if, when application for the issue of the process is made, a period of more than one year shall have elapsed from the date of the judgment, or from the date of the last previous application for execution.

Execution not to issue against heir or representative of deceased party without notice.

159. Execution on a judgment shall not issue against the heir or other representative of a deceased party, without notice to such heir or other representative to appear and be heard.

No process of execution after three years, if judgment be for sum not exceeding 500 rupees.

160. No process of execution of any description whatsoever shall be issued, on a judgment under this Act, after the lapse of three years from the date of such judgment, unless the judgment be for a sum exceeding five hundred rupees,

Regulation of period in such cases.

in which case the period within which execution may be had shall be regulated by the general rules in force in respect to the period allowed for the execution of decrees of the Civil Court.

Procedure in execution of warrant against person.

161. If a warrant issue for taking in execution the body of any person, the officer charged with the execution of the warrant shall bring him with all convenient speed before the Court.

If such person does not then deposit in Court the full amount specified in the warrant,

or make such arrangement for the payment of the same as shall be satisfactory to the judgment-creditor,

or satisfy the Court that he has no present means of paying the debt,

the Court shall send him to the civil jail, there to remain for such time as may be directed by a warrant addressed to the keeper of the jail, unless in the meantime he pays the full amount, for the payment of which he is liable under the decree:

Limit of imprisonment.

Provided that the time for which a debtor may be confined in execution of a decree under this Act, shall not exceed three months when the amount decreed (exclusive of costs) does not exceed fifty rupees,

or six months when such amount does not exceed five hundred rupees,

or two years in any other case.

No person to be imprisoned a second time under same judgment.

162. Any person once discharged from jail shall not be imprisoned a second time under the same judgment.

When further liability extinguished.

If the amount due under the decree do not exceed one hundred rupees, the Court may declare such discharged person absolved from further liability under that decree.

When not extinguished.

In other cases the discharge shall not extinguish the liability of the discharged person under the decree, or exempt any property belonging to such person from attachment in execution of the same.

Diet-money to be deposited at time of issue of warrant.

163. Any person applying for a warrant of arrest under section one hundred and nineteen, or suing out process of execution against the body of any person, shall deposit in Court, at the time of issue of the warrant, diet-money for thirty days at such rate as the Court may direct, not exceeding two annas per diem, unless the Court for any special reason direct that deposit be made at a higher rate, which shall not exceed four annas per diem.

Effect of non-payment of diet-money in advance during imprisonment.

164. Payment of diet-money at the same rate shall be made previously to the commencement of each succeeding month of the imprisonment, in failure of which the party confined shall be discharged.

Diet-money spent to be costs in suit.

165. All diet-money spent in providing subsistence for any prisoner shall be added to the costs in the suit,

Refund of remainder.

and any diet-money not so spent shall be returned to the person who deposited the same.

Procedure in executing writ against movable property.

166. In executing a writ of execution against the movable property of a debtor liable under this Act, the officer charged with the execution of the writ shall prepare a list of the property pointed out by the judgment-creditor, and shall publish a proclamation, specifying the day upon which the sale is intended to be held, together with a copy of the said list at the intended place of sale and at the residence of the debtor.

A copy of the said proclamation and list shall be transmitted to the Court and shall be affixed in its office.

Time to elapse before sale of movable property.

167. No sale of any movable property taken in execution shall be made until after the end of ten days next following the day on which such property may have been so taken.

Custody meanwhile.

Until such sale the property shall be deposited in some fit place, or it may remain in custody of some fit person approved by the officer executing the writ.

Provisions applied to sales.

The provisions of sections sixty-six to seventy, so far as the same are applicable, shall apply to sales under this section.

Examination of third party claiming interest in property.

168. If before the day fixed for the sale a third party appear before the Court and claim a right or interest in any of the movable property taken in execution, the Court shall examine such party or his agent on oath or af-

firmation or otherwise, according to the law for the time being in force relative to the examination of witnesses,

and, if it see sufficient reason for so doing, may stay the sale of such property.

Stay of sale.

169. The Court shall adjudicate upon such claim and make such order between the claimant and the plaintiff and defendant in the original suit as seems fit.

Adjudication of such claims.

In trying such claim, the Court shall be guided by the rules contained in this Act, so far as they may be applicable.

Rules applied.

170. If the claimant fail to establish his right to the property taken in execution, the Court, at the time of disposing of the case, may award to the judgment-creditor against such claimant, as part of the costs, such sum as it deems sufficient to cover any loss of interest or damage which the judgment-creditor may have sustained by reason of the postponement of the sale of the property.

Compensation awardable against claimant failing to establish right.

171. No appeal shall lie from any order passed by the Court under the two last preceding sections.

No appeal from order under sections 169, 170.

But the party against whom the same is given may bring a suit in the Civil Court to establish his right at any time within one year from the date of the order:

Right to sue in Civil Court.

Provided that, if the order be for the sale of the property, the suit shall not be for the recovery of the property, but shall be for compensation from the judgment-creditor by whom the property was brought to sale.

Proviso.

172. No irregularity in publishing or conducting a sale of movable property under an execution shall vitiate such sale,

Sale not vitiated by irregularity in publishing or conducting it.

but this rule shall not deprive any person injured by such irregularity from recovering compensation therefor by suit in the Civil Court:

Right to sue for damage.

provided that such suit be brought within one year from the date of sale.

Limitation.

173. If the decree be for an arrear of rent due in respect of an under-tenure which by the title-deeds or the custom of the country is transferable by sale, the judgment-creditor may apply for the sale of the under-tenure, and the under-tenure may thereupon be brought to sale in execution of the decree, according to the rules for the sale of under-tenures for the recovery of arrears of rent due in respect thereof contained in any law for the time being in force.

Sale of transferable under-tenures in execution of decrees for arrears of rent due in respect thereof.

But no such application shall be received when a warrant of execution has been previously issued against the person or movable property of the judgment-debtor, so long as such warrant remains in force.

Exception.

If, after sale of an under-tenure, any portion of the amount decreed remains due, process may be applied for against any other property, movable or immovable, belonging to the debtor, and any such immovable property may be brought to sale in the manner provided in section one hundred and seventy-seven.

Process for recovery of portion of decree remaining unsatisfied after sale of tenure.

174. If, before the day fixed for the sale of any such land, share or interest, in execution of a decree for arrears of revenue or rent due in respect of such under-tenure, a third party appear before the Court, and allege that he and not the person against whom the decree has been obtained, is the proprietor of such land, share or interest, and was in lawful possession of the same at the time when such decree was obtained, the Court shall examine such third party in the manner provided in section one hundred and sixty-eight for the examination of third parties,

If third party claim land, share or interest to be sold, Court to stay sale and enquire into and adjudicate upon the claim.

and if it see sufficient reason for so doing, and such third party deposit in Court the amount of the decree or give sufficient security for the same, the Court shall stay the sale and proceed to enquire into and adjudicate upon the claim.

175. In trying such claim the Court shall be guided by the rules contained in this Act, so far as the same may be applicable,

Rules applied to adjudication of such claims.

and the judgment passed by the Court on such claim shall not be subject to appeal;

No appeal.

but the party against whom it is given may bring a suit in the Civil Court to establish his right at any time within one year from the date of the judgment.

Right to sue in Civil Court.

176. In the execution of any decree for the payment of money under this Act, not being money due as arrears of rent of a saleable under-tenure, if satisfaction of the judgment cannot be obtained by execution against the person or movable property of the debtor within the district in which the suit was instituted, the judgment-creditor may apply for execution against any immovable property belonging to such debtor.

In execution of decrees for money, if judgment not otherwise satisfied, execution may be applied for against immovable property.

177. If the immovable property against which execution is applied for be a house or other building, process shall be issued in the same manner as for the attachment and sale of movable property,

Mode of executing process if immovable property be a house or other building.

and the provisions of sections one hundred and sixty-six and one hundred and sixty-seven shall be applicable to the execution of such process.

178. If, before the day fixed for the sale of any immovable property as aforesaid, objection be offered to the sale on the ground of such property not belonging to the judgment-debtor, and consequently not being liable to be sold in execution of a decree against him, the Collector

Procedure in case of objection offered before sale.

shall examine the party making the objection in the manner prescribed in section one hundred and sixty-eight for the examination of third parties,

and, if satisfied that there is sufficient ground for so doing, shall stay the sale and proceed to enquire into and adjudicate upon the objection in the same manner, and subject to the same right of suit by the party against whom judgment may be given, as is provided in section one hundred and seventy-five.

SCHEDULE.

FORM A. (*See section* 44.)

I, *A. B.* of do solemnly declare that I did personally, or by my agent *C. B.*, on the day of , tender payment to *E. F.* of the sum of Rs. as and for the whole amount due from me on account of rent from the month of to the month of both inclusive. I further declare that the said *E. F.* refused to accept the sum so tendered, and to give a receipt in full for the same, and I do declare that, to the best of my belief, the sum of rupees —— so tendered, and which I now desire to pay into Court, is the full amount I owe the said *E. F.*

FORM B. (*See section* 45.)

Court of the Collector of *dated the* *day of*

To *E. F.* &c.

With reference to the written declaration of *A. B.*, you are hereby informed that the sum of rupees therein mentioned is now in deposit in this Court and that the above sum will be paid to you, or to your duly authorized agent, on application.

[This is to be written on a copy of the declaration in Schedule made by the person paying the money into Court.]

FORM C. (*See section* 61.)

FORM OF NOTICE TO OWNER OF DISTRAINED PROPERTY.

Office of Commissioner for sale of distrained property.

A. B., Distrainer.

[*Name, description and address of the owner of the property.*]

Whereas the said *A. B.* has applied to have the distrained property specified below sold for the recovery of alleged to be due to him as arrears of rent, you are hereby required either to pay the said sum to the said *A. B.*, or to institute a suit before the Collector to contest the demand within fifteen days from the receipt of this notice, failing which the property will be sold.

Dated this day of 187 .

FORM D. (*See section* 114.)

FORM OF SUMMONS TO DEFENDANT.

No. (of suit) dated

In the Court of

A. B., Plaintiff.

[*Name, description and address of plaintiff.*]

C. D., Defendant.

[*Name, description and address of defendant.*]

Whereas the said *A. B.* has brought a claim against you in this Court for (*here specify particulars of claim as given in the statement,*) you are hereby required to appear in person in this Court on the day of [*if not specially required to appear in person, state,* "in person or by an agent who has personal knowledge of the subject or who shall be accompanied by a person who has such knowledge"] to answer the abovenamed plaintiff, and you will bring with you (or send by your agent) [*here mention any document the production of which may be required by the plaintiff*] which the plaintiff desires to inspect, and all documents on which you may intend to rely in support of your defence. You will also bring with you your witnesses, if they are willing to attend without issue of process.

FORM E. (*See section* 119.)

FORM OF WARRANT OF ARREST.

No. (of suit) dated

In the Court of

A. B., Plaintiff.

C. D. Defendant.

To the Názir of the Court of the Collector of

Whereas the plaintiff in this suit has obtained an order from the Court for the arrest of the defendant, you are hereby commanded to bring the defendant before the Court on or before the day of to be dealt with according to law.

Dated this day of 187

FORM F. (*See section* 119.)

FORM OF NOTICE TO ACCOMPANY SUCH WARRANT.

In the Court of

A. B., Plaintiff.

[*Name, description and address of plaintiff.*]

C. D., Defendant.

[*Name, description and address of defendant.*]

Whereas the said *A. B.* has brought a claim against you in this Court for (*here specify particulars of claim as given in the statement*) and has obtained a warrant for your arrest, you are hereby required, unless you admit the claim, to bring with you to the Court all documents on which you may intend to rely in support of your defence.

FORM G. (*See section* 121.)

FORM OF SECURITY BOND FOR APPEARANCE OF DEFENDANT.

Whereas *A. B.*, plaintiff, has instituted a suit in the Court of the Collector of against *C. D.*, defendant, and the said *C. D.* has been required to give security for his appearance at any time when called on while the suit is pending and until execution of the decree, I, *E. F.*, hereby declare myself surety for the said *C. D.'s* appearance as aforesaid, and in case of his making default in such appearance, I engage to pay any sum for the payment of which the said *C. D.* may be liable under the decree. *If the suit be for the delivery of papers or accounts specify some sum to be fixed by the Collector.*

FORM H. (*See section* 154.)

WRIT OF EXECUTION AGAINST THE PERSON.

A. B., Plaintiff.

C. D., Defendant.

To the Názir of the Court of the Collector of

Whereas the said *C. D.* was directed by a decree of this Court, under date the day of 187 , to pay to *A. B.* the sum of and for costs of suit, amounting to , and whereas the said *C. D.* has omitted to pay the same, you are hereby commanded to apprehend the said *C. D.*, and to bring him with all convenient speed before this Court to be dealt with according to law.

FORM I. (*See section* 154.)

WRIT OF EXECUTION AGAINST THE EFFECTS.

A. B., Plaintiff.
C. D., Defendant.

To the Názir of the Court of the Collector of

Whereas *C. D.* was directed by a decree of this Court under date the day of 187 , to pay to *A. B.* the sum of and for costs of suit, amounting to , and whereas the said *C. D.* has omitted to pay the same, you are hereby commanded to levy the said sum of , and the sum of for costs of executing this process, by seizure and sale of such moveable property of the said *C. D.* as (is described in the list annexed, and) [*if no list is furnished, these words to be omitted*] shall be pointed out to you by the judgment-creditor or his agent; and you are hereby ordered to sell such property of the said *C. D.*, on some convenient day, not being less than ten nor more than fifteen days from the day of seizure, unless the amount leviable as aforesaid shall be sooner paid; and you are hereby commanded to certify to me what you shall do by virtue of this warrant.

STATEMENT OF OBJECTS AND REASONS.

Proposals to modify Act X of 1859, so far as it concerns the North-Western Provinces, have for some years been before the Local Government. The Act had been passed but a short time when its provisions were very generally pronounced unsuitable to cultivating tenures in Upper India. It did not give sufficient protection to large classes of tenants who held land prescriptively at favourable rates, while numbers of tenants, who had not hitherto been declared to have rights of occupancy in their holdings, were suddenly proclaimed tenants with beneficial interests. The conditions under which the rent of tenants with a right of occupancy could be enhanced, though apparently clear and intelligible, have, in practice, been found inequitable. Again, after decree of enhancement, there was no limit or term protecting the tenant from a further suit. When the re-settlement of the Provinces commenced, other defects were brought to light. It was found that the standard of enhancement adopted under the Act had led to much injustice. The rates selected as exemplars were very generally not representative rates, and the area of comparison was too limited. But the main point which forced itself on the attention of the Government was the expediency of recognising the old cultivating classes, who had at one time or other, under British rule, possessed proprietary rights.

The problem before the Government was, while giving to the landlords full and fair opportunities of enhancement on all classes of tenants, to recognise the claims of the old cultivating bodies. It was necessary that these should be compelled to submit to the proprietors, and to pay an equitable rent for their old holdings. It was equally necessary to protect them from constant and irritating attempts at enhancement, and to admit the superiority of their claim to hold at favourable rents, as compared with the classes who, by Act X of 1859, have been vested with rights of occupancy.

It is proposed to provide, in the Land Revenue Bill, for the determination of the rights and rents of these ex-proprietary cultivators, at time of settlement, by the Settlement Officer. The present Bill lays down the proposed law in regard to the ordinary action of the Rent Courts, after settlement has been completed, and in cases arising after settlement. Tenants entitled to hold at privileged rates have been divided into four classes: namely, those who, or whose ancestors, have lost their proprietary rights since the introduction of the British Rule, or may hereafter lose them, by—

(1.) Sale for arrears of revenue;

(2.) Sale in execution of a decree of the Civil or Revenue Courts;

(3.) Private agreement, sale or mortgage;

(4.) Confiscation under Acts XI and XIV of 1857.

Every tenant who has held or cultivated land continuously for twelve years has been declared to have a right of occupancy, with certain specified exceptions, in the land so held or cultivated by him. Tenants at fixed rates have been recognized, as provided for by Act X of 1859; and all rights of occupancy are declared heritable, but not transferable, except when they are so by local custom.

The object of the framers of the Bill has been, while enforcing protection for the classes termed "privileged," to alter as little as possible the existing law in regard to rights of occupancy. Hence, though a creation of our own, the rule absolutely conferring such a right

after twelve years' cultivation has been maintained. Similarly, it has been sought to strengthen the position of the proprietor in his *seer* land, by retaining the provisions of the present law, which forbid the growth of occupancy rights in such lands; and by laying down, with greater precision than has hitherto been attempted, what shall be considered *sír* lands for the purposes of the Rent Act.

On this point there is a great conflict of opinion; and the definition of *sír*, embodied in the Bill, is a compromise of the views of contending parties. On the one hand, it is urged that *sír* lands were, under Native Rule, the lands held free of revenue by the proprietor, on consideration of his collecting and paying in the revenue: and that the Government having now given him a share of the rental assets, and assessed his *seer* lands, they can no longer be considered as retained exclusively for his maintenance, or as held on any special and distinctive tenure, but should be regarded as in all respects similar to all other lands—the proprietor's *sír* being in fact equivalent merely to the proprietor's actual cultivation. On the other hand, it is pointed out that, by the custom of the country, much land, though not actually in the proprietor's cultivation, is practically recognised as *seer*, both by proprietors and cultivators; that in such land cultivators, other than the proprietor, are sub-tenants, or tenants-at-will only; and that any law ignoring this would be opposed to local custom, would be extremely unjust to the proprietors, and would not be popular with any class.

The Bill is divided into six chapters.

Chapter I defines certain terms used in the Bill.

Chapter II deals with the Rights and Liabilities of Landlords and Tenants, including Leases, Enhancement, and Abatement of Rent, Commutation of Rent, Payment in kind, Ejectment, Compensation for Improvements made by Tenants, Deposits of Rent in the Government Treasury.

Chapter III deals with Distraint.

Chapter IV is entitled "Jurisdiction of Courts and Appeals," and embraces Suits cognizable under the Act, Suits by a landlord, Suits by and against Lambardárs, Co-sharers, and Muáfídárs, Appeals, Limitation of Suits, Applications and Appeals therefrom, and Jurisdiction of Courts.

Chapter V lays down the Procedure of the Rent Courts, and

Chapter VI, the final Chapter, the Procedure in Execution of Decree.

In Chapter II, after laying down the classes of tenants as above specified, it is provided that all tenants shall be entitled to leases, but that the leases of all tenants shall expire with the term of the Government settlement. This section re-enacts Act XVI of 1842, the repeal of which has led to much inconvenience, and has opened a door to collusive leases by the proprietor, on the eve of a re-settlement of the Government revenue. The provisions for enhancement or abatement of rent differ in several important points from those of the present law. Rents paid by tenants with right of occupancy at fixed rates will, as heretofore, not be liable to enhancement. The rent of tenants having a privileged right of occupancy will be liable to be raised to a rate which shall be two annas in the rupee less than the rent paid by tenants with right of occupancy only. This class, again, will be liable to enhancement only on the ground that the rent paid is below the prevailing rate payable by the same class of tenants, for land of a similar quality with similar advantages, in villages of a similar quality with similar advantages. Class, in the absence of local custom, is not to be held to include caste. Where a Settlement Officer has formed villages into circles for purposes of assessment, the standard villages shall be selected from such circle. In the absence of any such guide, the villages are to be selected from the same tahsil or from a tahsíl immediately adjacent. The rents, whether of tenants holding at privileged rates, or tenants with a right of occupancy, are to be fixed for a term of years. The sections regarding commutation of rents in kind into money-rents do not need much notice. It will, however, be seen that power is now given only to tenants, not being tenants at will, or to landlords, to apply for commutation. The following sections provide for ejectment, and modify in some respects the present law. No ejectment of a tenant, or cancelment of a lease, shall be decreed on account of any breach of the lease which is not detrimental to the land leased, or which is not contrary to the purpose for which it was leased. With a view further to avoid forfeiture of leases as much as possible, the principle recognized by Act X of 1859, in the case of non-payment of rent, is extended to all breaches for which forfeiture may be incurred. Time is to be given to the tenant to remedy the injury or breach for which forfeiture has been decreed. Thus, a tenant who has planted trees in his field will first have time given him to uproot the trees, and will only be evicted should he fail to do so. A tenant with right of occupancy can be ejected for arrears only after notice served through a Court, and after the end of the agricultural year in which such arrears accrued. Provision is made for ejectment of tenants not having rights of occupancy, or whose leases have expired. Section 33 provides for applications to dispossess grantees of land exempt from rent. Much land so held became, twelve years ago, permanently rent-free, because landlords did not sue to resume it within the terms allowed by Act X of 1859. This was inequitable, landlords in many cases being wholly ignorant of the provision; and it is now sought to provide a remedy which, while securing the rent-free holding to the tenant, if he has so held it for fifty years, including two successions, gives the proprietor in all other cases,

at each fresh succession to the property, power to resume, within twelve years, land granted rent-free by his predecessors.

The sections regarding compensation are new. The grant of compensation is made a condition to ejectment, but not to enhancement; and the compensation is to be based on the *present value* of the improvements made by the tenant, and is to be given either in money or by the grant of a beneficial lease of land, or by both.

Chapter IV defines the suits which shall be heard under the Act; and excepting that suits against agents have been struck out as being of the nature of civil suits, the sections differ little from the present law. Appeals and applications follow, and do not need special notice. Under "Jurisdiction of Courts" are specified the cases under the Act with which the several classes of Collectors are empowered to deal: the more important being reserved to Collectors of the first class, while no Collectors, even of the first class, unless specially empowered, will have power to try suits for enhancement or abatement of rent, for resumption of rent-free grants, or determination of rent thereon, or suits for pattas or counterparts, and the determination of the rates of rent at which such pattas or counterparts are to be delivered.

The other chapters, namely—

III, relating to Distraint,

V, laying down the procedure of the Rent Courts, and

VI, relating to procedure in Execution of Decrees, re-enact, without alteration, the provisions of the existing law, as contained in Acts X of 1859 and XIV of 1863, and therefore need no comment.

GOVERNMENT OF INDIA

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP 67.

The Council met at Government House on Tuesday, the 25th February 1873.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Honour the Lieutenant Governor of Bengal.
The Hon'ble Sir Richard Temple, K. C. S. I.
The Hon'ble B. H. Ellis.
Major General the Hon'ble H. W. Norman, C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble F. S. Chapman.
The Hon'ble R. Stewart.
The Hon'ble J. R. Bullen Smith.
The Hon'ble R. E. Egerton.
His Highness the Mahárájá of Vizianagram, K. C. S. I.
The Hon'ble J. F. D. Inglis.
The Hon'ble R. A. Dalyell.
The Hon'ble Rájá Ramánáth Thákur.

BURMA MUNICIPAL BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill to provide for the appointment of Municipal Commissioners in Towns in the Province of British Burma, and to make better provision for the Police, conservancy and improvement thereof, and for the levying of rates and taxes therein. He said that we all knew that British Burma was a growing province. The rural parts of the country were in a backward state, but it had several important towns

growing in commerce and general importance. There was no municipal law for the province, and it was desirable to have some municipal institutions for the government of such towns. It was not necessary nor desirable then to mention the provisions proposed to be inserted in the Bill; that would be done when he introduced the Bill. But that it was desirable to legislate in this sense for Burma would be plain enough to hon'ble members.

The Motion was put and agreed to.

PANJÁB APPEALS BILL.

The Hon'ble MR. HOBHOUSE also moved that the report of the Select Committee on the Bill to prolong the law relating to Appeals and Reviews of Judgment in the Panjáb be taken into consideration. He had explained, on a previous occasion, that this was a mere prolongation of the law already existing in the Panjáb. Two amendments had been made, both of a character relating to procedure and technicalities, and both in accordance with the express wish of the Chief Court of the Panjáb and the Local Government. And the Select Committee simply approved the Bill with those amendments. That was the whole of the report of the Committee, and he asked that it be now taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that, in Section 4, the following words be omitted:—

"with the modifications subject to which it was extended to the Panjáb, by notification of Government, dated the twenty-sixth day of September 1866."

Those were the concluding words of the clause. The case was simply this:—The Government had power to extend the Code of Civil Procedure to the Panjáb, with such modifications as it thought fit: and, in 1866, it had so extended the Code with several modifications, in the first instance. The effect of section four of this Bill, as drawn, would be to revive and perpetuate those modifications. They were all of a small character: all relating to procedure and matters of technical detail. The Chief Court and the Local Government were of one mind that it was not desirable to revive them by this Bill. It was not necessary to explain what those modifications were, nor could he do so without reading out the notification. The Committee had satisfied themselves that all related to procedure and details, of which the Local Government and the Chief Court were the best judges whether they should find a place in this Bill or not. On that ground he asked the Council to accept the amendment which he now moved.

His Honour THE LIEUTENANT GOVERNOR was inclined to think that this might be a very important amendment, for it removed some important modifications of the Code of Civil Procedure, in the imposition of which he had had some hand. He believed that notice of this motion had been duly given, and it might perhaps be his own fault that he did not understand its nature and character. At all events he should ask that the Bill should not be passed immediately with such an important amendment as this.

The Hon'ble MR. HOBHOUSE thought His Honour the Lieutenant Governor would find that the amendment was of no great importance. He really could not tell the Council what those modifications were, without reading out the notification, the modifications being of a minute character, and relating purely to technicalities. The Secretary reminded him that they had been repealed by the Panjáb Appeals Act of 1868. That was so. Still the Bill as it stood would revive them, and he admitted that the amendment was a substantial one, though not in an important matter. The Committee had satisfied themselves that they related merely to those matters of procedure and technicality on which the opinion of the Judges and the Local Government were entitled to be heard with respect. If the Council desired it, he would send for the notification and read it through: he could not explain

the modifications in any other way. If the Council would take the opinion of the local authorities as conclusive on that point, well and good: if not, he must, with the help of the notification, explain to them every one of those modifications.

His Excellency THE PRESIDENT thought that perhaps the best course would be for the Council to make the amendment now, and that the passing of the Bill should stand over for a week to enable His Honour the Lieutenant Governor and other hon'ble members to enquire into the matter and satisfy themselves. Perhaps, in the meantime, the hon'ble member in charge of the Legislative Department would cause the necessary papers to be circulated in order to let hon'ble members see the effect of the amendment.

His Honour THE LIEUTENANT GOVERNOR was not aware when he made the observation that the hon'ble member himself had not studied those modifications of the law as he now rather gathered to be the case. He was quite willing to assume that the local authorities were probably right, but he thought the Council would stultify itself if they passed this amendment without having heard what those modifications were. His impression was that those modifications were of an important character. When the Code was introduced into Oudh and other provinces, we made some important modifications under the authority reserved to the Government. Without having those modifications before them, it was impossible to say whether the alterations were of importance or not. If the hon'ble member had satisfied himself that those modifications were of no importance, HIS HONOUR would withdraw his objection to the amendment before the Council; but if Mr. Hobhouse had not done so, then HIS HONOUR thought it would not be desirable that the Council should pass this Act at the present sitting, and it would be better that the amendment itself should be postponed to another day.

The Hon'ble MR. BAYLEY, if he understood rightly, thought that this clause merely referred to the question of appeals, and not to the general modifications made in the Code by the order of extension, which were, no doubt, of considerable importance. The modification made by that order, however, in the case of appeals, was peculiar to the Panjáb, and he thought he might say, having had considerable experience of it in his official capacity as Secretary, that it had failed in its working in the Panjáb.

The Hon'ble MR. EGERTON said the notification alluded to in the Bill was passed in 1866, when Act VIII of 1859 was extended to the Panjáb. At that time it was considered that the system of appeals prescribed by Acts VIII of 1859 and XXIII of 1861 was not well adapted to the Panjáb, and it was desired to modify it when the Act was extended. The notification dealt with other matters besides appeals. It dealt with the definition of "authorized agent", and with the mode of execution of decrees against landed property, as well as with the question of appeals. After Act VIII of 1859 had worked for some time with the modifications of the notification regarding appeals, it was considered desirable to make a special law of appeals for the Panjáb, by which the procedure was made to differ from Act VIII of 1859 rather less than before. That Act was passed in 1868. When Act VII of 1868 was passed, the portion of the notification, so far as it related to appeals, was virtually repealed; and the law of appeals became Act VIII of 1859 taken together with Act VII of 1868. When the present Bill came up to be considered, the Chief Court recommended that two alterations should be made—one in section 3, to omit certain words and to add certain others, and the other in section 4, to insert the words which it was now proposed to omit, and by which the notification, virtually repealed in 1868, was revived so far as it related to appeals. It was overlooked, apparently, that this would create a very complex procedure, and that appeals, instead of being regulated by Act VII of 1868 and the Code of Civil Procedure only, would be governed also by the provisions of the notification of 1866, which had been repealed for the last five years. The Chief Court, therefore, on reconsideration,

withdrew the amendment which it originally proposed. It was by desire of the Chief Court that the old notification was revived. Now, the Chief Court had reconsidered their amendment, and proposed that the words reviving the notification should be omitted, leaving the Code to work as it had worked ever since Act VII of 1868 had been passed. The provisions relating to appeals in the Panjáb Appeals Act had been substituted ever since 1868 for the procedure laid down by the notification, and that system was now proposed to be continued. That was the whole scope of the amendment. It appeared to MR. EGERTON that there was no great importance in the amendment, except this, that it removed what would otherwise be a complication in procedure.

The Hon'ble MR. HOBHOUSE feared he had been misunderstood. What he said was, that the Committee had studied the modifications in question up to the point of satisfying themselves that they related to matters of technicality and procedure, eminently within the judgment of the local authorities. Having thus satisfied themselves, they did not go on to discuss the bearing of each detail. They acted on the opinion of those who said it was desirable to keep this law of procedure as it stood. This opinion was not challenged before them. He was told now that it was his duty to explain each point to the Council. He protested against that. He thought it was not necessary to explain every detail of a measure. It was necessary for those who objected to show to what they objected. If His Honour the Lieutenant Governor wished to move any amendment, it was for him to explain to what he objected. But he would put it to the Council whether it was the duty of their members to explain all minute details until they were challenged.

His Excellency THE PRESIDENT thought the best course would be to adjourn the debate on the amendment. To him, the explanation given by the Hon'ble Mr. Egerton appeared perfectly satisfactory, and showed very clearly that the effect of the amendment was to continue the practice which existed under the Act of 1868. At the same time, as His Honour the Lieutenant Governor had not had time to consider the question, it appeared to HIS EXCELLENCY that there was not the slightest objection to adjourn the debate.

The debate was adjourned.

OBSOLETE ENACTMENTS BILL.

The Hon'ble MR. HOBHOUSE also presented the preliminary report of the Select Committee on the Bill for the repeal of certain obsolete enactments.

The Council then adjourned to Tuesday, the 4th March 1873.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE FORTNIGHT ENDING THE 27th FEBRUARY 1873.

GENERAL REMARKS.—There is little change since last report. There has been some rain in the west of India, and the crops in Gujrat and Khandesh seem to have been slightly damaged by it. On the other hand, there has been little rain in Northern India and Bengal, though there have been light showers in places in the North-Western Provinces. Distress is said to be increasing in Jhansi.

Presidency or Province.	District.	Date of District Report.	Rainfall for fortnight preceding.	Date of report from Local Government or Administration.	State of Agricultural prospects.	Remarks of Local Government or Administration.
MADRAS ...	Krishna ...	February 26 ...	*Nil.*	February 28 ...	Water-supply sufficient; later dry crops suffering from grub; prices falling in some places and rising in others; markets well supplied; health fair.	General prospects satisfactory except Karnul
	Karnul ...	" 26 ...	"	" 28 ...	Dry crops failed; markets tolerably supplied; prices risen; fever and dengue prevalent.	
	Nagapatam ...	" 26 ...	—	" 28 ...	Slight rain; rivers low; crops in some places injured by unseasonable rain; harvest fair; markets well supplied; prices steady; health good.	
	Trichinapali ...	" 26 ...	...	" 28 ...	Slight rain; water-supply sufficient: crops good order; dry crops injured by rain; harvest below average; markets well supplied; prices falling; health good.	
	Sind.					
BOMBAY ...	Karachi ...	February 26 ...	*Nil*	February 27 ...	Rabi crops good; wheat 11·19 sers; rice 7·46.	
	Haidarabad ...	" 26 ...	"	" 27 ...	Weather warm. Early rabi ripening well; public health good; prices same; early cotton, melons and Indian corn being sown.

CALCUTTA;
COMMR. OF ISSUE OF PAPER CURRENCY,
The 3rd March 1873.

H. SANDEMAN,
Head Commissioner.

PENSIONS AND GRATUITIES.

The 7th March 1873.

No. 1545.—The Governor General in Council directs that the following be added to Rule 2 under Section 66 of the Civil Pension Code after the words "or suspended" :—

provided always that pension be not increased on account of increments in pay not actually received.

No. 1599.—The Governor General in Council directs that the following be added as case (*q*) under Rule 1, Section 39 of the Civil Pension Code :—

(*q*.) Zilladars in the North-West Stud Breeding Establishment.

SEPARATE REVENUE.

OPIUM.

The 6th March 1873.

No. 1515.—Opium Revenue to date compared with the Estimate for the year 1872-73 :—

PRESIDENCY.	LATEST MONTH.			TWELVE SALES OF BENGAL OPIUM AND ELEVEN MONTHS' DUTY ON MALWA OPIUM.		
	Estimate.	Actual.	Better than Estimate.	Estimate.	Actual.	Better than Estimate.
	£	£	£	£	£	£
Bengal	434,700*	457,570	22,870	5,300,235*	5,915,391	615,156
Bombay	169,553	238,260	68,707	2,060,433	2,344,225	283,792
TOTAL ...	604,253	695,830	91,577	7,360,668	8,259,616	898,948

* Instead of 44,175 chests, as originally estimated, the quantity sold in 1872-73 will be (as already advertised), in consequence of the failure of the crop, only 42,675 chests. The average price of a chest was estimated originally at Rs. 1,200. It must now be Rs. 1,242, if the whole estimate is to be made good. The figures here shown as "estimates" are adjusted accordingly.

SEPARATE REVENUE.

POST OFFICE.

The 7th March 1873.

No. 1581.—Mr. T. W. Gribble, B. C. S., is appointed to officiate as Post Master General, Bengal.

No. 1597.—Mr. M. Percy received charge of the office of Post Master, Madras, from Mr. T. Rhenius on the forenoon of the 22nd February 1873.

R. B. CHAPMAN,
Secretary to the Govt. of India.

MILITARY DEPARTMENT.

Fort William, the 1st March 1873.

No. 222 *of* 1873.—The under-mentioned Officer, whose exchange with Captain E. G. Clayton, Royal Engineers, Bengal, was notified in the General Orders of His Excellency the Commander-in-Chief, dated the 31st December 1872, has reported his arrival on the date specified :—

Captain Francis George Oldham, Royal Engineers, Imperial List,—date of arrival at Fort William, 7th February 1873.

The services of Captain Oldham are placed at the disposal of the Public Works Department, with effect from the 27th February 1873.

No. 223 *of* 1873.—His Excellency the Governor General in Council has been pleased to sanction the formation of a Volunteer Corps, composed of the employés of the Eastern Bengal Railway Company, to be designated the "Eastern Bengal Railway Volunteer Rifle Corps," and to be under the administrative command of the Commanding Officer for the time being of the Calcutta Volunteer Rifle Corps.

With reference to the above, the following appointment is made in the Eastern Bengal Railway Volunteer Rifle Corps :—

To be Major and Commandant.

Franklin Prestage, Esq.

No. 224 *of* 1873.—The under-mentioned Officers of the Royal Engineers, who have been placed under orders for duty in the Bengal Presidency, reported their arrival on the dates specified :—

Lieutenant R. F. Moore,—date of arrival at Bombay, 11th February 1873.
Lieutenant H. H. Hart,—date of arrival at Bombay, 18th February 1873.

No. 225 *of* 1873.—The under-mentioned Officers are permitted to proceed to Europe on furlough on private affairs :—

Lieutenant Colonel John Macdonald, of the Bengal Staff Corps, Deputy Superintendent, 1st Grade, Revenue Survey Department,—for twelve months, under the Regulations of 1868.

Major Malcolm George Clerk, of the late 4th European Regiment, Assistant Engineer, 1st Grade, Department of Public Works,—for two years, under the Regulations of 1868, embarking at Bombay.

The 3rd March 1873.

No. 226 *of* 1873.—The under-mentioned Officer is permitted to proceed to Europe on furlough on private affairs :—

Lieutenant Colonel (Brevet Colonel) Edward Oakes, of the Bengal Staff Corps, Commandant, 2nd Regiment of Native (Light) Infantry,—for two years, under the Regulations of 1868, embarking at Bombay.

The 5th March 1873.

No. 227 of 1873.—His Excellency the Governor General in Council is pleased to make the following appointment in the Department of the Adjutant General :—

Colonel T. Rattray, C. B., C. S. I., of the Bengal Staff Corps, Commandant, 42nd (Assam) Regiment of Native (Light) Infantry, to be 1st Assistant Adjutant General at Head Quarters, in succession to Colonel G. E. Holmes, whose tenure of service on the Staff will expire on the 16th April 1873, under the operation of G. G. O. No. 1068 of 1872.

No. 228 *of* 1873.—The services of Lieutenant A. C. Talbot, of the Bengal Staff Corps, 2nd Squadron Subaltern, 2nd Cavalry, Hyderabad Contingent, are placed temporarily at the disposal of the Foreign Department.

No. 229 *of* 1873.—Lieutenant Colonel J. S. Ogilvie, of the Bengal Staff Corps, Deputy Assistant Commissary General, 1st Class, is allowed leave of absence for one month, from such date as he may avail himself of it, to visit Bombay, preparatory to applying for furlough to Europe on medical certificate under the Regulations of 1868.

No. 230 *of* 1873.—With reference to G. G. O. No. 673 of the 3rd August 1866, it is hereby notified that the Director of Gymnastics in India shall in future be designated "In-

spector of Gymnasia in India," and that the regimental staff allowed shall be as follows, instead of that previously sanctioned in paragraph 6 of the Order :—

1 Non-Commissioned Officer as Regimental Instructor, at 1*s.* 6*d.* a day, for six days in the week.

2 Non-Commissioned Officers as Assistant Instructors, at 1*s.* a day each, for six days in the week.

Order Books to be corrected accordingly.

No. 231 *of* 1873.—The under-mentioned Officer is permitted to proceed to Europe on furlough on private affairs :—

Major Charles Ferguson Sharpe, of the Bengal Staff Corps, District Superintendent of Police, 2nd Grade, Sultanpore, Oude,—for two years, under the Regulations of 1868, embarking at Bombay.

This cancels G. G. O. No. 1150 of 1872.

No. 232 *of* 1873.—The under-mentioned Officer has been allowed furlough to Europe on medical certificate :—

Lieutenant Charles Folliott Powell, of the Bengal Staff Corps, 2nd Wing Subaltern, 2nd Punjab Infantry, Punjab Frontier Force,—for one year, under the Regulations of 1868, embarking at Bombay.

Captain Gerard Noel Money, 4th March 1873.

No. 249 *of* 1873.—The following Military Letter from the Right Hon'ble the Secretary of State for India is published for general information :—

MILITARY. INDIA OFFICE;

No. 14. *London, 30th January* 1873.

To His Excellency the Right Hon'ble the Governor General of India in Council.

MY LORD,

PARA. 1.—I have received and considered in Council your Military Letter No. 200 of the 26th September 1872, containing proposals to enable Officers of Royal Engineers employed in India to qualify for the military examinations prescribed by Horse Guards General Order No. 52 of 1872, to be passed previous to promotion.

2. In reply, I have to acquaint your Government that I have sanctioned the following arrangements:—

I.—That Royal Engineer Officers in the Public Works Department in India may be allowed to take special leave for three months in India on full pay, in order that they may be attached to some Corps for military duty; such leave to be considered as service in all respects.

II.—That all Lieutenants and Captains of the Royal Engineers, when on furlough in England, shall be allowed, in addition to their furlough, to spend a certain time on duty at the School of Military Engineering at Chatham, drawing English pay and extra pay as laid down at page 45 of the Revised Army Regulations, together with servant's allowance at the rate of 1*s.* 6*d.* a day.

The "certain time" above referred to is to be a maximum of six months after the first eight years of service in India qualifying for furlough, and three months after the second period of six years.

The time passed at Chatham on duty will not be allowed to reckon as a qualification for furlough.

Officers on furlough, who may prefer to spend a part of their furlough at the School, will not be subject to any reduction of their furlough pay.

III.—That the same advantages be accorded to Officers of Royal Engineers on leave on medical certificate, the time to be passed at Chatham in their case being regulated on the above principle, the period, however, not being less than three months.

3. In accordance with the suggestion of Lord Napier of Magdala, a certificate of proficiency will be required in all cases to authorize the time passed in study at Chatham to count as service in India.

I have, &c.,
(Sd.) ARGYLL.

No. 250 *of* 1873.—The under-mentioned Officer is permitted to proceed to Europe on furlough on private affairs:—

Lieutenant Colonel (Brevet Colonel) William Dunn Bishop, of Infantry,—for one year, under the Regulations of 1868, embarking at Bombay, after 6th April 1873.

Mails for Greece.—Under arrangements made with Her Majesty's Post Master General, letters for Greece may now be sent *viâ* Bombay through the French Post Office, Alexandria, if fully prepaid at the rate of 7 annas 4 pies per ½oz. Letters not fully prepaid at the above-mentioned rate will be forwarded as heretofore by French Packet.

Reduction of postage rates.—On letters for Newfoundland, consequent upon an alteration of the rates of postage chargeable upon letters passing between the United Kingdom and Newfoundland, the rates chargeable in India on letters for Newfoundland have been reduced from 12 to 10 annas per ½oz. (*viâ* Brindisi), and from 10 to 8 annas per ½oz. (*viâ* Southampton), the reduced rates being the same as those already prescribed for letters to Canada.

Mails to Zanzibar.—The following table of the Steam Packet Service between Aden and Zanzibar, and *vice versâ*, is published for general information. The service will be a monthly one in connection with the Mail Steamers from England :—

Leave Bombay.	Arrive Aden.	Leave Aden.	Arrive Zanzibar.	Leave Zanzibar.	Arrive Aden.	Leave Aden.	Arrive Bombay.

Mails for Zanzibar, Mozambique, Delagoa Bay, Natal, and the Cape of Good Hope.—Notice is hereby given that correspondence for Zanzibar forwarded *viâ* Bombay to Aden by the Mail Steamers of the Peninsular and Oriental Steam Navigation Company, and thence by the British India Steam Navigation Company's vessels, is chargeable at the same rates as correspondence for Aden, but all such correspondence must be fully prepaid.

2. A continuation of the same line of communication from Zanzibar to Mozambique, Delagoa Bay, Natal, and the Cape of Good Hope has come into force from this month, and correspondence may be sent thereby *viâ* Bombay, commencing with the Mail Steamer leaving Bombay on the 17th February. Correspondence for these places is subject to the same rates and conditions as prescribed above for correspondence for Zanzibar.

Mails for Hong-Kong and San Francisco.—Information having been received that the American Mail Steamer timed to leave Hong-Kong for San Francisco on or about the 27th of April next, will not perform the voyage in question, it is hereby notified that the despatch of Mails for America *viâ* Hong-Kong, entered under date the 25th March in the Calendar of Mail Steamer Departures from Bombay, published in the *Gazette* of the 25th January 1873, will not be made.

The postage for a ½ oz. letter to the Australian Colonies is 8 annas 8 pies.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 4th March 1873, and is hereby promulgated for general information :—

ACT No. IX OF 1873.

An Act to prolong the law relating to Appeals and Reviews of Judgment in the Panjáb.

Preamble.

WHEREAS the law relating to appeals and reviews of judgment in the Courts established in the Panjáb has been amended by an Act of which the second section provides that it shall continue in force to the thirtieth day of April 1873: And whereas it is expedient to repeal that Act and to re-enact it without prescribing any period for its continuance; It is hereby enacted as follows :—

Short title.

1. This Act may be called "The Panjáb Appeals Act, 1873:"

Extent.

It extends to the territories for the time being under the government of the Lieutenant Governor of the Panjáb;

Commencement.

And it shall come into force at once.

Repeal of Act VII of 1868.

2. Act No. VII of 1868 *(to amend the law relating to Appeals and Reviews of Judgment in the Panjáb)* is repealed.

Appeals when to lie.

3. An appeal shall lie from the decrees of the Courts of original and appellate jurisdiction to the Courts authorized under Act No. XIX of 1865 *(The Panjáb Courts' Act)* and Act No. IV of 1866 *(The Panjáb Chief Court Act)* to hear appeals, except where such decrees are by law declared final.

Code of Civil Procedure to apply to appeals.

4. All appeals falling within the jurisdiction of the Courts established in conformity with the said Acts shall, save as in the said Acts and in this Act is otherwise provided, be regulated by the Code of Civil Procedure.

Second regular appeals.

5. If the decision of a Deputy Commissioner or of a Commissioner passed in regular appeal reverse or modify the decision of the Court of original jurisdiction on a point material to the merits of the case, the Commissioner, where the decision shall have been passed on regular appeal by the Deputy Commissioner, and the Chief Court where the decision shall have been passed on regular appeal by the Commissioner, may receive a second appeal, if, on a perusal of the grounds of appeal and of copies of the judgments of the Courts below, a further consideration of the case appear to the Commissioner or the Chief Court (as the case may be) requisite for the ends of justice.

Time for presenting appeal.

6. The memorandum of appeal prepared in the form and containing the particulars mentioned in the Code of Civil Procedure, accompanied by copies of the judgments of the lower Courts, shall be presented in the Court empowered to hear the appeal within the period hereinafter specified, unless the appellant shows sufficient cause to the satisfaction of such Court for not having presented the memorandum of

appeal within such period, that is to say, within sixty days if the appeal lie to the Court of a Deputy Commissioner or Commissioner, and within ninety days if the appeal lie to the Chief Court.

The period shall be reckoned from and exclusive of the day on which the judgment and decree appealed against was pronounced and also exclusive of such time as may be requisite for obtaining a copy of the judgment and decree from which the appeal is made.

Confirmation of decision of lower Court.

7. When a memorandum of appeal, or an application for the admission of a special appeal, has been registered, the Appellate Court may, if it sees fit, after fixing a time for hearing the appellant or his pleader, and hearing him accordingly if he appears at such time, confirm the decision of the lower Court, without sending intimation of the appeal to such Court and without issuing notice to the respondent.

Chief Court may remove appeals.

8. The Chief Court of the Panjáb may, whenever it thinks proper to do so, either on the agreement of the parties to that effect or for purposes of justice, remove and try any appeal falling within the jurisdiction of any Court subject to its superintendence.

Review of judgment.

9. Any person considering himself aggrieved by a decree of a Court of original jurisdiction from which no appeal shall have been preferred to a superior Court,

or by a decree of a District or Divisional Court from which no regular or special appeal shall have been admitted by the Chief Court,

or by a decree of the Chief Court from which either no appeal may have been preferred to Her Majesty in Council, or, an appeal having been preferred, no proceedings in the suit have been transmitted to Her Majesty in Council;

and who, from the discovery of new matter or evidence which was not within his knowledge, or could not have been adduced by him, at the time when such decree was passed, or from any other good or sufficient reason, may be desirous of obtaining a review of the judgment passed against him,

may apply for a review of judgment by the Civil Court which passed the decree, or by any Court to which the business of the former Court has been transferred.

Judgments of Civil Courts subject to revision only as provided by Act.

10. Except as hereinbefore provided, the judgments of the Civil Courts established in conformity with the said Acts and with Act No. III of 1868 *(to authorize the Local Government of the Panjáb to invest any person with the powers of an Assistant Commissioner or Tahsíldár)* shall not be subject to revision.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 19.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th February 1873, and was referred to a Select Committee with instructions to make their report thereon in a month:—

No. 4 OF 1873.

THE NORTH-WESTERN PROVINCES RENT BILL, 1873.

CONTENTS.

PREAMBLE.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
2. Acts repealed.
3. Interpretation-clause.

CHAPTER II.

RIGHTS AND LIABILITIES OF LANDLORD AND TENANTS.

4. Persons holding land at fixed rent without change since permanent settlement to continue to hold at such rates.

SECTIONS.

5. Tenants holding land at fixed rates to have right of occupancy at those rates.
6. Presumption where rent of land not changed for twenty years.
7. Tenants with right of occupancy at privileged rates.
8. Right of occupancy of tenant cultivating or holding land for twelve years.
   Tenants barred from such right.
9. Rights under sections 5, 7 and 8 when transferable.

I.—Leases.

10. Lease to which tenant is entitled.
11. Leases to which tenants having right of occupancy are entitled.
12. Leases to which tenants not having right of occupancy are entitled.
13. Landlord granting lease entitled to counterpart engagement.
14. Relinquishment of land by tenant.
15. Service of notice through tahsíldár, if landlord or agent refuse to receive it.
16. Mode of serving notice.
    Determination of class of tenure of tenant.

II.—Enhancement and Abatement of Rent.

17. Bar to enhancement of rent of tenants with right of occupancy at fixed rates.
18. Enhancement in case of tenants with privileged right of occupancy.
19. Enhancement after decree fixing rent.

SECTIONS.

20. Enhancement in case of tenants with right of occupancy under section 8.
Ground for enhancement.
Selection of villages for comparison.
21. Enhancement, in case of tenant with right of occupancy, after fixing of rent by decree.
Cases excepted.
22. Time for instituting suits for enhancement.
Decrees when to take effect.
23. Bar to enhancement except by agreement or under decree.
24. Grounds of claim to abatement by tenant with right of occupancy.

III.—On Commutation of Rent and Payment in Kind.

25. Commutation of rents in kind to fixed money payment.
Power to apply provisions of section to districts;
to empower officers to decide suits, and to lay down rules.
26. Application by tenant for deputation of officer to divide produce or appraise crop, when landlord neglects to attend.
27. Procedure on such application.

IV.—Ejectment.

28. Liability of tenant to pay interest on arrear and to be ejected.
Bar to ejectment without decree.
Ejectment not to be decreed for certain breaches of lease.
29. Procedure for ejectment of tenant with right of occupancy, or holding under unexpired lease.
30. In case of tenant for limited period, landlord may serve notice.
31. Contents of notice.
32. Mode of serving notice.
33. Effect of failure of tenant to institute suit to contest liability to ejectment.
34. Procedure to enforce ejectment.
Saving of tenant's right to sue.
Notice of ejectment when void.
35. Right of ejected tenant to value of growing crops or ungathered produce.
36. Application for assessment of rent-free land.
Limitation.
Written deed of grant valid against applicant.
Possession for 50 years to vest proprietary right.
Saving of liability for Government revenue.

V.—Compensation for Improvements made by Tenants.

37. Tenants' right to compensation for improvements.
38. Basis of, and mode of making, compensation.
39. Settlement of difference as to amount or value of compensation.
40. Reference to arbitration.
41. Right of tenant to damages for exactions in excess of rent or for withholding receipt.
Contents of receipt.

SECTIONS.

42. Damages for extorting payment of rent by duress.
Liability to punishment for extortion not affected.

VI.—Deposit of Rent in Government Treasury.

43. Deposit of amount tendered by tenant and refused.
44. Form and verification of application.
Penalty for false statement.
45. Notice to issue on deposit being made.
46. Mode of serving notice.
47. Payment to person served with notice on his application.
48. Refund to depositor.

CHAPTER III.

DISTRAINT.

49. Produce of land hypothecated for rent.
Recovery of arrears by distraint.
Bar to distraint of produce covered by security.
Sharer not entitled to distrain.
50. No distraint for over-due arrear, nor, without agreement, for excess over past year's rent.
51. Distraint by managers under Court of Wards, &c.
Liability to damages for illegal act.
52. Persons empowered to distrain to give written authority to servants employed to make distress.
53. Standing crops, and crops gathered liable to distraint.
Exception.
54. Defaulter to be served with written demand and account.
Mode of service.
55. Distress to be proportionate to arrear.
List of property to be prepared, and copy served on owner.
56. Standing crops, &c., when attached, may be reaped and stored by cultivator, or, if he neglect, by distrainer.
Sale of products which cannot be stored.
57. Assistance to distrainer opposed or apprehending resistance.
58. Distress to be withdrawn on tender of arrear and expenses before sale.
59. Application for sale.
60. Contents of application.
Deposit of cost of service of notice.
61. Procedure by Amín, &c., on receipt of application.
62. Amín to suspend sale on receipt of Court's certificate of institution of suit.
63. Suit to contest distrainer's demand before issue of notice of sale.
64. Distress when to be withdrawn.
65. When sale may be proceeded with.
66. Place of sale.
Manner of sale.
Withdrawal of distress when demand and costs satisfied.
67. If fair price be not offered, sale may be postponed and shall be then completed.
68. Payment of purchase-money.
Re-sale on default.
Certificate to purchaser.
69. Deduction, from proceeds, of costs of sale.
Payment of distrainer's expenses.

SECTIONS.

Discharge of arrear with interest.
Surplus.
70. Sale-officers and employees prohibited from purchasing.
71. Report of irregularities by distrainer.
Postponement of sale, and report to Court when defaulter has not received due notice.
Order of Court.
72. Levy of charge when sale-officer attends and no sale takes place.
Recovery from owner.
Recovery from distrainer.
Limit to charge.
73. Proceedings of Amíns, &c., subject to revision and orders of Collector.
Power to call for reports and statements.
74. Order of sale when amount adjudged due.
Second proclamation of sale.
Sale on failure to pay debt and costs.
75. In suit to contest his demand, distrainer to prove arrear.
Recovery of amount decreed in favour of distrainer.
Compensation in case of vexatious distress.
76. Suit by person claiming property distrained for arrears alleged to be due from another.
Release of property on security being given.
Order of Court when claim dismissed.
Decree for release and compensation when claim upheld.
Saving of prior claim of person entitled to rent of land.
77. Procedure where right to distrain is claimed by other than distrainer.
Saving of right to sue in Civil Court.
78. Persons prevented from suing in time to save property from sale, may sue for damages.
79. Wrongful acts of distrainer.
80. Suit by owner against person distraining or selling without authority.
Penalty in addition to damages.
81. Limitation of suits under sections 78, 79, 80.
82. Procedure in case of resistance to distraint.

CHAPTER IV.

OF PROCESS.

83. Mode of serving process.
Deposit before issue.
Power to direct service free of charge.
84. Punishment for resistance of process.
Power to issue summons and warrant.
Orders under this section appeal against.

CHAPTER V.

JURISDICTION OF COURTS AND APPEALS.

Suits cognizable under the Act.

85. Suits cognizable by Revenue Courts only.
Bar to cognizance by other Courts.

IV.—Suits by, and against, Lambardárs, Co-sharers and Muafídárs.

V.—Appeals.

Investigation of plea of set-off.
86. Judgment of Collector final where amount, or value of property, in suit, does not exceed 100 rupees,
unless certain questions determined.
Appeal in such cases.
87. In suits not open to appeal, Collector may grant re-hearing upon discovery of new evidence, &c.
88. Appeal from decision of Collector of second class.
89. Time for presentation.
Time to be excluded from reckoning.
90. Procedure in appeal.
91. Re-admission of appeal.
92. Judgment in appeal.
93. Appeal to District Judge.
Appeal to High Court.
94. Rules as to time of presentation, &c., to apply.
95. Special appeal to High Court from decisions of District Judge.
96. Rules as to last day for presentation, deposit or payment, when Court is closed on such day.

VI.—Limitation of Suits.

97. Limitation of suits.

VII.—Applications and Appeals.

98. Applications cognizable by Revenue Courts only.
99. Notice to defendant.
100. Time for presenting appeals from orders.
Power to Board to call for cases.

VIII.—Jurisdiction of Courts.

101. Local Government may invest officers with Collector's powers, and withdraw them.
102. Suits and applications cognizable by Collectors.
103. Additional suits and applications cognizable by Collector, first class.
104. Additional suits cognizable by Collector, first class, specially empowered.

CHAPTER VI.

ON PROCEDURE UP TO JUDGMENT.

105. Mode of instituting suits. Contents of plaint or statement of claim.
106. Statement by whom to be presented.
107. Verification of statement.
108. Document relied on by plaintiff to be presented with statement.
Admission afterwards.
109. Procuring production of document in possession of defendant.
110. Contents of statement in suits for arrears of rent.
111. Contents of statement in suits for ejectment,
or for recovery of occupancy or possession.
112. Return or amendment of statement.
113. Issue of summons; order for personal attendance or appearance by agent.
114. Fixing of day to be specified in the summons,
order to produce documents,
and to bring witnesses.
115. Mode of serving summons.
116. Endorsement on summons as to mode of service.
117. Service of summons in another district.
118. Deposit of cost of serving summons or warrant.
Effect of failure to deposit.

SECTIONS.

119. Procedure when plaintiff desires issue of warrant of arrest.
120. Procedure after arrest of defendant.
121. Procedure when defendant is brought before Court under warrant.
Form of security-bond.
122. Procedure when defendant cannot be arrested under warrant.
123. Compensation for arrest applied for without reasonable cause.
124. Consequence of neither party appearing on day fixed.
125. If defendant only appear, Court shall pass judgment by default; or decree upon admission of claim.
Proviso.
126. If plaintiff only appear, Court may proceed *ex parte*.
127. If defendant appear on adjourned hearing, Court may allow him to be heard in answer.
128. No appeal from judgment *ex parte* or by default;
but Court may revive suit and alter or rescind decree.
Adverse party to be summoned.
129. Examination and cross-examination of parties and agents.
Defendant may file written statement.
130. Mode of examination.
131. Witness produced may be examined.
132. Document relied on by defendant to be produced at first hearing.
133. Decree after examination, if no further evidence is required.
134. Party to attend in person when his agent is unable to answer.
Judgment or order, if he fail to appear.
135. Procedure when parties at issue on question requiring evidence.
136. Parties to produce witnesses or procure attendance by summons.
137. Provisions regarding attendance, examination, &c., of witnesses.
138. Case to be struck off if neither party appears;
Trial of issue *ex parte*.
139. Provisions to apply when suits are instituted or defended on behalf of landholders by their employees.
Processes served on such employees.
140. Personal attendance of female plaintiff or defendant when not required.
141. Parties may employ agents or mukhtárs; but personal attendance not excused.
Fee for agent not chargeable as costs.
142. Court may grant time or adjourn hearing.
143. Court may cause local enquiry and report, or may itself enquire.
Provisions applied to such enquiry.
Record in case of enquiry by Court.
144. Defendant may pay admitted debt and costs into Court.
Plaintiff chargeable with subsequent costs if he proceed and recover no further sum.
145. No interest to plaintiff after date of deposit by defendant.
146. In suits for rent, third person who has enjoyed it to be made a party.
Saving of right to sue in Civil Court to prove title to rent.

SECTIONS.

147. Provisions of Civil Procedure Code as to arbitrations applied.
148. Court may order tenant to repair damage caused by breach of contract or lease, for which ejectment or cancelment of lease is decreed.
149. Delivery of judgment.
Language and contents.
When it may be in English.

CHAPTER VII.

PROCEDURE IN EXECUTION OF DECREE.

150. Mode of executing decree for ejectment or re-instatement of ryot.
Magistrate to give it effect in case of opposition.
151. Mode of executing decree for cancelment of lease or for ejectment or re-instatement of farmer or tenant.
152. Power to order detention in, or commitment to, civil jail, in certain cases.
153. Process against surety on failure to deliver judgment-debtor into custody.
154. Process of execution against person or property, but not both.
Applications on which it may issue.
Form of process.
155. Execution against movable property.
Articles excepted from attachment.
156 Date and duration of warrant.
157. Second and successive warrants.
158. After one year execution not to issue without notice to party concerned.
159. Execution not to issue against heir or representative of deceased party without notice.
160. No process of execution after three years, if judgment be for sum not exceeding five hundred rupees.
Regulation of period in such cases.
161. Procedure in execution of warrant against person.
Limit of imprisonment.
162. No person to be imprisoned a second time under same judgment.
When further liability extinguished.
When not extinguished.
163. Diet-money to be deposited at time of issue of warrant.
164. Effect of non-payment of diet-money in advance during imprisonment.
165. Diet-money spent to be costs in suit.
Refund of remainder.
166. Procedure in executing writ against movable property.
167. Time to elapse before sale of movable property.
Custody meanwhile.
Provisions applied to sales.
168. Examination of third party claiming interest in property.
Stay of sale.
169. Adjudication of such claims.
Rules applied.
170. Compensation awardable against claimant failing to establish right.
171. No appeal from order under sections 169, 170.
Right to sue in Civil Court.
Proviso.
172. Sale not vitiated by irregularity in publishing or conducting it.

SECTIONS.
Right to sue for damage.
Limitation.
173. Sale of transferable undertenures in execution of decrees for arrears of rent due in respect thereof.
Exception.
Process for recovery of portion of decree remaining unsatisfied after sale of tenure.
174. If third party claim land, share or interest to be sold, Court to stay sale and enquire into and adjudicate upon the claim.
175. Rules applied to adjudication of such claims.
No appeal.
Right to sue in Civil Court.
176. In execution decrees for money, if judgment not otherwise satisfied, execution may be applied for against immovable property.
177. Mode of executing process if immovable property be a house or other building.
178. Procedure in case of objection offered before sale.

A Bill to consolidate and amend the law relating to the recovery of Rent in the North-Western Provinces.

Preamble.

WHEREAS it is expedient to consolidate and amend the law relating to the recovery of Rent in the North-Western Provinces of the Presidency of Fort William in Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. This Act may be called "The North-Western Provinces Rent Act, 1873:"

Local extent.

It extends to the territories under the government of the Lieutenant Governor of the North-Western Provinces, except the Jhánsí Division, the Province of Kumaon, the Terai Parganas, the Parganas of Agori, Singrauli and Bichipúr, and the tract of country known as Jaunsár Báwar;

Commencement.

And it shall come into force on the passing thereof.

Acts repealed.

2. Act No. X of 1859 (*to amend the law relating to the recovery of Rent in the Presidency of Fort William in Bengal*), Act No. XIV of 1863 (*to amend Act X of* 1859) and Act XXII of 1872 (*to explain and amend Act* No. X of 1859) are hereby repealed.

Interpretation-clause.

3. In this Act, unless there be something repugnant in the subject or context—

'Land.'

(1.) 'Land' means land assessed, or liable to be assessed, and land the revenue whereof has been assigned or released by Government:

'Rent.'

(2.) 'Rent' means whatever is payable by the tenant on account of the use or occupation of land:

'Tenant.'

(3.) 'Tenant' means any occupant of land, who is, or, but for a special contract, would be, liable to pay rent therefor:

'Landlord.'

(4.) 'Landlord' means the person to whom a tenant is liable to pay rent:

'Seer.'

(5.) For the purposes of this Act, 'Seer' means—

(*a.*) land which was recorded as seer at last settlement, and has been continuously so recorded since; or,

(*b.*) land continuously cultivated by the proprietor himself, with his own stock or by hired labour, for twelve years; or,

(*c.*) land which is recognized by village-custom as the special holding of a co-sharer, and is treated as such in the distribution of profits or charges among the co-sharers:

'Arrear of rent or revenue.'

(6.) An 'arrear of rent or revenue' means any instalment of rent or revenue which is not paid on or before the day when the same became due, whether under written engagement, or according to law or local usage:

'Collector of the District.'

(7.) 'Collector of the District' means the Officer in charge of the Revenue Administration of the District:

'Civil Jail.'

(8.) 'Civil Jail' means the civil jail of the District, and includes any place appointed by the Local Government for the confinement of prisoners under sentence of any Court constituted under this Act:

'Názir.'

(9.) 'Názir' includes any officer of a Court who is authorised to serve or execute its process.

CHAPTER II.

RIGHTS AND LIABILITIES OF LANDLORD AND TENANTS.

Persons holding land at fixed rent without change since permanent settlement to continue to hold at such rates.

4. Persons possessing a permanent transferable interest in land, intermediate between the proprietor of an estate and the tenants, and who, in the permanently-settled districts, hold (otherwise than under a terminable lease) at a fixed rent which has not been changed from the time of the permanent settlement, shall continue to hold at such rent.

Tenants holding land at fixed rates to have right of occupancy at those rates.

5. Tenants who, in the permanently-settled districts, hold lands at fixed rates which have not been changed since the permanent settlement, shall have a right of occupancy at those rates, and shall be called 'tenants with a right of occupancy at fixed rates.'

Presumption where rent of land not changed for 20 years.

6. Whenever, in any suit under this Act, it is proved that the rent at which land is held by a tenant, or person mentioned in section four, has not been changed for a period of twenty years next before the commencement of the suit, it shall be presumed that the land has been held at that rent from the time of the permanent settlement, unless the contrary be shown, or unless it be proved that such rent was fixed at some later period.

Tenants with right of occupancy at privileged rates.

7. All tenants in a village who have lost their proprietary rights in such village, or whose ancestors have lost such rights since the introduction of British Rule, and all persons who may lose such rights hereafter, in any of the ways following, namely:—

(1.) by sale for arrears of revenue;

(2.) by sale in execution of a decree of a Civil or Revenue Court:

(3.) by private agreement, sale or mortgage:

(4.) by confiscation under Act No. XI of 1857 or Act No. XIV of 1857,

shall have a right of occupancy at privileged rates in any lands, situated in such village, cultivated by them at the time of the passing of this Act, or at the date of their ceasing to be proprietors, if such date is subsequent to the passing of this Act.

Right of occupancy of tenant cultivating or holding land for 12 years.

8. Every tenant who has held or cultivated land continuously for twelve years has a right of occupancy in the land so held or cultivated by him.

The holding of the father or other person from whom the tenant inherits, shall be deemed to be the holding of the tenant within the meaning of this section:

Tenants barred from such right.

Provided, that no right of occupancy shall be acquired under this section after the passing of this Act—

(1.) by any tenant in land sub-let by him to others:

(2.) by any tenant in land which he holds from an occupancy or privileged tenant, or tenant holding at fixed rates:

(3.) by any tenant in seer land:

(4.) by any tenant in land held by him under a written contract, expressly stipulating that he shall acquire no right of occupancy in such land:

(5.) by any tenant in land held by him on condition of service.

Rights under sections 5, 7 and 8 when transferable.

9. All rights of occupancy acquired under sections five, seven and eight, shall be heritable, but not transferable *inter vivos*, except when they are transferable by local custom.

1.—*Leases.*

Lease to which tenant is entitled.

10. Every tenant is entitled to receive from the person to whom the rent of the land held or cultivated by him is payable, a lease containing the following particulars:—

(*a.*) the quantity of such land; and, where the fields have been numbered in a Government survey, the number of each field:

(*b.*) the amount of annual rent:

(*c.*) the instalments in which the same is to be paid:

(*d.*) any special conditions of the lease:

(*e.*) if the rent is payable in kind, the proportion to be delivered and mode of valuation, and the time and manner and place of delivery.

Leases to which tenants having right of occupancy are entitled.

11. Tenants having a right of occupancy are entitled to receive leases at rates of rent determined in accordance with the provisions contained in sections eighteen and twenty.

Leases to which tenants not having right of occupancy are entitled.

12. Tenants not having a right of occupancy are entitled to leases only on such terms as may be agreed upon between them and their landlord:

Provided that no lease shall be granted, and no rent of land shall be fixed, by any landlord, for any period exceeding the term of his own engagements with Government for his land; and that, in case any lease is granted, or the rent of the land be fixed for any longer period, the lease or engagement shall be null and void for the excess beyond such term.

Landlord granting lease entitled to counterpart engagement.

13. Every landlord who grants a lease is entitled to receive a reciprocal engagement from the tenant, executed by the tenant, and conformable with the terms of the lease.

The tender to any tenant of a lease, such as the tenant is entitled to receive, shall entitle the person to whom the rent is payable to receive a reciprocal engagement from such tenant.

Relinquishment of land by tenant.

14. Every tenant holding from year to year shall continue liable for the rent of the land in his holding for the ensuing year, unless on or before the first day of May in any year he gives notice in writing to the landlord, or his recognized agent, of his desire to relinquish such land at the close of the agricultural year, and relinquishes it accordingly:

or unless it has been let to any other person by such landlord or agent.

Service of notice through tahsíldár, if landlord or agent refuse to receive it.

15. If the landlord or his agent refuse to receive such notice, and to sign a receipt for the same, the tenant may make an application to the tahsíldár, who shall cause the notice to be served on such landlord or agent, the tenant paying the costs of service.

Mode of serving notice.

16. The notice shall, if practicable, be served personally on the landlord or agent; but if he cannot be found, service may be made by affixing the notice at his usual place of residence, or if he does not reside in the district wherein the land is situated, at the *chaupál*, or other conspicuous place in the village where the land is situate.

Determination of class of tenure of tenant.

On the application of any tenant to have his class of tenure determined, the Collector shall determine the class to which he belongs, namely,

whether he has a right of occupancy at fixed rates,

or a right of occupancy at privileged rates,

or a right of occupancy only,

or whether he is a tenant without a right of occupancy.

2.—*Enhancement and Abatement of Rent.*

Bar to enhancement of rent of tenants with right of occupancy at fixed rates.

17. The rent paid by tenants with right of occupancy at fixed rates shall not be liable to enhancement.

Enhancement in case of tenants with privileged right of occupancy.

18. The rent paid by tenants having a privileged right of occupancy shall not be enhanced except by decree passed in a suit brought under this Act, or by an order passed by a Settlement Officer under the law for the time being in force;

and such rent shall be raised to a rate which shall be two annas in the rupee less than the rate which they would have to pay under section nineteen, if they were occupancy tenants.

Enhancement after decree fixing rent.

19. After the passing of such decree or order, the rent so fixed shall not be liable to enhancement during the term of settlement in the temporarily-settled districts;

or, in the permanently-settled districts, for thirty years from the date of such decree or order.

Enhancement in case of tenants with right of occupancy under section 8.

20. The rent paid by tenants with right of occupancy under section eight shall not be liable to enhancement, except—

(1.) by a written agreement, to be attested before the Kánungo:

(2.) by order of a Settlement Officer passed under the North-Western Provinces Revenue Act, section seventy-six:

(3.) by suit under this Act.

Ground for enhancement.

Enhancement shall be decreed or ordered only on the ground that the rate of rent paid by such tenant is below the prevailing rate payable by the same class of tenants for land of a similar quality, with similar advantages in villages of a similar quality, with similar advantages.

The word 'class' shall not be deemed to include caste, unless it is proved that, by the local custom, caste is taken into account in the determination of the rate of rent:

Selection of villages for comparison.

Provided that, whenever the district or tahsíl, or other local area in which such land is situated, shall have been divided by the Settlement Officer into circles of like capacity and soil, the villages of similar quality, with like advantages, for the purpose of this section, shall be selected from the villages in such circles.

When the Settlement Officer has not divided the district or other local area as aforesaid, the Court shall select, for the purpose of comparison, villages of similar quality and with similar advantages, from the tahsíl in which the land to be enhanced is situated, or a tahsíl immediately adjacent.

Enhancement, in case of tenant with right of occupancy, after fixing of rent by decree.

21. After the rent of any tenant with right of occupancy under section eight has been fixed by any decree under this Act, such rent shall not be liable to enhancement for the period of ten years after passing of such decree, or until the period of settlement of the district shall lapse, whichever term shall first expire:

Cases excepted.

Nothing in this section applies—

(1.) to cases in which land has been gained by alluvion after the date of such decree;

(2.) to cases in which the area of the tenant's holding has been added to since the date of such decree;

(3.) to cases in which the productive powers of the land have been increased, otherwise than by the agency or at the expense of the tenant, after the date of such decree.

Time for instituting suits for enhancement.

22. Suits for enhancement must be brought on or before the fifteenth day of November preceding the agricultural year for which enhancement is sought,

Decrees when to take effect.

and all decrees for enhancement passed under the last preceding section shall take effect from the first day of July next following the date of the decree.

Bar to enhancement except by agreement or under decree.

23. No tenant shall be liable to pay rent in excess of that payable in the last preceding year,

unless the parties have agreed as to the rent to be paid, and have attested their agreement before the Kánungo of the pargana,

or unless the rent has been enhanced by decree of Court.

Grounds of claim to abatement by tenant with right of occupancy.

24. Every tenant having a right of occupancy shall be entitled to claim an abatement of the rent previously paid by him on either of the following grounds:—

1st,—That the area of the land has been diminished by diluvion or otherwise:

2nd,—That the productive powers of the land have been decreased by any cause beyond the power of the tenant.

3.—*On Commutation of Rent and Payment in Kind.*

Commutation of rents in kind to fixed money payment.

25. In all cases in which rents have heretofore been paid in kind, or on the estimated value of a portion of the crop, any officer employed in making or revising the settlement of the land-revenue, may, on a suit instituted, either by the tenant, not being a tenant-at-will, or by the landlord, make a decree commuting such rent into a fixed money payment.

The rate or amount of rent thus fixed shall be binding upon the parties concerned, subject to the provisions of this Act, and shall take effect from the first day of July next following the date of the decree.

Power to apply provisions of section to districts;

The Local Government may, by a notification in the official Gazette,

(*a*.) declare the provisions of this section applicable to any district or portion of a district, whether under settlement or not,

to empower officers to decide suits,

(*b*.) declare what officers are empowered to hear and decide suits for the commutation of rents in kind, or rents paid by an estimated value of a portion of the crop, to fixed money payments; and

and to lay down rules.

(*c*.) lay down rules determining the circumstances under which such suits may be heard or refused, and the principles to be followed in their adjudication.

Application by tenant for deputation of officer to divide, produce or appraise crop, when landlord neglects to attend,

26. Wherever rent is taken by division of the produce in kind, or by estimate or appraisement of the standing crop, or other procedure of a similar nature, requiring the presence both

of the cultivator and proprietor, either personally or by a representative,

if the landlord or his agent neglect to attend at the proper time,

the tenant may present an application to the tahsíldár, requesting that a proper officer be deputed to make the division, estimate or appraisement.

Procedure on such application.

27. On receiving such application, the tahsíldár shall issue a written notice to the landlord to attend on the date and at the time specified in the notice, and shall depute an officer before whom such division, estimate or appraisement, shall be made.

If the landlord fails to attend, the officer shall call in three other tenants of the estate, as assessors, to divide the grain or appraise the crops, and shall decide the amount of rent payable by the tenant according to their award, and shall give the tenant a written authority to divide the grain or cut the crops.

Such decision shall be final, and any suit brought to set it aside shall be dismissed with costs.

4.—*Ejectment.*

Liability of tenant to pay interest on arrear and to be ejected.

28. When an arrear of rent remains due from any tenant on the thirtieth day of June, such tenant shall be liable to pay interest on such arrear at twelve per cent. per annum, and to be ejected from the land in respect of which the arrear is due:

Bar to ejectment without decree.

Provided that no tenant having a right of occupancy, or holding under a lease the term of which has not expired, shall be ejected otherwise than in execution of a decree or order under the provisions of this Act.

Ejectment not to be decreed for certain breaches of lease.

No ejectment of a tenant or cancelment of a lease shall be decreed on account of any breach of the lease which is not detrimental to the land demised, or which is not inconsistent with the purpose for which the land was demised.

Procedure for ejectment of tenant with right of occupancy, or holding under unexpired case.

29. If the landlord desire to eject a tenant with right of occupancy, or a tenant holding under an unexpired lease, against whom a decree for arrears has been passed and remains unexecuted, he may, after the end of the agricultural year in which such arrears accrued, apply to the Court, and the Court on receiving such application shall (subject to the provisions of the Indian Limitation Act, 1871, and of section one hundred and sixty of this Act) cause a notice to be served on the tenant directing him to pay the amount due by the decree into Court within fifteen days from receipt of the notice. If such amount be not so paid, the Court shall eject the tenant.

In case of tenant for limited period, landlord may serve notice.

30. If the landlord desire to eject a tenant not having a right of occupancy, or any other tenant holding only for a limited period, after the determination of his lease or tenancy, he shall serve a written notice on such tenant under the provisions of this Act.

Contents of notice.

31. The notice of ejectment shall be written in the vernacular language and character of the village;

it shall specify the land from which the tenant is to be ejected;

and it shall inform him that he must vacate the land on or before the first day of May next following; or that, if he means to dispute the ejectment, he must institute a suit for that purpose on or before that date.

Mode of serving notice.

32. The notice shall be served through the tahsíldár on or before the first day of April in each year, and the landlord shall pay the cost of service; it shall be served personally on the tenant, if practicable; but, if he cannot be found, service may be made by affixing the notice to his usual place of residence.

Effect of failure of tenant to institute suit to contest liability to ejectment.

33. If the tenant on whom such notice of ejectment has been served fail to institute a suit to contest his liability on or before the first day of May next after the service, his tenancy of the land in respect of which the notice has been served shall be held to cease on that date: unless, after the service, the landlord authorises him to continue in the occupation of the land.

Procedure to enforce ejectment.

34. If no such suit is brought, and the landlord require the assistance of the Collector to eject any person whose tenancy is alleged to have ceased under the provisions of section thirty, he may apply for such assistance before the ploughing for the *kharíf* harvest commences; and if the Court is satisfied that notice was served on such tenant, and that no subsequent agreement has been entered into between him and his landlord, it shall give such assistance accordingly:

Saving of tenant's right to sue.

Nothing done by the Court under the previous part of this section shall affect the right of any tenant to institute a suit against his landlord for illegal ejectment, and to recover compensation for the same.

Notice of ejectment when void.

If the landlord allow the tenant on whom the notice of ejectment has been served to remain in occupation of the land, and to prepare it for the *kharíf* harvest, the notice of ejectment shall be deemed void.

Right of ejected tenant to value of growing crops or ungathered produce.

35. Any tenant ejected in accordance with the provisions of this Act, shall be entitled to receive from the landlord the value of any growing crops or other ungathered products of the earth, belonging to the tenant, growing on the land at the time of his ejectment.

Application for assessment of rent-free land.

36. Any proprietor who desires to assess any land granted free of rent, shall apply to the Collector, and such application shall be dealt with as a suit under this Act.

Limitation.

Every such suit shall be instituted within the period of twelve years from the time when the person claiming the right to assess the land came into

the possession of the estate, by inheritance, or otherwise :

Provided that a written instrument of grant, given by the applicant, and specifically covenanting that the grant shall not be resumed, shall be held valid as against such applicant during the currency of the settlement :

Written deed of grant valid against applicant.

Provided, further, that rent-free possession for fifty years, including two successions, shall vest in the grantee or his representative a proprietary right in the land so held.

Possession for 50 years to vest proprietary right.

But no length of rent-free occupancy, nor any grant made by the proprietor, shall release such land from its liability to Government for the revenue assessable on the same.

Saving of liability for Government revenue.

5.—*Compensation for Improvements made by Tenants.*

37. If any tenant make, or the person from whom he inherits has made, any such improvements on the land in his possession as are specified in the Land Improvement Act, 1871, such tenant shall not be ejected from such land without payment of compensation for the outlay in money, labour, or both, expended in making such improvements.

Tenants' right to compensation for improvements.

38. Such compensation shall be based on the present value of such improvements; and may, at the option of the landlord or his representative, be made—

Basis of, and mode of making, compensation.

1*st*,—by payment in money;

2*nd*,—by the grant of a beneficial lease of the land, by the landlord or his representative, to the tenant or his representative;

3*rd*,—partly by payment in money, and partly by the grant of such lease as aforesaid.

39. In case of difference as to the amount or value of the compensation tendered, either party may apply to the Collector stating the matter in dispute, and requesting a determination thereof.

Settlement of difference as to amount or value of compensation.

On receiving such application, the Collector shall cause notice thereof to be served on the other party, and, after taking such evidence as the parties or either of them may adduce, and after such further inquiry as he may deem necessary, determine the amount of the payment, or the terms of the lease, or both.

In determining such amount, or the terms of such lease, the Collector shall take into account any assistance given to the tenant by the landlord, either directly in money, material or labour, for the purpose of making such improvements, or indirectly by subsequently allowing the tenant to hold at a rate of rent more favourable than the rate at which he otherwise would have held.

40. The Collector may refer any application brought under section thirty-nine to arbitration, in which case the proceedings shall be in accordance with the provisions of the North-Western Provinces Revenue Act.

Reference to arbitration.

41. Every under-tenant or ryot, from whom any sum is exacted in excess of the rent specified in his pattá, or payable under the provisions of this Act, whether as *ábwáb* or under any other pretext,

Right of tenant to damages for exactions in excess of rent or for withholding receipt.

and every under-tenant, ryot or cultivator from whom a receipt is withheld for any sum of money paid by him as rent,

shall be entitled to recover, from the person receiving such rent, damages not exceeding double the amount so exacted or paid.

Receipts for rent shall specify the year or years on account of which the rent is acknowledged to have been paid ;

Contents of receipt.

and any refusal to make such specification shall be held to be a withholding of a receipt.

42. If payment of rent, whether the same be legally due or not, is extorted from any under-tenant or ryot by illegal confinement or other duress, he shall be entitled to recover such compensation, not exceeding the sum of two hundred rupees, as the Court thinks reasonable.

Damages for extorting payment of rent by duress.

An award of compensation under this section shall not bar or affect any penalty or punishment to which the person practising such extortion may be subject by law.

Liability to punishment for extortion not affected.

6.—*Deposit of Rent in Government Treasury.*

43. If any tenant having a right of occupancy or holding under an unexpired lease, or under an agreement or decree, tenders to the person authorized to receive it full payment of the rent due from him, and if the amount so tendered be not accepted, and a receipt for the amount forthwith granted, the tenant may thereupon deposit such amount in the Collector's Court to the credit of the person authorized to receive it.

Deposit of amount tendered by tenant and refused.

44. The application to the Collector shall be drawn up in the form (A) annexed, and shall be verified in the manner prescribed for the verification of plaints under section one hundred and seven :

Form and verification of application.

and the person making the verification shall be subject to the penalty therein laid down, if the application contain any averment which he knows or believes to be false, or does not know or believe to be true.

Penalty for false statement.

45. On receiving the money so deposited, the Collector shall issue to the person to whose credit it has been deposited a notice in the form (B) annexed.

Notice to issue on deposit being made.

46. Such notice shall be served through the tahsíldár upon the person to whom it is addressed, or upon his recognized agent.

Mode of serving notice.

In their absence, the notice shall be affixed at the *chaupál*, or other conspicuous place in the village in which the land for which the rent is due is situated.

47. If the person on whom such notice is served, or his recognized agent, appears, and applies that the money in deposit be paid to him, it shall be paid accordingly.

Payment to person served with notice on his application.

48. If no application be made by the person on whom the notice was served, or by his agent, the sum shall be repaid to the depositor on the expiration of two years from the date of the deposit.

Refund to depositor.

CHAPTER III.

DISTRAINT.

Produce of land hypothecated for rent.

49. The produce of the land is held to be hypothecated for the rent payable in respect thereof;

Recovery of arrears by distraint.

and when an arrear of rent, as defined in section three, is due from any cultivator of land, the zamíndár, lákhirájdár, farmer, dependent taluqdár, under-farmer or other person entitled to receive rent immediately from such cultivator, instead of suing for the arrear as hereinbefore provided, may recover the same by distress and sale of the produce of the land on account of which the arrear is due, under the rules contained in this Chapter:

Bar to distraint of produce covered by security.

Provided always, that, when a cultivator has given security for the payment of his rent, the produce of the land for the rent of which security has been given, shall not be liable to be distrained:

Sharer not entitled to distrain.

Provided also, that no sharer in any estate, who is not entitled to collect the whole rent from the tenant, shall have power to distrain.

No distraint for overdue arrear, nor, without agreement, for excess over past year's rent.

50. A Distress shall not be made for any arrear which has been due for a longer period than one year;

nor for the recovery of any sum in excess of the rent payable for the same land in the preceding year, unless a written engagement for the payment of such excess has been executed by the cultivator, and attested before the Kánungo.

Distraint by managers under Court of Wards, &c.

51. The power to distrain vested by section forty-nine in zamíndárs, and other persons entitled to receive rent from cultivators of land, may be exercised by managers under the Court of Wards, surbarakars, and managers of estates held under khás management, and other persons lawfully entrusted with the charge of landed property;

and also by the náibs, gumáshtas, and other agents, employed by such persons as aforesaid, in the collection of rent, if expressly authorized by power-of-attorney in that behalf:

Liability to damages for illegal act.

Provided that, if any wrongful act is committed by any such náib, gumáshta, or other agent, under colour of the exercise of the said power, the person employing such agent shall be liable, as well as the agent, for to make compensation for such act.

Persons empowered to distrain to give written authority to servants employed to make distress.

52. When any person, empowered to distrain property under section forty-nine or section fifty-one employs a servant or other person to make the distress, he shall give to such servant or person a written authority for the same, and the distress shall be made in the name and on the responsibility of the person giving such authority.

Standing crops and crops gathered liable to distraint.

53. Standing crops and other ungathered products of the earth, and crops or other products when reaped or gathered, and deposited in any threshing-floor or place for treading out grain or the like, whether in the field or within a homestead, may be distrained by persons invested with power to distrain under the provisions of this Act.

Exception.

But no such crops or products, other than the produce of the land in respect of which an arrear of rent is due, or of land held under the same engagement, and no grain or other produce after it has been stored by the cultivator, and no other property whatsoever, shall be liable to be distrained under this Act.

Defaulter to be served with written demand and account.

54. Before or at the time when a distress is made under this Act, the distrainer shall cause the defaulter to be served with a written demand for the amount of the arrear, together with an account exhibiting the grounds on which the demand is made.

Mode of service.

The demand and account shall, if practicable, be served personally on the defaulter; or, if he abscond or conceal himself, so that they cannot be so served, shall be affixed at his usual place of residence.

Distress to be proportionate to arrear.

55. Unless the amount of the demand is immediately paid or tendered, the distrainer may distrain property as aforesaid of value proportionate to the amount of the arrear, with costs of the distress;

List of property to be prepared and copy served on owner.

and shall prepare a list or description of the said property, and deliver a copy of the same to the owner, or, if he be absent, affix it at his usual place of residence.

Standing crops, &c., when attached, may be reaped and stored by cultivator, or, if he neglect, by distrainer.

56. Standing crops and other ungathered products may, notwithstanding the distress, be reaped and gathered by the cultivator, and may be stored in such granaries or other places as are commonly used by him for the purpose.

If the cultivator neglect to do so, the distrainer shall cause the said crops or products to be reaped or gathered, and in such case shall store the same either in such granaries or other places as aforesaid, or in some other convenient place in the neighbourhood.

In either case the distrained property shall be placed in the charge of some person appointed by the distrainer for the purpose.

Sale of products which cannot be stored.

Crops or products which from their nature do not admit of being stored, may be sold before they are cut or gathered, under the rules hereinafter provided; but in such case, the distress shall be made at least twenty days before the time when the crops or products or any part of the same would be fit for cutting or gathering.

Assistance to distrainer opposed or apprehending resistance.

57. If a distrainer is opposed, or apprehends resistance, and desires to obtain the assistance of a public officer, he may apply to the Court, and the Court may, if it thinks necessary, depute an officer to support the distrainer in making the distress.

Distress to be withdrawn on tender of arrear and expenses before sale.

58. If at any time after property has been distrained, and prior to the day fixed for its being put up to sale as hereinafter provided, the owner of the

property tender payment of the arrear demanded of him, and of the expenses of the distress, the distrainer shall receive the same, and shall forthwith withdraw the distress.

Application for sale.

59. Within five days from the time of the storing of any distrained crops or products,

or, if the crops or products do not from their nature admit of being stored, within five days from the time of making the distress,

the distrainer shall apply for sale of the same to the Amín, or other officer authorized to sell property in satisfaction of decrees of the Civil Court within the circle in which the distrained property is situate, or to such other public officer as the Local Government appoints for the purpose.

Contents of application.

60. The application shall be in writing, and shall contain—

(*a*) an inventory or description of the property distrained,

(*b*) the name of the defaulter and his place of residence,

(*c*) the amount due, and the date of the distress, and

(*d*) the place in which the distrained property is deposited.

Deposit of cost of service of notice.

Together with the application, the distrainer shall deliver to the Amín or other officer the amount necessary for the service of a notice upon the defaulter as hereinafter provided.

Procedure by Amín, &c., on receipt of application.

61. Immediately on receipt of the application, the Amín or other officer shall transmit a copy of it to the Court;

and shall serve a notice in the form (C) contained in the schedule to this Act, or to the like effect on the person whose property has been distrained, requiring him, either to pay the amount demanded, or to institute a suit to contest the demand before the Court, within the period of fifteen days from the receipt of the notice.

He shall at the same time send to the Court, for the purpose of being put up in his office and in the kachahrí of the tahsíldár, a proclamation fixing a day for the sale of the distrained property, which shall not be less than twenty days from the date of the application; and shall deliver a copy of the proclamation to the peon charged with the service of the notice, to be put up by him in the place where the distrained property is deposited.

The proclamation shall contain—

(*a*) a description of the property,

(*b*) the demand for which it is to be sold, and

(*c*) the place where the sale is to be held.

Amín to suspend sale on receipt of Court's certificate of institution of suit.

62. If a suit is instituted before the Court in pursuance of the aforesaid notice, the Court shall transmit to the Amín or other officer, and, if so requested, shall deliver to the owner of the distrained property, a certificate of the institution of such suit;

and on such certificate being received by, or presented to, the Amín or other officer, he shall suspend proceedings in regard to the sale of the distrained property.

Suit to contest distrainer's demand before issue of notice of sale.

63. A person whose property has been distrained in the manner hereinbefore provided, may institute a suit to contest the demand of the distrainer immediately after the distress, and before the issue of notice of sale.

When such suit is instituted, the Court shall proceed in the manner prescribed in the last preceding section.

If, thereafter, application for the sale of the property is made to the Amín or other officer, he shall send a copy of the application to the Court, and suspend further proceedings, pending the decision of the case.

Distress when to be withdrawn.

64. The person whose property has been distrained may, at the time of instituting any such suit as aforesaid, or at any subsequent period, execute a bond with a surety, binding himself to pay whatever sum may be adjudged to be due from him, with interest and costs of suit;

and when such bond is executed, the Court shall give to the owner of the property a certificate to that effect, and, if so requested, shall serve the distrainer with notice of the same;

and upon such certificate being presented to the distrainer by the owner of the property, or served on him by order of the Court, the property shall be released from distress.

When sale may be proceeded with.

65. On the expiration of the period fixed in the proclamation of sale, if the institution of a suit to contest the demand of the distrainer has not been certified to the Amín or other officer in the manner hereinbefore provided, he shall, unless the said demand, with such costs of the distress as shall be allowed by him, be discharged in full, proceed to sell the property or such part of it as may be necessary, in the manner following.

Place of sale.

66. The sale shall be held at the place where the distrained property is deposited, or at the nearest ganj, bázár, hát or other place of public resort, if the Amín or other officer is of opinion that it is likely to sell there to better advantage.

Manner of sale.

The property shall be sold by public auction, in one or more lots, as the officer holding the sale may think advisable;

Withdrawal of distress when demand and costs satisfied.

and if the demand with the costs of distress and sale be satisfied by the sale of a portion of the property, the distress shall be immediately withdrawn with respect to the remainder.

If fair price be not offered, sale may be postponed and shall be then completed.

67. If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) be not offered for it, and the owner of the property, or some person authorized to act on his behalf, apply to have the sale postponed until the next day, or the next market day, if a market be held at the place of sale, the sale shall be postponed

until such day and shall be then completed whatever price may be offered for the property.

Payment of purchase-money.

68. The price of every lot shall be paid for in ready money at the time of sale, or as soon thereafter as the officer holding the sale thinks necessary;

Resale on default.

and, in default of such payment, the property shall be put up again and sold.

Certificate to purchaser.

When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate, describing the property purchased by him and the price paid.

Deduction, from proceeds, of costs of sale.

69. From the proceeds of the sale of distrained property, the officer holding the sale shall make a deduction at the rate of one anna in the rupee on account of the costs of the sale, and shall send the amount to the Court, in order that it may be credited to Government.

Payment of distrainer's expenses.

He shall then pay to the distrainer the expenses incurred by the distrainer on account of the distress, and of the issue of the notice and proclamation of sale prescribed in section sixty-one, to such amount as, after examination of the statement of expenses furnished by the distrainer, he thinks proper to allow.

Discharge of arrear with interest.

The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale;

Surplus.

and if there be any overplus, it shall be delivered to the person whose property has been sold.

Sale officers and employees prohibited from purchasing.

70. Officers holding sales of property under this Act, and all persons employed by or subordinate to such officers, are prohibited from purchasing, either directly or indirectly, any property sold by such officers.

Report of irregularities by distrainer.

71. Amíns and other officers as aforesaid are required to bring to the notice of the Court any material irregularities committed by distrainers under colour of this Act;

Postponement of sale, and report to Court when defaulter has not received due notice.

and if, in any case, on proceeding to hold a sale of property, the Amín or other officer find that the owner of the property has not received due notice of the distress and intended sale, he shall postpone the sale and report the case to the Court,

Order of Court.

and the Court shall direct the issue of another notice and proclamation of sale under section sixty-one, or pass such other order as to it may seem proper.

Levy of charge when sale officer attends, and no sale takes place.

72. When an Amín or other officer has proceeded to any place for the purpose of holding a sale, under this Act and no sale takes place, either for the reason stated in the last preceding section, or because the demand of the distrainer has been previously satisfied, no intimation of such satisfaction having been given by the distrainer to the Amín or other officer, the charge of one anna in the rupee on account of expenses shall be leviable and shall be calculated on the estimated value of the distrained property.

Recovery from owner.

If the demand of the distrainer be not satisfied until the day fixed for the sale, the charge for expenses shall be paid by the owner of the property, and may be recovered by the sale of such portion thereof as may be necessary.

Recovery from distrainer.

In every other case it shall be paid by the distrainer and may be recovered by attachment and sale of his property under the warrant of the Court:

Limit to charge.

provided, that in no case shall a larger amount than ten rupees be recoverable under this section.

Proceedings of Amíns, &c., subject to revision and orders of Collector.

73. All proceedings under this Act of the Amíns and other officers as aforesaid, shall be subject to the revision and orders of the Collector of the District,

Power to call for reports and statements.

and the Collector of the District, with the sanction of the Board of Revenue, may require the submission of such periodical reports and statements of business done by the Amíns and other officers as may be thought necessary.

Order of sale when amount adjudged due.

74. When a suit has been instituted to contest the demand of a distrainer and the property has not been released on security, if the demand or any portion of it is adjudged to be due, the Court shall issue an order to the Amín or other officer authorizing the sale of the property;

Second proclamation of sale.

and on the application of the distrainer, within five days from the receipt of such order by the Amín or other officer, such Amín or officer shall publish a second proclamation in the manner prescribed in section sixty-one, fixing another day for the sale of the distrained property, which shall not be less than five nor more than ten days from the date of the proclamation;

Sale on failure to pay debt and costs.

and unless the amount adjudged to be due with the costs of distress be paid intermediately, shall proceed to sell the property in the manner hereinbefore provided.

In suit to contest his demand, distrainer to prove arrear.

75. In all suits instituted to contest the demand of a distrainer, the distrainer shall be required to prove the arrear in the same manner as if he had himself brought a suit for the amount under the foregoing provisions of this Act.

Recovery of amount decreed in favour of distrainer.

If the demand or any part thereof is found to be due, the Court shall make a decree for the amount in favour of the distrainer, and such amount may be recovered by sale of the property, as provided in the last preceding section, if the distress has not been withdrawn;

and, if any balance remain due after such sale, by execution of the decree against the person and any other property of the defaulter,

or, if the property have been released on security, by execution of the decree against the person and property of the defaulter and of his surety.

Compensation in case of vexatious distress.

If the distress is adjudged to be vexatious or groundless, the Court, besides directing the release of the distrained property, may award such compensation to the plaintiff as the circumstances of the case require.

Suit by person claiming property distrained for arrears alleged to be due from another.

76. If any person claim as his own, property which has been distrained for arrears of rent alleged to be due from any other person, the claimant may institute a suit against the distrainer and such other person, to try the right to the property, in the same manner and under the same conditions as to the time of instituting the suit and to the consequent postponement of sale, as a person whose property has been distrained for an arrear of rent alleged to be due from him, may institute a suit to contest the demand.

Release of property on security being given.

When any such suit is instituted, the property may be released upon security being given for the value of the same.

Order of Court when claim dismissed.

If the claim is dismissed, the Court shall make an order for the sale of the property, or for the recovery of the value thereof, as the case may be, for the benefit of the distrainer.

Decree for release and compensation when claim upheld.

If the claim is upheld, the Court shall decree the release of the distrained property with costs, and such compensation (if any) as the circumstances of the case require:

Saving of prior claim of person entitled to rent of land.

Provided always, that no claim to any produce of land liable to distress under this Act, which at the time of the distress may have been found in the possession of a defaulting cultivator (whether such claim be in respect of a previous sale, mortgage or otherwise,) shall bar the prior claim of the person entitled to the rent of the land, nor shall any attachment in execution of a judgment of any Civil Court prevail against such prior claim.

Procedure where right to distrain is claimed by other than distrainer.

77. If, in any case in which property has been distrained for an arrear of rent, and a suit has been instituted to contest the demand, the right to distrain for such arrears is claimed by or on behalf of any person other than the distrainer, on the ground of such other person being actually and in good faith in the receipt and enjoyment of the rent of the land, such other person shall be made a party to the suit, and the question of the actual receipt and enjoyment of the rent by him before and up to the time of the commencement of the suit shall be enquired into, and in deciding the suit the result of such inquiry shall be taken into consideration.

Saving of right to sue in Civil Court.

Provided always, that the decision of the Court shall not affect the right of either party who may have a legal title to the rent of the land, to establish his title by suit in the Civil Court if instituted within one year from the date of the decision.

Persons prevented from suing in time to save property from sale, may sue for damages.

78. If any person whose property has been distrained for the recovery of a demand not justly due, or of a demand due or alleged to be due from some other person, is prevented by any sufficient cause from bringing a suit to contest the demand or to try the right to the property as the case may be, within the period allowed by section ninety-seven, and his property is in consequence brought to sale, he may, nevertheless, institute a suit under this Act to recover compensation for the illegal distress and sale of his property.

Wrongful acts of distrainer.

79. If any person empowered to distrain property, or employed for the purpose under a written authority by a person so empowered, distrain or sell, or cause to be sold, any property for the recovery of an arrear of rent alleged to be due, otherwise than according to the provisions of this Act,

or if any distrained property is lost, damaged, or destroyed by reason of the distrainer not having taken proper precaution for the due keeping and preservation thereof,

or if the distraint is not immediately withdrawn when it is required to be withdrawn by any provision of this Act,

the owner of the property may institute a suit under this Act to recover compensation for any injury which he has thereby sustained.

Suit by owner against person distraining or selling without authority.

80. If any person not empowered to distrain property under sections forty-nine and fifty-one, nor employed for the purpose under a written authority by a person so empowered, shall distrain or sell or cause to be sold any property under colour of this Act, the owner of the property may institute a suit under this Act to recover compensation from such person for any injury which the plaintiff has sustained from the distraint or sale,

Penalty in addition to damages.

and the defendant shall be held to have committed criminal trespass, and shall be subject to the penalties for that offence, in addition to any damages which may be awarded against him in such suit.

Limitation of suits under sections 78, 79, 80.

81. Provided that any suit which may be instituted under any of the last three sections, shall be commenced within the term prescribed by section ninety-seven.

Procedure in case of resistance of distraint.

82. If any person resist a distraint of property duly made under this Act, or forcibly or clandestinely remove any distrained property, the Court, upon complaint being made within fifteen days from the date of such resistance or removal, shall cause the person accused to be arrested and brought before the Court with all convenient speed, and the Court shall, if possible, proceed forthwith to try the case.

If the case cannot be at once heard, the Court may, if it think fit, require the party arrested to give security for his person, and, in default of such

security, may commit him to the civil jail until the case is tried,

and if the offence be proved and the offender be the owner of the property concerned, the Court shall order him to be imprisoned in the civil jail for six months, or until the whole arrear due to the distrainer, with all expenses and costs, is paid or levied under warrant of the Court by distress and sale of the property of the offender.

If the offender be not the owner of the property, he shall make good to the distrainer the value of the same, and shall further be liable to a fine not exceeding one hundred rupees,

or, in default of payment thereof, to imprisonment in the civil jail for a period not exceeding two months.

CHAPTER IV.

OF PROCESS.

Mode of serving process.

83. Every process issued by a Court under this Act shall be under the seal and signature of the Court, and shall be served or executed by the Názir, or by such other officer as the Court may direct, at the cost of the party at whose instance it is issued.

Deposit before issue.

The amount of such cost, and, in the case of summons to a witness, any sum required for the travelling expenses of such witness, shall be deposited in Court before the process is issued:

Power to direct service free of charge.

Provided that, if in any case the Court is satisfied that a party is unable to pay the cost of any necessary process, it may direct such process to be served free of charge.

Punishment for resistance of process.

84. Any resistance or opposition to the lawful process of a Court under this Act may be punished by the Court according to the provisions of the law for the time being in force for the punishment of resistance or opposition to the processes of the Courts of civil justice.

Power to issue summons and warrant.

When, in any such case, the offender is not present, the Court may summon him to answer to the charge: and if after due service of the summons he fail to attend, may issue a warrant for his apprehension.

Appeal against orders under this section.

Orders passed by Collectors under this section shall be subject to appeal as provided by section one hundred.

CHAPTER V.

JURISDICTION OF COURTS AND APPEALS.

Suits cognizable under this Act.

Suits cognizable by Revenue Courts only.

85. Except in the way of appeal as provided in this Act, the Courts of Revenue alone shall take cognizance of the following descriptions of suits, and such suits shall be heard and determined in the said Courts in the manner provided in this Act, and not otherwise;

Bar to cognizance by other Courts.

and except in the way of appeal as provided in this Act, all other Courts are hereby prohibited from taking cognizance of any such suits, whether the claim be joined to a claim cognizable by such other Courts or not.

I.—Suits by a landlord—

(1.) for arrears of rent;

(2.) for enhancement of rent of a tenant having right of occupancy;

(3.) for the ejectment of a tenant or for cancelling any lease on account of a breach of the conditions of any contract by which a tenant may be liable to ejectment, or a lease may be liable to be cancelled;

(4.) for the resumption of rent-free grants, or the determination of the rent of land thitherto held free of rent.

II.—Suits by a tenant—

(5.) for contesting a notice of ejectment;

(6.) for the recovery of rent illegally exacted or extorted, and for damages on account of the illegal exaction or extortion of rent, or any unauthorised cess or impost, or on account of extortion of rent by any means not warranted by law;

(7.) for compensation for withholding receipt for rent paid;

(8.) for compensation for illegal ejectment;

(9.) for the recovery of the occupancy of any land from which a tenant has been illegally ejected by the landlord;

(10.) for contesting the exercise of the powers of distress conferred on landlords and others by this Act, or any thing purporting to be done in the exercise of the said power, or for compensation for illegal distress;

(11.) for abatement of rent;

III.—Suits by tenants or landlords—

(12.) for pattás or counterparts, and for the determination of the rates of rent at which such pattás or counterparts are to be delivered.

IV.—Suits by, and against, Lambardárs, Co-sharers and Muáfidárs.

(13.) Suits by lambardárs for arrears of Government revenue, payable through them by the co-sharers whom they represent, and for village-expenses and other dues for which the co-sharers may be responsible to the lambardár;

(14.) Suits by co-sharers for their share of the profits of an estate, or any part thereof, after payment of the Government revenue and village-expenses, or for a settlement of accounts;

(15.) Suits by muáfidárs, or assignees of the Government revenue, for arrears of revenue owing to them, as such muáfidárs or assignees;

(16.) Suits by taluqdárs and other superior proprietors, for arrears of revenue or otherwise, not being rent due to them as such taluqdárs or superior proprietors.

Investigation of plea of set-off.

Where, in reply to any suit under this Act, a set-off is pleaded, the Court shall investigate such plea, notwithstanding that the matter of the set-off involves an inquiry beyond the ordinary jurisdiction of the Court under this Act.

V.—Appeals.

Judgment of Collector final where amount, or value of property in suit does not exceed 100 rupees.

86. In suits under this Act, tried and decided by a Collector of the First Class, if the amount sued for, or the value of the property claimed, does not exceed one hundred rupees,

the judgment of the Collector shall be final, and not open to revision or appeal, except as hereinafter provided,

unless in any such suit a question of right to enhance or otherwise vary the rent of a tenant, or any question relating to a title to land, or to some interest in land as between parties having conflicting claims thereto, has been determined by the judgment,

unless certain questions determined.

in such case the judgment shall be open to appeal in the manner provided in section ninety-three and following sections of this Act.

Appeal in such cases.

87. In suits in which the judgment of the Collector is final as provided in the last preceding section, the Collector may, upon the application of either party, if preferred within thirty days from the date of the decision, order the rehearing of a suit, upon the ground of the discovery of new evidence or matter material to the issue of the case, which the applicant had no knowledge of, or could not produce, at the time of trial.

In suits not open to appeal, Collector may grant re-hearing upon discovery of new evidence, &c.

88. When any such suit as aforesaid, in which, if tried and decided by a Collector of the first class, the judgment of such Collector would be final, is tried and decided by a Collector of the second class, an appeal from the judgment of the Collector of the second class shall lie to the Collector of the District.

Appeal from decision of Collector of second class.

89. The petition of appeal shall be presented to the Collector within fifteen days from the date of the decree;

Time for presentation.

provided that such time as may be requisite for procuring a copy of the decree appealed against shall not be reckoned as part of the fifteen days.

Time to be excluded from reckoning.

90. The Collector shall fix a day for hearing the appeal, and shall cause notice of the same to be served on the respondent in the manner hereinafter prescribed for the service of summons.

Procedure in appeal.

If, on the day fixed for hearing the appeal, or any other day to which the hearing may be adjourned, the appellant does not appear in person or by an agent, the appeal shall be dismissed for default.

If the appellant appears and the respondent does not appear in person or by an agent, the appeal shall be heard *ex parte*.

91. If an appeal be dismissed for default of prosecution, the appellant may, within fifteen days from the date of the dismissal, apply to the Collector for re-admission of the appeal,

Re-admission of appeal.

and if it be proved to the satisfaction of the Collector that the appellant was prevented by any sufficient cause from appearing when the appeal was called on for hearing, the Collector may re-admit the appeal.

92. After hearing the appeal, the Collector shall give judgment in the manner hereinafter prescribed for giving judgment in original suits, and the judgment of the Collector shall be final.

Judgment in appeal.

93. In all suits other than those in which, when tried and decided by a Collector of the first class, the judgment of such Collector is declared to be final, or when tried and decided by a Collector of the second class, an appeal is allowed to the Collector of the District, an appeal from the judgment of the Collector shall lie to the District Judge,

Appeal to District Judge.

unless the amount or value in dispute exceed five thousand rupees, in which case the appeal shall lie to the High Court.

Appeal to High Court.

94. The rules in force in regard to the time within which appeals from the decisions of Civil Courts may be received, and to the manner in which such appeals are heard and determined, and to all proceedings which may be had in respect of such appeals, shall be applicable to appeals to the District Judge or High Court under this Act.

Rules as to time of presentation, &c., to apply.

95. The decisions of District Judges passed in regular appeal under this Act, shall be open to special appeal to the High Court, in the same manner, and subject to the same rules, as the decisions of District Judges passed in regular appeal are open to special appeal under the Code of Civil Procedure and the Indian Limitation Act, 1871.

Special appeal to High Court from decisions of District Judge.

96. Whenever a Court is closed on the last day of any period provided in this Act for the presentation of any memorandum of appeal, or for the deposit or payment of any money in Court, the day on which the Court reopens shall be deemed to be such last day.

Rule as to last day for presentation, deposit or payment, when Court is closed on such day.

VI.—Limitation of Suits.

97. Suits for recovery of arrears of rent, revenue or share of profits, may be brought within two years from the date when the arrears became due:

Limitation of suits.

Suits relating to distress, or for recovery of rent in kind, where no application for appraisement has been given in under section twenty-six, may be brought within three months from the date of the cause of action:

All other suits may be brought within one year from the time that the right to sue accrues, unless otherwise specially provided for in this Act.

VII.—Applications and Appeals.

98. The Courts of Revenue alone shall take cognizance of the following descriptions of applications, and such applications shall be heard and determined in the said Courts in the manner provided under this Act:—

Applications cognizable by Revenue Courts only.

(1.) Application by landlord, or agent employed by a landlord, to compel the production of accounts by patwáris;

(2.) Application by tenant for assistance in the division or appraisement of standing crops, under section twenty-six;

(3.) Application from a landlord to eject a tenant with right of occupancy, under section twenty-nine;

(4.) Application from a landlord under section thirty-four for assistance to eject a tenant, on whom a notice of ejectment has been served and who has not brought a suit to contest such notice:

(5.) Application from a tenant to determine the value of any standing crops, or ungathered products of the earth, belonging to the tenant and being on the land at the time of his ejectment under section thirty-five;

(6.) Application for compensation for improvement, under section thirty-seven;

(7.) Application to determine the nature and class of a tenant's tenure, under section sixteen.

Notice to defendant.

99. On receipt of an application under section ninety-eight, notice thereof shall be served on the defendant in the manner laid down in section one hundred and fourteen.

Time for presenting appeals from orders.

100. Appeals against orders passed on applications by officers vested with the powers of a Collector of the first or second class under this Act, shall be presented to the Collector of the District within fifteen days of the date of the order.

An appeal from the order of the Collector of the District shall be presented to the Commissioner of the Division within thirty days from the date of the order, and his decision shall not be open to further appeal:

Power to Board to call for cases.

Provided that the Board of Revenue may call for any case and pass such orders on it as they think fit.

VIII.—Jurisdiction of Courts.

Local Government may invest officers with Collector's powers, and withdraw them.

101. The Local Government may invest any officer with the powers of a Collector of the first or second class under this Act, and may at any time deprive any officer of such powers.

Suits and applications cognizable by Collectors.

102. Collectors of the first and second class shall have as such, power to try suits and applications of the following descriptions:—

(1.) Suits for arrears of rent, clause one, section eighty-five;

(2.) Suits for compensation for withholding receipt for rent paid, clause seven, section eighty-five;

(3.) Suits to contest the exercise of the powers of distraint conferred on landlords and others by this Act, or anything purporting to be done in exercise of the said powers, or for compensation for illegal distraint, clause ten, section eighty-five;

(4.) Suits by lambardárs for arrears of Government revenue, payable through them by the co-sharers whom they represent, and for village-expenses and other dues, for which the co-sharers may be responsible to the lambardár, clause thirteen, section eighty-five;

(5.) Suits by muafidárs or assignees of the Government revenue, for arrears of revenue owing to them as such muafidárs or assignees, clause fifteen, section eighty-five;

(6.) Applications by a landlord, or by an agent employed by a landlord, to compel the production of accounts by patwáris, under clause one, section ninety-eight;

(7.) Applications by a tenant for assistance in the division or appraisement of standing crops, under section ninety-eight, clause two;

(8.) Applications by a tenant to determine the value of any standing crops or ungathered products of the earth, belonging to the tenant, and being on the land at the time of his ejectment, under section ninety-eight, clause five;

(9.) Suits by taluqdárs for arrears of revenue under clause sixteen, section eighty-five.

Additional suits and applications cognizable by Collector, first class.

103. Collectors of the first class, in addition to the suits and applications specified in section one hundred and two, shall have power to try suits and applications of the following descriptions:—

(1.) Suits to eject a tenant, or cancel a lease, on account of breach of the conditions of any contract by which a tenant may be liable to ejectment, or a lease may be liable to be cancelled, clause three, section eighty-five;

(2.) Suits to contest notices of ejectment, clause five, section eighty-five;

(3.) Suits to recover rent illegally exacted or extorted, and for compensation for such exaction or extortion of rent, or any unathorized cess or impost, or for extortion of rent by confinement or other duress, or by any other means not warranted by law, clause six, section eighty-five;

(4.) Suits to recover the occupancy of any land from which a tenant has been illegally ejected by the landlord, clause nine, section eighty-five;

(5.) Suits for compensation for illegal ejectment, clause eight, section eighty-five;

(6.) Suits by co-sharers for their share of the profits of an estate or any part thereof, after payment of the Government revenue and village-expenses, or for a settlement of accounts, clause fourteen, section eighty-five;

(7.) Applications by a landlord for assistance to eject a tenant, on whom notice of ejectment has been served, under section ninety-eight, clause three;

(8.) Applications by a landlord to eject a tenant with right of occupancy, under section ninety-eight, clause four;

(9.) Applications for compensation for improvements, under section ninety-eight, clause six;

(10.) Applications to determine the nature and class of a tenant's tenure, section ninety-eight, clause seven.

Additional suits cognizable by Collector, first class, specially empowered.

104. In addition to the powers specified in sections one hundred and two and one hundred and three, a Collector of the first class specially empowered by Government, shall have power to try the following suits:—

(1.) Suits for enhancement of rent of a tenant having right of occupancy, under clause two, section eighty-five;

(2.) Suits for abatement of rent, under clause 11, section eighty-five;

(3.) Suits for the resumption of rent-free grants, or for the determination of rent of land thitherto held rent-free, under clause four, section eighty-five;

(4.) Suits for pattás or counterparts, and for the determination of the rates of rent at which such pattás or counterparts are to be delivered, under clause twelve, section eighty-five.

CHAPTER VI.

ON PROCEDURE UP TO JUDGMENT.

Mode of instituting suits. Contents of plaint or statement of claim.

105. Suits under this Act shall be instituted by presenting to the Court a plaint or statement of claim, which shall contain

(*a*) the name, description and place of abode of the plaintiff;

(*b*) the name, description and place of abode of the defendant, so far as they can be ascertained;

(*c*) the substance of the claim, and its value estimated according to the law for the time being in force for the valuation of suits; and

(*d*) the date on which the right to sue accrued.

Statement by whom to be presented.

106. The statement of claim shall be presented by the plaintiff, or by an authorized agent of the plaintiff, who has personal knowledge of the facts of the case, or by an agent who shall be accompanied by a person who has such knowledge.

Verification of statement.

107. The statement of claim shall be subscribed and verified at the foot by the plaintiff or his agent in the manner following, or to the like effect:—

"I, *A. B.*, do declare that the above statement is true to the best of my knowledge and belief."

Document relied on by plaintiff to be presented with statement.

108. If the plaintiff rely in support of his claim on any document in his possession, he shall deliver the same to the Court at the time of presenting his statement of claim.

Admission afterwards.

Unless such document be so delivered, or its non-production be sufficiently excused, or unless the Court see fit to extend the time for producing the same, it shall not afterwards be admitted.

Procuring production of document in possession of defendant.

109. If the plaintiff require the production of any document in the possession or power of the defendant, he may, at the time of presenting his statement of claim, deliver to the Court a description of the document, in order that the defendant may be required to produce the same.

Contents of statement in suits for arrears of rent.

110. If the suit be for the recovery of an arrear of rent, the statement shall specify the name of the village and estate, and of the pargana or other local division in which the land is situate:

and, if the arrear is alleged to be due from any ryot, the quantity of land, and (where fields have been numbered in a Government survey) the number of each field, and yearly rent of the land; the amount (if any) received on account of the year for which the claim is made; the amount in arrear, and the time in respect of which it is alleged to be due.

Contents of statement in suits for ejectment,

111. If the suit be for the ejectment of a ryot, farmer or tenant, from any land, farm or tenure,

or for recovery of occupancy or possession.

or for the recovery of the occupancy or possession of any land, farm or tenure,

the statement shall describe (as circumstances may require) the extent, situation and designation of the same; and, if necessary for the identification of the land, shall set forth the boundaries of such land.

Return or amendment of statement.

112. If the statement of claim do not contain the several particulars hereinbefore required to be specified therein, or be not subscribed and verified as hereinbefore required, the Court may return the statement to the plaintiff, or, at its discretion, allow it to be amended.

Issue of summons; order for personal attendance or appearance by agent.

113. If the statement of claim be in proper form, the Court, except as otherwise hereinafter specially provided, shall direct the issue of a summons to the defendant,

and if the plaintiff require the personal attendance of the defendant, and satisfy the Court that such attendance is necessary, or the Court of its own accord require such attendance, the summons shall contain an order for the defendant to appear personally on a day to be specified in the summons,

otherwise, the summons shall order the defendant to appear personally or by an agent duly authorized on his behalf, who has personal knowledge of the subject, or who shall be accompanied by a person who has such personal knowledge.

Fixing of day to be specified in the summons.

114. The day to be specified in the summons shall be fixed with reference to the state of the file and the distance that the defendant may be or be supposed to be at the time from the place where the Court is held,

order to produce documents,

and the summons shall order the defendant to produce any document which he may have in his possession, of which the plaintiff demands inspection, or upon which the defendant may intend to rely in support of his defence.

and to bring witnesses.

It shall also enjoin him to bring with him his witnesses, if they are willing to attend without issue of process, and shall be in the form D contained in the schedule to this Act, or to the like effect.

Mode of serving summons.

115. The summons shall be served by delivering a copy thereof to the defendant personally when practicable;

or, if the summons cannot be served on the defendant personally, by affixing a copy of it to some conspicuous part of his usual residence

and also affixing a copy of the same in the Collector's office.

Endorsement on summons as to mode of service.

116. If the summons be served personally, the Názir shall endorse on the summons the fact of such service.

If personal service be not effected, the Názir shall endorse on the summons the reason of not serving it personally, and how it has been served.

Service of summons in another district.

117. If the usual residence of the defendant be in another district, the summons, together with the cost of the service thereof, shall be sent by the public post to the Collector of such district, who shall issue the summons, and return the same, after service, with the prescribed endorsement, to the officer by whom it was transmitted to him.

Deposit of cost of serving summons or warrant.

118. The amount of the cost of serving the summons,

or, if a warrant be issued as provided in the next succeeding section, of serving the warrant,

shall in all cases be deposited in Court upon the same day or the day next following that on which the plaint or statement of claim is presented to the Court.

Effect of failure to deposit.

If the said amount be not so deposited (except in cases in which the Court may allow the issue of summons free of cost under the discretion reserved to it in section eighty-three), the case shall not be brought on the file of suits;

but in such case the plaintiff may present another plaint at any time within the period allowed by the rules for the limitation of suits.

Procedure when plaintiff desires issue of warrant of arrest.

119. If in any suit against an under-tenant or ryot for the recovery of an arrear of rent, the plaintiff desires a warrant of arrest to be issued against the defendant, such defendant being resident within the district in which the suit is instituted, he shall present, with his statement of claim, an application for the issue of such warrant.

When such application is presented, the Court shall examine the plaintiff or his agent, on his oath or affirmation, or otherwise, according to the law for the time being in force in relation to the examination of witnesses, and inspect the documents adduced by him in support of his claim; and if *primâ facie* the claim appear to the Court to be well founded, and that, if a summons be issued, the defendant will abscond instead of appearing to answer the claim, the Court may issue a warrant for the arrest of the defendant.

The Court shall fix a reasonable time for the return of the warrant, and the officer entrusted with the service thereof shall, at the time of arresting the defendant, deliver to him a notice addressed to the defendant containing the particulars of the claim, and requiring the defendant, if he contest the claim, to bring with him any document upon which he may intend to rely in support of his defence.

But no such warrant shall be issued in a suit for arrears of rent due in respect of a dependent taluq, or other transferable tenure, which, as hereinafter provided, is liable to farm or transfer in execution of any decree which may be passed in the case.

Every warrant issued and notice delivered under this section, shall be respectively in the forms E and F in the schedule hereto annexed or to the like effect.

Procedure after arrest of defendant.

120. If a defendant be arrested under the warrant of arrest, he shall be brought with all convenient speed before the Court, and the Court shall commit him to custody, unless he deposit in Court such sum as may be specified in the notice.

Procedure when defendant is brought before Court under warrant.

121. When a defendant is brought before the Court under warrant, the Court shall with all convenient speed proceed to try the case in the manner hereinafter provided; and if the suit cannot be at once adjudicated, the Court may, if it think fit, require the defendant to give security for his appearance whenever the same may be required at any time whilst the suit is pending, or until execution of the final decree which may be passed thereon, and may commit him to the civil jail to be there detained until he shall furnish such security or deposit such sum as the Court shall order.

Form of security-bond.

The security-bond shall be in the form G contained in the schedule to this Act, or to the like effect.

Procedure when defendant cannot be arrested under warrant.

122. If the defendant cannot be arrested under the warrant, the Court, on the application of the plaintiff, shall either postpone the case for such period as to it may seem proper, in order that the plaintiff may apply within the said period for another warrant to be issued for the arrest of the defendant, or shall forthwith issue a proclamation, to be affixed in its own office and at the residence of the defendant, fixing a day for the hearing of the case, which shall not be less than ten days from the date of the publication of the notice, at the residence of the defendant.

If the defendant appear in pursuance of the proclamation, he shall be dealt with as provided in the last preceding section.

Compensation for arrest applied for without reasonable cause.

123. If it appear to the Court that the arrest of the defendant was applied for without reasonable cause, the Court may in its decree, award to the defendant such sum not exceeding one hundred rupees as it may deem a reasonable compensation for any injury or loss which he may have sustained by reason of such arrest, or of his detention in jail during the pendency of the suit.

Consequence of neither party appearing on day fixed.

124. If on the day fixed by the summons or proclamation for the appearance of the defendant, or on any subsequent day to which the hearing of the case may be adjourned prior to the recording of an issue for trial as hereinafter provided, neither of the parties appear in person or by an agent, the case shall be struck off, with liberty to the plaintiff to bring a fresh suit, unless precluded by the rules for the limitation of suits.

125. If on any such day the defendant only appear, the Court shall pass judgment against the plaintiff by default, unless the defendant admit the right to sue, in which case the Court shall proceed to give judgment for the plaintiff upon such admission without costs :

If defendant only appear, Court shall pass judgment by default; or decree upon admission of claim.

Provided that such judgment, if there be more than one defendant, shall be only against the defendant who makes the admission.

Proviso.

126. If on any such day the plaintiff only appear, the Court, upon proof that the summons or proclamation has been duly served according to the provisions of this Act, shall proceed to examine the plaintiff or his agent, and after considering the allegations of the plaintiff, and any documentary or other evidence adduced by him, may either dismiss the case or postpone the hearing of it to a future day for the attendance of any witness the plaintiff may wish to call, or may pass judgment *ex parte* against the defendant.

If plaintiff only appear, Court may proceed *ex parte*.

127. If the defendant appear on any subsequent day to which the hearing of the suit may be postponed under the last preceding section, the Court may, upon such conditions, if any, as to costs or otherwise as it may think proper, allow the defendant to be heard in answer to the suit as if he had appeared on the day fixed for his attendance.

If defendant appear on adjourned hearing, Court may allow him to be heard in answer.

128. No appeal shall lie from a judgment passed *ex parte* against a defendant who has not appeared, or from a judgment against a plaintiff by default for non-appearance.

No appeal from judgment *ex parte* or by default;

But in all such cases if the party against whom judgment has been given shall appear, either in person or by agent, if a plaintiff, within fifteen days from the date of the Court's order, and, if a defendant, within fifteen days after any process for enforcing the judgment has been executed, or at any earlier period, and shall show good and sufficient cause for his previous non-appearance, and shall satisfy the Court that there has been a failure of justice, the Court may, upon such terms and conditions as to costs or otherwise as it thinks proper, revive the suit and alter or rescind the decree, according to the justice of the case.

but Court may revive suit and alter or rescind decree.

But no decree shall be reversed or altered without previously summoning the adverse party to appear and be heard in support of it.

Adverse party to be summoned.

129. When both parties appear in person or by agent on the day named in the summons, or upon any subsequent day to which the hearing of the case may be adjourned, for sufficient reason to be recorded by the Court, the Court shall proceed to examine such of the parties as may be present, and either party or his agent may cross-examine the other.

Examination and cross-examination of parties and agents.

If either of the parties be not bound to attend personally, any agent by whom he shall appear, or any person who shall accompany such agent, shall be examined and cross-examined in like manner as the party himself would have been if he had attended personally.

At the time of the examination, the defendant, if he think fit, may file a written statement of his defence.

Defendant may file written statement.

130. The examination of the parties or their agents or such other persons as aforesaid shall be upon oath or affirmation, or otherwise, according to the law for the time being in force relative to the examination of witnesses.

Mode of examination.

The substance of the examination shall be reduced to writing in the vernacular language of the Court, and shall be filed with the record.

131. If either of the parties bring forward a witness on such day, the Court may take the evidence of such witness.

Witness produced may be examined.

132. If the defendant rely on any document in support of his defence, he shall deliver the same into Court at the first hearing of the suit;

Document relied on by defendant to be produced at first hearing.

and unless such document be so delivered, or its non-production be sufficiently excused, or unless the Court see fit to extend the time for producing the same, it shall not afterwards be admitted.

133. If after the examination required by section one hundred and thirty, and also the examination of any witness who may attend to give evidence on behalf of either of the parties, and after a consideration of the documentary evidence adduced, a decree can be properly made without further evidence, the Court shall make its decree accordingly.

Decree after examination, if no further evidence is required.

134. If on such examination as aforesaid the agent of either party be unable to answer any material question relating to the case which the Court is of opinion that the party whom he represents ought to answer, and is likely to be able to answer if interrogated in person, the Court may postpone the hearing of the case to a future day, and direct that the party whose agent may have been unable to answer as aforesaid shall attend in person on such day;

Party to attend in person when his agent is unable to answer.

and if the party so directed to attend shall fail to appear in person on the day appointed, the Court may pass judgment as in case of default, or make such other order as it may deem proper in the circumstances of the case.

Judgment or order if he fail to appear.

135. If on such examination as aforesaid it appear that the parties are at issue on any question upon which it is necessary to hear further evidence, the Court shall declare and record such issue, and shall fix a convenient day for the examination of witnesses and the trial of the suit; and the trial shall take place on that day, unless there be sufficient reason for adjourning it, which reason shall be recorded by the Court.

Procedure when parties at issue on question requiring evidence.

136. The parties shall bring forward their witnesses on the day of trial, and if either party require assistance to procure the attendance of a witness on such day, either to give evidence or to produce a document, he shall apply to the Court in sufficient time before the day fixed for the trial, to enable the witness to be summoned to attend on that day; and the Court shall issue a summons requiring such witness to attend.

Parties to produce witnesses or procure attendance by summons.

137. The law and rules for the time being in force relating to the evidence of witnesses, for procuring the attendance of witnesses and the production of documents, and for the examination, remuneration, and punishment of witnesses, whether parties to the case or not, in cases before the Civil Courts of the Presidency of Bengal, shall, except so far as may be inconsistent with the provisions of this Act, apply to and be of equal force and effect in suits under this Act.

Provisions regarding attendance, examination, &c., of witnesses.

138. If on the day fixed for the trial of any issue neither of the parties appear, the case shall be struck off under the conditions provided in section one hundred and twenty-four.

Case to be struck off if neither party appears.

If on any such day one only of the parties appear, the issue may be tried and determined in the absence of the other party, upon such proof as may be then before the Court.

Trial of issue *ex parte*.

139. When suits under this Act are instituted or defended by náibs, gumáshtas or other persons employed in the collection of rent or management of land, in the name and on the behalf of the landholders by whom they are so employed, all the provisions of this Act, by which the personal appearance or attendance of parties to a suit is or may be required, shall be applicable to such náibs, gumáshtas or other persons;

Provisions to apply when suits are instituted or defended on behalf of landholders by their employees.

and anything which, by this Act, is required or permitted to be done by a party in person, may be done by any such person as aforesaid.

Processes served on any such person shall be as effectual for all purposes in relation to the suit, as if the same had been served on the landholder in person:

Processes served on such employees.

and all the provisions of this Act relative to the service of processes on a party to the suit shall be applicable to the service of processes on such person.

140. A female plaintiff or defendant shall not be required to attend in person, if she be of a rank or class which, according to the custom and manners of the country, would render it improper for her to appear in public.

Personal attendance of female plaintiff or defendant when not required.

141. Any party to a suit may employ an authorized agent or mukhtár to conduct the case on his behalf,

Parties may employ agents or mukhtárs;

but the employment of such agent or mukhtár shall not excuse the personal attendance of the plaintiff or defendant, in cases where his personal attendance is required by the summons, or any order of the Court; and no fee for any agent shall be charged as part of the costs of suit in any case under this Act.

but personal attendance not excused.

Fee for agent not chargeable as costs.

142. The Court may in any case grant time to the plaintiff or defendant to proceed in the prosecution or defence of a suit,

Court may grant time or adjourn hearing.

and may also, from time to time, in order to the production of further proof, or for other sufficient reason to be recorded by the Court, adjourn the hearing or further hearing of any case, in such manner as to it may seem fit.

143. The Court may, at any stage of a case, cause a local inquiry and report respecting the matter in dispute to be made by any officer subordinate to it, or by any other officer of Government, with the consent of the authority to whom such officer is subordinate, or may itself proceed to the spot, and make such local inquiry in person.

Court may cause local enquiry and report, or may itself enquire.

The provisions of the law for the time being in force relative to local inquiries by Amíns or Commissioners, under orders of the civil courts, shall apply to any local inquiry made by any officer under this section,

Provisions applied to such enquiry.

and, so far as they are applicable, to inquiries made by the Court in person.

In the latter case the Court, after completing the inquiry, shall record on the proceedings such observations as appear to it appropriate, and the observations so recorded shall be received as evidence in the suit.

Record in case of enquiry by Court.

144. The defendant in any suit under this Act may pay into Court such sum of money as he thinks a full satisfaction for the demand of the plaintiff, together with the costs incurred by the plaintiff up to the time of such payment, and such sums shall be paid to the plaintiff.

Defendant may pay admitted debt and costs into Court.

If the defendant deposit less than the sum claimed and the plaintiff elect to proceed in the case, and ultimately recover no further sum than has been paid into Court, the plaintiff shall be charged with any costs incurred by the defendant in the suit after such payment.

Plaintiff chargeable with subsequent costs if he proceed and recover no further sum.

145. No interest shall be allowed to a plaintiff on any sum paid by the defendant into the Court from the date of such payment, whether such sum be in full of the plaintiff's claim, or fall short thereof.

No interest to plaintiff after date of deposit by defendant.

146. When in any suit between a landholder and a ryot or under-tenant under this Act, the right to receive the rent of the land or tenure cultivated or held by the ryot or under-tenant is disputed on the ground that some third

In suits for rent, third person who has enjoyed it to be made a party.

person has actually and in good faith received and enjoyed such rent before and up to the time when the right to sue accrued, such third person shall be made a party to the suit,

and the question of such receipt and enjoyment of the rent by such third person shall be enquired into, and the suit shall be decided according to the result of such enquiry:

Saving of right to sue in Civil Court to prove title to rent.

Provided always, that the decision of the Court shall not affect the right of either party, who may have a legal title to the rent of such land or tenure, to establish his title by suit in the Civil Court, if instituted within one year from the date of the decision.

Provisions of Civil Procedure Code as to arbitrations applied.

147. The provisions of chapter VI (relative to Arbitration) of the Code of Civil Procedure shall apply to suits and applications under this Act.

Court may order tenant to repair damage caused by breach of contract or lease, for which ejectment or cancelment of lease is decreed.

148. Whenever a decree is given for the ejectment of a tenant, or the cancelment of a lease, on account of any breach of a condition of the contract or lease, by which the land in the occupation of such tenant has been injured, the Court may order the tenant to repair the damage caused by such breach of contract or lease within one month,

and if such damage shall be so repaired, execution shall be stayed.

Delivery of judgment.

149. The Collector shall pronounce judgment in open Court.

Language and contents.

The judgment shall be written in the vernacular language of the Collector and shall contain the reasons for the same, and shall be dated and signed by the Collector at the time it is pronounced:

When it may be in English.

Provided that the judgment may be written in English, if the Collector is able to write a clear and intelligible decision in that language.

CHAPTER VII.

PROCEDURE IN EXECUTION OF DECREE.

Mode of executing decree for ejectment or re-instatement of ryot.

150. If the decree be for the ejectment of any ryot from land occupied by him, or for the re-instatement of any ryot in the occupancy of land from which he has been ejected, the decree shall be executed by giving the possession or occupancy of the land to the person entitled by the decree to such possession or occupancy.

Magistrate to give it effect in case of opposition.

If any opposition is made to the execution of the order for giving such possession or occupancy, by the party against whom the order is made, the Magistrate, on the application of the Court, shall give effect to the same.

Mode of executing decree for cancelment of lease or for ejectment or re-instatement of farmer or tenant.

151. If the decree be for the cancelment of any lease or the ejectment of any farmer or other person (not being an actual cultivator), or for the re-instatement of any farmer or other such person in the possession of a farm or tenure from which he has been ejected,

the decree shall be executed by proclaiming the substance of the decree to the cultivators or other occupants by beat of drum, or in such other manner as may be customary, and affixing the same in some conspicuous place within, or adjacent to, the farm or tenure.

Power to order detention in, or commitment to, civil jail, in certain cases.

152. If the decree be for arrears of rent, or for money, papers or accounts, and the defendant has been committed to jail, or appear, pursuant to the conditions of any security-bond given under section one hundred and twenty-one, the Court may order that he be detained in, or committed to, the civil jail, unless he immediately pay into Court the amount of the decree with costs, or otherwise comply with the terms of the decree.

Process against surety on failure to deliver judgment-debtor into custody.

153. If the judgment-debtor has given security for his appearance, and be not present when judgment is pronounced, and the surety fail to deliver him into custody when required so to do, process of execution may be taken out against the surety in the same manner as if a decree for the amount due by the debtor had been passed against the surety.

Process of execution against person or property, but not both.

154. Process of execution may be issued against either the person or the property of a judgment-debtor;

but process shall not be issued simultaneously against both person and property.

Applications on which it may issue.

Such process may be issued on the oral application of the judgment-creditor, his agent, or mukhtár, made at the time the decree is passed, or thereafter, upon the written application of the judgment-creditor, his agent, or mukhtár.

Form of process.

Process of execution against the person or movable property of a debtor shall be in form H or I contained in the schedule to this Act, or to the like effect.

Execution against movable property.

155. Any movable property required to be seized under an execution shall, if practicable, be described in a list to be furnished by the judgment-creditor;

but, if the creditor is unable to furnish such list, he may apply for a general attachment of the debtor's effects, to the amount of the judgment and costs.

In either case, the property to be seized shall be pointed out to the officer entrusted with the execution of the process, by the creditor, or his agent:

Articles excepted from attachment.

Provided that no implements of husbandry, or cattle actually employed in agriculture, or tools of artisans, shall be attached under this section.

Date and duration of warrant.

156. Every warrant of execution shall bear date on the day on which it is signed by the Court, and shall continue in force for such period as the Court may direct (not being more than sixty days), calculated from such date.

157. Second and successive warrants of execution may be issued by order of the Court on the application of the judgment-creditor, after the expiration of the period fixed for the continuance in force of a previous warrant.

Second and successive warrants.

158. Process of execution shall not be issued upon any judgment, without previous notice to the party against whom execution is applied for, if, when application for the issue of the process is made, a period of more than one year shall have elapsed from the date of the judgment, or from the date of the last previous application for execution.

After one year execution not to issue without notice to party concerned.

159. Execution on a judgment shall not issue against the heir or other representative of a deceased party, without notice to such heir or other representative to appear and be heard.

Execution not to issue against heir or representative of deceased party without notice.

160. No process of execution of any description whatsoever shall be issued, on a judgment under this Act, after the lapse of three years from the date of such judgment, unless the judgment be for a sum exceeding five hundred rupees,

No process of execution after three years, if judgment be for sum not exceeding 500 rupees.

in which case the period within which execution may be had shall be regulated by the general rules in force in respect to the period allowed for the execution of decrees of the Civil Court.

Regulation of period in such cases.

161. If a warrant issue for taking in execution the body of any person, the officer charged with the execution of the warrant shall bring him with all convenient speed before the Court.

Procedure in execution of warrant against person.

If such person does not then deposit in Court the full amount specified in the warrant,

or make such arrangement for the payment of the same as shall be satisfactory to the judgment-creditor,

or satisfy the Court that he has no present means of paying the debt,

the Court shall send him to the civil jail, there to remain for such time as may be directed by a warrant addressed to the keeper of the jail, unless in the meantime he pays the full amount, for the payment of which he is liable under the decree:

Provided that the time for which a debtor may be confined in execution of a decree under this Act, shall not exceed three months when the amount decreed (exclusive of costs) does not exceed fifty rupees,

Limit of imprisonment.

or six months when such amount does not exceed five hundred rupees,

or two years in any other case.

162. Any person once discharged from jail shall not be imprisoned a second time under the same judgment.

No person to be imprisoned a second time under same judgment.

If the amount due under the decree do not exceed one hundred rupees, the Court may declare such discharged person absolved from further liability under that decree.

When further liability extinguished.

In other cases the discharge shall not extinguish the liability of the discharged person under the decree, or exempt any property belonging to such person from attachment in execution of the same.

When not extinguished.

163. Any person applying for a warrant of arrest under section one hundred and nineteen, or suing out process of execution against the body of any person, shall deposit in Court, at the time of issue of the warrant, diet-money for thirty days at such rate as the Court may direct, not exceeding two annas per diem, unless the Court for any special reason direct that deposit be made at a higher rate, which shall not exceed four annas per diem.

Diet-money to be deposited at time of issue of warrant.

164. Payment of diet-money at the same rate shall be made previously to the commencement of each succeeding month of the imprisonment, in failure of which the party confined shall be discharged.

Effect of non-payment of diet-money in advance during imprisonment.

165. All diet-money spent in providing subsistence for any prisoner shall be added to the costs in the suit,

Diet-money spent to be costs in suit.

and any diet-money not so spent shall be returned to the person who deposited the same.

Refund of remainder.

166. In executing a writ of execution against the movable property of a debtor liable under this Act, the officer charged with the execution of the writ shall prepare a list of the property pointed out by the judgment-creditor, and shall publish a proclamation, specifying the day upon which the sale is intended to be held, together with a copy of the said list at the intended place of sale and at the residence of the debtor.

Procedure in executing writ against movable property.

A copy of the said proclamation and list shall be transmitted to the Court and shall be affixed in its office.

167. No sale of any movable property taken in execution shall be made until after the end of ten days next following the day on which such property may have been so taken.

Time to elapse before sale of movable property.

Until such sale the property shall be deposited in some fit place, or it may remain in custody of some fit person approved by the officer executing the writ.

Custody meanwhile.

The provisions of sections sixty-six to seventy, so far as the same are applicable, shall apply to sales under this section.

Provisions applied to sales.

168. If before the day fixed for the sale a third party appear before the Court and claim a right or interest in any of the movable property taken in execution, the Court shall examine such party or his agent on oath or af-

Examination of third party claiming interest in property.

firmation or otherwise, according to the law for the time being in force relative to the examination of witnesses,

and, if it see sufficient reason for so doing, may stay the sale of such property.

Stay of sale.

169. The Court shall adjudicate upon such claim and make such order between the claimant and the plaintiff and defendant in the original suit as seems fit.

Adjudication of such claims.

In trying such claim, the Court shall be guided by the rules contained in this Act, so far as they may be applicable.

Rules applied.

170. If the claimant fail to establish his right to the property taken in execution, the Court, at the time of disposing of the case, may award to the judgment-creditor against such claimant, as part of the costs, such sum as it deems sufficient to cover any loss of interest or damage which the judgment-creditor may have sustained by reason of the postponement of the sale of the property.

Compensation awardable against claimant failing to establish right.

171. No appeal shall lie from any order passed by the Court under the two last preceding sections.

No appeal from order under sections 169, 170.

But the party against whom the same is given may bring a suit in the Civil Court to establish his right at any time within one year from the date of the order:

Right to sue in Civil Court.

Provided that, if the order be for the sale of the property, the suit shall not be for the recovery of the property, but shall be for compensation from the judgment-creditor by whom the property was brought to sale.

Proviso.

172. No irregularity in publishing or conducting a sale of movable property under an execution shall vitiate such sale,

Sale not vitiated by irregularity in publishing or conducting it.

but this rule shall not deprive any person injured by such irregularity from recovering compensation therefor by suit in the Civil Court:

Right to sue or damage.

provided that such suit be brought within one year from the date of sale.

Limitation.

173. If the decree be for an arrear of rent due in respect of an under-tenure which by the title-deeds or the custom of the country is transferable by sale, the judgment-creditor may apply for the sale of the under-tenure, and the under-tenure may thereupon be brought to sale in execution of the decree, according to the rules for the sale of under-tenures for the recovery of arrears of rent due in respect thereof contained in any law for the time being in force.

Sale of transferable under-tenures in execution of decrees for arrears of rent due in respect thereof.

But no such application shall be received when a warrant of execution has been previously issued against the person or movable property of the judgment-debtor, so long as such warrant remains in force.

Exception.

If, after sale of an under-tenure, any portion of the amount decreed remains due, process may be applied for against any other property, movable or immovable, belonging to the debtor, and any such immovable property may be brought to sale in the manner provided in section one hundred and seventy-seven.

Process for recovery of portion of decree remaining unsatisfied after sale of tenure.

174. If, before the day fixed for the sale of any such land, share or interest, in execution of a decree for arrears of revenue or rent due in respect of such under-tenure, a third party appear before the Court, and allege that he and not the person against whom the decree has been obtained, is the proprietor of such land, share or interest, and was in lawful possession of the same at the time when such decree was obtained, the Court shall examine such third party in the manner provided in section one hundred and sixty-eight for the examination of third parties,

If third party claim land, share or interest to be sold, Court to stay sale and enquire into and adjudicate upon the claim.

and if it see sufficient reason for so doing, and such third party deposit in Court the amount of the decree or give sufficient security for the same, the Court shall stay the sale and proceed to enquire into and adjudicate upon the claim.

175. In trying such claim the Court shall be guided by the rules contained in this Act, so far as the same may be applicable,

Rules applied to adjudication of such claims.

and the judgment passed by the Court on such claim shall not be subject to appeal;

No appeal.

but the party against whom it is given may bring a suit in the Civil Court to establish his right at any time within one year from the date of the judgment.

Right to sue in Civil Court.

176. In the execution of any decree for the payment of money under this Act, not being money due as arrears of rent of a saleable under-tenure, if satisfaction of the judgment cannot be obtained by execution against the person or movable property of the debtor within the district in which the suit was instituted, the judgment-creditor may apply for execution against any immovable property belonging to such debtor.

In execution of decrees for money, if judgment not otherwise satisfied, execution may be applied for against immovable property.

177. If the immovable property against which execution is applied for be a house or other building, process shall be issued in the same manner as for the attachment and sale of movable property,

Mode of executing process if immovable property be a house or other building.

and the provisions of sections one hundred and sixty-six and one hundred and sixty-seven shall be applicable to the execution of such process.

178. If, before the day fixed for the sale of any immovable property as aforesaid, objection be offered to the sale on the ground of such property not belonging to the judgment-debtor, and consequently not being liable to be sold in execution of a decree against him, the Collector

Procedure in case of objection offered before sale.

shall examine the party making the objection in the manner prescribed in section one hundred and sixty-eight for the examination of third parties,

and, if satisfied that there is sufficient ground for so doing, shall stay the sale and proceed to enquire into and adjudicate upon the objection in the same manner, and subject to the same right of suit by the party against whom judgment may be given, as is provided in section one hundred and seventy-five.

SCHEDULE.

FORM A. (*See section* 44.)

I, *A. B.* of do solemnly declare that I did personally, or by my agent *C. B.*, on the day of , tender payment to *E. F.* of the sum of Rs. as and for the whole amount due from me on account of rent from the month of to the month of both inclusive. I further declare that the said *E. F.* refused to accept the sum so tendered, and to give a receipt in full for the same, and I do declare that, to the best of my belief, the sum of rupees —— so tendered, and which I now desire to pay into Court, is the full amount I owe the said *E. F.*

FORM B. (*See section* 45.)

Court of the Collector of dated the day of

To *E. F.* &c.

FORM OF SUMMONS TO DEFENDANT.

No. (of suit) dated

In the Court of

A. B., Plaintiff.

[*Name, description and address of plaintiff.*]

C. D., Defendant.

[*Name, description and address of defendant.*]

Whereas the said *A. B.* has brought a claim against you in this Court for (*here specify particulars of claim as given in the statement,*) you are hereby required to appear in person in this Court on the day of [*if not specially required to appear in person, state,* "in person or by an agent who has personal knowledge of the subject or who shall be accompanied by a person who has such knowledge"] to answer the abovenamed plaintiff, and you will bring with you (or send by your agent) [*here mention any document the production of which may be required by the plaintiff*] which the plaintiff desires to inspect, and all documents on which you may intend to rely in support of your defence. You will also bring with you your witnesses, if they are willing to attend without issue of process.

FORM E. (*See section* 119.)

FORM OF WARRANT OF ARREST.

No. (of suit) dated

In the Court of

A. B., Plaintiff.

C. D. Defendant.

To the Názir of the Court of the Collector of

Whereas the plaintiff in this suit has obtained an order from the Court for the arrest of the defendant, you are hereby commanded to bring the defendant before the Court on or before the day of to be dealt with according to law.

Dated this day of 187

FORM F. (*See section* 119.)

FORM OF NOTICE TO ACCOMPANY SUCH WARRANT.

In the Court of

A. B., Plaintiff.

[*Name, description and address of plaintiff.*]

C. D., Defendant.

[*Name, description and address of defendant.*]

Whereas the said *A. B.* has brought a claim against you in this Court for (*here specify particulars of claim as given in the statement*) and has obtained a warrant for your arrest, you are hereby required, unless you admit the claim, to bring with you to the Court all documents on which you may intend to rely in support of your defence.

FORM G. (*See section* 121.)

FORM OF SECURITY BOND FOR APPEARANCE OF DEFENDANT.

Whereas *A. B.*, plaintiff, has instituted a suit in the Court of the Collector of against *C. D.*, defendant, and the said *C. D.* has been required to give security for his appearance at any time when called on while the suit is pending and until execution of the decree, I, *E. F.*, hereby declare myself surety for the said *C. D.'s* appearance as aforesaid, and in case of his making default in such appearance, I engage to pay any sum for the payment of which the said *C. D.* may be liable under the decree. *If the suit be for the delivery of papers or accounts specify some sum to be fixed by the Collector.*

FORM II. (*See section* 154.)

WRIT OF EXECUTION AGAINST THE PERSON.

A. B., Plaintiff.

C. D., Defendant.

To the Názir of the Court of the Collector of

Whereas the said *C. D.* was directed by a decree of this Court, under date the day of 187 , to pay to *A. B.* the sum of and for costs of suit, amounting to , and whereas the said *C. D.* has omitted to pay the same, you are hereby commanded to apprehend the said *C. D.*, and to bring him with all convenient speed before this Court to be dealt with according to law.

FORM I. (*See section* 154.)

WRIT OF EXECUTION AGAINST THE EFFECTS.

A. B., Plaintiff.
C. D., Defendant.

To the Názir of the Court of the Collector of

Whereas *C. D.* was directed by a decree of this Court under date the day of 187 , to pay to *A. B.* the sum of and for costs of suit, amounting to , and whereas the said *C. D.* has omitted to pay the same, you are hereby commanded to levy the said sum of , and the sum of for costs of executing this process, by seizure and sale of such moveable property of the said *C. D.* as (is described in the list annexed, and) [*if no list is furnished, these words to be omitted*] shall be pointed out to you by the judgment-creditor or his agent; and you are hereby ordered to sell such property of the said *C. D.*, on some convenient day, not being less than ten nor more than fifteen days from the day of seizure, unless the amount leviable as aforesaid shall be sooner paid; and you are hereby commanded to certify to me what you shall do by virtue of this warrant.

STATEMENT OF OBJECTS AND REASONS.

Proposals to modify Act X of 1859, so far as it concerns the North-Western Provinces, have for some years been before the Local Government. The Act had been passed but a short time when its provisions were very generally pronounced unsuitable to cultivating tenures in Upper India. It did not give sufficient protection to large classes of tenants who held land prescriptively at favourable rates, while numbers of tenants, who had not hitherto been declared to have rights of occupancy in their holdings, were suddenly proclaimed tenants with beneficial interests. The conditions under which the rent of tenants with a right of occupancy could be enhanced, though apparently clear and intelligible, have, in practice, been found inequitable. Again, after decree of enhancement, there was no limit or term protecting the tenant from a further suit. When the re-settlement of the Provinces commenced, other defects were brought to light. It was found that the standard of enhancement adopted under the Act had led to much injustice. The rates selected as exemplars were very generally not representative rates, and the area of comparison was too limited. But the main point which forced itself on the attention of the Government was the expediency of recognising the old cultivating classes, who had at one time or other, under British rule, possessed proprietary rights.

The problem before the Government was, while giving to the landlords full and fair opportunities of enhancement on all classes of tenants, to recognise the claims of the old cultivating bodies. It was necessary that these should be compelled to submit to the proprietors, and to pay an equitable rent for their old holdings. It was equally necessary to protect them from constant and irritating attempts at enhancement, and to admit the superiority of their claim to hold at favourable rents, as compared with the classes who, by Act X of 1859, have been vested with rights of occupancy.

It is proposed to provide, in the Land Revenue Bill, for the determination of the rights and rents of these ex-proprietary cultivators, at time of settlement, by the Settlement Officer. The present Bill lays down the proposed law in regard to the ordinary action of the Rent Courts, after settlement has been completed, and in cases arising after settlement. Tenants entitled to hold at privileged rates have been divided into four classes: namely, those who, or whose ancestors, have lost their proprietary rights since the introduction of the British Rule, or may hereafter lose them, by—

(1.) Sale for arrears of revenue;

(2.) Sale in execution of a decree of the Civil or Revenue Courts;

(3.) Private agreement, sale or mortgage;

(4.) Confiscation under Acts XI and XIV of 1857.

Every tenant who has held or cultivated land continuously for twelve years has been declared to have a right of occupancy, with certain specified exceptions, in the land so held or cultivated by him. Tenants at fixed rates have been recognized, as provided for by Act X of 1859; and all rights of occupancy are declared heritable, but not transferable, except when they are so by local custom.

The object of the framers of the Bill has been, while enforcing protection for the classes termed "privileged," to alter as little as possible the existing law in regard to rights of occupancy. Hence, though a creation of our own, the rule absolutely conferring such a right

after twelve years' cultivation has been maintained. Similarly, it has been sought to strengthen the position of the proprietor in his *seer* land, by retaining the provisions of the present law, which forbid the growth of occupancy rights in such lands; and by laying down, with greater precision than has hitherto been attempted, what shall be considered *sír* lands for the purposes of the Rent Act.

On this point there is a great conflict of opinion; and the definition of *sír*, embodied in the Bill, is a compromise of the views of contending parties. On the one hand, it is urged that *sír* lands were, under Native Rule, the lands held free of revenue by the proprietor, on consideration of his collecting and paying in the revenue: and that the Government having now given him a share of the rental assets, and assessed his *seer* lands, they can no longer be considered as retained exclusively for his maintenance, or as held on any special and distinctive tenure, but should be regarded as in all respects similar to all other lands—the proprietor's *sír* being in fact equivalent merely to the proprietor's actual cultivation. On the other hand, it is pointed out that, by the custom of the country, much land, though not actually in the proprietor's cultivation, is practically recognised as *seer*, both by proprietors and cultivators; that in such land cultivators, other than the proprietor, are sub-tenants, or tenants-at-will only; and that any law ignoring this would be opposed to local custom, would be extremely unjust to the proprietors, and would not be popular with any class.

The Bill is divided into six chapters.

Chapter I defines certain terms used in the Bill.

Chapter II deals with the Rights and Liabilities of Landlords and Tenants, including Leases, Enhancement, and Abatement of Rent, Commutation of Rent, Payment in kind, Ejectment, Compensation for Improvements made by Tenants, Deposits of Rent in the Government Treasury.

Chapter III deals with Distraint.

Chapter IV is entitled "Jurisdiction of Courts and Appeals," and embraces Suits cognizable under the Act, Suits by a landlord, Suits by and against Lambardárs, Co-sharers, and Muáfídárs, Appeals, Limitation of Suits, Applications and Appeals therefrom, and Jurisdiction of Courts.

Chapter V lays down the Procedure of the Rent Courts, and

Chapter VI, the final Chapter, the Procedure in Execution of Decree.

In Chapter II, after laying down the classes of tenants as above specified, it is provided that all tenants shall be entitled to leases, but that the leases of all tenants shall expire with the term of the Government settlement. This section re-enacts Act XVI of 1842, the repeal of which has led to much inconvenience, and has opened a door to collusive leases by the proprietor, on the eve of a re-settlement of the Government revenue. The provisions for enhancement or abatement of rent differ in several important points from those of the present law. Rents paid by tenants with right of occupancy at fixed rates will, as heretofore, not be liable to enhancement. The rent of tenants having a privileged right of occupancy will be liable to be raised to a rate which shall be two annas in the rupee less than the rent paid by tenants with right of occupancy only. This class, again, will be liable to enhancement only on the ground that the rent paid is below the prevailing rate payable by the same class of tenants, for land of a similar quality with similar advantages, in villages of a similar quality with similar advantages. Class, in the absence of local custom, is not to be held to include caste. Where a Settlement Officer has formed villages into circles for purposes of assessment, the standard villages shall be selected from such circle. In the absence of any such guide, the villages are to be selected from the same tahsil or from a tahsíl immediately adjacent. The rents, whether of tenants holding at privileged rates, or tenants with a right of occupancy, are to be fixed for a term of years. The sections regarding commutation of rents in kind into money-rents do not need much notice. It will, however, be seen that power is now given only to tenants, not being tenants at will, or to landlords, to apply for commutation. The following sections provide for ejectment, and modify in some respects the present law. No ejectment of a tenant, or cancelment of a lease, shall be decreed on account of any breach of the lease which is not detrimental to the land leased, or which is not contrary to the purpose for which it was leased. With a view further to avoid forfeiture of leases as much as possible, the principle recognized by Act X of 1859, in the case of non-payment of rent, is extended to all breaches for which forfeiture may be incurred. Time is to be given to the tenant to remedy the injury or breach for which forfeiture has been decreed. Thus, a tenant who has planted trees in his field will first have time given him to uproot the trees, and will only be evicted should he fail to do so. A tenant with right of occupancy can be ejected for arrears only after notice served through a Court, and after the end of the agricultural year in which such arrears accrued. Provision is made for ejectment of tenants not having rights of occupancy, or whose leases have expired. Section 33 provides for applications to dispossess grantees of land exempt from rent. Much land so held became, twelve years ago, permanently rent-free, because landlords did not sue to resume it within the terms allowed by Act X of 1859. This was inequitable, landlords in many cases being wholly ignorant of the provision; and it is now sought to provide a remedy which, while securing the rent-free holding to the tenant, if he has so held it for fifty years, including two successions, gives the proprietor in all other cases,

at each fresh succession to the property, power to resume, within twelve years, land granted rent-free by his predecessors.

The sections regarding compensation are new. The grant of compensation is made a condition to ejectment, but not to enhancement; and the compensation is to be based on the *present value* of the improvements made by the tenant, and is to be given either in money or by the grant of a beneficial lease of land, or by both.

Chapter IV defines the suits which shall be heard under the Act; and excepting that suits against agents have been struck out as being of the nature of civil suits, the sections differ little from the present law. Appeals and applications follow, and do not need special notice. Under "Jurisdiction of Courts" are specified the cases under the Act with which the several classes of Collectors are empowered to deal: the more important being reserved to Collectors of the first class, while no Collectors, even of the first class, unless specially empowered, will have power to try suits for enhancement or abatement of rent, for resumption of rent-free grants, or determination of rent thereon, or suits for pattas or counterparts, and the determination of the rates of rent at which such pattas or counterparts are to be delivered.

The other chapters, namely—

III, relating to Distraint,

V, laying down the procedure of the Rent Courts, and

VI, relating to procedure in Execution of Decrees, re-enact, without alteration, the provisions of the existing law, as contained in Acts X of 1859 and XIV of 1863, and therefore need no comment.

CALCUTTA; *The 6th January* 1873.

J. F. D. INGLIS.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th March 1873, and was referred to a Select Committee with instructions to make their report thereon in three weeks:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, be published in English and in Burmese in the *British Burma Gazette*:—

No 5 OF 1873.

A Bill to amend the law relating to Timber floated down the rivers of British Burma.

Preamble.

WHEREAS it is expedient to amend the law relating to timber floated down the rivers of British Burma;

It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Burma Timber Duties Act, 1873:"

Local extent.

It extends only to the territories under the administration of the Chief Commissioner of British Burma;

Commencement.

And it shall come into force on the passing thereof.

Duty on timber.

2. On all timber floated down any of the rivers of British Burma, a duty shall be levied, in such manner, at such places, and to such extent as the Chief Commissioner, with the previous sanction of the Governor General in Council, from time to time prescribes by notification in the *British Burma Gazette*.

Provided that, if the duty is directed to be levied on each log of the said timber, it shall not exceed two rupees twelve annas per log of five feet in girth and upwards, and one rupee six annas per log of less than five feet in girth.

Provided also, that if the duty is directed to be levied *ad valorem*, it shall not exceed eight per cent. on the value.

Power to fix value for assessment of duty.

3. In every case in which such duty is directed to be levied *ad valorem*, the Chief Commissioner may, with the like sanction, from time to time fix, by like notification, the value on which the duty shall be assessed.

Rules for timber floated.

4. The Chief Commissioner may from time to time, with the previous sanction of the Governor General in Council, make rules as to the time and manner of floating timber down any of the rivers of British Burma; and prescribe what descriptions of timber may lawfully be floated, and what descriptions of timber may not lawfully be floated, down any such river. And all timber found floating contrary to such rules may be confiscated.

Legalization of prior levy of duties.

5. All duties heretofore levied on timber floated down any of the said rivers, shall be deemed to have been levied in accordance with law.

Indemnity.

And all officers and other persons are hereby indemnified for anything done before the passing of this Act, which might lawfully have been done if this Act had been in force; and no suit or other proceeding shall be maintained against any such officer or other person in respect of anything so done.

Enactments repealed.

6. The enactments mentioned in the schedule hereto annexed are repealed to the extent mentioned in the third column of the said schedule.

SCHEDULE.

Number and year.	Title.	Extent of repeal.
Act XXX of 1854.	An Act to provide for the levy of Duties of Customs in the Arracan, Pegu, Martaban, and Tenasserim Provinces.	Sections one, seven, eight and twelve.
		Sections four and six, so far as they relate to timber floated down the rivers of British Burma.
Act IV of 1863.	An Act to give effect to certain provisions of a Treaty between His Excellency the Earl of Elgin and Kincardine, Viceroy and Governor General of India, and His Majesty the King of Burma.	The whole Act so far as it relates to duty on such timber.

SCHEDULE,—*continued.*

Number and year.	Title.	Extent of repeal.
Act VII of 1869.	An Act to give validity to certain Rules relating to Forests in British Burma.	The whole Act so far as it gives validity to rules relating to duty on such timber.
	The Rules for the better management and preservation of the Government forests of British Burma, dated the 2nd August 1865.	So far as they relate to duty on such timber.

STATEMENT OF OBJECTS AND REASONS.

The primary object of this Bill is to authorize the levy of *ad valorem* duties on timber floated down the rivers of British Burma. The opportunity has been taken to consolidate the law on the subject of such timber, which law is now contained in three Acts, and in certain Rules legalized by Act VII of 1869.

SUPPLEMENT TO

The Gazette of India.

CALCUTTA, SATURDAY, MARCH 8, 1873.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP 67.

The Council met at Government House on Tuesday, the 4th March 1873.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Honour the Lieutenant Governor of Bengal.
The Hon'ble Sir Richard Temple, K. C. S. I.
The Hon'ble B. H. Ellis.
Major General the Hon'ble H. W. Norman, C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley.
The Hon'ble F. S. Chapman.
The Hon'ble R. Stewart.
The Hon'ble J. R. Bullen Smith.
The Hon'ble R. E. Egerton.
His Highness the Mahárájá of Vizianagram, K. C. S. I.
The Hon'ble J. F. D. Inglis.
The Hon'ble R. A. Dalyell.
The Hon'ble Rájá Ramánáth Thákur.

PANJÁB APPEALS BILL.

The adjourned debate on the motion to amend section 4 of the Bill to prolong the law relating to Appeals and Reviews of Judgment in the Panjáb was resumed.

The Hon'ble SIR RICHARD TEMPLE moved that the papers circulated to members of Council be taken into consideration.

His Excellency THE PRESIDENT said the original motion was that in section 4 the following words be omitted :—

"with the modifications subject to which it was extended to the Panjáb, by notification of Government, dated the twenty-sixth day of September 1866."

Since which a motion had been made that the papers which had been circulated be taken into consideration.

His Honour the LIEUTENANT-GOVERNOR said it would be in the recollection of the Council that the hon'ble member who had placed the amendment before the Council had, with some warmth of manner, protested against HIS HONOUR's action in asking for information. He said, if HIS HONOUR remembered rightly, that it was for HIS HONOUR to find out the effect of the matter which was before the Council and to move an amendment if he thought it necessary. Now, he was not prepared to accept that view of the hon'ble member, even supposing that it was a matter which had been laid before the Council in the usual manner, after a Bill had been prepared in the usual form and had been discussed and digested by the Committee in the usual way. But putting that aside, the hon'ble member seemed entirely to have forgotten that, in this case, it was not HIS HONOUR who had suggested an amendment, but it was the hon'ble member himself who had proposed an amendment, and had proposed it at the very last stage of the Bill. The Bill had been considered in the regular course; had been discussed in Committee and reported upon. The Bill was, in fact, on a former occasion, on the very point of passing, when it was abruptly stopped, and at the very last stage—at the last minute of the eleventh hour—the hon'ble member put before the Council an amendment which certainly did not explain itself. HIS HONOUR did say that he was justified in protesting against the protest of the hon'ble member. He said that when, under these unusual circumstances, at the last moment, the hon'ble member placed before the Council an amendment which he would presently show to be of great importance, it was his duty to explain the nature of the amendment. It was impossible for HIS HONOUR, with the means at the disposal of the members, to have found out the nature of the amendment. The papers were not before the Council, and he had only guessed the nature and importance of the amendment. Well, then, the hon'ble member having put before them this amendment without explanation, and having protested against HIS HONOUR's action in asking for an explanation of the nature of the amendment, a certain explanation was given by the Hon'ble Mr. Egerton, who seemed to know more about the matter than the hon'ble member in charge of the Bill. That explanation amounted to a very satisfactory sort of justification by faith. He did not explain the exact nature of the amendment, but showed that it was supported by very good authority. The papers had now, however, been laid before the Council; and, on looking at that authority, HIS HONOUR found that it was not exactly the case that the Panjáb Government had assented to the conditions of this amendment. The Lieutenant Governor of the Panjáb was, he believed, at the time in Camp; and we might judge by the terms of the telegram that the Panjáb Government did not quite understand the nature of the amendment. They did not unconditionally assent to the amendment, but signified their consent in these terms:—"The Lieutenant Governor had no objection to omission of reference to notification of 1866, if the rules sanctioned by that notification have ceased to have the force of law under Panjáb Laws Act or Panjáb Appeals Act." The consent of the Panjáb Government was put with an "if." HIS HONOUR now found that, in fact and in truth, the amendment was of most extreme importance: it altered radically the whole appellate law of the Panjáb. It substituted one law for another law contained in the notification of the 26th September 1866 in full detail. That notification was a somewhat long one, as hon'ble members might see for themselves. Nine-tenths of the notification was devoted to the subject of appeals, and the effect of the amendment which the hon'ble member had placed before the Council was to substitute another appellate law for that which otherwise would be law as the Bill at present stood. The amendment did vary entirely the law of appeal in the Panjáb. Besides other important variations, he found that, under the notification of 1866, while there was power summarily to reject appeals, there was given to the Appellate Courts the widest power to revise decisions without appeal by the parties. He would say that this amendment was a most important amendment, altering the whole character and system of appeals, and

going to the very bottom of the appellate system of the Panjáb. That was so. But, on the other hand, the true justification of the amendment was that which was suggested by his hon'ble friend Mr. Egerton, namely, that the real mistake in the matter was the inserting of these words which it is now proposed to omit. Mr. Egerton had told the Council fairly and very correctly that, in truth, it was a mistake to insert these words, as they had the effect of reviving the law of 1866, which provided an entirely different system of appellate procedure in the Panjáb. That was our situation. The Bill was drawn in one form and altered into another form, and it was now proposed again to go back to the first form. He would say that, if this amendment was right, then on a former occasion we must have been wrong. On the former occasion we were on the very point of doing what was wrong. There was the greatest risk in making these hasty amendments. We knew by practice that, when a communication was received from a High Court or a Chief Court, it did not necessarily follow that that communication had been considered by all the judges as a body. In this case it seemed extremely improbable that this communication had been considered by the judges of the Chief Court as a body. He could hardly imagine that, if they had deliberately considered it, they would have come to diametrically opposite conclusions on two occasions within a few days of one another. He spoke under correction, but he believed this Bill had, on a former occasion, been put down to be passed, and that it was stopped at the very last moment in consequence of the receipt of a communication from the Chief Court of the Panjáb; but whether that communication had been considered by one or more of the judges of the Chief Court, the Council were not informed. He thought it extremely improbable that this matter had been considered by the judges of the Chief Court as a body when they caused the insertion of words which they now sought to withdraw. So we were in this position, that, on a communication from the Chief Court of the Panjáb, we inserted these most important words, and now, on another communication from the same Court, we were asked to omit them without explanations in either case. He must say that he protested against legislation in that manner, which he could not but call a sort of haphazard legislation. For himself, personally, he should prefer the old rules of 1866, but that law being indirectly superseded by the law of 1868, he had satisfied himself that the effect of the amendment would be to restore the law of 1868. Inasmuch as that law was established by this Council, and as the Government and the Chief Court of the Panjáb were in its favour, he did not propose to oppose the amendment now that he understood it. But he hoped the hon'ble member in charge of the Legislative Department would thank him for having saved the Council from somewhat precipitate legislation on an important matter which they had not before understood.

The Hon'ble Mr. Hobhouse said, "My Lord,—As His Honour the Lieutenant Governor has appealed to me to thank him for saving the Council from precipitate legislation, I must tell him frankly that no thanks are due to him from any quarter or on any account whatever. From what has he saved the Council? Why, he is now supporting the self-same thing that I proposed last week, and on the self-same grounds which I then assigned for it. At this moment His Honour has no reason to give the Council for accepting the amendment before it, except the reason which I gave you last week, namely, that the local authorities of the Panjáb thought it was the proper course to take.

"Neither have I any other reason to give. The reason I gave last week, I give this week. The matter relates to minute details in procedure, as to which I confess myself unable to form an independent opinion which of two arrangements is best adapted for the Courts of the Panjáb. The reason I assigned to the Council for supporting the amendment was, that there was no dispute upon the subject among those who were able to form an opinion, and who agreed that it was better for the Panjáb to have the provisions of the Civil Procedure Code without the modifications made in 1866 than with them. I say the same now, neither more nor less.

"In all business, public or private, we come to a point at which we rest on the opinion of others; unless indeed we pretend to omniscience. In each piece of business it is a question when that point has been reached, and different minds will judge differently on that question. But no one will deny that it is reached at some time. It will hardly be denied that persons who are not familiar with local details reach it when they come to deal with such matters. They must then depend upon others who possess the requisite familiarity with the subject. The question therefore in this case was, whether the Council had before it matters of such a local and detailed character as made it right for them to trust to local authorities.

"I will show to the Council what sort of a matter this is. The notification of 1866 is, as His Honour has said, a long one; and nineteen-twentieths of it relate to details of procedure connected with appeals. It is not the fact, as the Lieutenant-Governor has stated, that the general system of appeals is regulated by this notification. That is otherwise provided for. The notification relates to small matters of practical detail. For that purpose it displaces forty-five sections of the Code of Civil Procedure, and substitutes for them twenty-five rules of its own. I told you before, and say again, that I cannot explain the effect of the notification without reading it through. I ought to have added that I could not do so without also reading through the forty-five displaced sections of the Civil Procedure Code, or without comparing the two documents point by point to exhibit the differences between them. I will, however, give the Council a fair specimen of what the notification does. I will not pick out any exceptional rule from it, but will take as specimens the first rule and the last.

"The first alteration of the Code was made by Rule II, which runs thus:—

"'II. The application for the admission of an appeal to any Appellate Court, except the Chief Court, shall be made within two months from the date of the order appealed against; and such application to the Chief Court shall be made within three months from such date. The time shall be reckoned from, and exclusive of, the day of the date of the judgment, and also exclusive of such time as may be requisite for obtaining the copies of orders prescribed in Rule III. Provided that appeals may be admitted after the expiration of the prescribed time, on sufficient cause being shown, by special order of the Court.'

"That rule corresponds to section 333 of the Civil Procedure Code and to the provisions of the Limitation Act; and it is, indeed, precisely the same, except that the latter Acts prescribe limits of thirty days for appeal to a District Judge and ninety days for appeal to the High Court. Now, I will ask any member of the Council to weigh these two things together, and to say whether he can decide which of these two arrangements, differing minutely as they do, is the best for the Panjáb Courts, and whether he would not prefer to leave it to the Panjáb Courts themselves to say which is best for them.

"I will now skip to the last rule, rule 26 of the notification, which is as follows:—

"'XXVI. The Appellate Court may, for "sufficient" cause shown, order that execution of decree be stayed. If application for execution be made before the time allowed for appeal has expired, and the Lower Court has not received intimation of an appeal having been preferred, the Lower Court may, if sufficient cause be shown, stay the execution. Before making an order to stay execution, the Court making the order shall require security to be given by the party against whom the decree was passed for the due performance of the decree or order of the Appellate Court.'

"That rule corresponds with section 338 of the Civil Procedure Code. It is in substance the same. I am not sure that there is even a verbal difference. Why the provisions of the Code were displaced, and this rule substituted, I do not know. There is probably some good explanation of it known to those who are familiar with the Panjáb Courts. Equally unable am I to say whether it is now better for the Panjáb Courts to apply to them rule 26 of the notification or section 338 of the Code. But I am quite willing to follow the guidance of the authorities of those Courts.

"Now, on going through the notification, it will be found that the whole relates to questions of this kind. They are not all of the same magnitude, but they are all of the same kind. The difference, then, between the Code and the notification does not relate to the main lines of the system of appeals,

it relates to the details of the procedure. The Committee saw this, and, having seen it, were satisfied that the local authorities were the best judges of the matter.

"If, indeed, there had been any dispute among those authorities, a different case would have arisen. If a man finds those on whom he leans for matters of detail disputing among themselves, he must decide the matter as best he may. But if there is no dispute or doubt among the authorities about a matter which properly falls within their office, then it is incumbent on a sane and rational man to trust to them. I cannot carry the case further than that, nor do I know how else to conduct business.

"Now, I was perfectly candid with the Council. I did not pretend that anything had been done which had not been done. I told them, as I intend to tell them on every occasion, precisely what had been done and what had not, and what was the only reason which induced me to propose the amendment. I can do no more now. If you think that reason a good one, and adopt it, you will pass the amendment; if not, you will reject the amendment, and re-commit the Bill, or take some other course. But I beg the Council not to reject the amendment on account of a general allegation made by a single member of Council, that the matter may be more important than it seems, and that there is or may be some great alteration effected by the amendment in the system of appeals. These are allegations not supported by a tittle of evidence, not founded on any examination of a single particular in the notification or in the Civil Procedure Code, but which His Honour calls upon the Council to believe on his *ipse dixit*. I trust that, if any member thinks it right to oppose the amendment, he will do so, not on random surmises, but on the rational ground that, having compared the two alternative arragements, he finds a substantial difference between them, and thinks that the notification contains the best arrangement for the Panjáb.

"I must now advert to one or two other points mentioned by the Lieutenant Governor. First, he said there was very short notice of this amendment. It so happens that the notice was unusually long. It was in the notice-paper before the postponement took place, and, when it appeared the second time, it was in the same form as at first. His Honour had, therefore, an exceptionally long period for preparing his plans.

"Then, he says that there were papers—the notification for instance—not placed before the Council. Then why in the world did he not move for them? Is it not the business of every member of the Council to ask for such information as he thinks necessary? There is a special rule which provides that any member may ask for papers connected with any measure before the Council. The Lieutenant Governor had ample notice that the Council were to be asked to decide and vote on a subject which, as he asserts, was improperly laid before them. It was, then, his clear duty to move for the more perfect information, and not to come down with verbal assertions as to the nature of the case, and so take the Council by surprise. There is another course not uncommon in an assembly of gentlemen, which is to ask for a private explanation of any seeming difficulty. It now turns out that a question put to myself, or my friend Mr. Egerton, would at once have shown that there was no difficulty. His Honour, however, had not thought fit to follow that course. Not a single thing did he do to inform himself about the validity of the objection he was going to raise. No: he prefers to come down to Council, and raise an objection which nobody knew of, and the means of meeting which were not at hand.

"The Lieutenant Governor has thought fit to offer me some advice as to the proper mode of conducting my business. His advice is not good, and I cannot accept it. Instead of doing so, I will advise him to take the trouble to inform himself a little more about the business to be brought before the Council, instead of interfering in a way which simply impedes business and wastes the public time.

"Let me call the attention of the Council to the ludicrous result, or non-result, of the action taken by the Lieutenant Governor. We have seen the parturition of mountains and the birth of a mouse. We have had to circulate these papers. We had some time consumed in discussion last week, and more to-

day. And, after all, we stand precisely at the point from which we started. Not a word has been said to prove that there is anything in the amendment beyond the substitution of one set of small details for another. No reason has been given for rejecting the amendment. No reason has been given for supporting it, except that the local authorities are the best judges; that we are not in a position to form an independent opinion for ourselves; and that it is only because they so tell us that we believe one set of rules to be better for the Panjáb than the other."

The Hon'ble SIR RICHARD TEMPLE said, as he had made the motion upon which the discussion had arisen, he believed he might withdraw it now; for there appeared to be no farther any reason for continuing the debate. After all, the real point was this, that for some years a set of peculiarly local rules regarding the details of procedure in appeals had been established in the Panjáb, that some five years ago these rules had been superseded by Act VII of 1868, and that it was now considered by the persons most competent to judge, that the revival of those peculiarities was not desirable. But the Lieutenant Governor considered that further time should be allowed, firstly, to satisfy himself by a perusal of the papers on the subject, and secondly, that the Legislative Department should have an opportunity of giving a full explanation of the matter to the Council. He believed that the Council would consider that both those objects had been satisfactorily attained. We had had the advantage of the clear explanation given by the hon'ble Mr. Egerton, who, in some sense, might be said to represent the Government of the Panjáb, and we had now had the satisfactory declaration from the Lieutenant Governor that on the whole he had no objection to the amendment. And lastly, we had the clear explanation given by the hon'ble member in charge of the Legislative Department of the reasons that dictated the amendment, and which suggested the adoption of the mode of procedure prescribed in the Bill. SIR RICHARD TEMPLE thought the result of this discussion would be entirely satisfactory.

The Hon'ble SIR RICHARD TEMPLE'S motion was, by leave, withdrawn.

The Hon'ble MR. HOBHOUSE'S amendment was agreed to.

The Hon'ble MR. HOBHOUSE moved that the Bill as amended be passed. He said it would be necessary to suspend one of the Rules for the Conduct of Business. He did not know that there was any great necessity to pass the Bill on this day. But in point of fact, the present law would expire on the thirtieth of April next; and as the matter had been so much discussed, perhaps it would be convenient that the Council should pass the Bill at the present meeting. He would therefore apply to the President to suspend the Rules for the Conduct of Business.

His Excellency THE PRESIDENT declared the Rules suspended.

The Hon'ble MR. HOBHOUSE moved that the Bill be passed.

His Honour THE LIEUTENANT GOVERNOR did not propose to continue this debate. The papers were before hon'ble members, and they could judge whether the changes made in the Bill were as he asserted most radical and important, or as the Hon'ble Mr. Hobhouse said minute and unimportant. He only wished to explain that the Hon'ble Mr. Hobhouse was mistaken if he thought he (THE LIEUTENANT GOVERNOR) had sprung a mine upon him when he objected to this amendment. When the notice was given in so innocent a form, it did not attract his observation, but the hon'ble member having given a very unsatisfactory explanation, HIS HONOUR stated his objections. He had no objection now to the passing of the Bill.

The Motion was put and agreed to.

BURMA TIMBER DUTIES BILL.

The Hon'ble MR. HOBHOUSE also introduced the Bill to amend the law relating to timber floated down the rivers of British Burma, and moved that it be referred to a Select Committee with instructions to report in three weeks. When he had obtained leave to introduce this Bill, he had given an explanation

of the reasons for making some alteration in the existing law. It now only remained, in introducing it, to explain to the Council what the effect of the Bill was. The fact was that the law at present was governed by certain rules made under the Forest Act, which imposed duties on timber by the cubic measurement of the logs. Some difficulty was felt two or three years ago about the validity of those rules, and Act VII of 1869 was passed to give them the force of law. In that Act was given no power to alter the rules from time to time. It had been found more convenient and more just to the owners of timber to take an *ad valorem* duty than a duty assessed upon each log. In point of fact that course had been taken because it was found that the mode of assessment *ad valorem* was in favour of the tax-payer, so that they had assented willingly to that mode of valuation. It was better however to give the authority of law to all such arrangements, and therefore it was proposed that the Government should have power to levy a duty on all timber floated down the rivers either per log or *ad valorem*. A maximum was fixed to each method of levying the duty. At present the legal maximum was two rupees and twelve annas per log five feet in girth and upwards, and one rupee and six annas per log less than five feet in girth. That was the maximum fixed by the Bill. Then it was provided that, if the duty was levied *ad valorem*, it should not exceed eight rupees per cent. That was a round sum which nearly represented the average value of the duty levied. The exact amount was rupees 7·85. The Bill also re-enacted the power to make rules, and provided an indemnity-clause in case there possibly should have been any illegality in the mode now adopted of levying the duty. That was the substance of the Bill.

The Hon'ble MR. DALYELL said, if he was not out of order in making the application at the present stage of the Bill, he should like to ask that the correspondence with the Chief Commissioner of British Burma should be laid before the Council. As far as he could understand the present state of the law, certain rates of duty were leviable on timber floated down certain rivers; whereas the present Bill seemed to provide for the levy of duty on timber floating down all rivers in British Burma, and the maximum rate seemed also to be lower than the maximum under the present law. No doubt there were very good reasons for a change in the law, but before the Council was asked to alter the law he would suggest that those reasons should be laid before the Council.

HIS EXCELLENCY the President observed that all the papers on the subject would be laid before the Council.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE moved that the Bill be published in English and in Burmese in the *British Burma Gazette*.

The Motion was put and agreed to.

REGULATIONS AND ACTS LOCAL EXTENT BILL.

The Hon'ble MR. HOBHOUSE also presented the further report of the Select Committee on the Bill to consolidate and amend the law relating to the local extent of the general Regulations and Acts, and to the local limits of the jurisdiction of the High Courts and the Chief Controlling Revenue Authorities. It would be convenient, in presenting this report, to mention what stage the Bill had arrived at, because it was a long time since the Bill was introduced, and there had been some change in the law since that time. It was now rather more than three years since Mr. Cockerell first launched this measure. The immediate object of it was this. It was found that doubts existed, as to some districts in India, whether they had come within the pale of the general Regulations or not. The particular district which suggested this measure was Dehra Dún, which, since its annexation to the British Empire, had undergone several changes of law; and from the year 1827 onwards it was considered that it fell within the general Regulations, and for about forty years it was administered on that hypothesis. Then a case occurred in which a question was raised before the High Court, whether the general Regulations did or did not apply to the district; and after argu-

ment it was held that they did not. So this Council passed an Act for the purpose of declaring the law under which the district was. That Act did not deal with the whole district. It specified a portion, called Jaunsár Báwar, which was excepted from the general law, and as to the rest of the district it was declared subjected to the general law. The occurrence of that case drew attention to other cases in which the same sort of doubt might occur; and it was thought better to provide for the difficulty by a general enactment, to enable the Local Governments to ascertain and declare what was the law in force in each of those outlying districts as to which doubts existed, and to provide, in express terms, that, except as to those districts, the General Regulations should be held to apply to the whole of India. That was the Bill as introduced by Mr. Cockerell. In the same year 1870, an Act of Parliament was passed for the purpose of dealing with the outlying districts of India. It was well known to this Council that, from time to time, the General Regulations had been extended to various districts found not to be suited for them, and the local authorities applied to this Council for Acts which were to remove those districts beyond the pale of the law, and which were called by the somewhat long name of deregulationizing Acts. It was doubted by some legal authorities whether it was competent to this Council to pass such Acts. MR. HOBHOUSE could not say that he participated in those doubts; but doubts were felt by competent persons, and it was thought advisable to invoke the aid of Parliament. This led to the passing of the Statute 33 Vic., Cap. 3, which established a process for deregulationizing a district. It provided, first, for a declaration by the Secretary of State that the Act applied to the district in question. In the second place, the Local Government must submit a Regulation to the Government of India for the government of the particular outlawed district. That Regulation must be approved by the Government of India, and then it was subject to the same disallowances, first, by the Governor General, and afterwards by the Crown, as if it was a Bill passed through this Council. To a certain extent that Act affected the same subject-matter as the Bill with which we were at present dealing, because it provided for taking a district out of the pale of the Regulations, and a machinery for passing Regulations for that district. It was necessary to explain to the Council that this Bill did not provide any machinery for taking away law from any district whatever. But it did provide a machinery for ascertaining what law now applied to a district. It provided a machinery for fixing the boundaries of a district, and also a machinery for extending the general law to a district. In that respect only it trenched upon the same ground as the Act of 1870, and, as to that, he conceived there would be no doubt that it was right to have an easy mode of extending to a particular district a law found good for the rest of India. We all knew that, in particular Acts, it was of frequent occurrence to give the Executive Government power to extend the Act to places other than those to which it applied. This would be a general Act for the same purpose. The Committee had thought it necessary to explain that matter very fully in their Report, and he thought it necessary to draw the attention of the Council to that explanation, because an idea prevailed in some quarters that, when this Act was passed, a district might be removed from the pale of the general Regulations by means of a notification. He wished to explain that such was not the fact; and it was now proposed that the Bill should be sent to the Local Governments, calling their attention to the state of the law, and begging them to take care that the schedule of excepted districts should be very carefully expressed with reference to that condition of the law.

CALCUTTA CARGO-BOATS LICENSING BILL.

The Hon'ble MR. HOBHOUSE also moved for leave to introduce a Bill to amend the law relating to the grant of licenses to cargo-boats plying for hire within the port of Calcutta. The reason for introducing the Bill was this. The existing law required that cargo-boats should be registered by the Collector of Customs, whereas at present they were registered by the Commissioner of Police. It was desired by the Government of Bengal to combine the establishments employed on those duties, and for that purpose it was necessary to take away that function from the Collector of Customs. The Bill

could not be passed by the local legislature as it proposed to modify Act VI of 1863.

The Motion was put and agreed to.

VILLAGE POLICE (N.-W. P.) BILL.

The Hon'ble MR. INGLIS moved for leave to introduce a Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces. The present law relating to village-watchmen was contained in Regulation XX of 1817 and Act III of 1869. Regulation XX of 1817 prescribed the duties performed by these watchmen, but was defective, inasmuch as it provided no punishment for misconduct or neglect of duty by a chaukídár, save dismissal. Act III of 1869 made a chaukídár guilty of misconduct liable to the same punishment as the regular police enrolled under Act V of 1861. But that Act applied only to the chaukídárs appointed under it. It was therefore proposed to consolidate the two laws into one enactment which should be applicable to all village police of the North-Western Provinces; and to provide, as in section 10 of the amended Bill, that a village-watchman guilty of neglect of duty, or of certain specified offences, should be liable, on conviction before a Magistrate, to a small fine or imprisonment.

His Highness THE MAHÁRÁJÁ of VIZIANAGRAM quite approved of the principle of the Bill, that it was expedient to take advantage of the improvement in the mode of remunerating the village chaukídárs, to more strictly define their duties and liabilities. Hitherto, it had too often been the case that the village chaukídár, who ought to be the most useful instrument in the detection and suppression of crime in the rural districts, had, in the hands of unscrupulous persons, been the means of enabling crime to remain unpunished, and justice to be perverted. Any step tending to raise the position and consequent responsibility of the force was always very desirable; and, did the circumstances of the country allow it, he (THE MAHÁRÁJÁ) should gladly see it provided in this Bill that a plain knowledge of reading and writing should be an indispensable qualification for the appointment of village chaukídár. In the present state of general education it was, however, useless to propose such a standard.

Probably this was not the occasion to consider this Bill in detail, but he might be permitted to suggest that it would be well to declare the duty of the chaukídár with reference to stolen property found by him either on the thief or elsewhere, and that, amongst the things of which he should be required to give information, ought to be stated the keeping of arms without license.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to amend the law relating to timber floated down the rivers of British Burma—The Hon'ble Messrs. Ellis, Stewart, Bullen Smith and Dalyell and the Mover.

The Council then adjourned to Tuesday, the 11th March 1873.

CALCUTTA;
The 4th March 1873.

WHITLEY STOKES,

On the Western Jamná Canal the decrease is large, 18,320 acres. In the upper portion of the canal, it is owing to heavy rain and defective drainage having swamped much land and prevented cultivation. In the lower portions, to the rains being favourable, admitting not only of sowing without canal water, but falling at short intervals, it obviated the necessity of watering at all.

Delhi and Gurgáon Works and Inundation Canals.																	The decrease in the area irrigated from Inundation Canals is chiefly in the Derah Ghazi Khán District, which is watered by the Indus Canals, and is attributable to the failure of supply of the Dhingánah Canal, and to the breach in the Sháh Jamál Bund, which ruined the irrigation of the Sohan, Núr, Dhándi, Kutab and Kadrah Canals either wholly or in part. The river was on an average 2·20 feet below the preceding year.

The demand for water has been steady in all Divisions for wheat and sugar-cane, and there is every probability that the area irrigated will be up to the average.

Eastern Jumna Canal.—Executive Engineer makes no remarks.

Doon Canals.—Ditto ditto.

Rohilkhund Canals.—Executive Engineer makes no remarks, but the area already irrigated is far above the average.

Traffic.—As compared with the corresponding month of the season of 1871-72, this return shows generally an increase in the weight of goods carried by boats and a decrease in rafting operations; the latter is accounted for by a stoppage at the Jowallapore lock channel, and also by the precarious condition of the Jaoli lock.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 4th March 1873, and is hereby promulgated for general information :—

Act No. IX of 1873.

An Act to prolong the law relating to Appeals and Reviews of Judgment in the Panjáb.

Preamble.

Whereas the law relating to appeals and reviews of judgment in the Courts established in the Panjáb has been amended by an Act of which the second section provides that it shall continue in force to the thirtieth day of April 1873: And whereas it is expedient to repeal that Act and to re-enact it without prescribing any period for its continuance; It is hereby enacted as follows :—

Short title.

1. This Act may be called "The Panjáb Appeals Act, 1873:"

Extent.

It extends to the territories for the time being under the government of the Lieutenant Governor of the Panjáb;

Commencement.

And it shall come into force at once.

Repeal of Act VII of 1868.

2. Act No. VII of 1868 *(to amend the law relating to Appeals and Reviews of Judgment in the Panjáb)* is repealed.

Appeals when to lie.

3. An appeal shall lie from the decrees of the Courts of original and appellate jurisdiction to the Courts authorized under Act No. XIX of 1865 *(The Panjáb Courts' Act)* and Act No. IV of 1866 *(The Panjáb Chief Court Act)* to hear appeals, except where such decrees are by law declared final.

Code of Civil Procedure to apply to appeals.

4. All appeals falling within the jurisdiction of the Courts established in conformity with the said Acts shall, save as in the said Acts and in this Act is otherwise provided, be regulated by the Code of Civil Procedure.

Second regular appeals.

5. If the decision of a Deputy Commissioner or of a Commissioner passed in regular appeal reverse or modify the decision of the Court of original jurisdiction on a point material to the merits of the case, the Commissioner, where the decision shall have been passed on regular appeal by the Deputy Commissioner, and the Chief Court where the decision shall have been passed on regular appeal by the Commissioner, may receive a second appeal, if, on a perusal of the grounds of appeal and of copies of the judgments of the Courts below, a further consideration of the case appear to the Commissioner or the Chief Court (as the case may be) requisite for the ends of justice.

Time for presenting appeal.

6. The memorandum of appeal prepared in the form and containing the particulars mentioned in the Code of Civil Procedure, accompanied by copies of the judgments of the lower Courts, shall be presented in the Court empowered to hear the appeal within the period hereinafter specified, unless the appellant shows sufficient cause to the satisfaction of such Court for not having presented the memorandum of

appeal within such period, that is to say, within sixty days if the appeal lie to the Court of a Deputy Commissioner or Commissioner, and within ninety days if the appeal lie to the Chief Court.

The period shall be reckoned from and exclusive of the day on which the judgment and decree appealed against was pronounced and also exclusive of such time as may be requisite for obtaining a copy of the judgment and decree from which the appeal is made.

Confirmation of decision of lower Court.

7. When a memorandum of appeal, or an application for the admission of a special appeal, has been registered, the Appellate Court may, if it sees fit, after fixing a time for hearing the appellant or his pleader, and hearing him accordingly if he appears at such time, confirm the decision of the lower Court, without sending intimation of the appeal to such Court and without issuing notice to the respondent.

Chief Court may remove appeals.

8. The Chief Court of the Panjáb may, whenever it thinks proper to do so, either on the agreement of the parties to that effect or for purposes of justice, remove and try any appeal falling within the jurisdiction of any Court subject to its superintendence.

Review of judgment.

9. Any person considering himself aggrieved by a decree of a Court of original jurisdiction from which no appeal shall have been preferred to a superior Court,

or by a decree of a District or Divisional Court from which no regular or special appeal shall have been admitted by the Chief Court,

or by a decree of the Chief Court from which either no appeal may have been preferred to Her Majesty in Council, or, an appeal having been preferred, no proceedings in the suit have been transmitted to Her Majesty in Council;

and who, from the discovery of new matter or evidence which was not within his knowledge, or could not have been adduced by him, at the time when such decree was passed, or from any other good or sufficient reason, may be desirous of obtaining a review of the judgment passed against him,

may apply for a review of judgment by the Civil Court which passed the decree, or by any Court to which the business of the former Court has been transferred.

Judgments of Civil Courts subject to revision only as provided by Act.

10. Except as hereinbefore provided, the judgments of the Civil Courts established in conformity with the said Acts and with Act No. III of 1868 *(to authorize the Local Government of the Panjáb to invest any person with the powers of an Assistant Commissioner or Tahsildár)* shall not be subject to revision.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 19.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th March 1873, and was referred to a Select Committee with instructions to make their report thereon in three weeks:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, be published in English and in Burmese in the *British Burma Gazette*:—

No. 5 OF 1873.

A Bill to amend the law relating to Timber floated down the rivers of British Burma.

Preamble.

WHEREAS it is expedient to amend the law relating to timber floated down the rivers of British Burma;

It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Burma Timber Duties Act, 1873:"

Local extent.

It extends only to the territories under the administration of the Chief Commissioner of British Burma;

Commencement.

And it shall come into force on the passing thereof.

Duty on timber.

2. On all timber floated down any of the rivers of British Burma, a duty shall be levied, in such manner, at such places, and to such extent as the Chief Commissioner, with the previous sanction of the Governor General in Council, from time to time prescribes by notification in the *British Burma Gazette*.

Provided that, if the duty is directed to be levied on each log of the said timber, it shall not exceed two rupees twelve annas per log of five feet in girth and upwards, and one rupee six annas per log of less than five feet in girth.

Provided also, that if the duty is directed to be levied *ad valorem*, it shall not exceed eight per cent. on the value.

Power to fix value for assessment of duty.

3. In every case in which such duty is directed to be levied *ad valorem*, the Chief Commissioner may, with the like sanction, from time to time fix, by like notification, the value on which the duty shall be assessed.

Rules for timber floated.

4. The Chief Commissioner may from time to time, with the previous sanction of the Governor General in Council, make rules as to the time and manner of floating timber down any of the rivers of British Burma; and prescribe what descriptions of timber may lawfully be floated, and what descriptions of timber may not lawfully be floated, down any such river. And all timber found floating contrary to such rules may be confiscated.

Legalization of prior levy of duties.

5. All duties heretofore levied on timber floated down any of the said rivers, shall be deemed to have been levied in accordance with law.

Indemnity.

And all officers and other persons are hereby indemnified for anything done before the passing of this Act, which might lawfully have been done if this Act had been in force; and no suit or other proceeding shall be maintained against any such officer or other person in respect of anything so done.

Enactments repealed.

6. The enactments mentioned in the schedule hereto annexed are repealed to the extent mentioned in the third column of the said schedule.

SCHEDULE.

Number and year.	Title.	Extent of repeal.
Act XXX of 1854.	An Act to provide for the levy of Duties of Customs in the Arracan, Pegu, Martaban, and Tenasserim Provinces.	Sections one, seven, eight and twelve. Sections four and six, so far as they relate to timber floated down the rivers of British Burma.
Act IV of 1863.	An Act to give effect to certain provisions of a Treaty between His Excellency the Earl of Elgin and Kincardine, Viceroy and Governor General of India, and His Majesty the King of Burma.	The whole Act so far as it relates to duty on such timber.
Act VII of 1869.	An Act to give validity to certain Rules relating to Forests in British Burma. The Rules for the better management and preservation of the Government forests of British Burma, dated the 2nd August 1865.	The whole Act so far as it gives validity to rules relating to duty on such timber. So far as they relate to duty on such timber.

STATEMENT OF OBJECTS AND REASONS.

The primary object of this Bill is to authorize the levy of *ad valorem* duties on timber floated down the rivers of British Burma. The opportunity has been taken to consolidate the law on the subject of such timber, which law is now contained in three Acts, and in certain Rules legalized by Act VII of 1869.

A. HOBHOUSE.

CALCUTTA, *28th January* 1873.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th March 1873, and was referred to a Select Committee with instructions to make their report thereon in six weeks:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, and the Panjáb Municipal Act, 1873, be published in English, Marháthí and Hindí in the *Central Provinces Gazette*:—

No. 6 OF 1873.

A Bill to extend the Panjáb Municipal Act, 1873, to the Central Provinces.

Preamble.

FOR the purpose of extending the Panjáb Municipal Act, 1873, to the Central Provinces; It is hereby enacted as follows:—

Extension of Act IV of 1873 to Central Provinces.

1. The said Act shall extend to the Central Provinces, but subject to the following modifications, that is to say—

(*a.*) The title and preamble, section one, paragraph one, and section two, shall be read as if, after the word 'Panjáb,' the words "and Central Provinces" were inserted.

(*b.*) Section one, paragraph two, shall be read as if, for the words "under the government of the Lieutenant Governor of the Panjáb," the words "respectively under the government of the Lieutenant Governor of the Panjáb, and the administration of the Chief Commissioner of the Central Provinces," were substituted.

(*c.*) In sections four, five, six and seven, after the words "*Panjáb Gazette*" (wherever they occur), the words "or *Central Provinces Gazette*, as the case may be," shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

Under section 21 of the Panjáb Municipal Act (XV of 1867), that Act was at various times extended to several towns in the Central Provinces for five years from the date of each extension. Act IV of 1873, which replaces Act XV of 1867 in the Panjáb, has been made exclusively applicable to that Province, and thus there will soon be no Act under which municipal rates or taxes can be raised or expended in any town of the Central Provinces. It is therefore necessary to pass an Act to supply a fresh legal basis on which the action of Municipal Committees may rest. As the Panjáb Act of 1867 has hitherto served for the Central Provinces, and has been found to work well, it is considered best to extend to those Provinces the new Panjáb Act, which is a modification of the former one.

CALCUTTA, *26th February* 1873.

A. HOBHOUSE.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th March 1873, and was referred to a Select Committee with instructions to make their report thereon in a fortnight:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, be published in English, Urdú and Hindí in the *North-Western Provinces Gazette*:—

No. 7 OF 1873.

A Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces.

Preamble.

WHEREAS it is expedient to consolidate and amend the law relating to the Village Police in the North-Western Provinces; It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Village Police (North-Western Provinces) Act, 1873:"

It extends only to the territories under the government of the Lieutenant Governor of the North-Western Provinces;

Local extent.

And it shall come into force on the passing thereof.

Commencement.

2. So much of section twenty-one of Bengal Regulation XX of 1817 as relates to the Village Watchmen of the North-Western Provinces, and sections eighteen, nineteen and twenty of Act No. III of 1869, are hereby repealed.

Repeal of enactments.

3. The nomination to the post of Village Policeman shall be made by the zamíndár of the village, or, where there are more zamíndárs than one by the lambardár as their representative, and where there are more lambardárs than one, the opinion of the majority (unless there is some special provision to the contrary in the village administration paper) shall prevail.

Right of nomination of Village Policemen.

4. Every person authorized to nominate a person to the office of Village Policeman shall, within fifteen days after the occurrence of a vacancy in the office, nominate a proper person to the vacant post, and communicate the nomination to the Magistrate of the District.

Obligation to nominate.

5. The person so nominated shall, after due enquiry into his age, character and ability, be appointed or rejected by such Magistrate at his discretion, or by some officer authorized in that behalf.

Discretion to appoint or reject nominee.

6—(*a*.) In default of such nomination within the said fifteen days, the Magistrate of the District shall appoint such person as he thinks fit to the vacancy.

Power to Magistrate to appoint.

(*b*.) If the nomination has been made within the said fifteen days, but the nominee is rejected, the person authorized to nominate a person to the office of Village Policeman, shall within fifteen days from the date of such rejection, nominate another person to the vacant post; and in default of such nomination, or if such nomination has been made, but the nominee is again rejected, the Magistrate of the District shall appoint such person as he thinks fit to the vacancy.

Procedure in case of rejection of nominee.

7. Every Village Policeman shall perform the following duties:—

Duties of Village Policemen.

(*a*). He shall give immediate information to the officer in charge of the police-station within the jurisdiction of which the village is situate, of every unnatural, suspicious, or sudden death occurring in the village of which he is Chaukídár;

of each of the following offences occurring in such village (that is to say)

murder, culpable homicide, rape, dacoity, theft, mischief by fire, house-breaking, counterfeiting coin, causing grievous hurt, riot,

and all attempts and preparations to commit, and abetments of, the said offences.

(*b*.) He shall keep the Police informed of all disputes which are likely to lead to any riot or serious affray.

(*c*.) He shall arrest all proclaimed offenders, and all persons whom he may find in the act of committing any offence specified in clause (*a*) of this section.

(*d*.) He shall observe, and from time to time report to the officer in charge of the police-station within the jurisdiction of which the village may be situate, the movements of all bad characters in such village.

(*e*.) He shall report to the officer in charge of such police-station the arrival of suspicious characters in the neighbourhood.

(*f*.) He shall supply any local information which a Magistrate or any officer of police may require, and shall promptly execute all orders egally issued to him by competent authority.

8. Whenever a Village Policeman arrests any person, he shall forthwith take him to the police-station within the jurisdiction of which his village is situate; provided that, if the arrest is made at night, such person shall be so taken, as soon as possible, on the following morning.

Procedure on arrest by Village Policeman.

9. The Magistrate of the District may dismiss any Village Policeman for any misconduct or neglect of duty.

Dismissal of Village Policeman.

10. Every Village Policeman guilty of any wilful misconduct in his office or of neglect of duty, such misconduct or neglect not being an offence within the meaning of the Indian Penal Code;

Acts punishable.

or withdrawing from the duties of his office without permission, or without having given previous notice for a period of two months;

or guilty of cowardice,

or offering any unwarrantable personal violence to any person in his custody;

or violating any of the rules that may under section eleven be framed by the Local Government in pursuance of this Act,

shall be liable, on conviction before a Magistrate, to a penalty not exceeding three months' pay, or to imprisonment for a period not exceeding three months, or to both.

Penalty.

11. The Local Government may from time to time frame further rules for the discipline of the Village Police, and for carrying out generally the purposes of this Act, and breach of such rules shall be punishable as an offence under this Act.

Rules under Act.

12. All fines levied under this Act on Village Policemen shall be credited to the Chaukídárí Fund of the District in which they are employed.

Fines to be credited to Chaukídárí Fund.

STATEMENT OF OBJECTS AND REASONS.

The only two laws at present in force for the appointment of village-watchmen, for the definition of their duties, and for enforcing penalties for neglect thereof, are section 21, Regulation XX of 1817, and sections 18, 19 and 20 of Act III of 1869.

The provisions of the latter Act are of special and not of general application, being applicable only to watchmen appointed under that Act. Those of the former, however good, are not of themselves sufficient. But the two combined, with certain alterations and additions, give excellent materials for one consolidated Act on the subject.

So long as the village-watchmen of these Provinces were remunerated by the small pittance in money, grain, or land, which they formerly received, it was hard to expect much of them, or to subject them to a severer penalty for neglect of duty than that prescribed by Regulation XX of 1817, namely, dismissal from their posts. But now that these men have been put on a regular footing, and receive fixed monthly salaries, it seems proper that they should, as regards their appointment, discipline, and general management, be subjected to rules similar to those adopted for village-watchmen, paid under Act III of 1869, while such portions of the old law, Regulation XX of 1817, as defined correctly their present duties and responsibilities, should be re-enacted. The present Bill has been framed with the above views.

CALCUTTA, 23rd *February* 1873. } J. F. D. INGLIS.

WHITLEY STOKES,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF AGRICULTURE, REVENUE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE FORTNIGHT ENDING THE 13th MARCH 1873.

GENERAL REMARKS.—Rain or hail has fallen generally in Bengal, the North-Western Provinces, Oudh and parts of the Central Provinces. In Oudh the hail has done much harm to the standing crops, and in Bengal, the Central Provinces, and Indor has somewhat damaged opium. In the North-Western Provinces a good average crop is expected. Rain is wanted in the Panjab, and in some places the crops are suffering in consequence. In other provinces there is hardly any change to report; the winter crops are being, or have been, reaped, and the result is generally satisfactory.

The reports of the public health in Madras are unfavourable. Sickness is prevalent, and in Calicut small-pox of a virulent type is epidemic.

Presidency or Province.	District.	Date of District Report.	Rainfall for fortnight preceding.	Date of report from Local Government or Administration.	State of Agricultural prospects.	Remarks of Local Government or Administration.
MADRAS ...	Krishna ...	March 12 ...	*Nil.*	March 13 ...	Water-supply fair; later dry crops suffering from grub; prices falling; markets well supplied; small-pox and fever slight.	General prospects satisfactory, except diseases prevalent.
	Karnul ...	" 12 ...	"	" 13 ...	Crops generally diseased; markets tolerably supplied; prices continue high; fever prevalent; small-pox occasional.	
	Nagapatam ...	" 12 ...	"	" 13 ...	Rivers low; no supply to tanks; crops good order; harvest fair; markets well supplied; prices tending to rise; cholera occasional.	
	Trichinapali ...	" 12 ...	"	" 13 ...	Water-supply sufficient; crops good order; harvest fair; markets well supplied; prices steady; small-pox and dengue in some places.	
	Calicut ...	" 11 ...	"	" 13 ...	Second crop harvested; markets well supplied; prices almost steady; small-pox of a virulent type epidemic.	

Presidency or Province.	District.	Date of District Report.	Rainfall for fortnight proceeding.	Date of report from Local Government or Administration.	State of Agricultural prospects.	Remarks of Local Government or Administration.
	Sind.					
	Karachi ...	March 12 ...	...	March 13 ...	Rabi crops very good; wheat 11·19 sers; rice 7·46 sers.	
	Haidarabad ...	" 12 ...	...	" 13 ...	Weather cool and favorable for rabi; crop excellent; reaping of oil seeds commenced; districts healthy; Indus very low; trade dull; prices same.	
	Gujrat.					
	Ahmadabad ...	" 12 ...	...	" 13 ...	All well; wheat 12·8; bajri 18·4.	
	Kaira ...	" 12 ...	...	" 13 ...	Late crops good and being reaped; bajri 16·5; rice 8·7.	
	Bharoch ...	" 12 ...	...	" 13 ...	Reaping almost completed; bajri 19 sers.	
	Surat ...	" 12 ...	...	" 13 ...	Winter crops being reaped; wheat 10 5 sers.

RESOLUTION.—The Governor General in Council has read these papers with the interest and attention due to the importance of the subjects discussed.

2. His Excellency in Council cordially acknowledges the intelligence, ability, and moderation with which the several Governments, and the officers consulted by them, have answered the questions asked by the Supreme Government. In respect to the policy and effect of particular measures there is, as might be expected, much difference of opinion ; but an anxious desire for the prosperity of India and the well-being of the people is evinced by all those whose opinions have been recorded.

3. It is not the object of the Governor General in Council to declare, in this Resolution, the policy of the Government of India upon questions of imperial taxation or general finance. For the present, His Excellency in Council will only say that the evidence contained in these papers as to the feelings of the people of India upon those subjects has been carefully considered. It is only with questions relating to local taxation, and with those essentially of local interest and importance, that His Excellency in Council now proposes to deal.

4. The recent policy of the Government of India with respect to provincial services and local taxation is based upon the Financial Resolution No. 3334, dated the 14th December 1870.

That Resolution was one of great importance. It initiated a policy which was adopted after mature deliberation, in the well-grounded belief that practical effect would be given to a course of action which, to use the words of the late

Earl of Mayo, had been contemplated for a lengthened period by some of the "wisest and most experienced of Indian Statesmen."

5. One of the main objects of the Resolution was to enlarge the powers and responsibility of the Local Governments in respect to certain branches of expenditure, and so to prevent friction between the Supreme and Local Governments, and give to the latter a direct interest in economy.

A remarkable unanimity of opinion is expressed in the papers which are now under consideration that, in this respect, the measures which were then adopted have proved successful. Various suggestions have been made by the several Local Governments upon the subject of the assignments made from imperial revenues for provincial services. For the present, the Governor General in Council is unable to say more than that the Government of India will give due consideration to the argument that, in order completely to develope the policy of 1870, it is desirable to give the Local Governments a substantial interest in some of the sources of revenue which are under their administration.

6. The Resolution of 1870 also contemplated that the expenditure upon the services entrusted to the control of the Local Governments should, if it could not be met out of the provincial assignments, be provided by local taxation. The views of the Government of India were thus expressed:—

"It would have been satisfactory had His Excellency in Council been able to propose the enlargement of the power and responsibility of Local Governments without charging upon local resources any part of the existing imperial expenditure. This cannot be done. But it has been determined to make as small a demand on these resources as possible."

7. Several measures for the levy of local rates and taxes have passed into law during the last two years; some immediately consequent upon the Resolution and others which had been initiated before the Resolution was issued. The remarks and criticisms upon these measures which are contained in the papers now under consideration may be classed under two heads, namely, *first*, the general principles involved in the policy of the Government, *secondly*, the manner in which that policy has been carried into effect in different parts of India.

8. The only objection that has been raised to the general principles of this policy is contained in the opinion which some officers have expressed either that the Government is, or that it is thought by the people to be, chargeable with a breach of faith, if it imposes local rates or cesses upon the land during the currency of a settlement, whether permanent or temporary. The allegation is prominently made by several of the officers connected with the administration of Oudh in respect to the operation of the Oudh Local Rates Act (XVII of 1871).

9. This objection to the operation of the law and to the policy of the Government is based upon the assumption that a settlement of the land revenue exempts the proprietor or farmer from any taxation of the profits that he may derive from the land. It is obvious that this assumption, if correct, would render impracticable any scheme of local rating. The questions, *first*, whether the objection is just in itself, and, *second*, whether, even though arising from misapprehension, it ought nevertheless to be respected, have repeatedly occupied the anxious attention of the Government of India and of Her Majesty's Government in England, and the decision of Her Majesty's Government was eventually given in the following words:—

Despatch No. 5 of 12th May 1870, para. 17.

"Her Majesty's Government have now to intimate to your Excellency the conclusion to which they have come, after a careful consideration of a controversy which has now been going on for a long course of years. This conclusion is, that rating for local expenditure is to be regarded, as it has hitherto been regarded in all the provinces of the Empire, as taxation separate and distinct from the ordinary land revenue; that the levying of such rates upon the holders of land, irrespective of the amount of their land assessment, involves no breach of faith on the part of the Government, whether as regards holders of permanent or of temporary tenures; and that, where such rates are levied at all, they ought, as far as may be possible, to be levied equally, without distinction and without exemption, upon all the holders of property accessible to the rate."

10. This decision was the result of the most careful consideration of all the arguments which could be urged upon either side; and His Excellency in Council wishes it to be distinctly understood that there is no intention on the part of the Government of India to depart from the principle which has thus been so recently and so deliberately enunciated.

Notwithstanding any discontent which may for the present exist in some districts with reference to the levy of local rates, His Excellency believes that the results of the policy of meeting local wants from local resour-

ces, which was affirmed by the Financial Resolution of 1870, cannot fail to be, in the end, beneficial to the people of India.

11. The Governor General in Council therefore confidently expects that the civil officers will use all proper efforts to remove any impression which may be found to prevail in any part of India, to the effect that the Government has proceeded without due remembrance of its obligations, or adopted any measure that can justly be construed as a breach of faith. The endeavours of all officers should be exerted to enlist the services of the people in carrying out the necessary local improvements for which Local Rates have been imposed, and the Governor General in Council does not doubt that the people will acquiesce with loyalty and intelligence.

Whilst, however, the Governor General in Council is resolved to carry out the general policy which is above recited, His Excellency is glad of the opportunity which has been afforded him of declaring that no further increase of local taxation is now required.

12. It remains to consider the objections which have been raised to the manner in which the policy has been carried into effect in the several Provinces of India, and to make some observations upon the questions of local interest and importance upon which opinions have been expressed. Each Province will be dealt with separately.

13. BRITISH BURMAH.—The reports of the local officers are very creditable, especially the report of Major Duncan, Inspector General of Police, who has brought much experience and intelligence to bear upon the subject The Statistical Returns, however, are incomplete and in some respects inaccurate, and must be returned for revision.

The Government has been able to make a special addition of £45,000 to the imperial assignment of 1872-73 for provincial services in British Burmah. This will enable the Chief Commissioner to carry out some of the improvements most urgently needed.

The Government of India observes that the Chief Commissioner rightly challenged the remarks made by the Deputy Commissioner of Shwegyeen, upon the subject of the effect of the excise duty on spirits and drugs. So far as the Government of India is informed, the remarks of the Deputy Commissioner are not applicable to the present administration of the excise department. The Chief Commissioner is well aware that it is by no means the desire of the Government of India to promote the use of spirits and drugs among the people of Burmah, or that the department should be administered exclusively, or chiefly, in the supposed interests of the revenue.

14. BENGAL.—Thanks are due to the Hon'ble the Lieutenant-Governor for the able and comprehensive manner in which he has discussed the questions which were referred for his opinion. The accounts and returns appear to be well and carefully prepared.

The Bengal Municipalities Bill not having become law, the Governor General in Council considers it unnecessary to comment upon the remarks made by the officers consulted by the Government of Bengal regarding the feelings of the people in anticipation of the introduction of that measure.

His Excellency in Council is not prepared to accept the conclusions drawn from certain statistics quoted in the fourth paragraph of the letter from the Government of Bengal, as to the comparative incidence of municipal taxation in Bengal and in other parts of India. Apart from the Presidency town, the urban population of Bengal forms a smaller proportion of the whole population than elsewhere, and it remains to be proved that those who pay municipal taxes are less heavily taxed in Bengal than in other Provinces.

In regard to the Road Cess Act, the Governor General in Council desires to repeat that this measure has been deliberately adopted, after prolonged and careful consideration, with the full approval of Her Majesty's Government. It is important that all concerned should understand that the decision of the Government to levy this cess is final.

The Government of India is still in communication with the Government of Bengal regarding the practical working of the measure. The Governor General in Council will carefully watch its operation, in communication with the Hon'ble the Lieutenant-Governor, whose anxious desire it is to protect the cultivating ryots from all undue or illegal exactions in connection with the cess, and to ensure the expenditure of the proceeds of the cess on local objects, so that the purposes of the cess and the results of the expenditure may be brought within the immediate cognizance of the tax-payers. If the local character of the

cess be carefully preserved, the Governor General in Council joins with the Lieutenant-Governor in the hope that, although its first imposition may be unpopular, the road cess will, before long, "settle down into one of the recognized institutions of the country."

15. NORTH-WESTERN PROVINCES.—The Governor General in Council acknowledges the care and intelligence manifested in the reports of the local officers. Due attention is given by the Government of India to the statement that, "as soon as financial considerations will admit, the Lieutenant-Governor would be glad to see the export duty on sugar crossing the frontier line taken off."

16. THE PUNJAB.—The questions addressed to the officers consulted were well calculated to elicit their opinions in a systematic and practical form. But the statistical returns are incomplete and, in some respects, inaccurate; they must be returned for revision. In respect to municipal taxation, and especially the municipal house-tax, the Government of India await the submission of the rules which the Lieutenant-Governor proposes to make under the Punjab Municipalities Act (IV of 1873).

It is obvious that great care is required in watching the incidence of the octroi levied for municipal purposes, in order to prevent its becoming a transit duty.

17. OUDH.—The Governor General in Council has already adverted to the alleged dissatisfaction of some of the landholders at the imposition of the cess under the Oudh Local Rates Act. The local officers have done their duty in bringing the allegation to notice on this occasion. General Barrow enjoyed the entire confidence of the Oudh talookdars, and it is believed that those who assented to the proposals made through him did so unreservedly. The policy of the Government having been, once more, fully set forth, the Governor General in Council trusts that the Chief Commissioner and the officers of the Oudh Commission will take every means to explain the advantages of the measure, and that they will encourage no expectation that this slight and necessary addition to the taxation of the Province will be remitted.

18. CENTRAL PROVINCES.—The Governor General in Council desires especially to acknowledge the ability manifested in the elaborate despatch of the Chief Commissioner, Mr. Morris, and in the reports of the three Commissioners, Messrs. W. G. Pedder, W. B. Jones, and C. Grant.

The Government of India desires to know whether the Chief Commissioner would recommend a modification of the Pándhari tax by exempting some of the lower classes of the tax-payers, and, if so, what change he would propose, and what the financial effect would be.

The Government of India bears in mind the expediency of abridging the extent of the inland customs line, so far as may be possible. But this can only be done upon a consideration of the whole policy of the Government in regard to the salt tax, with which the Governor General in Council is not dealing in this Resolution.

19. MADRAS.—In the papers submitted by the Government of Madras, the Governor General in Council observes the general expression of opinion against the house-tax imposed by Act IV of 1871 (M. C.), and would enquire what course the Government of Madras intends to take respecting the levy of this tax, and whether there is any intention of modifying the Act.

20. BOMBAY.—The minute by His Excellency the Governor of Bombay, dated the 3rd November, sums up succinctly the general result of the opinions collected by the Government of Bombay, and shows a careful appreciation of the circumstances of that Presidency.

The Governor General in Council desires to acknowledge the decision shown by the Government of Bombay in suspending the levy of the non-agricultural cess as soon as it was found that this resource could be spared. The Governor General in Council has subsequently learnt with much satisfaction, from a letter from the Chief Secretary to the Government of Bombay, No. 816-35F, dated 22nd February, that it is not the intention of the Government of Bombay to levy the cess during the coming financial year, and that Act No. I of 1871 (Bo. C.) is also to be held in abeyance.

In thus relieving the people from burdens no longer necessary, the Government of Bombay will receive the entire support of the Supreme Government. The Governor General in Council agrees with His Excellency the Governor in thinking that the Act for the levy of the non-agricultural cess should now be repealed.

The Governor General in Council also concurs with His Excellency in the opinion that it is of the utmost importance that local funds should be expended in, and for the benefit of, the localities in which they are raised. The Government of Bombay may expect the cordial approval of the Government of India in carrying this policy into effect, and the Governor General in Council awaits with interest the report of whatever action may be taken for this end.

The Governor General in Council has noticed the very high incidence of the Octroi duty in the towns of Surat, Broach, and Kurrachee, and would wish for some explanation. There seems some reason to fear that the duty may be imposed in these towns upon articles not consumed within their limits.

21. It is observed that the receipts of some of the Local Governments in 1871-72 greatly exceeded their expenditure. The Governor General in Council believes that this may have been mainly due to the uncertainty attending the introduction of the new system, and that the funds at the disposal of these Governments may not be found, in future, to be in excess of their normal requirements. But His Excellency in Council desires to direct attention to the following instructions contained in the despatch of the Secretary of State (No. 59, dated 23rd February 1871, paragraphs 10 and 11), by which the approval of Her Majesty's Government was given to the system of fixed assignments for provincial services.

"The great objects to be kept in view are to secure the greatest degree of economy consistent with efficiency; to provide for the growing demands arising out of improved administration without materially increasing the burdens of the people; and, as far as possible, to secure the general concurrence of the local communities in the measures taken on their behalf.

"When devising measures of improvement, it should be the earnest endeavour of each Local Government to provide the funds required for them by the exercise of strict economy in the general expenditure, and additional taxation should only be resorted to in cases of undoubted necessity, and when the income otherwise available is clearly insufficient."

22. Lastly, the Governor General in Council is obliged to express disappointment that in these papers so few suggestions are made which are likely to lead to reduction of expenditure. His Excellency in Council is confident that this is not owing to any want of willingness on the part of the officers of the Government to promote economy in the administration, wherever possible; and the subject is commended afresh to the anxious consideration of every Local Government and every influential public officer.

ORDERED, that a copy of the reports, together with a copy of this Resolution, be communicated to each Local Government; also that copies be forwarded to the Legislative Department, in order that a copy may be circulated to each Member of the Legislative Council of the Governor General; also that the Resolution be published in the *Gazette of India*.

LEAVE AND ALLOWANCES.

The 20th March 1873.

No. 1904.—The Governor General in Council is pleased to notify that retrospective effect is not to be given to the revised rules for privilege leave, published in Notification by the Government of India in the Financial Department, No. 978, dated 10th February 1873.

In calculating the amount of privilege leave due to an officer for service performed partly before the 10th February 1873 and partly after that date, all privilege leave due for service before the 10th February, and all such service counting towards privilege leave, are to be reckoned according to the old rules, and added to any privilege leave or service accrued or performed after the 10th February 1873.

MINT AND CURRENCY.

The 21st March 1873.

No. 1871.—Mr. H. A. Mangles is appointed to officiate as Head Commissioner of the Department of Issue of Government Paper Currency.

PENSIONS AND GRATUITIES.

The 21st March 1873.

No. 1893.—The Governor General in Council directs that the following paragraph be added to Rule 2 under section 49 of the Civil Pension Code :—

The certificate in regard to candidates in India will be in the following form :—

I do hereby certify that I have examined _____, *a candidate for employment in the* _____ *Department, and find that he has no disease, constitutional affection or bodily infirmity unfitting him, or likely to unfit him, for the public service in any part of India.*

_____ 187 .

Surgeon,
&c., &c.

R. B. CHAPMAN,
Secretary to the Govt. of India.

MILITARY DEPARTMENT.

Major George Ayton Craster, of the Royal Engineers, Superintending Engineer, 1st Circle, Provincial Works, Department Public Works, North-Western Provinces,—for two years, under the Regulations of 1868.

Surgeon John Berry White, of the Medical Department, in medical charge of the 42nd (Assam) Regiment of Native (Light) Infantry,—for two years, under the Regulations of 1868.

Captain Charles Simeon Noble, of the Bengal Staff Corps, Assistant Commissioner, 3rd Grade, Oude, and Officiating Deputy Commissioner, Baraich,—for two years under the Regulations of 1868, embarking at Bombay.

No. 304 *of* 1873.—The services of Surgeon J. C. Morice, of the Medical Department, in medical charge of the 16th Bengal Cavalry, are placed temporarily at the disposal of the Government of the Punjab.

No. 305 *of* 1873.—His Excellency the Governor General in Council is pleased to make the following appointment :—

Calcutta Volunteer Lancers.

Lieutenant Colonel (Brevet Colonel) Montague James Turnbull, of the Bengal Staff Corps, to be Major during the absence on furlough to Europe of Major L. Conway-Gordon, or until further orders.

No. 306 *of* 1873.—The services of Lieutenant St. G. C. Gore, of the Royal Engineers (Imperial Establishment), are placed at the disposal of the Department of Agriculture, Revenue, and Commerce.

No. 307 *of* 1873.—His Excellency the Governor General in Council is pleased to make the following appointment, subject to the Officer passing an examination in drill:

East Indian Railway Volunteer Rifle Corps.

Mr. John Hudson to be Ensign from the 12th March 1873, to complete the establishment.

No. 308 *of* 1873.—The undermentioned Officers have been permitted to proceed to Europe on furlough on private affairs :—

Lieutenant Colonel (Brevet Colonel) Henry Mills, of the Bengal Staff Corps; Deputy Assistant Commissary General, 2nd Class,—for two years under the Regulations of 1868, embarking at Bombay.

Captain John Henry Baldwin, of the Bengal Staff Corps, Quarter Master, 39th (The Allygurh) Regiment of Native Infantry,—for two years under the Regulations of 1868, embarking at Bombay.

Captain Sullivan Edward Becher, of the General List Infantry, Adjutant, 2nd Goorkha (The Sirmoor Rifle) Regiment,—for two years under the Regulations of 1868, embarking at Bombay.

Captain Edward Augustus Pemberton, of the General List Infantry, Assistant Commissioner, 3rd Class, and Officiating 1st Class, Nimar, Central Provinces,—for 20 months under the Regulations of 1868, embarking at Bombay.

Captain George William Holdsworth, of the late 3rd European Regiment, 1st Wing Subaltern, 1st Regiment of Native Infantry,—for 20 months under the Regulations of 1868, embarking at Bombay.

This cancels the furlough granted to Captain G. W. Holdsworth in G. G. O. No. 273 of 1873.

No. 309 *of* 1873.—The services of the under-mentioned Officers of the Royal Engineers (Imperial Establishment) are placed at the disposal of the Public Works Department :—

Lieutenants N. Arnott, R. deVillamil and E. H. Cameron.

No. 310 *of* 1873.—The under-mentioned Officers of the Royal Engineers, who have been placed under orders for duty in the Bengal Presidency, reported their arrival on the dates specified :—

Lieutenant F. B. G. D'Aguilar,—date of arrival at Bombay, 9th March 1873.

Lieutenant A. Hildebrand,—date of arrival at Bombay, 9th March 1873.

No. 311 *of* 1873.—The under-mentioned Officer is promoted to the rank of Colonel by Brevet, from the date specified, under the operation of Clause 8 of the Royal Warrant of the 31st January 1859, subject to Her Majesty's approval :—

Lieutenant Colonel Edmund Antoine Henry Bacon, Bombay Staff Corps,—3rd December 1872.

No. 312 *of* 1873.—The under-mentioned Officer is promoted to the rank of Colonel by Brevet, from the date specified, under the operation of Clause 13 of the Royal Warrant of the 21st December 1871 :—

Lieutenant Colonel Francis Edward Francis, Bombay Infantry,—30th January 1873.

The 21*st March* 1873.

No. 313 *of* 1873.—The following promotions are made in the under-mentioned corps of the Native Army :—

16*th* (*The Lucknow*) *Regiment of Native Infantry.*

Jemadar Joseph Letts to be Subadar, *vice* Monohur Sing, deceased.
Havildar Shekh Chaund to be Jemadar, *vice* Joseph Letts, promoted.

The above promotions will have effect from the 10th December 1872.

15*th Bengal* (*Cureton's Mooltanee*) *Cavalry.*

Kote Duffadar Yar Mahomed Khan to be Jemadar, from the 4th December 1872, *vice* Mustafah Khan, deceased.

No. 314 *of* 1873.—The under-mentioned Officer has been allowed furlough to Europe on medical certificate :—

Lieutenant Francis Charles Burton, of the Bengal Staff Corps, 1st Squadron Subaltern, 1st Bengal Cavalry,—for 2 years under the Regulations of 1868, embarking at Bombay.

No. 315 *of* 1873.—The G. G. O. No. 240 of the 7th March 1872, admitting Sub-Conductor James Judge, of the Army Commissariat Department, to pension, is hereby cancelled.

No. 316 *of* 1873.—In continuation of G. G. O. Nos. 807 and 1092 of 1872, the Right Hon'ble the Governor General in Council is pleased to sanction the introduction of the credit note system as therein prescribed, for the payment of charges for the carriage of troops, stores, &c., on the Oude and Rohilcund, and Scinde, Punjab and Delhi Railways from the 1st April 1873.

The form of the credit notes is to be the same as that given in the above Government General Order for the East Indian Railway. The credit notes of the Oude and Rohilcund Railway are to be payable at Lucknow, and those of the Scinde, Punjab and Delhi Railway are to be payable at Lahore, if issued in the Bengal Presidency, and at Kurrachee, if issued in the Bombay Presidency.

No. 317 *of* 1873.—Native Farrier Kullun, lately attached to the 9th Bengal Cavalry, is specially admitted to the pension of his rank from the date he may have been struck off the strength of that Regiment.

The stipend will be disbursed in the North-Western Provinces Circle of pension payment.

No. 318 *of* 1873.—The under-mentioned Officers have reported their departure for Europe. on the date specified :—

Lieutenant Colonel T. Taylor, of the Bengal Staff Corps, G. G. O. No. 84 of 1873; Major C. J. Hughes, of the Bengal Staff Corps, G. G. O. No. 44 of 1873; and Major W. F. Shaw, of the Bengal Staff Corps, G. G. O. No. 256 of 1873, *Mirzapore*, 14th March 1873.

No. 319 *of* 1873.—Deputy Inspector General of Hospitals E. B. Tuson, appointed to the Bengal Presidency, having reported his arrival from England on the 1st March 1873 at Bombay, is brought on the strength of the administrative staff of the British Medical Service in Bengal, *vice* Deputy Inspector General of Hospitals J. G. Inglis, M. D., C. B., transferred to the Meerut Circle of Medical Superintendence.

Surgeon Major G. Auchinleck, M. D., will, on being relieved by Dr. Tuson of the Medical Superintendence of the Allahabad Circle, revert to regimental duty.

No. 320 *of* 1873.—The following Extracts from the *London Gazette* of the 31st January 1873, 7th, 11th and 18th February 1873, pages 423, 518, 587, 588 and 684, are published for general information :—

"*London Gazette*" *of the* 31*st January* 1873, *page* 423.

WAR OFFICE, PALL MALL,
31*st January* 1873.

Secy. to the Govt. of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENT.

Fort William, the 15th March 1873.

No. 181.—Mr. A. B. Byrne, Assistant Engineer, 1st Grade, Hyderabad, is allowed leave to Europe on medical certificate for two years under Section III, Supplement F, of the Civil Leave Code, with effect from 21st February 1873.

No. 182.—Mr. W. B. Farr, Examiner of Guaranteed Railway Accounts to the Government of India at Lahore, is granted six months' leave on private affairs under Section V, Supplement F, of the Civil Leave Code, also preparatory leave for one month under Section X, from the 12th April next, or from such date as he may avail himself of it.

The 17th March 1873.

No. 183.—The following persons are appointed temporarily to the Public Works Department in the grades specified, and posted to the Indus Valley (State) Railway :—

Mr. E. Behrmann, as Sub-Engineer, 3rd Grade, with effect from 26th January 1873.
Mr. J. Mackenzie, as Supervisor, 2nd Grade, with effect from 13th February 1873.
Mr. A. A. Ramsay, as Overseer, 2nd Grade, with effect from 1st January 1873.

The 18th March 1873.

No. 185.—Mr. S. Brock, Controller of Public Works Accounts, Madras, is allowed two years' furlough to Europe on medical certificate under Section III of Supplement F of the Civil Leave Code, with effect from 15th April next or such date as he may avail himself of it.

Mr. T. Moss, Assistant Accountant General, Public Works Department, is appointed to officiate as Controller, Public Works Accounts at Madras, with the rank of Controller, 2nd Class, 1st Grade, *vice* Mr. Brock.

Mr. W. R. Newman, Deputy Controller, is appointed to officiate as Assistant Accountant General, Public Works Department, with the rank of Controller, 2nd Class, 4th Grade, *vice* Mr. Moss.

Captain A. J. Filgate, R. E., Deputy Accountant General, Public Works Department, and *ex-officio* Under Secretary to the Government of India, in the Public Works Department, with the rank of Controller, 2nd Class, 1st Grade, will hold the officiating rank of Controller, 1st Class, from date of Mr. Brock's departure.

No. 186.—Baboo Radhica Pershad Mookerjee, Assistant Engineer, 1st Grade, is transferred from the Military Works Branch to Bengal.

No. 187.—Mr. P. deL. Lennox, Assistant Engineer, 1st Grade, Indus Valley Railway, is reduced to the rank of Assistant Engineer, 2nd Grade.

No. 188.—Captain C. A. Sim, R. E., Executive Engineer, 2nd Grade, Military Works Branch, is granted one month's preparatory leave from the date on which he may avail himself of it.

The 19th March 1873.

No. 189.—Mr. J. M. Hardy, temporary Overseer, 1st Grade, attached to His Highness the Nizam's (State) Railway, is permitted to resign his appointment in the Public Works Department.

No. 190.—The following Prospectus of the Military Engineer Class of the Thomason Civil Engineering College for 1873, is published for general information :—

(*Notifications by the Governor General in Council, No.* 585 *of* 24*th September* 1852, *No.* 668 *of* 22*nd June* 1860, *and No.* 84 *of* 5*th May* 1871, *G. O. C. C.,* 12*th November* 1853, 1*st February* 1855, *and No.* 206 *of* 5*th August* 1872.)

European Commissioned Officers of the Army, under the rank of Captain, are permitted to study at the Thomason College at Roorkee, on the following terms:—

1. The candidate for admission must be well acquainted with his military duties as certified by his Commanding Officer, and must be of such standing as will, at the close of his college course, render him eligible for employment in the Public Works Department.

2. His application is to be addressed through the Commanding Officer to the Principal of the College, who will arrange for the examination of the candidate, and in the event of his passing will forward his application for the approval of His Excellency the Commander-in-Chief.

3. The test of admission to the College will be by an examination in Mathematics to the following extent :—

Mathematics (300).

Arithmetic (60).

The whole Algebra (70).

Including Quadratic Equations, Proportions, Permutations and Progression, the Binomial Theorem.

Geometry (60).

Euclid, Books I, II, III, IV, VI and XI to Proposition 21.

Plane Trigonometry and Logarithms (60.)

Mechanics (50).

Composition and Resolution of Forces; Equilibrium of Forces at a point in one Plane the Mechanical Powers, the Centre of Gravity.

Officers of the Royal Artillery will not be required to pass this Entrance examination.

4. The candidate is required, moreover, before entering the College, to pass in Hindustani by the Lower Standard, under Government Order No. 734, dated 9th September 1864.

5. Officers of the Army Staff and Regimental Staff Officers are not eligible to join the Roorkee College for the purpose of studying there, unless they relinquish their staff appointments.

6. No Officer on probation with a native regiment can join the Roorkee College during his period of probation.

7. No Officer, after passing through the College, can enter the Public Works Department, unless qualified for the Staff Corps, and the time passed at Roorkee is not considered as probationary for the Staff Corps; but passing the College course gives no claim to employment in the Public Works Department.

8. Applications should be forwarded before the 1st September, so as to permit of the candidate's joining the College on 1st November following, after leave formally granted in General Orders.

9. The duration of the first permission to study at the College will be from the 1st November till 1st October of the ensuing year; but if the progress of the student is satisfactory, the Principal will be at liberty to forward a recommendation to head-quarters at the close of the first session, that the student should be allowed to resume his studies during the following session.

10. The Principal of the College may at any time recommend through local Government to His Excellency the Commander-in-Chief that an Officer be ordered to rejoin his regiment.

11. Officers who obtain permission to study at this College will be considered "absent on duty," and will be so reported in the Regimental Returns.

12. Officers coming to and returning from Roorkee are not entitled to travelling allowance.

13. Officers studying at Roorkee under these rules will be required to pay (10) ten rupees a month as a College fee.

14. Quarters are provided for those students of this class who may wish to avail themselves of the same in the College bungalows, at a rent of Rs. 12-8 per mensem, each bungalow accommodating two students.

15. Such Officers as may qualify themselves in Surveying and Civil Engineering, respectively, shall be distinguished in the Army Official List and Monthly Returns of their Corps, by having the letters, "Sur." and "C. Eng." prefixed to their names; and the letters "T. C." will be inserted opposite the names of such Officers as may pass the prescribed test of qualification as Assistant Engineers at this College.

16. A Government Prize of 1,000 Rupees is given to every officer who shall obtain not less than 2,000 marks in the tabular result of the session.

17. The course of study is for two sessions, and those Officers who may qualify will receive certificates as Assistant Engineers. Appointments in the Public Works Department are not guaranteed; although as a general rule they are granted to all who may qualify, but the holders thereof will be required to enter the Staff Corps. Officers usually enter the Public Works Department as Assistant Engineers of the 2nd Grade. It is, however, to be clearly understood that Officers availing themselves of the benefits of the Institution must not consider that the completion of the course of study there, gives them any *claim* on the Government for employment in the Public Works Department, or other Civil Departments under the Government of India.

18. The College certificates are recognized by the Surveyor General as qualifying for admission to the Survey Department.

19. The annual examination commences on the 15th August, and the session closes on the 31st of that month.

Full particulars of the course of the study in all classes, with copies of the examination papers (entrance, monthly and final) of the past year, are given in the "Roorkee College Calendar," which can be obtained on application. (Price Rs. 4, with postage.)

No. 191.—Serjeant T. W. Smith, Supervisor, 2nd Grade, Punjab Northern (State) Railway, is remanded to military duty.

No. 192.—Mr. J. C. Morris is appointed to the Public Works Department as an Assistant Engineer of the 1st Grade, and posted to the Indus Valley (State) Railway.

No. 193.—Mr. J. Steel, Executive Engineer, 2nd Grade, has been granted by Her Majesty's Secretary of State leave for six months on medical certificate, in further extension of the leave granted him in Public Works Department Notifications No. 545, dated 7th October 1872, and No. 189, dated 4th May 1871.

No. 194.—Mr. F. Moore, Deputy Controller, Bengal, is appointed to officiate as Auditor of the Oudh and Rohilkhund Railway Accounts during Mr. Macdonald's absence on privilege leave

Mr. H. J. R. DeSalis is appointed an Assistant Controller of the 2nd Grade, and to officiate as Assistant Examiner of Guaranteed Railway Accounts to the Government of India in Calcutta, *vice* Mr. Bayly.

No. 195.—Mr. W. G. Bayly, B. A., Assistant Examiner of Guaranteed Railway Accounts at Calcutta, is appointed to officiate as Examiner of Guaranteed Railway Accounts at Lahore during the absence of Mr. Farr, or until further orders.

The 20th March 1873.

No. 196.—Shew Churn Sing, Sub-Overseer, 1st Grade, Oudh, is promoted to the Upper Subordinate Establishment as an Overseer, 2nd Grade, and posted to that province.

No. 197.—Mr. J. S. Thorpe, Assistant Secretary to the Government of India in the Public Works Department, resumed charge of his duties from Mr. W. G. L. Cotton on the forenoon of the 20th instant.

Mr. D. Scott, Executive Engineer, 2nd Grade, and Assistant Secretary to the Government of India in the Public Works Department, Buildings and Roads Branch, availed himself of the preparatory leave granted him in Public Works Department Notification No. 107, dated 11th February 1873, on the forenoon of the 20th instant.

Mr. W. G. L. Cotton, Executive Engineer, 4th Grade, Irrigation Branch, Punjab, will continue to officiate as Assistant Secretary to the Government of India in the Public Works Department as a temporary arrangement, *vice* Scott.

No. 198.—Mr. W. G. L. Cotton, Officiating Assistant Secretary, officiated as Under Secretary to the Government of India in the Public Works Department from 1st to 11th March, both days inclusive.

The 21st March 1873.

No. 199.—Mr. C. Blair, Executive Engineer, 2nd Grade, Agra District, Rajpootana (State) Railway, is granted two years' furlough under Section 7 of the Civil Leave Code; also 15 days' subsidiary leave from the date on which he may avail himself of it.

No. 200.—Mr. O. H. Clark, Executive Engineer, 3rd Grade, Mysore, is permitted to retire on pension with effect from the 21st December, instead of 21st September 1872, as stated in Public Works Department Notification No. 21 of the 11th January 1873.

No. 201.—Captain B. Blood, R. E., Superintendent of Park and Field Train Sappers and Miners, Bengal, passed the Colloquial Examination in Hindoostanee on the 7th September 1872.

The 19th March 1873.

No. 189.—Mr. J. M. Hardy, temporary Overseer, 1st Grade, attached to His Highness the Nizam's (State) Railway, is permitted to resign his appointment in the Public Works Department.

No. 190.—The following Prospectus of the Military Engineer Class of the Thomason Civil Engineering College for 1873, is published for general information :—

(*Notifications by the Governor General in Council, No.* 585 *of* 24*th September* 1852, *No.* 668 *of* 22*nd June* 1860, *and No.* 84 *of* 5*th May* 1871, *G. O. C. C.,* 12*th November* 1853, 1*st February* 1855, *and No.* 206 *of* 5*th August* 1872.)

European Commissioned Officers of the Army, under the rank of Captain, are permitted to study at the Thomason College at Roorkee, on the following terms :—

1. The candidate for admission must be well acquainted with his military duties as certified by his Commanding Officer, and must be of such standing as will, at the close of his college course, render him eligible for employment in the Public Works Department.

2. His application is to be addressed through the Commanding Officer to the Principal of the College, who will arrange for the examination of the candidate, and in the event of his passing will forward his application for the approval of His Excellency the Commander-in-Chief.

3. The test of admission to the College will be by an examination in Mathematics to the following extent :—

Mathematics (300).

Arithmetic (60).

The whole Algebra (70).

Including Quadratic Equations, Proportions, Permutations and Progression, the Binomial Theorem.

Geometry (60).

Euclid, Books I, II, III, IV, VI and XI to Proposition 21.

Plane Trigonometry and Logarithms (60.)

Mechanics (50).

Composition and Resolution of Forces; Equilibrium of Forces at a point in one Plane the Mechanical Powers, the Centre of Gravity.

Officers of the Royal Artillery will not be required to pass this Entrance examination.

4. The candidate is required, moreover, before entering the College, to pass in Hindustani by the Lower Standard, under Government Order No. 734, dated 9th September 1864.

5. Officers of the Army Staff and Regimental Staff Officers are not eligible to join the Roorkee College for the purpose of studying there, unless they relinquish their staff appointments.

6. No Officer on probation with a native regiment can join the Roorkee College during his period of probation.

7. No Officer, after passing through the College, can enter the Public Works Department, unless qualified for the Staff Corps, and the time passed at Roorkee is not considered as probationary for the Staff Corps; but passing the College course gives no claim to employment in the Public Works Department.

8. Applications should be forwarded before the 1st September, so as to permit of the candidate's joining the College on 1st November following, after leave formally granted in General Orders.

9. The duration of the first permission to study at the College will be from the 1st November till 1st October of the ensuing year; but if the progress of the student is satisfactory, the Principal will be at liberty to forward a recommendation to head-quarters at the close of the first session, that the student should be allowed to resume his studies during the following session.

10. The Principal of the College may at any time recommend through local Government to His Excellency the Commander-in-Chief that an Officer be ordered to rejoin his regiment.

11. Officers who obtain permission to study at this College will be considered "absent on duty," and will be so reported in the Regimental Returns.

12. Officers coming to and returning from Roorkee are not entitled to travelling allowance.

13. Officers studying at Roorkee under these rules will be required to pay (10) ten rupees a month as a College fee.

14. Quarters are provided for those students of this class who may wish to avail themselves of the same in the College bungalows, at a rent of Rs. 12-8 per mensem, each bungalow accommodating two students.

Calcutta, the 21st March 1873.

(*Notifications by the Governor General in Council, No.* 585 *of* 24*th September* 1852, *No.* 668 *of* 22*nd June* 1860, *and No.* 84 *of* 5*th May* 1871, *G. O. C. C.,* 12*th November* 1853, 1*st February* 1855, *and No.* 206 *of* 5*th August* 1872.)

European Commissioned Officers of the Army, under the rank of Captain, are permitted to study at the Thomason College at Roorkee, on the following terms:—

1. The candidate for admission must be well acquainted with his military duties as certified by his Commanding Officer, and must be of such standing as will, at the close of his college course, render him eligible for employment in the Public Works Department.

2. His application is to be addressed through the Commanding Officer to the Principal of the College, who will arrange for the examination of the candidate, and in the event of his passing will forward his application for the approval of His Excellency the Commander-in-Chief.

3. The test of admission to the College will be by an examination in Mathematics to the following extent :—

Mathematics (300).

Arithmetic (60).

The whole Algebra (70).

Including Quadratic Equations, Proportions, Permutations and Progression, the Binomial Theorem.

Geometry (60).

Euclid, Books I, II, III, IV, VI and XI to Proposition 21.

Plane Trigonometry and Logarithms (60.)

Mechanics (50).

Composition and Resolution of Forces; Equilibrium of Forces at a point in one Plane the Mechanical Powers, the Centre of Gravity.

Officers of the Royal Artillery will not be required to pass this Entrance examination.

4. The candidate is required, moreover, before entering the College, to pass in Hindustani by the Lower Standard, under Government Order No. 734, dated 9th September 1864.

5. Officers of the Army Staff and Regimental Staff Officers are not eligible to join the Roorkee College for the purpose of studying there, unless they relinquish their staff appointments.

6. No Officer on probation with a native regiment can join the Roorkee College during his period of probation.

7. No Officer, after passing through the College, can enter the Public Works Department, unless qualified for the Staff Corps, and the time passed at Roorkee is not considered as probationary for the Staff Corps; but passing the College course gives no claim to employment in the Public Works Department.

8. Applications should be forwarded before the 1st September, so as to permit of the candidate's joining the College on 1st November following, after leave formally granted in General Orders.

9. The duration of the first permission to study at the College will be from the 1st November till 1st October of the ensuing year; but if the progress of the student is satisfactory, the Principal will be at liberty to forward a recommendation to head-quarters at the close of the first session, that the student should be allowed to resume his studies during the following session.

10. The Principal of the College may at any time recommend through local Government to His Excellency the Commander-in-Chief that an Officer be ordered to rejoin his regiment.

11. Officers who obtain permission to study at this College will be considered "absent on duty," and will be so reported in the Regimental Returns.

12. Officers coming to and returning from Roorkee are not entitled to travelling allowance.

13. Officers studying at Roorkee under these rules will be required to pay (10) ten rupees a month as a College fee.

14. Quarters are provided for those students of this class who may wish to avail themselves of the same in the College bungalows, at a rent of Rs. 12-8 per mensem, each bungalow accommodating two students.

15. Such Officers as may qualify themselves in Surveying and Civil Engineering, respectively, shall be distinguished in the Army Official List and Monthly Returns of their Corps, by having the letters, "Sur." and "C. Eng." prefixed to their names; and the letters "T. C." will be inserted opposite the names of such Officers as may pass the prescribed test of qualification as Assistant Engineers at this College.

16. A Government Prize of 1,000 Rupees is given to every officer who shall obtain not less than 2,000 marks in the tabular result of the session.

17. The course of study is for two sessions, and those Officers who may qualify will receive certificates as Assistant Engineers. Appointments in the Public Works Department are not guaranteed; although as a general rule they are granted to all who may qualify, but the holders thereof will be required to enter the Staff Corps. Officers usually enter the Public Works Department as Assistant Engineers of the 2nd Grade. It is, however, to be clearly understood that Officers availing themselves of the benefits of the Institution must not consider that the completion of the course of study there, gives them any *claim* on the Government for employment in the Public Works Department, or other Civil Departments under the Government of India.

18. The College certificates are recognized by the Surveyor General as qualifying for admission to the Survey Department.

19. The annual examination commences on the 15th August, and the session closes on the 31st of that month.

Full particulars of the course of the study in all classes, with copies of the examination papers (entrance, monthly and final) of the past year, are given in the "Roorkee College Calendar," which can be obtained on application. (Price Rs. 4, with postage.)

No. 191.—Serjeant T. W. Smith, Supervisor, 2nd Grade, Punjab Northern (State) Railway, is remanded to military duty.

No. 192.—Mr. J. C. Morris is appointed to the Public Works Department as an Assistant Engineer of the 1st Grade, and posted to the Indus Valley (State) Railway.

No. 193.—Mr. J. Steel, Executive Engineer, 2nd Grade, has been granted by Her Majesty's Secretary of State leave for six months on medical certificate, in further extension of the leave granted him in Public Works Department Notifications No. 545, dated 7th October 1872, and No. 189, dated 4th May 1871.

No. 194.—Mr. F. Moore, Deputy Controller, Bengal, is appointed to officiate as Auditor of the Oudh and Rohilkhund Railway Accounts during Mr. Macdonald's absence on privilege leave

Mr. H. J. R. DeSalis is appointed an Assistant Controller of the 2nd Grade, and to officiate as Assistant Examiner of Guaranteed Railway Accounts to the Government of India in Calcutta, *vice* Mr. Bayly.

No. 195.—Mr. W. G. Bayly, B. A., Assistant Examiner of Guaranteed Railway Accounts at Calcutta, is appointed to officiate as Examiner of Guaranteed Railway Accounts at Lahore during the absence of Mr. Farr, or until further orders.

The 20th March 1873.

No. 196.—Shew Churn Sing, Sub-Overseer, 1st Grade, Oudh, is promoted to the Upper Subordinate Establishment as an Overseer, 2nd Grade, and posted to that province.

No. 197.—Mr. J. S. Thorpe, Assistant Secretary to the Government of India in the Public Works Department, resumed charge of his duties from Mr. W. G. L. Cotton on the forenoon of the 20th instant.

Mr. D. Scott, Executive Engineer, 2nd Grade, and Assistant Secretary to the Government of India in the Public Works Department, Buildings and Roads Branch, availed himself of the preparatory leave granted him in Public Works Department Notification No. 107, dated 11th February 1873, on the forenoon of the 20th instant.

Mr. W. G. L. Cotton, Executive Engineer, 4th Grade, Irrigation Branch, Punjab, will continue to officiate as Assistant Secretary to the Government of India in the Public Works Department as a temporary arrangement, *vice* Scott.

No. 198.—Mr. W. G. L. Cotton, Officiating Assistant Secretary, officiated as Under Secretary to the Government of India in the Public Works Department from 1st to 11th March, both days inclusive.

The 21st March 1873.

No. 199.—Mr. C. Blair, Executive Engineer, 2nd Grade, Agra District, Rajpootana (State) Railway, is granted two years' furlough under Section 7 of the Civil Leave Code; also 15 days' subsidiary leave from the date on which he may avail himself of it.

No. 200.—Mr. O. H. Clark, Executive Engineer, 3rd Grade, Mysore, is permitted to retire on pension with effect from the 21st December, instead of 21st September 1872, as stated in Public Works Department Notification No. 21 of the 11th January 1873.

No. 201.—Captain B. Blood, R. E., Superintendent of Park and Field Train Sappers and Miners, Bengal, passed the Colloquial Examination in Hindoostanee on the 7th September 1872.

No. 202.—Mr. J. Walker is appointed temporarily to the Public Works Department as an Accountant, 2nd Grade, and to officiate as Assistant Controller, Bengal, during the absence of Mr. Moore, or until further orders.

No. 203.—Mr. C. D. Berrill is appointed to the Public Works Department as a temporary Supervisor of the 2nd Grade, with effect from 1st current, and posted to Hyderabad.

No. 204.—Captain J. P. Westmoreland, R. E., Controller of Public Works Accounts, Punjab, is granted three months' privilege leave, with effect from the 24th April next, or from any subsequent date on which he may avail himself of it.

No. 205.—The Governor General in Council is pleased to make the following alterations in the designations of the under-mentioned Divisions of Military Works :—

The *Dugshaie* Division in the 4th Circle will in future be styled the *Kussowlie* Division.

The *Upper Sirhind* Division in the 8th Circle will in future be styled the *Dugshaie* Division.

A. GRANT,
Offg. Chief Engr., P. N. (S.) Railway.

CONSULTING ENGINEER'S OFFICE—GUARANTEED RAILWAYS.

NOTIFICATION.

Calcutta, the 20th March 1873.

Baboo Tincowry Mookerjee, 2nd Class Accountant, attached to the Office of the Examiner of Railway Accounts to the Government of India for Guaranteed Railways at Calcutta, availed himself of the privilege leave granted him in Notification dated the 21st ultimo, from the morning of the 20th March 1873.

F. S. TAYLOR, *Lieut. Colonel, R. E.,*
Consg. Engr. to the Govt. of India
for Guaranteed Railways.

Notice.

Tenders are hereby invited for the supply of the following material for the Sutlej Bridge, Indus Valley (State) Railway:—

30,000 (thirty thousand) maunds of Sukkur Lime Stone.

30,000 (thirty thousand) maunds of Lime Stone from the neighbourhood of Pindadun-Khan.

30,000 (thirty thousand) maunds of Jhund or Keekur Charcoal.

The deliveries from each direction to be made at the minimum rate of 5,000 (five thousand) maunds monthly, commencing with the month of July, so that the whole shall be delivered by the end of December 1873.

The charcoal also to be delivered in six monthly quotas of 5,000 (five thousand) maunds each.

Distinct tenders should be made for each of the three above operations, and an earnest deposit of Rs. 500 to be lodged with each tender, which will be returned to those whose tenders are not accepted.

A deduction of 10 per cent. will be made from all payments in addition to the deposit of Rs. 500, and the sum thus accumulated will remain in the hands of Government until the contracts are completed, when it will be repaid to the contractor.

The two lime stone contracts will not be given to one individual, but the charcoal supply and one lime stone contract may be obtained by the same contractor.

Sealed tenders will be received up to and on the 31st March 1873, and will be opened, in the presence of those who may wish to attend, at noon on the 1st day of April 1873.

The lowest tender will not necessarily be accepted.

Further information may be obtained on application to the undersigned at Adamwahan.

R. HEENAN,
Superintendent of Works, Sutlej Bridge.

Calcutta, the 8th March 1873.

All letters intended for Jedda, Mecca, or other places in West Arabia should be prepaid as far as Suez, *i. e.*, at the rate of six annas per half ounce. Such letters will be forwarded from Suez by the Turkish post or such other means of conveyance as may offer the best prospect of speedy delivery.

GOVERNMENT SIMLA PASSENGER DAK.

UMBALLA AND KALKA ROAD.

The 15*th March* 1873.

From the 1st April to the 31st of May 1873, arrangements have been made for booking Express Passenger Dâks from Umballa to Kalka, at the Calcutta Post Office,* under certain rules and conditions, of which a printed copy can be obtained on application to the Post Master, Calcutta.

* Post Master's room, east verandah, between the hours of 10 A. M. and 4 P. M.

It is expected that about twelve Express Dâks can be supplied daily, and the charge per dâk will be Rs. 30.

From the 1st April, two ordinary vans carrying mails will leave the Umballa Post Office, one in the morning at or about 6 A. M., and the other in the evening at or about 6 P. M. In each of these vans, four seats will be available for passengers (if the weight of the mails admit) at a charge of Rs. 6 per seat.

F. R. HOGG,

Offg. Director Genl. of the Post Office of India.

N. B.—For conditions respecting the booking of dâks in Calcutta, see paragraph 11 of the Rules.

The 21*st March* 1873.

Mails for Rangoon, Moulmein, Penang, Malacca and Singapore, for transmission per Steamer *Himalaya*, will be closed at this Office on Sunday, the 23rd March, at 7 P. M.

Mails for Chittagong, Akyab, Kyouk Phyoo and Sandoway, for transmission per Steamer *Penang*, will be closed at this Office on Sunday, the 23rd March, at 7 P. M.

Mails for Guadur, Muscat, Bunder Abbas, Linga, Bushire, Bagdad and Bussorah, for transmission per Steamer from Bombay, will be closed at this Office on Monday, the 24th March, at 7 P. M.

Mails for Gopaulpore, Bimlipatam, Vizagapatam, Coconada, Madras, Pondicherry, Negapatam, Galle, Colombo, Tuticorin, Cochin, Beypore, Calicut, Tellicherry, Cannanore, Mangalore and Bombay, for transmission per Steamer *Assyria*, will be closed at this Office on Wednesday, the 26th March, at 7 P. M.

Mails for Madras and Ceylon, for transmission per P. and O. Co.'s Steamer *China*, will be closed at this Office on Wednesday, the 26th March, at 7 P. M.

Mails for Port Blair and Camorta, for transmission per Steamer *Scotia*, will be closed at this Office on Monday, the 31st March, at 7 P. M.

The next Overland Mail *viâ* Bombay will close on Friday, the 28th March 1873.

2. Book post and pattern packets must be posted on the 27th.

N. B.—The Letter Box will close at 7 P. M. precisely, after which hour Overland letters, fully prepaid and bearing extra postage stamp of two (2) annas on each cover, will be received up to 7-30 P. M., or bearing an extra postage stamp of four (4) annas on each cover up to 8 P. M., and after 8 up to 9 P. M. by a Post Office Clerk at the East Indian Railway Station, Armenian Ghât.

Overland parcel post will be received daily at 5 P. M. for transmission per Mail Steamer from Bombay.

The 18th March 1873.

appeal within such period, that is to say, within sixty days if the appeal lie to the Court of a Deputy Commissioner or Commissioner, and within ninety days if the appeal lie to the Chief Court.

The period shall be reckoned from and exclusive of the day on which the judgment and decree appealed against was pronounced and also exclusive of such time as may be requisite for obtaining a copy of the judgment and decree from which the appeal is made.

Confirmation of decision of lower Court.

7. When a memorandum of appeal, or an application for the admission of a special appeal, has been registered, the Appellate Court may, if it sees fit, after fixing a time for hearing the appellant or his pleader, and hearing him accordingly if he appears at such time, confirm the decision of the lower Court, without sending intimation of the appeal to such Court and without issuing notice to the respondent.

Chief Court may remove appeals.

8. The Chief Court of the Panjáb may, whenever it thinks proper to do so, either on the agreement of the parties to that effect or for purposes of justice, remove and try any appeal falling within the jurisdiction of any Court subject to its superintendence.

Review of judgment.

9. Any person considering himself aggrieved by a decree of a Court of original jurisdiction from which no appeal shall have been preferred to a superior Court,

or by a decree of a District or Divisional Court from which no regular or special appeal shall have been admitted by the Chief Court,

or by a decree of the Chief Court from which either no appeal may have been preferred to Her Majesty in Council, or, an appeal having been preferred, no proceedings in the suit have been transmitted to Her Majesty in Council;

and who, from the discovery of new matter or evidence which was not within his knowledge, or could not have been adduced by him, at the time when such decree was passed, or from any other good or sufficient reason, may be desirous of obtaining a review of the judgment passed against him,

may apply for a review of judgment by the Civil Court which passed the decree, or by any Court to which the business of the former Court has been transferred.

Judgments of Civil Courts subject to revision only as provided by Act.

10. Except as hereinbefore provided, the judgments of the Civil Courts established in conformity with the said Acts and with Act No. III of 1868 *(to authorize the Local Government of the Panjáb to invest any person with the powers of an Assistant Commissioner or Tahsíldár)* shall not be subject to revision.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 19.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th March 1873, and was referred to a Select Committee with instructions to make their report thereon in three weeks:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, be published in English and in Burmese in the *British Burma Gazette*:—

No. 5 OF 1873.

A Bill to amend the law relating to Timber floated down the rivers of British Burma.

Preamble.

WHEREAS it is expedient to amend the law relating to timber floated down the rivers of British Burma;

It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Burma Timber Duties Act, 1873:"

Local extent.

It extends only to the territories under the administration of the Chief Commissioner of British Burma;

Commencement.

And it shall come into force on the passing thereof.

Duty on timber.

2. On all timber floated down any of the rivers of British Burma, a duty shall be levied, in such manner, at such places, and to such extent as the Chief Commissioner, with the previous sanction of the Governor General in Council, from time to time prescribes by notification in the *British Burma Gazette*.

Provided that, if the duty is directed to be levied on each log of the said timber, it shall not exceed two rupees twelve annas per log of five feet in girth and upwards, and one rupee six annas per log of less than five feet in girth.

Provided also, that if the duty is directed to be levied *ad valorem*, it shall not exceed eight per cent. on the value.

Power to fix value for assessment of duty.

3. In every case in which such duty is directed to be levied *ad valorem*, the Chief Commissioner may, with the like sanction, from time to time fix, by like notification, the value on which the duty shall be assessed.

Rules for timber floated.

4. The Chief Commissioner may from time to time, with the previous sanction of the Governor General in Council, make rules as to the time and manner of floating timber down any of the rivers of British Burma; and prescribe what descriptions of timber may lawfully be floated, and what descriptions of timber may not lawfully be floated, down any such river. And all timber found floating contrary to such rules may be confiscated.

Legalization of prior levy of duties.

5. All duties heretofore levied on timber floated down any of the said rivers, shall be deemed to have been levied in accordance with law.

Indemnity.

And all officers and other persons are hereby indemnified for anything done before the passing of this Act, which might lawfully have been done if this Act had been in force; and no suit or other proceeding shall be maintained against any such officer or other person in respect of anything so done.

Enactments repealed.

6. The enactments mentioned in the schedule hereto annexed are repealed to the extent mentioned in the third column of the said schedule.

SCHEDULE.

Number and year.	Title.	Extent of repeal.
Act XXX of 1854.	An Act to provide for the levy of Duties of Customs in the Arracan, Pegu, Martaban, and Tenasserim Provinces.	Sections one, seven, eight and twelve. Sections four and six, so far as they relate to timber floated down the rivers of British Burma.
Act IV of 1863.	An Act to give effect to certain provisions of a Treaty between His Excellency the Earl of Elgin and Kincardine, Viceroy and Governor General of India, and His Majesty the King of Burma.	The whole Act so far as it relates to duty on such timber.
Act VII of 1869.	An Act to give validity to certain Rules relating to Forests in British Burma.	The whole Act so far as it gives validity to rules relating to duty on such timber.
	The Rules for the better management and preservation of the Government forests of British Burma, dated the 2nd August 1865.	So far as they relate to duty on such timber.

STATEMENT OF OBJECTS AND REASONS.

The primary object of this Bill is to authorize the levy of *ad valorem* duties on timber floated down the rivers of British Burma. The opportunity has been taken to consolidate the law on the subject of such timber, which law is now contained in three Acts, and in certain Rules legalized by Act VII of 1869.

A. HOBHOUSE.

CALCUTTA, *28th January* 1873.

WHITLEY STOKES,
Secy. to the Govt. of India.

[Second Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th March 1873, and was referred to a Select Committee with instructions to make their report thereon in six weeks:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, and the Panjáb Municipal Act, 1873, be published in English, Marháthí and Hindí in the *Central Provinces Gazette*:—

No. 6 OF 1873.

A Bill to extend the Panjáb Municipal Act, 1873, *to the Central Provinces.*

Preamble.

FOR the purpose of extending the Panjáb Municipal Act, 1873, to the Central Provinces; It is hereby enacted as follows:—

Extension of Act IV of 1873 to Central Provinces.

1. The said Act shall extend to the Central Provinces, but subject to the following modifications, that is to say—

(*a.*) The title and preamble, section one, paragraph one, and section two, shall be read as if, after the word 'Panjáb,' the words "and Central Provinces" were inserted.

(*b.*) Section one, paragraph two, shall be read as if, for the words "under the government of the Lieutenant Governor of the Panjáb," the words "respectively under the government of the Lieutenant Governor of the Panjáb, and the administration of the Chief Commissioner of the Central Provinces," were substituted.

(*c.*) In sections four, five, six and seven, after the words "*Panjáb Gazette*" (wherever they occur), the words "or *Central Provinces Gazette*, as the case may be," shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

Under section 21 of the Panjáb Municipal Act (XV of 1867), that Act was at various times extended to several towns in the Central Provinces for five years from the date of each extension. Act IV of 1873, which replaces Act XV of 1867 in the Panjáb, has been made exclusively applicable to that Province, and thus there will soon be no Act under which municipal rates or taxes can be raised or expended in any town of the Central Provinces. It is therefore necessary to pass an Act to supply a fresh legal basis on which the action of Municipal Committees may rest. As the Panjáb Act of 1867 has hitherto served for the Central Provinces, and has been found to work well, it is considered best to extend to those Provinces the new Panjáb Act, which is a modification of the former one.

CALCUTTA, *26th February* 1873.

A. HOBHOUSE.

WHITLEY STOKES,
Secy. to the Govt. of India.

[Second Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th March 1873, and was referred to a Select Committee with instructions to make their report thereon in a fortnight:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, be published in English, Urdú and Hindí in the *North-Western Provinces Gazette*:—

No. 7 OF 1873.

A Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces.

Preamble.

WHEREAS it is expedient to consolidate and amend the law relating to the Village Police in the North-Western Provinces; It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Village Police (North-Western Provinces) Act, 1873:"

It extends only to the territories under the government of the Lieutenant Governor of the North-Western Provinces;

Local extent.

And it shall come into force on the passing thereof.

Commencement.

2. So much of section twenty-one of Bengal Regulation XX of 1817 as relates to the Village Watchmen of the North-Western Provinces, and sections eighteen, nineteen and twenty of Act No. III of 1869, are hereby repealed.

Repeal of enactments.

3. The nomination to the post of Village Policeman shall be made by the zamíndár of the village, or, where there are more zamíndárs than one by the lambardár as their representative, and where there are more lambardárs than one, the opinion of the majority (unless there is some special provision to the contrary in the village administration paper) shall prevail.

Right of nomination of Village Policemen.

4. Every person authorized to nominate a person to the office of Village Policeman shall, within fifteen days after the occurrence of a vacancy in the office, nominate a proper person to the vacant post, and communicate the nomination to the Magistrate of the District.

Obligation to nominate.

5. The person so nominated shall, after due enquiry into his age, character and ability, be appointed or rejected by such Magistrate at his discretion, or by some officer authorized in that behalf.

Discretion to appoint or reject nominee.

6—(*a*.) In default of such nomination within the said fifteen days, the Magistrate of the District shall appoint such person as he thinks fit to the vacancy.

Power to Magistrate to appoint.

(*b*.) If the nomination has been made within the said fifteen days, but the nominee is rejected, the person authorized to nominate a person to the office of Village Policeman, shall within fifteen days from the date of such rejection, nominate another person to the vacant post; and in default of such nomination, or if such nomination has been made, but the nominee is again rejected, the Magistrate of the District shall appoint such person as he thinks fit to the vacancy.

Procedure in case of rejection of nominee.

7. Every Village Policeman shall perform the following duties:—

Duties of Village Policemen.

(*a*). He shall give immediate information to the officer in charge of the police-station within the jurisdiction of which the village is situate, of every unnatural, suspicious, or sudden death occurring in the village of which he is Chaukídár;

of each of the following offences occurring in such village (that is to say)

murder, culpable homicide, rape, dacoity, theft, mischief by fire, house-breaking, counterfeiting coin, causing grievous hurt, riot,

and all attempts and preparations to commit, and abetments of, the said offences.

(*b*.) He shall keep the Police informed of all disputes which are likely to lead to any riot or serious affray.

(*c*.) He shall arrest all proclaimed offenders, and all persons whom he may find in the act of committing any offence specified in clause (*a*) of this section.

(*d*.) He shall observe, and from time to time report to the officer in charge of the police-station within the jurisdiction of which the village may be situate, the movements of all bad characters in such village.

(*e*.) He shall report to the officer in charge of such police-station the arrival of suspicious characters in the neighbourhood.

(*f*.) He shall supply any local information which a Magistrate or any officer of police may require, and shall promptly execute all orders legally issued to him by competent authority.

8. Whenever a Village Policeman arrests any person, he shall forthwith take him to the police-station within the jurisdiction of which his village is situate; provided that, if the arrest is made at night, such person shall be so taken, as soon as possible, on the following morning.

Procedure on arrest by Village Policeman.

9. The Magistrate of the District may dismiss any Village Policeman for any miscondu or neglect of duty.

Dismissal of Village Policeman.

10. Every Village Policeman guilty of any wilful misconduct in his office or of neglect of duty, such misconduct or neglect not being an offence within the meaning of the Indian Penal Code;

Acts punishable.

or withdrawing from the duties of his office without permission, or without having given previous notice for a period of two months;

or guilty of cowardice,

or offering any unwarrantable personal violence to any person in his custody;

or violating any of the rules that may under section eleven be framed by the Local Government in pursuance of this Act,

shall be liable, on conviction before a Magistrate, to a penalty not exceeding three months' pay, or to imprisonment for a period not exceeding three months, or to both.

Penalty.

11. The Local Government may from time to time frame further rules for the discipline of the Village Police, and for carrying out generally the purposes of this Act, and breach of such rules shall be punishable as an offence under this Act.

Rules under Act.

12. All fines levied under this Act on Village Policemen shall be credited to the Chaukídárí Fund of the District in which they are employed.

Fines to be credited to Chaukídárí Fund.

STATEMENT OF OBJECTS AND REASONS.

The only two laws at present in force for the appointment of village-watchmen, for the definition of their duties, and for enforcing penalties for neglect thereof, are section 21, Regulation XX of 1817, and sections 18, 19 and 20 of Act III of 1869.

The provisions of the latter Act are of special and not of general application, being applicable only to watchmen appointed under that Act. Those of the former, however good, are not of themselves sufficient. But the two combined, with certain alterations and additions, give excellent materials for one consolidated Act on the subject.

So long as the village-watchmen of these Provinces were remunerated by the small pittance in money, grain, or land, which they formerly received, it was hard to expect much of them, or to subject them to a severer penalty for neglect of duty than that prescribed by Regulation XX of 1817, namely, dismissal from their posts. But now that these men have been put on a regular footing, and receive fixed monthly salaries, it seems proper that they should, as regards their appointment, discipline, and general management, be subjected to rules similar to those adopted for village-watchmen, paid under Act III of 1869, while such portions of the old law, Regulation XX of 1817, as defined correctly their present duties and responsibilities, should be re-enacted. The present Bill has been framed with the above views.

CALCUTTA, 23rd *February* 1873. } J. F. D. INGLIS.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th March 1873, and was referred to a Select Committee with instructions to make their report thereon in a week :—

No. 8 OF 1873.

A Bill to amend the law relating to Cargo-boats plying for hire within the Port of Calcutta.

Preamble.

WHEREAS, under the Consolidated Customs Act, No. VI of 1863, section one hundred and sixty-two, the Chief Officer of Customs of the port of Calcutta is empowered to issue licenses for, and to make registration of, cargo-boats plying within the limits of such port, under the rules, and on payment of the fees, therein referred to: And whereas it is expedient to transfer such power from the said Chief Officer to the Conservator of the said port; It is hereby enacted as follows :—

Transfer of power to license and register cargo-boats.

1. The power hereinbefore recited shall henceforward be exercised by the Conservator of the Port of Calcutta in lieu of the Chief Officer of Customs of the said Port.

STATEMENT OF OBJECTS AND REASONS.

When the Government of Bengal proposed that three-fourths of the charge of the River Police should be paid out of port revenues, the Port Commissioners agreed on certain conditions, one being that the nett proceeds realized from the registration of cargo and passenger-boats should be made over to them.

To this condition the Government of Bengal, with the concurrence of the Government of India, so far as the condition referred to cargo-boats, assented, charges of registration being also transferred. At present the law requires that cargo-boats shall be registered by the Collector of Customs, and passenger-boats by the Commissioner of Police; but it is considered advisable to amalgamate the establishments employed upon these duties, and to place them under the Port Commissioners as Conservators of the Port of Calcutta. The object of the present Bill is simply to remove the legal difficulty in the way of the proposed amalgamation.

A. HOBHOUSE.

OATHS AND AFFIRMATIONS BILL.

The Hon'ble MR. HOBHOUSE asked leave to postpone the presentation of the preliminary report of the Select Committee on the Bill to consolidate the law relating to Oaths and Affirmations.

Leave was granted.

CENTRAL PROVINCES MUNICIPAL BILL.

The Hon'ble MR. HOBHOUSE also introduced the Bill to provide for the appointment of Municipal Committees in the Central Provinces, and moved that it be referred to a Select Committee with instructions to report in six weeks. He

had explained to the Council, on a previous occasion, that the Central Provinces were in this position, that the Panjáb Municipal Act of 1867 was made extendible to them by the Executive Government, and that it had, in point of fact, been extended to a number of places. He had, indeed, no complete list of them, but he was informed that they were considerably upwards of a dozen. Now the Council would bear in mind that we had lately been legislating for the Panjáb Municipalities, and had passed an Act for that purpose, an Act which was founded almost entirely on the existing Act for the Panjáb, passed in 1867, but with some modifications in it. Well, then, in the Central Provinces we had the Panjáb Act of 1867 actually at work in the principal towns, and we were informed by the Government of the Central Provinces that the working of the Act was satisfactory, and that they desired nothing more than a repetition of the same thing which was done in 1867, namely, the extension to the Central Provinces of the law which had been enacted for the Panjáb. That, therefore, was the object of the very simple Bill which he had now to introduce. The Panjáb Act had been so recently before the Council that he need hardly go through the Act in much detail in order to explain what was proposed to be done for the Central Provinces. They would recollect that it was in the power of the Local Government to apply the Act to any town within its jurisdiction; then the Local Government might appoint Committees or provide for the election of Committees, and those Committees had the power of defining the persons and property to be taxed, and the taxes which they decided upon, when sanctioned by the Local Government, would have the force of law. There were some few modifications introduced by the recent Act into the system which existed in 1867, and had existed from that time onwards. All those modifications were in the direction of some greater deliberation and caution before any community was to be taxed. The Act now in force in the Panjáb provided that, before any town was brought within its operation, notice should be given, and that some time should elapse during which objections might be taken by persons who thought that the law was not applicable to their town, and those objections should be heard before the Act was actually applied. The same kind of process was to take place before any tax was imposed. The Municipal Committee had first to declare its intention of taxing particular property and persons. Then time was to elapse during which objections might be made, and it was the duty of the Government ultimately to hear those objections and to decide upon them. Moreover, power was reserved to the Supreme Government to lay down rules subject to which the whole power of taxation, whether over persons or property, was to work; and that, coupled with the time given for delay in making objections, seemed to us when we were discussing the Panjáb Bill to secure a very full consideration of any objectionable tax or any objectionable extension of the law that there might be. That was the law which we now proposed to apply to the Central Provinces, the same as now existed, excepting that we introduced the same modifications as were thought proper to be put into the Panjáb Act.

The Hon'ble Mr. Egerton said, having had the honour of serving for some time in the Central Provinces, he wished to express his belief that the Act which had been passed for the Panjáb was extremely well adapted for the Central Provinces, and would be as suitable to the Central Provinces as the former Act of 1867 had been.

The Hon'ble Mr. Chapman said—"I desire to take this opportunity of saying that the course we are now adopting in respect to legislating for the constitution of municipalities is not in my opinion satisfactory. It seems to me that we are dealing with this most important subject in an incomplete and imperfect manner.

"A few weeks ago, my hon'ble friend, Mr. Egerton, succeeded in passing the Panjáb Act. I then condemned the bald character of that law, and the almost entire absence in it of provisions for regulating the constitution of municipalities and their powers in respect to taxation and administration. I specially objected to the utter want of legal control over the action of the Executive. Since then my hon'ble friend, Mr. Hobhouse, has obtained permission to introduce separate Municipal Bills for the North-Western

Provinces and Oudh, the Central Provinces, and British Burma. Unless I am much mistaken, each of these measures will be found to be of the same indefinite character in respect to principle and specific control. Now, my Lord, I am very decidedly of opinion that it is the duty of this Council to endeavour to deal once for all with this most difficult subject in a broad, comprehensive, and thorough manner—in a manner which shall unmistakeably indicate the policy and views of the Supreme Government. I can anticipate the objection that will be taken to this proposal. I shall be told that, owing to the varied conditions and circumstances of the different parts of this great country, it will be neither possible nor expedient to attempt to deal with the question of municipal government by one law of general applicability. I beg distinctly to disclaim any wish to attempt to deal with it by one law; but I am prepared to maintain that, as regards the main outlines and the principal provisions, it is our duty to pass a law, the principles of which would be applicable to all the Administrations which have not Legislatures of their own, and which would serve as a model for Madras, Bombay and Bengal.

"I will notice, as briefly as I can, what I conceive to be the leading principles that would have to be dealt with; and how far they admit of being made generally applicable.

"The first point would be the conditions under which municipalities should be established. I apprehend we should all agree to abandon the sham and farce of the voluntary principle, as contained in the old Act, XXVI of 1850. Conceding, then, to the Executive Government, the authority to establish these bodies without regard to the wishes of the majority of the people, the next point for consideration would be, whether this authority should not be exercised subject to the fulfilment of certain conditions. For my own part I am of opinion that it would be very undesirable that the Government should have the power to establish municipalities wherever they pleased, irrespective of the size, population and tax-producing capacity of the place. I can conceive that the exercise of indiscriminate authority of this kind might give rise to many cases of hardship, and be productive of many instances of inconsistency.

"But what I contend for is, that the question whether a limitation should or should not be imposed by law on the Executive is of a general character, the decision of which is in no way affected by local or provincial peculiarities. Having decided on the conditions under which municipalities should be established, the next point would be the constitution and form of government which should be provided for them. You will find in every part of the country, towns which vary in respect to numbers, wealth and intelligence of their inhabitants. These cities and towns ought, I think, to be divided into one or more classes, to each of which a municipal constitution should be granted, varying with the capacity of the inhabitants to undertake the responsibility of local self-government. In the smaller and less advanced class of towns, you might find it advisable to vest the chief control in official hands, merely utilizing the municipality as a panchâyat, or consultative body.

"Then, as to the important subject of taxation, I admit that it would not be possible to lay down a fixed scale of taxes which could be generally adopted. In this matter, local associations, prejudices and feelings must be carefully studied and attended to. A tax that would be paid with comparative cheerfulness in one province, might, if attempted to be imposed in another, give rise to the most serious disaffection. But admitting so much, I contend that there would be little or no difficulty in preparing a list, as has been done in the North-Western Provinces Act, of every authorized description of tax; and leaving it to the municipalities and the Executive Government to select those they considered best adapted to their own particular circumstances. The maximum amount to be levied in each case should be clearly limited by law, and, in the case of octroi-duties, they should be so regulated as to limit their incidence per head of population to a fixed sum. I would also provide for the annual publication, in the *Gazette of India*, of a list of all municipal towns in India, their population, and the amount of taxation to which they are subjected. It is only by some such means as this that you will be able to put

a stop to and check the growth of the gross inequalities and anomalies which I believe to prevail at present.

"There is one point connected with municipal taxation to which I wish to draw the special attention of the Council. I allude to the question of taxing the multitudes, either by a capitation-tax or otherwise, who resort on certain fixed festivals to sacred places and mélás. It is a well established fact that these large gatherings are a most fruitful source of epidemic disease, not merely amongst the people who attend them, but to the whole surrounding country. For the disease generated at these places is spread far and wide by the multitudes on their homeward journeys; and this danger has been greatly increased of late years by the facilities afforded by railway communication. I maintain that a Municipal Bill ought to deal specially with this great evil. Here, again, there is no question of local peculiarities. If, for example, it is deemed right to tax, for the purpose of protecting them against disease and hardships, the crowds who resort to Pandharpúr to do honour to Vithoba, it surely is equally right to treat those who resort to Púrí to worship Jaganáth in like manner. Of course the exercise of this right should be left to the discretion of the Local Government, but the principle should be affirmed by law.

"The next point to which I would refer is the power to be conferred on municipalities for enforcing conservancy and other arrangements for the health and comfort of the inhabitants. I admit that these powers must be of an arbitrary and summary character, and it seems all the more necessary to define them precisely by law. You must bear in mind that the exercise of these powers will greatly affect the every-day domestic life of the people. I hold in my hand a draft of a Bill for Mofussil municipalities in the Bombay Presidency, in which no less than forty-eight sections are taken up with minutely defining the extent to which the municipal bodies may carry their interference. In the Panjáb law, this important subject is airily disposed of in one section, which is to the effect that the municipality may, subject to the sanction of the Government, make whatever rules and bye-laws they think best. Now, I contend that here, again, you have to deal with a principle of general application. It is either advisable to fence in the action of the municipality or it is not. And, as a rule, it may be safely said that, whatever powers should be conferred at Rangoon to suppress a nuisance or widen a street, should be given at Lahore.

"Lastly, I come to the very important question as to whether the performance of certain duties should be rendered compulsory on municipalities or not. On this point I entertain a very decided opinion that the Government should have the power to step in and insist on a certain amount of expenditure being incurred on such objects as water-supply, vaccination, and, perhaps, primary education. I would especially provide by law that it should be the first duty of a municipality to provide a good supply of water. The question I have raised as to rendering the performance of certain specified duties obligatory on a municipality may admit of much difference of opinion, but, once decided, the principle is, I maintain, of general applicability.

"I think I have now enumerated the main general principles that ought to be considered in passing a Municipal Bill, and I hope I have succeeded in showing that there ought to be no very great difficulty in deciding them either one way or the other.

"I am no advocate for undue centralization. I have the strongest faith in the great value of these municipal institutions, and it is because I believe them to be capable of conferring such vast benefits on the country, that I am anxious to see their duties and responsibilities clearly and precisely defined by law.

"I do not think I can do better than quote what His Honour the Lieutenant Governor has said in his Administration Report on this subject:

"'The Lieutenant Governor has always believed that while, on the one hand, the task of really governing India down to the villages and the people is too great for the British Government, and, on the other, anything like national political freedom is inconsistent with a foreign rule, we may best supplement our own deficiencies and give the people that measure of self-government and local freedom to which both their old traditions and their modern education alike point, by

giving to towns and restoring to villages some sort of municipal or communal form of self-government. Some years ago, when Chief Commissioner of the Central Provinces, he made a commencement of such a system in Nágpúr and other towns. He has had that object especially at heart in these provinces, awakening, as they are, to a new light under the influence of the education which we have given to so many of the upper and middle classes. Seeing, then, the very various and confusing nature of the municipal constitutions heretofore existing, the Lieutenant Governor has thought it very desirable to consolidate and systematize the whole law on the subject, ranging municipalities in different classes, and prescribing a suitable constitution for each, in all of which the element of self-government might be largely infused. He has hoped that, in this way, the whole subject may come to be better understood, both by the officers of Government and by the people, and that the Government may be enabled gradually to introduce the privileges and the advantages of representative and elective institutions.'

"My Lord, it is not my intention to oppose the present motion. I shall have gained my object if I succeed in obtaining from my hon'ble friend, Mr. Hobhouse, or some other member of the Executive Government, an assurance that these piecemeal and incomplete measures now before the Council are of a temporary character, and that they will hereafter be replaced by enactments of a wider character, which shall contain a full exposition of the fixed views and policy of the Government of India."

His Honour THE LIEUTENANT-GOVERNOR said, his hon'ble friend Mr. Chapman had been good enough to read to the Council with approbation an extract regarding his municipal administration of the Central Provinces. Having, in common with the hon'ble Mr. Egerton and a distinguished man sitting opposite (Sir R. Temple), served in the Central Provinces, he also felt gratified by the statement made by the hon'ble member in charge of the Bill that, in the opinion of the Government, the municipal system of the Central Provinces had worked satisfactorily. He was very much inclined to agree with his friend, Mr. Chapman, that it would be better that the powers of the Government in this matter should be more accurately defined. The powers conferred by these Bills were of the widest possible character. In fact, the Government might impose what taxes they liked, and might spend the money as they liked; and, in regard to the law of nuisances, they might declare any acts or omissions to be nuisances, and provide what punishments they liked for the commission of those nuisances. The powers given by these Bills were therefore certainly of the very widest possible character. In case the municipal administration of the Central Provinces might be discussed, he had provided himself with certain papers which would confirm what had been said by the hon'ble member in charge of the Bill, that the power of municipal government, great and almost unlimited as it was, had been administered with moderation by the Government of the Central Provinces. Perhaps the Council would pardon him if he took the liberty of reading a passage or two from a circular issued by the Local Government at a time when municipal administration was reviewed and systematized in the province a few years ago. The circular from which he would read contained those passages:—

"Now that the octroi-system of taxation has been fully tried, the Chief Commissioner desires that the wishes of the people shall be entirely consulted regarding the form of taxation they would prefer for the future, and that as much attention as possible should be paid to their wishes with respect to the amount of municipal taxation.

"The question should not be, how much can be raised, but how much it is really necessary to raise for specified objects, and how that can best be raised.

"All municipal income will be strictly devoted to and spent by municipalities from which it is raised.

"As far as possible the people should be consulted for what objects they choose to be taxed, and to what extent.

"The rates are nowhere to be raised.

"They are to be reduced in all cases, and as regards all articles which are affected by the following rules:—

[Here follow certain prescribed maxima of taxation.]

"It being then borne in mind that no increase is to be made, but that decrease must be made where these instructions render it necessary and may be made by consent, I am to direct that, if the local officers and the people (poor as well as rich) are agreed about the matter, then arrangements for the ensuing year may be made at once at the rates agreed on.

"If there is a wish to substitute some other form of taxation for octroi, or there be difference of opinion regarding the amount, rates and the like, Deputy Commissioners will make the best temporary arrangements they can on the existing system, and will refer through you for the orders of Chief Commissioner."

And a subsequent circular went on to provide for the trial, experimentally, of the system of election. He would not trouble the Council with much upon that subject, but would read only one or two brief passages :—

"It will not be necessary to record the votes of those who do not choose to attend and vote, but the district officers are requested to use their influence to induce the people to take an interest in the matter, and to give their votes. It should be an object to ensure that all classes may be fairly represented, and especially that the labouring classes, who cannot easily make themselves heard, may have those who will speak for them and take care of their interests.

"It is not to be expected that the interest felt in these elections will be great at first, but the Chief Commissioner believes that, if the people find that their representatives have a real voice in their taxation and municipal management, an interest will spring up, and substantial self-government may be gradually introduced. Wherever the Committees have not been duly and properly elected under rules previously promulgated, elections will now be held under these instructions. Where they have been already so elected, they will, of course, hold office for the term for which they were elected."

He trusted his hon'ble friend would be satisfied that, although the power given to the Local Government under this Bill was enormous, the Chief Commissioner of the Central Provinces did what he could to regulate that power, and, in fact, to a certain extent, did what his hon'ble friend would have the Council do by law. He laid down maxima of taxation by certain rules within which the local officers and the Municipal Committees were obliged to act. So far, then, His Honour hoped the Council would see that those who administered the government of the Central Provinces had done what they could to keep the law within due bounds. But at the same time he admitted that the law was enormously wide, and he must express his concurrence in the general principles laid down by his hon'ble friend, when he said he desired that the law should define the powers of the Government more precisely; that the law should limit the power and quantity of taxation, and, to a certain extent, also lay down certain general leading rules beyond which municipalities should not be permitted to go, and within which minor details might be filled according to the needs of each district and each locality. So far as this Bill was, to a moderate degree, a modification of the previous law, inasmuch as it introduced certain very moderate moral checks, he thought it was an improvement on the previous law. He thought it was right that the intention to introduce municipal institutions and municipal taxation should be published, so that an opportunity might be given to the townspeople to say their say on the subject. It was also right to give power to the Government of India to restrain the Local Governments in the matter of taxation, by laying down rules by which municipal taxation should be regulated. At the same time he would say that the Government of India, as well as the Local Government, was human, and that it might be desirable to regulate by law the powers of the Government of India as well as those of the Local Governments. No doubt individual discretion depended on the character of those who exercised it. But if the principle was right that these powers should be regulated by law, it was not enough that you should give the Supreme Executive Government the power of limiting taxation by rules; it was proper in that case that that power should be more accurately defined by law.

He should like also to say one word in confirmation of what fell from his hon'ble friend as to the necessity of regulating the conduct of fairs and assemblies. We were to a certain extent placed in difficulties in this matter, because an old Regulation on that subject had been abolished for reasons not known to him, and we found that, at places where great collections of people took place, the zamíndárs were in the habit of collecting certain dues and deriving revenue from these fairs without bearing the expense. And it had fallen on the Government, without any special fund for the purpose, to make arrangements for the necessary sanitary arrangements and medical and magisterial regulations. He thought it most important and necessary that some provision should be made on that subject.

The Hon'ble MR. BAYLEY said the hon'ble Mr. Chapman had challenged an expression from the Government of India as to their views and their policy generally in regard to municipalities. He had no authority, nor did he pretend, to lay down any such policy on behalf of the Government of India. But he wished to give, in a very few words, the results, or some of the results, of his own experience; for he could say conscientiously that, for many years as an executive officer, this particular subject was the very one in which he had been above all others particularly interested. The hon'ble member had, as he (MR. BAYLEY) understood him, been complaining, in the first place, that there were four Bills about to be introduced, all on the same model, and enunciating the same policy. Having said that, he, in the same breath, proceeded to attack the Government for having no policy at all, and demanded that they should lay down some model which all such Bills should follow. But when he came to explain himself, his meaning seemed to be that he did not like the policy which these particular Bills expounded, and that he would have a policy of his own, which he would wish the Government of India to adopt. It was not MR. BAYLEY's business to say what he thought such a policy should be, and it was a subject which required, perhaps, a good deal more consideration than in a hasty debate of this kind it was quite possible to give it. But this he thought he might say, that if the restrictions which the hon'ble member himself had shadowed out were imposed, they would make the practical working of any system of municipality in India absolutely impossible. As MR. BAYLEY understood the hon'ble member, he objected very much to any provision of law which compelled the Government to obtain applications from the inhabitants of any place at which a municipality was proposed to be established. He told the Council that such applications were a sham. But still he thought it desirable that the feelings of the people should be ascertained. Well, MR. BAYLEY could say that he had had some experience in three provinces of India,—in the Panjáb, in the North-Western Provinces and in Oudh; and he could positively affirm that the Government did, in every case, carefully consider, not only the wishes of the people, but the policy of establishing each intended municipality and of the particular constitution which it was intended to give to it. He understood that the hon'ble member would propose further restrictions on the size of municipalities,—restrictions as to the class of municipalities. He would make one class of municipalities of large cities, confined solely to elective institutions, and another class of small towns, with official institutions, if MR. BAYLEY might so call them. He would place a limit on the incidence of particular taxes, and he would forbid the imposition of any but particular taxes. Now, MR. BAYLEY could say distinctly that, with regard to the size of towns, he could mention many small towns—places which you could hardly dignify with the name of towns —which had enjoyed elective institutions and worked them with great credit and very much to the satisfaction of the people. And he could mention others, large and wealthy towns, in which it had been impossible to obtain any machinery for elective bodies. While, therefore, on the one hand, the Government probably would give to large municipalities elective institutions, and would on the other hand, at any rate in the first instance, give official bodies to small towns, yet he did not see why the Government should in the least be restricted to giving one class of institutions to any particular class of towns, or why they should not be left to judge as to the propriety of giving to any town any institution for which it was properly prepared.

Then, as to taxation, it was a broad question of policy, on which there might very well be two opinions. But he confessed he feared that, if Government laid down eighteen or twenty different sorts of taxes and said that they might be imposed, the belief of every householder in the municipalities would be that he was liable to pay every one of them; that it would cause a great deal more irritation and alarm if the Council expressed the taxes in the Bill, than if it gave a general power to the Local Government, under the check and control of the Imperial Government, of imposing taxation. Besides, there were already existing, and had been, modes of raising funds in many of these municipalities—modes which had prevailed from times far anterior to our Government, the whole of which, or even most of which, it would be

almost a hopeless task to define in any law. He knew that, in the early days of the administration in the Panjáb, on the occasion of introducing the Chaukídárí tax of the North-Western Provinces, the people without any exception, from one end of the Panjáb to the other, came to the local officers and said—"we have special modes of raising funds which we are quite willing to devote to this object, but we don't like this new tax." MR. BAYLEY was then a district officer, and he went into every town in which chaukídárs were enrolled, and consulted the people, and adopted the particular mode of raising funds which they indicated was most suitable to them. He believed that was the course which, under this Bill, would be adopted, and he was sure it was one which far better suited the wishes of the people and the varied circumstances of the country.

The hon'ble member's allusion to the octroi-duties was somewhat unfortunate, because the attempt had actually been made to lay down rigid rules on the subject. It was impossible, *á priori*, to object to the course adopted, for the rules laid down were based on the soundest principles of political economy, and yet every one of the Local Governments without exception remonstrated, and said that it was impossible to work the system of octroi-duties, unless a relaxation of those rules was permitted. That order having been made by the Executive Government, they had the power to alter and modify it; but if such hard and fast restrictions were imposed by law, the Government would be perpetually under the necessity of applying to this Council to modify it.

[The Hon'ble MR. CHAPMAN observed that he had only said that the amount of taxation should be limited by law, not the mode of raising the tax.]

The Hon'ble MR. BAYLEY resumed—In regard even to the amount, he thought that restrictions should not be provided by law. He would take the city of Amritsar as an example. There, a certain amount of octroi-duties was levied: it was very large and was satisfactorily expended by the people themselves for the improvement of their own town; it was applied to purposes of conservancy; to lighting; the maintenance of schools; the furtherance of education, and to many other purposes, which rendered that town, though one of our most recent possessions, one of the best and most contented towns in Upper India. And that was done, not only with the consent, but with the cordial co-operation, of the people of the town.

Then, again, as regards the power of making rules. He did not quite understand what his hon'ble friend meant as to the power of the municipality to enforce rules. MR. BAYLEY understood him to object to the power of the municipality to make rules defining nuisances. But as regards the enforcement of the rules, MR. BAYLEY might observe that it had been the practice of the Government of India not to allow the enforcement of any such rules in any municipality, unless it was situated within easy reach of some magisterial officer to whom the adjudication of offences against the rules could be safely confided. As to the power of making rules, he might say that it would be almost impossible to lay down ready-made rules that would be suitable for all places. Take the instance of British Burma, which the hon'ble member had himself quoted. One of the greatest nuisances in the towns in British Burma was the throwing of rice-husks into the river. Who on earth would have thought of putting such a matter into an imperial Bill. All he could say was, that he felt sure from his own experience, and from all he had seen and read, that the wisest policy was to pass Bills jealously guarding the liberty of local taxation, but leaving the consideration of details to those best acquainted with the circumstances of the towns in which such taxation was about to be imposed. He was quite sure that that system had worked well, and if his hon'ble friend's experience was the other way, all MR. BAYLEY could say was, that his friend had been especially unfortunate. His Honour the Lieutenant Governor could vouch for the Central Provinces and for Bengal: MR. BAYLEY certainly could vouch (and he believed other hon'ble members would agree with him) for three other provinces; and if the case of Bombay had been different, all he could say was that it was exceptional.

His hon'ble friend's remarks regarding fairs and religious gatherings had, MR. BAYLEY thought, nothing to do with this Bill. He believed that, in one or two large towns in Bombay, fairs were held. But in other parts of India, they were held sometimes in wastes far from any town whatever. He knew with regard to several fairs that there was not a town within ten miles of them, and to bring matters relating to these fairs within any Municipal Bill was a proposition which could not for a moment be entertained. Not many years ago, during Lord Lawrence's administration, the subject was taken up and considered very carefully and, after communication with all the Local Governments, it was found to be attended with so many difficulties that the subject was dropped. There was no reason, why, if found necessary, the matter should not be separately re-considered. But it was a most difficult subject, regarding which he saw no need for uniform legislation, or for declaring any general line of policy, and he thought it certainly should not form part of any Municipal Bill.

Major General the Hon'ble H. W. NORMAN observed that, having so recently supported the passing of the Panjáb Municipal Act, with which this Bill was identical, and being informed on the best possible authority that that Act was as applicable to the Central Provinces as it was to the Panjáb, he could have no objection to the passing of this Bill. But he agreed with His Honour the Lieutenant Governor that it would be desirable that a limit should be fixed by law as to the amount and incidence of municipal taxation generally throughout the country.

The Hon'ble MR. ELLIS said that, when his hon'ble friend Mr. Chapman commenced his speech, he was afraid Mr. Chapman was about to appear as the champion of centralization, and advocate the passing of one uniform municipal law for all parts of the country. But MR. ELLIS was much relieved to find that his hon'ble friend did not go to that extent. What the hon'ble member said was that it was necessary to lay down, in one Bill affecting municipalities, some broad general principles of universal application, and he imputed blame to the Government for not having placed before the Council a more perfect measure laying down such principles. He (MR. ELLIS) would answer that, substantially and practically, we had laid down certain principles in the Bills which had been passed by, or were now before, this Council. Mr. Chapman mentioned six broad principles which he considered ought to be formulated by the Council of the Viceroy. In the first place, he asked us to place some limit on the power of the Local Governments to establish municipalities with reference to the size and population of a town. Now, on this point MR. ELLIS must join issue with his hon'ble friend, and say that he thought it was not desirable that any such restrictions should be placed. He need only refer to Mr. Chapman's own special experience when Collector of Satára, and remind him that, in that particular district, a large number of small municipalities were formed by means of a very simple process, and had worked well; he would admit that the formation of small municipalities was expedient and advisable in that particular district, though as a general rule it would not be desirable to establish such municipalities. When that district was first brought under the British Government, there was found, in the small towns, a system of taxation on non-agriculturists, which would be abolished as a source of imperial revenue. The Commissioner of the district, Sir Bartle Frere, very wisely used the opportunity of retaining this tax, and making it the germ of a municipal fund. The consequence was, that the people, accustomed to the tax and feeling no burden, found themselves in the possession of a small fund to meet the demands of sanitation, water-supply and other municipal wants. Here was a case in which, if there had been a prohibition against the establishment of municipalities in towns of small size and small population, the work which was then accomplished could not have been carried out, and the formation of these municipalities, attended with no irritation and no discontent, would have been impossible.

The next point to which Mr. Chapman had referred was the necessity of distinctions in the constitution of municipalities. In this matter the Bills which the Council had passed, or were about to pass, did recognize distinc-

tions. But the principle therein affirmed was that it should rest with the Local Governments to determine what constitution was applicable to particular localities. The Council had passed the Panjáb Municipalities Act, which was to be extended by the Bill under discussion, in a form which would admit of the election or nomination of municipal committees according to the discretion of the Local Government. He thought the Council had fully recognised the principle that there were to be different classes of municipalities, but had at the same time decided that the determination of the question under which class a particular municipality should be brought was better left to the discretion of the Executive Government.

Then, there was another point, namely the question of taxation, on which his hon'ble friend would lay down a broad principle. He admitted the great variety of circumstances in different districts, and in different towns in the same district, and yet he would impose restrictions on the Executive Government. MR. ELLIS would remind his hon'ble friend that an unlimited power of taxation was not given by this or any other Bill passed by the Council. First, there was the very substantial restriction that the particular form of taxation must be agreed to by the municipal bodies themselves; and MR. ELLIS thought that, as they were composed of the people who were to pay the taxes, they were good judges of the form of taxation to be imposed. Secondly, before the Local Government could carry out a scheme of taxation, the form of taxation must be approved by the Government of India. His hon'ble friend asked why different systems were followed in the case of the land-revenue and in the case of municipalities. MR. ELLIS maintained that there was no difference in the two cases. In the Bill relating to the assessment of revenue in the North-Western Provinces, it was laid down that the mode of assessment should be subject to the general principles laid down by the Government of India, while the determination of the assessment itself was left to the Local Government; so that the system followed was precisely the same as regarded municipal taxation and land-revenue assessment.

Another broad principle which his hon'ble friend contended should be laid down by law was as to the publication of accounts. MR. ELLIS need hardly say that he cordially concurred. But he contended that that principle was fully provided for already; he need only refer to the Government Gazettes, which, in Bombay at any rate, were every now and then full of detailed accounts of petty municipalities published to the world at large by the Local Governments.

The fifth point as to municipal administration to which his hon'ble friend referred was as to the determination of nuisances. Mr. Chapman considered it undesirable that this should be left to the Executive Government. But MR. ELLIS contended that municipal administration in respect of nuisances was the very point which the Executive Government concerned could best regulate, and the Bills passed by this Council proposed that the determination of nuisances should be left to rules to be framed by the Local Government. The circumstances of various towns in the same province were so varied, that an act which might be a nuisance in one place would not necessarily be a nuisance in another: and it was much better that these matters should be provided for by rules having the force of law, defining strictly the responsibility of the Executive, than to lay down by law rules of administration. There had been no difference, as far as he knew, in respect to the practice in this respect in the Bills before this Council. The only difference that he had heard of was in an embryo Bill for Bombay, which devoted some forty-eight sections to the subject of nuisances. He did not wish to question the propriety of thus dealing with nuisances in the municipalities in Bombay, if it seemed necessary to the Local Government to do so. But he did say that the course which this Council was adopting was a wiser one; he preferred that these matters should be left to be dealt with by rules to be framed by the Executive Government, and that was the principle affirmed in the Bill before the Council.

The sixth and last broad principle which Mr. Chapman would wish the Council to lay down was to fix the amount to be expended by municipalities on certain definite objects of municipal expenditure. In the Panjáb Bill, it was

laid down generally that municipal expenditure should be confined to certain objects, but the proportion of expenditure for different branches of municipal administration was not fixed. MR. ELLIS thought the Council was wise in doing this. He quite concurred with his hon'ble friend in thinking that water-supply was one of the first objects on which municipal funds should be expended. Still, there were so many towns in which water-supply was not a first object, and in which other matters were more important, that it would be very unwise to lay down that a certain proportion of the funds, or a certain amount annually, should be devoted to the supply of water. Therefore he thought the principle laid down that municipal expenditure should be restricted to certain objects, without fixing any proportion for particular objects, was the right principle.

He believed he had now gone through every one of the points on which his hon'ble friend desired to lay down broad principles, and he thought that what had been done was amply sufficient to meet the wants of the case. We had laid down certain leading principles, which might or might not be the principles which Mr. Chapman approved; but MR. ELLIS thought that those principles were sufficiently well defined, and wherever we had left the details to the Executive Government, we had, he considered, done wisely. There was great mischief in entering too many details in a law: on the other hand there was great advantage in leaving to the Executive matters of detail which could easily be corrected if not found to work well; whereas, if those details were fixed by law, it would require a great deal of time before the law could be altered. He would, in conclusion, refer to the Bill which his hon'ble friend held in his hand, and which was about to be introduced into the Bombay Council. MR. ELLIS would warn his hon'ble friend to guard against carrying too far the principle which he advocated; he would warn him to guard against introducing into a project of law a great many details of administration, which were better left to the discretion of the Executive Government.

The Hon'ble SIR RICHARD TEMPLE had very little to say in the matter, having troubled the Council at some length on this same topic, in reference to the Bill recently passed for municipalities in the Panjáb. But perhaps he might remark generally, in reference to the speech of the hon'ble Mr. Chapman, that probably nobody sitting round this table here differed greatly from the general tenor of his remarks upon the various points to which the hon'ble member had referred. The only point on which we were at issue was, how far it was possible or expedient to put these definitions into positive law. If the hon'ble member asked why, if these provisions were desirable, they were not imported into law, SIR RICHARD TEMPLE answered, because we, sitting here as a Legislative Council, had not the knowledge nor the experience to enable us to do so. If we were asked why we did not do it, we would answer, because we found that we could not. If the Council would bear in mind the various matters to which the hon'ble member alluded as fit and proper to be imported into the law, and that he wanted a general indication of the views of the Government of India regarding the particular nature of the taxes to be imposed in reference to the tax-paying capabilities of the various towns and their general circumstances, and as to the size and classes of towns, such classification being made in reference to the advancement of intelligence and public opinion in those towns, and also as to the various kinds of property which were fit subjects of taxation, if the Council would reflect on the magnitude, variety, and uncertainty of all these facts, they would at once see the enormous difficulty of the task which the hon'ble member would impose on the Legislative Department. Great as was our confidence in the ability of our hon'ble colleague in charge of the Legislative Department, and in the experience and acumen of our Secretary, he (SIR RICHARD TEMPLE) ventured to say that their powers would hardly be equal to such a difficult task. If we admitted that the Council did not of itself possess the requisite knowledge, we must rely on each Local Government to give us the information: we must rely on the rules which each Local Government must prepare. That being the case, it was better to say "We don't essay this task, but leave it to the Local Government." It was more satisfactory not

to attempt to do what we could not. And if the Council could not rely on the Local Governments, it was better to say so at once. This view would be borne out by what had fallen from Mr. Chapman in reference to local taxation. He said that it was impossible to say what taxes were suitable to particular provinces, and that we should therefore annex a schedule of every kind of taxation which might be imposed in municipalities. The hon'ble Mr. Bayley had very properly pointed out the formidable aspect which such a schedule would bear in the eyes of our Native fellow-subjects. If we legislated we should have to promulgate such a schedule, and leave each Local Government to select, from amongst the taxes laid down in the schedule, the particular tax or taxes applicable to particular localities; instead of doing which, it appeared to SIR RICHARD TEMPLE better to say that the mode of taxation should be left to the discretion of the Local Government. It was simply a question of possibility. Under Mr. Chapman's scheme, we would be pretending to do what we knew we could not do. SIR RICHARD TEMPLE thought he need only add that, in reference to the Government of India indicating its views and policy regarding municipal taxation generally, perhaps the hon'ble member hardly recollected that the Government of India had done that in a memorable resolution issued in the summer of the year 1868. That resolution was very carefully considered by the Governor General of India in Council. Almost every member of the executive Council had had a share in the elaboration of those rules, and if an elaborate indication of the views and policy of the Government of India was required, it was to be found in that resolution, to which he must refer the hon'ble member.

With reference to the audit of municipal accounts, he had to remind the Council that the accounts of the principal municipalities in India were subject to complete audit at the head-quarters of the Financial Department. That audit was as efficient as it could be made, and it could not be made more efficient by any legal enactment. Then, as regards the provincial funds, special provision was made in the resolution of December 1870, establishing the provincial services, that the accounts were to be submitted to the same audit as in the Public Works Department, and due effect had been given to that resolution. And, as regards the remaining local funds, he might remind the Council that those local accounts were subjected to precisely the same audit to which all other civil expenditure was subject; and as the system of accounts was established on a special report made by the Commissioners appointed from England, we might be entitled to presume that the system was as good as modern experience could make it. He failed to perceive that anything more could be supplied by legislative enactment. With these remarks he would support the Bill.

The Hon'ble MR. HOBHOUSE said, as his hon'ble friend, Mr. Chapman, had thought fit not to oppose the motion, he did not feel it necessary to say more than a few words in reply, and for this reason, that his knowledge of India was so slight that, when he got out of the hard and somewhat narrow ground of fact on which he presented the case to the Council, he felt himself at a great disadvantage in discussing the subject. Therefore he would only remind the Council that we were not discussing the matter generally, but were proceeding on the ground that there was something existing in the Central Provinces, which something we were continuing in that modified form which approved itself to this Council on the occasion of passing the Panjáb Act.

His Excellency THE PRESIDENT said: "This discussion is so entirely a revival of that which was raised by the hon'ble member (Mr. Chapman) when the Panjáb Municipalities Bill was under the consideration of the Council, that I do not feel it necessary to repeat, now, the observations I then made on the views of the hon'ble member.

"The discussion which has taken place to-day will, I think, be useful, as showing the hon'ble member and the Council that, however desirable it may appear to be to lay down what are termed broad and comprehensive principles upon a subject of this kind, the difficulty of doing so, and of grappling, in a general law, with any single one of the many points raised by the hon'ble Mr. Chapman, is very great. The hon'ble member will see, in the first

place, that to lay down for all India any hard-and-fast line, for the purpose of determining whether a town shall or shall not be formed into a municipality, would be exceedingly difficult; he will see that it would also be exceedingly difficult to decide, by any general rule based upon population, that one town shall have a system of self-government, and another, perhaps a few hundred below the standard of population, shall be debarred from the same privilege; he will see, again, from what has passed to-day, that it would be unadvisable, even if it were possible, to include in the schedule of any Bill all the different forms of taxation which, for municipal purposes, it may be found desirable to levy in all parts of India; he will see, on consideration of the clauses in the draft Bill for the Presidency of Bombay to which he has referred to-day, that it would be difficult, if not altogether impossible, to embody in any general measure those minute sanitary and police regulations which it may be necessary to apply to towns differing in almost every respect in which it is possible that one town can differ from another; he will see, not only how difficult it would be to do all this, but also that, if the difficulties could be surmounted and all possible taxes were to be enumerated, all sanitary and police regulations were to be embodied, and a maximum of municipal taxation were to be laid down in one general Act, the tendency of such legislation would be contrary to the policy which he himself is really anxious to carry out. The probable effect of including minute sanitary and police regulations in a general law would be to import into towns which were not fit for them complicated sanitary regulations, and to lay down a maximum of taxation which would be applicable to all towns, and include, for example, Calcutta and Bombay, would be of little or no use for the purpose of restricting the rate of municipal taxation, and might even have an opposite effect, for the law might be interpreted as a direction to impose the maximum rate.

"For these reasons, we have decided, in dealing with the questions as to the alteration of the municipal laws in different parts of India which have been brought before the Council this year, not to introduce any general scheme for municipal taxation. These reasons have been supported by the evidence which we have received that the municipal law which we have continued for the Panjáb, and propose to continue for the Central Provinces, has hitherto worked well. We have heard from my hon'ble friend (Mr. Egerton), who has filled a high office in the Panjáb for many years, also from His Honour the Lieutenant Governor of Bengal, and from my hon'ble friend on the right (Sir R. Temple), who have been charged with the administration of the Central Provinces, that this form of legislation has answered in the Panjáb and in the Central Provinces; and when I recollect that my hon'ble friend opposite (Mr. Chapman) comes from a presidency where this elastic law is not in operation, but where the municipal law is more precise, I cannot but, as a matter of evidence, prefer the testimony of those who speak from personal experience.

"I have been led to make these remarks in order to show the hon'ble member that the Government have carefully considered this question, and that they have felt the wiser course to be to accept what has been proved to be successful, and not to overweight the statute-book with laws of minute detail, which, in practice, might be found inconvenient and possibly dangerous.

"I would only say one word more. A remark fell from my hon'ble friend in regard to the ultimate success of representative committees for municipal purposes. I have had some opportunities of ascertaining what the present state of representative municipal government is in different parts of India, and I am happy to say that I have had satisfactory evidence that, in some parts of India at any rate, representative municipal institutions have worked well. The realization of the full advantages of these institutions must, of course, be a matter of time, and will require the education of more than one generation; but in Sindh, the Panjáb and the Central Provinces, I was assured that the representative municipal committees have acted with independence and managed their own affairs well and satisfactorily.

"I wish therefore to say that, as far as my knowledge enables me to speak, I believe municipal representative institutions have already worked well in many parts of India, and I am convinced that the introduction of representa-

tion in the management of local affairs will ultimately prove a great security to the Government, and an advantage to the people of this country."

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE then moved that the Bill, together with the Statement of Objects and Reasons, be published in English and in Urdú in the *Central Provinces Gazette*.

His Honour THE LIEUTENANT GOVERNOR said that, on the last occasion on which the hon'ble member in charge of the Legislative Department had made a motion of that sort, he had asked whether any hon'ble member demanded any explanation on the subject in so defiant a tone that, remembering the hon'ble member's fierce and unbridled oratory that preceded that motion, HIS HONOUR felt too much terrorised to ask for any explanation. But if he dared he would now ask why a motion of this kind should be laid before the Council when they were never accustomed to such motions before. His impression was that the publication of Bills was an executive act within the competency of His Excellency the President.

His Excellency THE PRESIDENT said that the motion was necessitated by a new Rule which provided that—

"when any motion mentioned in Rule 18 is carried, the Bill shall, together with a Statement of its Objects and Reasons, be published in English in the *Gazette of India*.

"The Bill and Statement shall also be published in such official Gazettes and in such Vernacular languages (if any), as the Council in each case decides to be necessary for the purpose of giving notice to the communities affected by the Bill.

"For this purpose, the Council shall make an order at the Meeting at which such motion is carried, and may, from time to time, on the motion of any member, vary or cancel such order."

His Honour THE LIEUTENANT GOVERNOR proceeded. He stood corrected on that point. He had not given notice of motion, but he might say that it seemed to him extremely strange that, if the Bill was published in any Oriental language at all, it should be published only in a language which not one in ten thousand of the inhabitants of the Central Provinces understood. He would move that, instead of the word "Urdú," should be inserted the words "Hindí and Mahráthí."

The Hon'ble MR. HOBHOUSE said it had just been suggested to him that it would be proper to publish the Bill in Hindí, and he would ask leave to amend his motion accordingly.

His Honour THE LIEUTENANT GOVERNOR resumed. Another matter which he wished to notice was that, under the terms of the motion, the Bill was to be published. But what was the Bill? The Bill was nothing more than a Bill introducing into the Central Provinces the Panjáb Municipal Act. It was like publishing a "ditto." No one in the Central Provinces would know what the Bill actually was. Therefore, perhaps the hon'ble member would also accept another proposal, that after the word "Reasons" the words "and the Panjáb Municipal Act" be added.

The Hon'ble MR. HOBHOUSE intimated that he had no objection to the amendment.

The Motion that the Bill, together with the Statement of Objects and Reasons, and the Panjáb Municipal Act, 1873, be published in English, Mahráthí and Hindí in the *Central Provinces Gazette* was put and agreed to.

VILLAGE POLICE (NORTH-WESTERN PROVINCES) BILL.

The Hon'ble MR. INGLIS introduced the Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces, and moved that it be referred to a Select Committee with instructions to report in a fortnight. He had explained when he had asked leave to introduce the Bill, that the only alteration proposed to be made in the existing law was to make all chaukídárs in the North-Western Provinces, whether appointed under Regulation XX of 1817 or Act III of 1869, liable, on conviction before a Magistrate of misconduct or neglect of duty, to be punished by fine or imprisonment, a punishment which, at present, could be inflicted only on chaukídárs appointed under Act III

of 1869. This was the only alteration of the law proposed. In all other matters the Bill re-enacted and consolidated the provisions of the two laws which it was proposed to repeal.

His Honour THE LIEUTENANT GOVERNOR said, as far he saw, the Bill was a good Bill, and the only observation he would make would be in reference to a passage in the Statement of Objects and Reasons, which ran thus :—

"Now that these men have been put on a regular footing, and receive fixed monthly salaries, it seems proper that they should, as regards their appointment, discipline, and general management, be subjected to rules similar to those adopted for village-watchmen paid under Act III of 1869, while such portions of the old law, Regulation XX of 1817, as defined correctly their present duties and responsibilities, should be re-enacted."

He understood that, in the North-Western Provinces, the village police had been centralized; that there was not a Village Chaukídárí Fund, but a District Police Fund: he was not sure whether there was not one General Provincial Fund. And the result was that these chaukídárs had been put on a regular footing and received their pay from the central fund, and the central authority exercised more direct control over them. He need not remind the hon'ble member that, on the subject of village-watchmen, there were two schools: one maintained that it was better not to have a regular police in the country villages; that you should rather maintain the old village institution of chaukídárs doing village services, and partially doing the work of the Government in reporting crime and catching thieves. HIS HONOUR himself belonged to that school. On the other hand, another school maintained that the village chaukídárs should be put on the same regular footing as the ordinary police. He would deprecate carrying out that system. He hoped the result of this Bill would not be that these men would be put entirely under the power of the central authority, but that they should be allowed, to a certain extent, to remain on the same footing as that on which they had previously worked.

The Hon'ble MR. BAYLEY stated that the sole alteration of the existing law which the Bill proposed was to give a power to punish chaukídárs for misconduct or neglect of duty. This power was formerly given by an old Regulation, and he was sure that His Honour the Lieutenant Governor must himself have punished chaukídárs under that Regulation. It was only because that Regulation had been repealed that it was now necessary to re-enact it to the extent stated.

The Hon'ble MR. ELLIS entirely concurred with all that His Honour the Lieutenant Governor had stated with reference to the two classes of village police. One class was the old village police, to be improved to the best of our ability; another class were appointed under the District Police Act. MR. ELLIS entirely concurred that we should do all we could to improve and maintain the old village police, and not attempt to do village police work by means of the district police. As the Bill first came up, it appeared to the Government of India to have in it provisions not in accordance with this view, and in consequence it was modified by the Government of the North-Western Provinces so as to confine it to the better organization and better control of the indigenous village police.

The Motion was put and agreed to.

The Hon'ble MR. INGLIS moved that the Bill, together with the Statement of Objects and Reasons, be published in English and in Urdú in the *North-Western Provinces Gazette.*

His Highness THE MAHÁRÁJÁ OF VIZIANAGRAM, in giving his entire concurrence to the Bill, proposed that, as the North-Western Provinces bordered upon the Central Provinces of British India, a translation of the Bill in Hindí and Mahráthí should be published in the *North-Western Provinces Gazette.*

His Honour THE LIEUTENANT GOVERNOR supported the proposal of His Highness as far as regarded publication in Hindí: but said that if a knowledge of the Bill was to be brought home to the people, it should be published in a language which was understood by the people. Not one in a thousand understood Urdú.

The Hon'ble MR. INGLIS observed that, as there were no Mahráthas in the North-Western Provinces, it would be useless to transate the Bill into that language, and that as Urdú was in general use throughlout those Provinces,

and understood by all educated persons who could read, it seemed to him unnecessary to have the Bill published in Hindí as well.

The Motion was agreed to with the insertion of the words "and Hindí" after "Urdú."

The following Select Committees were named:—

On the Bill to provide for the appointment of Municipal Committees in the Central Provinces—The Hon'ble Messrs. Chapman, Egerton and Inglis and the Mover.

On the Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces—The Hon'ble Messrs. Hobhouse, Bayley and Egerton, His Highness the Mahárájá of Vizianagram and the Mover.

The Council then adjourned to Tuesday, the 18th March 1873.

CALCUTTA,

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 18th March 1873.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Honour the Lieutenant Governor of Bengal.
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
The Hon'ble Sir Richard Temple, K. C. S. I.
The Hon'ble B. H. Ellis.
Major General the Hon'ble H. W. Norman, C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble F. S. Chapman.
The Hon'ble R. Stewart.
The Hon'ble J. R. Bullen Smith.
The Hon'ble R. E. Egerton.
His Highness the Mahárájá of Vizianagram, K. C. S. I.
The Hon'ble J. F. D. Inglis.
The Hon'ble R. A. Dalyell.
The Hon'ble Rájá Ramánáth Thákur.

OATHS AND AFFIRMATIONS BILL.

The Hon'ble MR. HOBHOUSE presented the preliminary report of the Select Committee on the Bill to consolidate the law relating to Oaths and Affirmations. He said the reason why we presented a preliminary report was that all the communications which were expected had not yet been received. But we considered it advisable, as we saw our way to some result, to let the Council know in a formal way what we were about. It would however be necessary to consider the further communications that might be received and make a final report on the Bill. At present, we adhered strictly to the principle upon which the Bill was introduced, except in one particular, in which we had made a small amendment. We had provided, in that part of the Bill which related to oaths of a peculiar nature, that no person should be compelled to attend personally in Court merely for the purpose of answering whether he will make the oath proposed. The amendment was made only for the purpose of securing that those clauses should be used for *boná fide* purposes: it could not interfere with the efficiency of the clauses. It was reported that they had been put into action merely for the purpose of oppression. If the evidence of a person was really wanted, he ought to be summoned to give evidence in the usual way, and then these clauses could be put properly

into operation. MR. HOBHOUSE thought it right to offer this explanation at the earliest period, because the Bill was introduced as being simply a consolidation measure, and in this one respect it was now proposed to deviate from the existing law.

CALCUTTA CARGO-BOATS LICENSING BILL.

The Hon'ble MR. HOBHOUSE also introduced the Bill to amend the law relating to the grant of licenses to cargo-boats plying for hire within the Port of Calcutta, and moved that it be referred to a Select Committee with instructions to report in a week. He had explained when he got leave to introduce this Bill, that it was merely for the purpose of putting the licensing of cargo and passenger-boats under one authority, according to the wishes of the Government of Bengal. The Bill was of the simplest construction, and was intended merely for the purpose stated. It was desirable to pass this Bill before the Council left Calcutta, and he thought one week would be sufficient time to enable the Committee to make their report.

The Motion was put and agreed to.

BURMA TIMBER DUTIES BILL.

The Hon'ble MR. HOBHOUSE asked leave to postpone the presentation of the report of the Select Committee on the Bill to amend the law relating to timber floated down the rivers of British Burma.

Leave was granted.

VILLAGE POLICE (NORTH-WESTERN PROVINCES) BILL.

The Hon'ble MR. INGLIS asked leave to postpone the presentation of the report of the Select Committee on the Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces. The translations of the Bill had not yet been published in the *North-Western Provinces Gazette.*

Leave was granted.

OATHS AND AFFIRMATIONS BILL.

His Honour THE LIEUTENANT GOVERNOR begged to suggest it would be necessary that the Council should pass some resolution regarding the presentation of the report on the Oaths Bill. As the reference to the Committee at present stood, they were directed to submit their report within a month.

The Hon'ble MR. HOBHOUSE observed that, when the Council directed that the report of the Committee should be submitted in one month, it meant within one month or as long after as might be found necessary. If there was any irregularity in reporting at a later period than one month, we could ask the leave of the Council to extend the time for the presentation of the report. But it appeared to him that there was no irregularity in reporting at a later period.

His Honour THE LIEUTENANT GOVERNOR thought that the Committee might report sooner than the time allowed, but were bound not to be later with their report.

His Excellency THE PRESIDENT thought that the rule in regard to this matter must be interpreted as an instruction, and not as involving any question of legislative competence to produce the report within the time specified.

The Hon'ble MR. HOBHOUSE remarked that he only yesterday received a letter from one of the Judges which would require consideration before the Committee could make their report.

TAXATION.

His Excellency THE PRESIDENT wished to mention to hon'ble members of the Council that papers relating to taxation would shortly be circulated.

The following Select Committee was named :—

On the Bill to amend the law relating to the grant of licenses to cargo-boats plying for hire within the Port of Calcutta :—His Honour the Lieutenant Governor, the Hon'ble Messrs. Stewart and Bullen Smith and the Mover.

The Council then adjourned to Tuesday, the 25th March 1873.

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

No. 2145, dated 28th March 1873.

RESOLUTION—By the Government of India.

Read—

Minute by the Hon'ble Sir Richard Temple, dated 27th March 1873.
Budget Estimates for 1873-74, with Appendices.

THE Governor General in Council has already approved of the figures of the Budget Estimates for 1873-74, and the usual notifications will be issued to the several Local Governments and Administrations.

2. A comparison between the estimate of the ordinary revenue and expenditure for the year 1873-74 shows a surplus of £220,000.

3. The cash balance in India at the commencement of the year is estimated at £19,300,000, and, at the end of the year, at £14,800,000, after providing for an expenditure of £3,878,000 on reproductive works, which, under ordinary circumstances, would have been met from loan funds.

4. The general condition of the finances is, therefore, satisfactory. Although the estimated surplus for the year 1873-74 is small, the estimates, both of revenue and expenditure, have been framed with caution; the estimate of the net receipts from opium is £5,385,000, which is less by 2¼ millions, than the receipts of 1871-72, and by 1½ million, than the receipts of 1872-73; and the state of the cash balances prevents any risk of financial difficulty during the year.

5. With respect to the future, His Excellency in Council believes that no additional taxation is required for the purpose of maintaining the finances of India in a sound and satisfactory condition. Besides the gradual expansion of the revenue which may reasonably be expected, there will be, in the course of the years 1874-75 and 1875-76, a reduction of expenditure of nearly half a million per annum, in consequence of the time having arrived when the Stock of the East India Company will be paid off. Any increase of expenditure which may be necessary in some branches of the public service, may, His Excellency in Council believes, be met by economy in others. The schemes for public works chargeable to loan funds have been revised, and, so far as reliance can be placed upon careful estimates, the completion of the system of guaranteed

railways, and the construction by Government of the railway and irrigation works now sanctioned or contemplated, will not entail any serious additional charge upon the annual revenues. The Government of India has, therefore, decided that it is not necessary, with reference to the present or prospective condition of the finances, that the Income Tax should be reimposed, or that any other tax should be imposed in addition to the existing sources of revenue.

6. The Government of India has also considered whether the Income Tax should be reimposed as a part of the ordinary fiscal system of India, while other taxes might, either immediately or eventually, be remitted or reduced. After a careful consideration of this alternative, and of the opinions expressed by the local authorities and officers in answer to the recent financial circular, the Government has determined that it would not be expedient to reimpose the Income Tax for the purpose of carrying this policy into effect.

7. As no legislative measure will be introduced in connection with the Budget of the coming year, it would be in contravention of the Indian Councils Act, 1861, that a financial statement should be made in the Council of the Governor General for the purpose of making Laws and Regulations. The minute recorded by the Hon'ble Sir Richard Temple, which contains the customary explanations of the Budget figures of the present year, together with his review of and opinions regarding the financial policy of the Government of India during the last four years, will be published, together with this Resolution, the Budget Estimates, and Appendices, in the *Gazette of India* for general information.

By order of the Right Hon'ble the Viceroy and Governor General in Council.

FINANCIAL DEPARTMENT,
28*th March*, 1873.

R. B. CHAPMAN,
Secretary to the Government of India.

MINUTE

BY THE

HON'BLE SIR RICHARD TEMPLE, K.C.S.I.

I have to present the budget of British India for the year 1873-74, together with my financial exposition in the usual divisions :—

1*stly*, the actuals for the past year 1871-72;

2*ndly*, the regular estimate for the current year about to close, 1872-73;

3*rdly*, the budget estimate for the coming year about to commence, 1873-74; and

4*thly*, the ways and means and the cash balances.

Before treating of each of these divisions in order, I must mention some slight alterations which have (with the sanction of the Secretary of State) been made in the form of the accounts.

On the receipt side a new heading of receipts in aid of superannuation, retired, and compassionate allowances is presented. This consists chiefly of the subscriptions by officers on account of those pensions for widows and orphans which were formerly paid from the military and medical funds, but which are now paid by the State, since the abolition of those funds in 1866, and it includes transfers from the capital deposits originally the property of those funds, but now the property of the State. In my previous budget statements they were included in the miscellaneous heading.

On the expenditure side a new heading appears for civil furlough and absentee allowances, an item which has always been shown separately in the home accounts. And, on this occasion, the loss by exchange on remittances to the Home Treasury which used to be included in miscellaneous, is shown separately, by reason of the special importance of the item. The miscellaneous heading, which was unduly large, has thus been reduced to a more manageable size. The heading of medical services, which has heretofore appeared in the budget statements, disappears in the present statement, having been transferred to the heading of allotments for provincial services. The greater part of the civil medical grants had previously merged in these allotments, and the remnant now follows.

ACTUALS, 1871-72

I thus begin with the actual figures of the year 1871-72. In my last financial exposition it was explained that, according to regular estimate, a surplus of £2,700,000 was expected of income over ordinary expenditure, owing mainly to gain in the opium department, and partly to savings and reductions in expenditure. It is now seen, however, that the surplus actually amounts to £3,124,178, or more than three millions, owing to still further savings and reductions in expenditure. The fact of this amount exceeding actually even the large surplus shown in the regular estimate, is satisfactory, as proving that

ACTUALS, 1871-72.

this regular estimate, though very favorable, was yet cautious, and that the economy enforced so successfully up to the tenth month of the year, when the regular estimate was prepared, was strictly maintained up to the last day of the year. And in this advantage all departments have shared alike, according to their respective proportions, the civil branches generally, the army, the marine, the public works, the railways. The main causes of this surplus were set forth by me last year. Doubtless its magnitude will be regarded as very satisfactory; but our satisfaction must be moderated by the recollection that more than half of the surplus arises from a gain in opium, on which we had no right to count. Still the result is partly due to our own management; for the ordinary expenditure of the year (just under 47 millions) was low; quite the lowest that has been seen for several years past.

It will be observed then from the appended statement that the receipts of the year 1871-72 were £50,109,093, or more than 50 millions; while the ordinary expenditure amounted to £46,984,915, or nearly 47 millions, leaving the surplus of £3,124,178, or more than 3 millions.

Besides the ordinary expenditure, there was an extraordinary expenditure of £1,628,474, or 1½ millions, on remunerative public works. Even with this extraordinary expenditure, for which we are allowed to provide by loan, the income of the year exceeded the aggregate of expenditure, ordinary and extraordinary together, by £1,495,704, or 1½ millions.

Thus ends the most prosperous year yet known in our financial history, since the establishment of the budget system.

REGULAR ESTIMATE, 1872-73.

I next turn to the second part of the subject, namely, the regular estimate for the current year 1872-73. On this, as on previous occasions, the estimate is based on actual figures for periods ranging from 9 to 11 months for the various provinces and departments. It is to be remembered that the remaining months for which we still await the actual figures, are of importance, and that, notwithstanding all the care which can be exercised, many variations will probably occur between this estimate and the actual accounts of the year, when they shall be made up hereafter.

The budget for the year showed a surplus of £237,000 of income over ordinary expenditure. The regular estimate now shows a surplus of £1,354,000, or 1⅓ millions, the estimated receipts amounting to £49,905,000, or nearly 50 millions, and the estimated ordinary expenditure to £48,551,000, or 48½ millions.

The year has been generally propitious. The rains have been abundant; the harvests, for the most part, good, and, in some provinces, very fine. The condition of the people being prosperous, the revenues have flourished. Though the import trade has not been in a favorable position, and though some exports have fallen off, yet several staples of the export trade have advanced excellently. We have enjoyed immunity from misfortunes of season, and from those political contingencies and troubles which so often have disturbed financial arrangements.

There have also been special causes for the production of surplus, and once more I have to dwell on the fact that the surplus of the year is attributable mainly to gain in opium. In the budget £7,700,000, or 7¾ millions, were set down for opium receipts; but in the regular estimate there appear £8,677,000, or 8⅔ millions; the difference in our favor amounting to £977,000, or nearly 1 million. Of the increase, more than one-third (£369,700) is in the Malwa opium, the revenue of which has amounted to £2,614,700, a sum which is so high as to be almost without precedent, even in this speculative division of the trade. The increase (£607,300) in the Bengal opium is not owing to the quantity, inasmuch as the number of chests is fixed under our system to within a very narrow margin, but owing to the prices rising beyond the rate assumed in the budget. The rate stood at Rs. 1,200, or £120 per chest

in the budget; the actual rate has been Rs. 1,386, or £138-12*s*. per chest. It is hardly necessary to advert to the uncertainty which always hangs over the subject of prospective prices of opium. The result, as is so well known, may be affected by circumstances both in China and in India. We are not aware of any present circumstances in China which could be adduced as causes of the high range of prices. But in India, there is one cause immediately apparent; namely this, that the poppy crop, which at the time of bringing forward the budget promised a fair yield, gave, ultimately, an indifferent yield. Instead of the 55,000 chests expected under the earlier condition of the harvest, there was, in the end, an out-turn of only 46,656 chests. Both figures include the supply for consumption in India itself. Thus, in the first half of the year, there was an apprehension of a somewhat short supply, a circumstance specially calculated to make prices rise and to maintain them at a high standard.

REGULAR ESTIMATE, 1872-73.

But, further, this comparatively short supply has affected the estimate in another direction. Less opium having been produced in the Bengal agencies, there has been less to be paid for than was expected. Consequently the payments, estimated in the budget at £2,323,000, have fallen in the regular estimate to £1,818,000, showing a diminution of £505,000.

Thus the difference in the opium estimate amounts on the receipt side to £977,000, and on the expenditure side to £505,000; in all to £1,482,000, or 1½ million. Whether this difference is wholly favorable to the future of our finance may be a question. But that it more than accounts for the surplus in the current year is unquestionable. And it is the main support of the fortunate position of the financial year upon which I am commenting.

There has not been any marked increase under the heads of revenue in the regular estimates as compared with the budget estimates. Under most heads the budget estimate has been well sustained, and no more. To this, however, there are some exceptions to which I must advert.

The land revenue shows an increase of £329,000. This, to the extent of more than £100,000, has arisen from the payment in 1872-73 of revenue suspended in the Bombay Presidency at the end of 1871-72. The remainder of the improvement is due to the favorable season to which I have already adverted.

To the same general cause must be attributed the improvement of £82,000 under excise on spirits and drugs.

Under customs there is an increase of £61,000, due entirely to the great expansion of the export trade in rice.

In the post office, the receipts show a falling off of £213,000. This decrease is not, however, in the cash receipts paid in by the public, which are improving, slowly though steadily, but in the receipts from official postage during the year. The new rules for the abolition of franking, and the substitution of official postage stamps, have fully come into force, and have caused economy to be exercised to a degree greater even than was expected. The reformed system causes every official to observe closely the charge that he incurs when transmitting letters on the public service, because that charge is rendered immediately apparent by the value of the stamp affixed. Consequently, the numerous public departments, having had their attention practically down to the subject, have exercised an unprecedented economy, not only in respect to the weight of their despatches, but also in respect to the mode of transmission. A large part of the despatches are now sent by the slower and cheaper transit; the more urgent letters only being reserved for the quicker and more expensive transit. And, inasmuch as, by existing rules, the value of official postage is credited in the receipts of the postal department, there is a decrease in the total of receipts. This is in some degree nominal, and is, so far, balanced by decrease of recorded expenditure under the several service heads. But it really represents a considerable saving in the cost of transmitting the mass of official letters throughout India. And, accordingly, the regular estimate shows on the other side of the account an actual decrease of £51,000 in the postal expenditure.

REGULAR ESTIMATE, 1872-73.

In the mint the receipts show a large decrease, which arises from the fact that the amount of silver bullion tendered by the public for coinage, on which a seignorage of 2 per cent. is levied, has been insignificantly small. I shall hereafter revert to this somewhat remarkable circumstance.

There is also some decrease in forest receipts. This is of less importance, inasmuch as it only indicates that the department has done less work than was expected, and has incurred less expense. As has been explained on previous occasions, this is a spending rather than a receiving department. And though we may continue to regret that its revenues do not increase faster, still we must always bear in mind that its main work, which it performs efficiently, is the preservation of the national wealth of forests with which India is endowed.

The net result on the receipt side of the estimate is an increase of £1,134,000, or upwards of one million.

On the expenditure side I will advert, firstly, to items of decrease, and, secondly, to items of increase.

There are savings and reductions in various civil departments, such as that of land revenue, decrease £54,000; of assessed taxes, decrease £17,000; of customs, decrease £10,000; of salt, decrease £23,000; of administration, decrease £27,000; of law and justice, decrease £144,000. To a considerable extent these decreases are due to the saving in official postage, as already explained. The decrease under law and justice is partly, nominal, owing to the exclusion of the receipts and charges for the service of processes in the Madras Presidency, which were included in the original estimates.

There is a decrease of £73,000 in marine charges by reason of less work being done than usual in the Bombay dockyard.

There is a large decrease, £52,000, under forests; but, as has been just seen, there has been a decrease of receipts also.

The decrease of £51,000 under post office has been just explained.

And the great decrease under opium has been already adverted to.

There is a reduction in army charges; the budget showed £15,862,000, whereas the regular estimate shows only £15,646,000, the difference less being £216,000, or nearly a quarter of a million. In both cases the total is satisfactorily low. But it must be remembered that (as stated in my last exposition) there has been a transfer of charge for certain barrack expenses from the military department to the public works department. After allowing for this, however, I believe that the estimate is indicative of strict economy.

This great item of expenditure is divided into two heads, namely, the charges incurred in India, and the charges incurred in England on account of India. The charges incurred in India may be summarized thus: The budget showed an expenditure of £12,100,000; the regular estimate shows £12,025,000; a decrease of £75,000. The decrease is owing to the postponement of the camps of exercise in the Madras and Bombay Presidencies, to the retirement of artillery officers and breaking up the head quarters of the 24th Brigade Royal Artillery, to the abolition of the Poona depôt, to favorable market prices for grain and forage, to savings in the Military Account department, to a less outlay for clothing, barrack, medical, and ordnance supplies, and to a less expenditure for sea transport and non-effective charges. The estimated saving from these sources is about £238,000. On the other hand, increased provision had to be made in the revised estimate for—

	£
The Looshai Expedition	25,000
Camps of Exercise at Delhi (arrears) and Hussun Abdal ...	8,000
For two Regiments of Madras Native Infantry returned from China and the Straits	22,000
Asylums in the Madras Presidency transferred from civil to military estimates	9,000
Arrear charges, Order of British India	15,000
Special payments to artillery officers on retirement	9,000
Arrear charges, Overland Troop transports	30,000
Freight paid in India on Military Stores	45,000
	£ 163,000

Setting these increments against the savings, there appears a net saving of £75,000 upon the budget. REGULAR ESTIMATE 1872-73.

The expenditure of the army has been analysed with extreme care by the department over which my hon'ble colleague (General Norman) presides.

The military receipts in India were set down at £840,000, but the actuals for the first eight months of the year justified the revised estimate of £870,000. The causes of this improvement are the discharge purchase-money of British soldiers in India, and the messing contributions for passages by the overland troop transports, which are now credited to the Indian instead of to the Home Government; and the receipts, by a larger sale than was expected, of stud cattle, clothing, medical and ordnance stores.

On the other hand a large credit expected in England was not realised, so that the decrease there neutralises the improvement in India.

For the charges incurred in England on account of India, the revised estimate shows a reduction of £141,200, of which £25,000 is in furlough allowances of Indian officers, owing to a decrease in the number of officers on furlough, and £100,000, are savings in military stores.

On the other hand, there are several items of increase on the expenditure side of the regular estimate.

The item of interest on service funds and other accounts rises from £527,000 to £584,000, mainly by reason of an adjustment of a claim with interest on the part of the Madras Civil Service Annuity Fund for sums overpaid by the fund to Government on account of the annuities.

There is an increase of £97,000 under minor departments. This is owing to a charge of £57,000 for stores in England which, under the old system, would have been entered under miscellaneous; to the completion of the general census of British India, the original provision for this important operation not having been found sufficient in some provinces; and to its having been found necessary to make a special grant in order that Indian products and fabrics may be worthily represented at the Vienna Exhibition.

The increase of £23,000 in the political charges arises from the transfer to this head of the Mairwára battalion; to the unforeseen expenses of durbars; and to additional charges on account of the late Yarkand mission and the Seistan arbitration.

There is a considerable increase of £240,000 under loss by exchange. It will be remembered that, in the budget, we calculated that the drawings by the Secretary of State would amount to 13½ crores of rupees during the year, at an average rate of 1*s.* 11*d.* to the rupee, which would represent a loss by exchange in round numbers of £500,000. It is now estimated that the bills paid will exceed 15 crores, at an average rate of 1*s.* 10¾*d.* to the rupee, representing a loss by exchange of £740,000. This sum of 15 crores includes the payment for a sum of £403,040, which was remitted to England in May last by bills purchased in India. The excess in the drawings was chiefly occasioned by a diminution in the amount of railway capital for India intended to be raised in England. Some of the capital (£1,100,000), for the receiving of which provision had been made, was subsequently countermanded as not being required. This diminution was very desirable, because the Indian treasury has still a large amount of unexpended railway capital in hand.

The increase of £278,000 in the allotment for provincial services is owing to additional grants having been found necessary, for Bengal of £113,500, chiefly for compensation for a court house made over to the military department as a hospital for the troops, and for the capitalisation of certain annual charges at the debit of the Imperial Government—for Bombay £107,400 for the construction of a small cause court house and of buildings required for the collection of the salt revenue—for Burmah £45,000, in order to enable the administration to execute various useful works which are urgently needed.

The increase of £216,000 in public works ordinary has occurred in consequence of its having been found necessary to assign additional funds for the prosecution of various works; and in consequence of the transfer to this head

FOR ESTIMATE. 1873. of items, which it was originally intended to defray from loan funds, but which are now found to be not properly so debitable.

The net charge for guaranteed railway interest was originally estimated at £1,800,000, but is now expected to amount to £2,117,000, or more than 2 millions, which is considerably larger than any sum ever yet shown on this account, and suggests serious consideration. This charge is made out in this wise: the guaranteed interest amounts to £4,665,000 on a capital sum of £95,000,000. Against this there is a set-off of £2,548,000, estimated net traffic receipts on 5,073 miles of open line, which receipts arise from £6,864,000, estimated gross traffic earnings, less £4,316,000, working expenses. The net traffic receipts deducted from the guaranteed interest leave the £2,117,000 as cost to the State.

The increase of the net charge upon the Government does not at all arise from the gross amount of the interest being in excess of the estimate; on the contrary, it is rather less, by reason of the capital subscriptions being less than the anticipation; which circumstance aggravates the fact of the net charge being so much greater. What, then, are the causes of the excess? In the first place, there has been a change for the better in accounting, whereby the charges for the stores expended in working are transferred more rapidly than heretofore from the capital account to the revenue account. This has caused an unusually heavy debit during the current year. Then there has been a recurrence of disastrous floods, injuring or destroying masonry works on several lines, causing additional expense, and also interruption of traffic. Another cause is want of expansion in the traffic. Not indeed that the total of gross traffic earnings has actually declined; on the contrary, it was slightly greater during the last calendar year, 1872, than it has ever been. But it has remained almost stationary during the three years ending with 1872, notwithstanding that 400 miles of new line have been opened. In 1870 it stood at £6,247,000; in 1871 at £6,125,000; in 1872 at £6,275,000. This stagnation, on the whole, is the more remarkable, inasmuch as, during the period, the passenger traffic has steadily increased. Some 18 millions (18,048,547) of passengers travelled in 1870, whereas some 20 millions (19,907,781), or 2 millions more, travelled in 1872. But the goods traffic has not increased on the whole; while, on some lines, it has even declined. In my last exposition there was allusion to the special enquiry regarding the falling off on the East Indian line, which was traced partly to the state of the harvests and partly to variations in the rates. With a view to affording further inducements to traffic, the railway company have given prompt attention to the rates, and have judiciously reconsidered them. On the Great Indian Peninsula line there was disappointment in respect to the total earnings (notwithstanding increase in many articles) by reason of the falling off in the transport of cotton from the central regions of India to the port of Bombay. But, whatever special causes may be assignable in particular years, the main fact remains that the goods traffic has for some years been either stationary or slightly retrogressive. And, whatever may have been the fluctuations in trade, it appears that the roads and rivers which compete with the railways have all this time experienced no lack of traffic. Thus, we cannot but fear that the railways are not used by the people as much as we might hope. And we must reflect more and more closely on the question whether the railway management and administration might not be more practically adapted to the needs and the habits of the country.

On the other hand, there has been no proportionable increase in the working expenses. Economy has been, and is being, enforced. The train service is more economically managed; the engineering establishments have been reduced; European agency has in many stations been replaced by cheaper native agency. On some lines, especially the East Indian, and the Punjab and Delhi, the diminution of expenses has been demonstrably great. On the East Indian line the percentage of working expenses amounted to 40·5 per cent. on the earnings, which will apparently bear favorable comparison with the corresponding percentage on some of the principal English lines: for instance the—

48	per cent.	on the Great Northern,
45	„	on the Great Western,
45	„	on the London and North-Western,
45	„	on the Midland,

and the 47, average on the lines throughout England and Wales.

In order to show how far the lines are beginning to prove remunerative undertakings, I subjoin an abstract statement showing the percentage of profits on capital withdrawn for all the guaranteed railways in India. It will be seen that, on the whole system, the percentage still falls short of the guaranteed rate of 5 per cent. :— REGULAR ESTIMATE 1872-73.

NAME OF GUARANTEED RAILWAY.	1871. Percentage of profits on capital withdrawn.	1ST HALF OF 1872. Rate of percentage per annum of profits on capital withdrawn.
East Indian, Main	4·90	5·98
Ditto, Jubbulpore Extension	1·23	*4·44
Eastern Bengal	3·07	1·84
Oudh and Rohilkund	0·22	0·38
Sindh, Punjab, and Delhi...	0·14	1·16
Madras	2·69	2·76
Great Southern of India	1·91	1·52
Carnatic	1·71	1·92
Great Indian Peninsula	2·97	3·92
Bombay, Baroda, and Central India	2·66	5·16
All Guaranteed Railways	3·00	3·96

* Exceptional, owing to adjustments.

I may be pardoned for this brief digression, inasmuch as the finance of the year is affected adversely to the extent of £317,000 by the guaranteed railways.

The result on the expenditure side of the regular estimate, increase balanced against decrease, is a net increase of £17,000.

The total result, as already seen, is the surplus of £1,354,000 of income over ordinary expenditure.

Besides the ordinary expenditure there is in this the regular estimate an extraordinary expenditure on reproductive works of £2,307,000, or 2¼ millions, which amount corresponds fairly with that set down in the original estimate. Of the two great divisions, that pertaining to canals shows somewhat less expenditure by reason of the postponement of the Sarda canal, while that of State railways shows somewhat more. The approximate agreement in this instance between the totals of the regular and of the original estimate is worthy of notice, inasmuch as, in previous years, the actual expenditure on these works has been much less than that proposed in successive budgets, the cause of the difference having been, generally, delay in the maturing of the projects, and in the submitting of complete plans for sanction. But now that the organization of these works is in a more advanced state, the rate of progress becomes comparatively quicker; and, thus, the accounts of the year are presenting the largest expenditure ever yet attained in this branch. While, on the one hand, this result is satisfactory, as indicating the advance of material improvement, yet, on the other hand, it suggests precautions for maintaining strong cash reserves in the treasury to meet the rising demand for funds.

The surplus of income over ordinary expenditure is the outturn of an estimate which, though made near the close of the year, may fail to accord entirely with the actual facts yet to be finally ascertained. But it may not be otherwise than opportune to pass in review the aggregate of surplus which has been obtained since 1869-70. The actual surplus then has been as follows :—

	£
1869-70, actual	118,669
1870-71 „	1,482,990
1871-72 „	3,124,178
Add—	
1872-73 „ (estimated)...	1,354,000
TOTAL ...	£6,079,837

REGULAR ESTIMATE, 1872-73

Allowing for some variation yet to arise in the surplus for 1872-73, we have a surplus for the four years of more than six millions.

It may be well to recall to mind the chief causes which have produced this important result. I say causes, inasmuch as it is attributable not to any one circumstance, but to a combination of circumstances.

One main reason has been the prosperity of the opium revenue. Within the four years, we have received from this source, net (after deduction of expenditure), £3,894,140 in excess of the budget estimates. Year by year, the opium estimate has received the approval of the Secretary of State as being prudent and in accord with the known facts of the time. The actual receipts, however, have proved larger than the anticipation. This, too, happened during a period when some authorities seem to consider the Indian opium trade as threatened by serious competition from the expanding culture of the indigenous drug in China and even from the produce of other countries—when the Indian opium harvests have been considerably below the average,—and when the area under poppy cultivation has not materially increased. Indeed, the fiscal facts point to the conclusion that the demand in China for the Indian drug is firmly sustained. Doubtless the ability of China to pay a good price for the opium is maintained by the growing wealth and rising trade of that country.

The full increase (£2,980,554) which occurred in the opium receipts, and the full decrease (£913,586) in the charges, could not indeed have been entirely foreseen. But the occurrence of some improvement did not excite surprise, because the possibility of its occurring was foreseen, inasmuch as the estimates were purposely made with cautious moderation. Looking to the disturbing elements to which some parts of the budget were exposed; looking also to the deficit which had extended over three years, the recurrence of which it was necessary to avert, we desired that the opium estimates should be made absolutely secure.

Another cause consists, no doubt, in reduction of expenditure. As shown in my last exposition, the total expenditure was in—

	£
1868-69	52,036,722, or 52 millions.
1869-70	50,782,452, or 50¾ „
1870-71	49,930,695, or 50 „

But the expenditure was in—

1871-72	46,984,915 or 47 milions.
1872-73 (estimated)	48,534,000 or 48½ „

The expenditure on public works ordinary stood thus:—

	£
1867-68	5,972,626
1868-69	6,632,135
1869-70	5,347,037

But the expenditure was brought down to £3,811,167 in 1870-71. And if the reduced grants of subsequent years be added to the public works charges transferred to provincial services, the total for 1872-73 will hardly exceed the last-named sum.

The army expenditure stood thus in—

	£
1867-68	16,103,296
1868-69	16,269,581
1869-70	16,329,739

whereas in 1872-73 it stands at £15,646,000.

In the other branches of the service it was not possible to obtain so considerable a reduction. But, in every department, we strove to keep down the budget grants to the lowest amounts possible, and then to secure economy and saving even within the limits of those grants. The detailed rules which operate in the direction of economy were vigilantly observed, and adherence to them in all particulars was insisted on. The financial control exercised in the numerous civil branches did no doubt contribute to the production of the surplus.

Furthermore, among the main causes of the surplus are the measures passed during the four years by the authority of the Legislative Council, consist-

ing of five Income-tax Acts. The revenue obtained under the operation of those Acts may be stated at net £4,453,232, or 4½ millions as seen below :— REGULAR ESTIMATE, 1872-73.

Year.	Receipt.	Expenditure.	Net.
	£	£	£
1869-70	1,110,224	41,701	1,068,528
1870-71	2,072,025	43,991	2,023,034
1871-72	825,241	29,566	795,575
1872-73	575,000	14,000	561,000
TOTAL	4,582,490	129,258	4,453,232

The total sum is equal to more than two-thirds of the amount of the surplus of six millions just stated. It is thus manifest that, without the income-tax, so large an aggregate of surplus would not have been obtained. And, whatever may be the importance of other facts operating in combination, this fact alone proves the importance of the measures passed by the legislature during the period under review, and illustrates the share they have had in the maintenance of our financial status.

If these 4½ millions be added to the proceeds of the direct taxation, including the license taxes, imposed since the establishment of the budget system in 1860, the aggregate of receipts from this source will amount to 14 millions sterling.

A consideration of the past condition of our finances compelled us to do all that could properly be done for the purpose of obtaining a substantial surplus. The condition of deficit had been so serious for three years, that it had become imperative to effectually obviate the risk of any future deficiency arising, and to ensure the application of an adequate remedy. At one time the cash reserves in the treasury were regarded as being too low for the demands of the public service. Effort was therefore made for the restoration of the cash balance to its normal strength. In regard also to the financial credit of the Government, it was desirable to prove that a state of deficit would be immediately superseded by a state of surplus.

We did not indeed make provision for so large a surplus as that which has accrued; nor was taxation imposed for that particular end. What we aimed at was financial safety supported by a moderate surplus. But, as the surplus has proved to be so great, there is cause for satisfaction in the thought that there has been no new or heavy burden on the mass of the people for the benefit of the general revenue; that the income-tax was very limited in its incidence; and that, except for a period of eighteen months, it has been levied at a minimum rate.

Further, I think that there are reasons for affirming that considerable as the surplus may have been, it has not been greater than what was needed in order to establish the finances in a strong position.

The accounts of the three previous years had shown deficit amounting, on the whole, to £6,299,216, or 6¼ millions of income as compared with ordinary expenditure, as will be seen thus—

	£
1866-67 (11 months)	2,517,491
1867-68	1,007,695
1868-69	2,774,031
TOTAL	6,299,217

I acknowledged this deficit expressly in my financial exposition on the 2nd April 1870; and added: "The deficit being 6¼ millions, of which only 3½ can be accounted for by the barracks and are susceptible of special justification, it must be admitted that the remainder, 2¾ millions, are due to excess of expenditure accepted as chargeable against current income; and represent deficit pure and simple without such special justification."

This large deficit was twice noticed by the Governor General (the late Earl Mayo) in the Legislative Council, once in November 1869, and once in April 1871.

Against that deficit we may now set the surplus just explained. I would repeat the opinion stated in my previous expositions, that, if our finance is to possess stability, the deficit of some years must, at least, be balanced by the surplus of other years. From this point of view, it is seen that the greater

REGULAR ESTIMATE, 1872-73.

part (though not quite the whole) of the abovementioned deficit has been counteracted by surplus.

In justice to Indian finance, however, it is to be noted that in one of the years just mentioned, namely, 1866-67, there were included only eleven months (owing to alteration of the financial year), which placed the exceptional period at a disadvantage. Also the preceding year 1865-66 was a year of surplus, shown in the financial statement at £2,766,068, but of which £1,028,089 we ascertained to be nominal, leaving £1,737,979 real surplus. If this circumstance be considered, then a similar result, namely, the balancing of deficit by surplus, will be apparent for the period previous to that on which I have been commenting. From the financial statements of my predecessors, the following years are found to be in deficit or in surplus respectively:—

Deficit of income as compared with ordinary expenditure.

				£
1860-61	...	...	...	4,021,385
1861-62	...	...	...	50,628

			TOTAL ...	3,643,672

			£
*Total shown	...	...	2,766,068
Deduct nominal	...	...	1,028,089
Leaving real	...	..	1,737,979

In these years, then, which complete the period since the establishment of our budget system, the deficit is, for the most part, counteracted by surplus.

It may be impossible to prevent the occurrence of deficit in some years. Such occurrence may arise from any one of the many chances to which the country is exposed. But it ought to be possible to produce an equilibrium between income and ordinary expenditure if taken on a series of years. And, if the period be reviewed since 1860, when the budget system was established in India, it will be found that we are not very far from attaining such an equilibrium between income and ordinary expenditure,—although an exact balancing of the account from 1860 to the present time might show that there remains something to be made up by means of surplus, if the principle, as above stated, should be accepted.

In stating the financial result, however, I do not intend to claim too great a degree of credit for our own proceedings. Something is due to causes beyond the control of the Government, though something also is due to policy and management.

I present, for the first time, a statement of the accounts of the system of provincial services announced in the Resolution of 17th December 1870; and commenced from the year 1871-72. The statement for these services is prepared uniformly with the imperial statement, and embraces the actual figures of 1871-72, the regular estimate of 1872-73, and the budget for 1873-74. I must explain, however, that this general statement is only a compilation from the detailed statements furnished by the several local Governments. There is some difficulty in the classification of the various heads of receipt and of expenditure, and in their proper distribution between provincial services and local funds. The organization of the system is not sufficiently perfected to enable me to certify that the statement is entirely correct. The figures therefore, as rendered by the local Governments, are not as yet accepted by the Government of India. And, at the best, the statement chiefly consists of estimates from which the actual figures may differ largely hereafter. I present it, however, in the belief that whatever imperfections exist will be rectified within a short time.

REGULAR ESTIMATE, 1872-73

To the allotments of the opening year 1871-72 were added the special assignment of £200,000, rateably distributed among the various provinces as explained in my exposition of March 1871. It will be observed that in that year, 1871-72, there was an available amount of £5,713,933, of which the various local Governments expended £5,453,873, leaving a balance of £260,060, to be carried on to the next year; that in 1872-73 there was an amount (balance of former year added to fresh allotments) of £6,283,789, against which the local Governments have an estimated expenditure £6,391,181, leaving an adverse balance of £107,392 to be provided for from local resources, which resources are seen to be ample from the accompanying statement of local funds.

During the current year a circular was addressed to the local Governments, asking opinions as to the working of the system of provincial services; and the replies are, unanimously and strongly, in favour of the system. Improvement both in efficiency and economy, and abridgement of labour, are attributed to it by all the authorities consulted. Nothing has come to the knowledge of the Government of India to lessen the force of that conclusion. And, from a financial point of view, we must acknowledge that the limitation of expense which the system has imposed on several of the departments most likely to expand, does materially conduce to the maintenance of equilibrium in the imperial budget, and contributes something towards the favorable result now exhibited for the general finance of the country.

It is to be remembered that the statement above alluded to relates only to the measure introduced by the resolution of December 1870, which provides that certain allotments shall be made from the imperial exchequer for certain provincial services, and that the receipts derived previously, from those services and credited to imperial revenues should be transferred to local revenues. It does not relate to the previously existing local funds and local expenditure; nor to the various measures of local taxation subsequently passed. For all these a separate statement is prepared.

I have not space enough to describe the details for each local Government; which details will, however, be found in the statement relating to local funds. But it may be noticed that, in every province, the provincial administration has been conducted at a cost fairly within the financial means available, and that, generally, a fair margin has been left. This is noteworthy as indicating that, together with enlarged local responsibility, there has prevailed a keener spirit of economy than heretofore, and a stronger desire to measure requirements by the standard of disposable resources. The closing balance of the local funds, if taken together with the closing balance of the provincial services, will show a net increase of available means.

In my last exposition a list was given of the new measures of local taxation in the various provinces of India. Of these, however, some have been held in abeyance. In Bombay, the levy of the non-agricultural cess has been suspended. In Madras, that portion of the local taxation which related to houses has not generally been carried out.

From the abovementioned list, it might perhaps have been understood by some that all those measures were consequences of the provincial service resolution. I did not, however, intend to imply this. Some of the measures were consequences of that resolution, while others were not. The Bengal cess, and the Madras local taxation Acts, were in contemplation before the resolution was framed. In the North-West Provinces that portion of Act of 1871, which authorized the five per cent. cess in temporarily settled districts, did not impose any taxation, but virtually gave a new legal form to cesses previously existing or ordered.

The total amount received from the new local taxes imposed in consequence of the resolution, during 1871-72 was only £144,000, and the amount for 1872-73 is estimated at £212,000. These amounts are relatively small, and afford perhaps the most satisfactory answer to those who apprehend that local taxation is likely, under the present system, to be carried too far. And, certainly, the vigilant attention of the Government of India has been, and is, directed to the subject, in order that due moderation may be observed in this important respect.

The total income of all local funds, including new local taxes, but excluding provincial service receipts, was for 1871-72 £4,399,191, and is expected to be £3,593,078, or 3½ millions for 1872-73. The expenditure from these local funds was for 1871-72 £4,155,647, and for 1872-73 it is expected to be £2,967,601, leaving a balance in hand of £2,811,484, for commencement of the coming year.

REGULAR ESTIMATE, 1872-73

Doubts seem to have arisen in the minds of some whether the provincial service system will not cause local taxation to be excluded from the revenue accounts of India; whether it will not relieve the imperial finance of expenses to be transferred to local finance; and whether it will not seriously aggravate the burdens of the people.

Now the first of these objections was obviated from the beginning by the provision that there shall be provincial budgets, appended to the imperial budget; to which provision effect is now given on this the very earliest opportunity.

It was not contemplated by the provincial service resolution to transfer imperial burdens to local finance to any appreciable extent. For certain heads of service a fixed annual allotment was determined by the Government of India for each local Government. The sum total was indeed less by £330,000 than the budget allotments of the year last preceding. But it was held that those budget allotments were somewhat more than what would have been permanently allowed even without the new system; and that in practice some savings within these allotments were actually being made by the local Governments themselves. Thus the reduction did not amount to much in reality. And at all events it bore but a small proportion to the total in question, namely, 5⅛ millions. The new allotments were in fact made on a calculation of what the local Governments were being allowed to spend. Thus the allowance made was such as the local Governments might be reasonably expected to work with. And they have actually worked within it, since the provincial service system has come into operation. It was no part of the policy eventually adopted to cut down the allowances to an insufficient limit, and leave the local Governments to provide the remainder. The objects of the scheme were indeed more administrative than financial. And that the allotments are, on experience, found sufficient, is proved by the statements which I now present.

As to the system aggravating the burdens of the people,—no such effect was intended by the Government of India. That no such consequence has yet arisen, is proved by the facts I have just recited.

BUDGET, 1873-74

I thus come to the third part of my subject, namely, the budget for the coming year, 1873-74.

The first and most important item on the receipt side is that of land revenue. In the last budget the amount was £20,900,000, which was stated to be (if adjustments and transfers were set aside) the largest sum ever presented under this head. That estimate is, however, exceeded by the regular estimate for the year. And in the present budget the amount will be seen to be again somewhat larger, namely £21,180,000. The slow but steady growth of this our greatest branch of revenue is satisfactory; especially as it accrues at a time when revised settlements are in progress in several provinces of India, north, south and west. The increase is not indeed proportionate to the known augmentation of the agricultural resources of the country and to the rise in prices. Indeed, the revised assessments are, avowedly and intentionally, made more moderately than any previous assessments in proportion to the means of the people.

It will be recollected that the rainfall during last summer was abundant, and that the harvest and crops, with but few exceptions, have been good throughout India.

The returns of canal irrigation during the year have been less than was expected, and this is attributed to the diminished need of irrigation after the abundant rainfall. The estimate for the next year, £478,000, is set down at a slight increase. Doubtless, some expansion of irrigation from the canals of Northern India is to be looked for, though certainly the growth is but slow as yet.

The decrease apparent under excise, £100,000, is partly balanced by a decrease in expenditure, £39,000, and is to some extent due to the exclusion from both sides of the account of the cost price of opium consumed in the Bombay Presidency. A portion of the decrease is also due to the fact that, during the current year, the excise in some provinces still included, as a receipt, a portion of the gross price of opium paid for in former years, which receipt will be

necessarily less in the coming year. This is connected with the arrangement mentioned in my last exposition, whereby the cost price of opium retailed in India is to be credited directly to opium, and not intermediately to excise. Some small portion of this revenue has also been surrendered to certain cantonments. BUDGET, 1873-74.

The relative merits or demerits of the system of central distilleries as compared with the old farming system have been often discussed and sometimes pressed upon our consideration. While prepared to admit such modifications in the central distillery system as may be found expedient in practice, the Government have adhered to the principle of that system, namely this, that the excise shall be administered not so much for the augmentation of the revenue as for the welfare of society; that everything conducive to the encouragement of the excessive use of drugs and spirits shall be avoided; and that our aim shall rather be to levy the maximum of duty on the minimum of consumption.

The heading of assessed taxes shows a sum of only £10,000. This comprises the arrears due under the Income-tax Act of 1872-73, which still remain to be collected. That Act expires on the 31st March 1873. And the Government have decided not to propose an Income-tax Act for 1873-74.

The next item calling for remark will be that of customs, for which £2,649,000 are set down; being nearly the same sum as that which is shown in the regular estimate for the current year. This amount is somewhat in excess of the amounts shown in the past budget, 1872-73, and in the actual account of 1871-72. It may excite remark that there should be this increase at a time when trade is known not to be flourishing generally, and when especially there has been some falling off in several dutiable imports. But the cause of the fiscal increase on the whole has been the very favorable condition of the export trade in grain, which grain mainly consists of rice exported from Bengal Proper and from British Burmah. The rice is sent chiefly to the United Kingdom and to the continent of Europe, partly also to the Persian Gulf and to the British colonies,—in quantities annually increasing, as will be seen thus:—

	1869-70	1870-71.	1871-72	1872-73 (9 months only.)
	Cwt	Cwt.	Cwt.	Cwt.
Rice exported from India to foreign countries	10,614,644	16,087,813	17,311,285	15,692,340

It is hardly necessary to dilate on the importance of this exportation of an agricultural product, which is specially Indian, and which is an article of food for the nations of Europe.

At one time, an apparent discrepancy was discovered between the Indian return of rice exported nominally to the United Kingdom, and the English return of the same article imported into that country; the former being in excess of the latter. This, however, has been on enquiry accounted for by the fact that the vessels which carry rice destined for the continent of Europe, clear nominally for the United Kingdom and call at the channel ports; and there, without unloading their cargo, wait for orders, on receipt of which they proceed to the continental ports. The cargoes of such vessels would necessarily appear in the Indian returns as exportations to the United Kingdom, but would not appear in the English returns at all. Consequently the Indian returns would be *pro tanto* in excess of the English; and hence the discrepancy which is thus accounted for.

The trade returns for 1871-72 have recently been published. It will therefore have been already seen how the total return of that year, the last completed year, was, on the whole, one of the largest ever known in British India, and the best that has occurred since the close of the American war, and since the period when the exportation of Indian cotton was so abnormally high. The total value of the trade of 1871-72, merchandize and treasure together, amounted to

BUDGET 1873-74.

more than 107 millions sterling; and this large amount is brought out notwithstanding the fact that the imports of merchandize were somewhat low, amounting to only 31 millions in value. The real cause of the magnitude of the aggregate then, is the amount of the exports which rose to the high value of 63 millions sterling. With the exceptions of three articles, raw silk, saltpetre and seeds, there was an increase all through the list of our export staples. The cotton export, though far from being the highest known, yet amounted to 809 millions of pounds or 2 millions of bales at 400 lbs. per bale. The jute export rose to the unprecedented amount of 6 millions of cwts., the rice export to 17 millions of cwts. These are the three most important of our staples. Two articles specially interesting to our countrymen in India, namely, tea and coffee, have, in this return, a more favorable place than ever: the export of coffee amounts to 56 millions of lbs., and that of tea to 17 millions of lbs.

In my last exposition, attention was drawn to the magnitude of our exports, and encouragement was thence derived as to the future prospects of the country. The total value of the exports then amounted to 55 millions sterling. But now another year's figures are before us, and the total has risen to 63 millions.

But although the past year, 1871-72, has in this respect ended so well, there is every reason to fear that the outturn of the current year, 1872-73, will be less favorable. Up to a recent period the prices of cotton have been comparatively low, and the export has fallen off. There is also a serious decline (under the heading of oilseeds) in the exportation of rapeseed; but, as this arises from a failure of the crops of this staple in some districts, it will prove, we hope, to be but temporary. The importation of British piece-goods shows some tendency to decline; and the condition of that important branch of trade does not seem to be considered satisfactory by those engaged in it. The exportation of jute (fibre) is very large, and that of rice continues to flourish.

The influence of the Suez Canal upon the trade of India is becoming more and more marked every year. I subjoin a table of the value of merchandise (excluding treasure) from Bengal, Sindh and Burmah, which has passed through the canal during the three years that have elapsed since its opening. Returns have not been received from Madras and Bombay:—

	1870-71.	1871-72.	1872-73 (11 months.)
Bengal.	£	£	£
Imports	6,289,414	8,682,250	9,097,286
Exports	2,154,254	5,454,772	5,385,485
TOTAL ...	8,443,668	14,137,022	14,482,771
Sindh.			
Imports	... ...	30,708	59,595
Exports	... ...	88,158	131,450
TOTAL ...	... ...	118,866	191,045
British Burmah.			
Imports	29,680	273,462	724,627
Exports	16,978	149,956	398,891
TOTAL ...	46,658	423,418	1,123,518
GRAND TOTAL ...	... ...	... ...	... ...
Imports	6,319,094	8,986,420	9,881,508
Exports	2,171,232	5,692,886	5,915,826
TOTAL ...	8,490,326	14,679,306	15,797,334

The amount for Bombay must, in all probability, be nearly equal to that for Bengal, 14½ millions for eleven months of 1872-73. Thus the figure for

Bombay may be assumed at 14 millions sterling. Judging from the proportion of the vessels employed in the Madras trade, I assume that the amount for Madras cannot be less than 6 millions. In this way, the aggregate value, actual and estimated, will not fall short of 36 millions sterling.

If the total annual value of the entire foreign trade of India be taken at 100 millions, it would then appear that a portion represented by 36 per cent. in value of the trade of India is passing through the Suez Canal within three years of its opening.

The above comparison is not however strictly relevant, because it includes a large quantity of merchandise which, belonging to the Eastern and Southern trade, could not possibly pass through the canal. A test can best be had from a comparison with the trade of India with Europe and America. The value then of the merchandise (excluding treasure) of the trade of India with Europe and America during 1871-72 amounts to £69,635,773, or 69¾ millions. As already seen, the value of the merchandise passing through the canal during 11 months of 1872-73 amounts to 36 millions, which gives a percentage of 51 upon the 69¾ millions. It is thus evident that more than half of the trade of India with Europe and America is already passing through the Suez Canal.

I add a table of the number and tonnage of vessels which passed through the Suez Canal to and from India during the last three years :—

Years.		Bengal.		Bombay.		Sindh.		Madras.		British Burmah.		Total.	
		Vessels.	Tons	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.
1870-71 ...	Entered.	56	56,353	58	58,566	...	...	34	37,837	5	3,780	153	156,536
	Cleared.	40	43,438	77	74,828	1	576	11	12,568	6	5,416	135	136,826
Total ...		96	99,791	135	133,394	1	576	45	50,405	11	9,196	288	293,362
1871-72	Entered.	89	109,175	90	93,258	6	4,022	50	63,146	19	14,843	254	284,444
	Cleared..	85	105,065	90	91,303	2	1,637	24	28,470	17	13,625	218	240,100
Total ...		174	214,240	180	184,561	8	5,659	74	91,616	36	28,468	472	524,544
1872-73 (11 months)	Entered.	81	107,570	118	132,949	5	4,390	57	78,737	62	64,107	323	387,753
	Cleared..	66	91,226	100	101,987	6	5,390	27	39,087	50	49,375	249	287,065
Total ...		147	198,796	218	234,936	11	9,780	84	117,824	112	113,482	572	674,818

It is thus seen that in the eleven months of 1872-73 there have passed through the canal 572 vessels with 674,818 tons.

As the shipping annually engaged in the trade of India with Europe and America is represented by an average of 2,687 vessels and 2,760,242 tons, it follows that 21 per cent. of the number of vessels and 24 per cent. of their tonnage pass through the Suez Canal already.

The comparison refers to merchandise only. There is also the treasure, the amount of which fluctuates greatly from year to year. At present it is for the most part carried by vessels of the Peninsular and Oriental Steam Navigation Company, which vessels have seldom made use of the canal.

In my last financial exposition, the fact was adverted to that for the latest completed year (1870-71) the import of treasure amounted to only 5½ millions sterling—a very low sum as compared with the average of preceding years (14 millions). The importation was however stated to be then on the increase. And accordingly for 1871-72, the import of treasure stands at 11½ millions. But during the current year 1872-73 the influx of treasure has, for the most part, ceased. The quantity of bullion presented for coinage at our mints at Calcutta and Bombay is very small, and it may be said that the mint establishments are, for the time, in a state of unavoidable inaction. The proximate cause is not far to seek, and is found in the condition of the exchange between India and England. The exchanges have been, for Secretary of State's bills, on the average rate of 1*s.* 10¾*d.* to the rupee, and have not since May last reached 1*s.* 11*d.*, which rates are of course unfavorable to India. A dis-

BUDGET, 1873-74. cussion of the causes again of this low range of the exchange rates would exceed the limits of this exposition. But the diminished values and quantities of the cotton exports immediately suggest a reason. And another reason is doubtless connected with the inevitably large drawings upon India by the Secretary of State in England, now that India has to remit annually the sum of her whole debt to the home treasury, without any assistance being derived from the capital payments in England by the guaranteed railway companies of India.

In my last exposition I endeavoured to show how necessary it is for India that she should be able to sell progressively large quantities of her produce to other nations, in order that she may have the means of arranging for the annual remittance of her great debt to England, now more than 13 millions sterling a year. From this point of view the returns for the last complete year, just commented on, are eminently satisfactory, as proving that India, by the development of her export trade, is duly providing herself with such resources.

I have thus dwelt for a few moments on the condition of our trade, because it affects, not only our customs revenue primarily, but, secondarily, several other items in the budget, such as the mint receipts, the loss by exchange, the net traffic receipts of the guaranteed railways, and also, to some extent, the prices and returns of opium.

For the next item, salt, a sum is taken nearly in accordance with the regular estimate of the current year; the fiscal yield remaining stationary. The various rates of the salt duty which prevail, and the various modes of levying the duty, in the several provinces of India, have been carefully considered by the Government.

The sum set down for opium is £7,500,000, or 7½ millions, being somewhat less than the 7¾ millions set down in the last budget and considerably less than the 8¾ millions which will be received during the current year. The estimate consists of two parts: one relating to Bengal opium, the other to Malwa and Bombay opium.

For the Bengal opium the quantity is small, consisting of 31,500 chests taken from the supply of the harvest of 1872, for three quarters of the financial year 1873-74; and 11,250 chests for the last quarter to be taken from the harvest of 1873, in all 42,750 chests. The harvest of 1873 is not yet gathered, and its outturn cannot be confidently predicted. The early promise was good; but, subsequently, doubts arose which have not been altogether removed. An abundant yield is hardly hoped for now. But whatever the yield may be, we do not intend to take from it more than what may suffice to make up a certain supply for the calendar year 1874. It is not intended to sell more than 45,000 chests in that calendar year. The expectation is that the yield of the present crop will suffice to provide at least that number of chests, though, on this point, no guarantee can be given. But if, as we hope, the yield shall be in excess of this standard, then the surplus quantity will be devoted to forming a reserve supply of chests on which we may draw in order to make up for future deficiency of harvest. The object in view is to prevent any considerable variation in the supply from year to year, and to promote steadiness in the prices. The attainment of this object, though always kept in view, has been of late retarded by the unpropitiousness of the seasons for two consecutive years.

The average price has been assumed at Rs. 1,200 or £120 per chest. This is less than the average of the prices, as explained to-day, which have prevailed during the current year. But the tendency for the last few months has been slightly towards decline, and the contingency of a fall in prices must be guarded against. In the last budget the estimate of Rs. 1,200 or £120 per chest was considered to be as high as the then existing circumstances would warrant. The prices are now considerably lower than they were then. Still, in consideration of the present state of prices and the small supply that we are providing for sale, it is thought that we may assume the same average price without overstepping the bounds of prudence. It cannot be too often repeated in financial expositions, that a safe and moderate estimate of the opium revenue is one of the mainstays of our finance.

The estimate of the Malwa opium revenue is framed on the calculation of 37,050 chests being brought forward for exportation. Under the circumstances of the trade, and the known facts of the past and the current year, this expectation for the coming season seems to be sufficiently well founded. BUDGET, 1873-74.

The estimated exports of the Malwa opium, combined with the comparatively certain sale of Bengal opium, will bring up the probable total supply for the Chinese market during the year to 79,800 chests.

The stamp receipts show an increase of £51,000, which is wholly nominal, owing to the intended collection, for the first time, of fees for the service of processes in Madras by means of stamps. Otherwise, these receipts are taken at the same amount as that shown in the regular estimate. In my last exposition I described the growth of this branch of revenue in recent years. The development must now be gradual, concurrently with the progress of wealth, activity and enterprize. The use of adhesive stamps, in substitution of the old impressed stamps, has been ordered for nearly all departments and classes of documents, with a large saving of expense and labour. The adhesive stamps are being prepared in England with the advantage of precise mechanical execution. Notwithstanding the opinion entertained by some that the method of affixing stamps will afford some opportunities of forgery and malpractice which were not afforded under the system of impressed stamps, we trust that with the use of adhesive stamps, forgery and malpractice will be more difficult than ever; and in this view we are supported by the experience of the postal and telegraphic departments.

The mint receipts are set down at the very low amount of £40,000, which is based on the apprehension that no more than two millions sterling worth of silver bullion may be presented for coinage during the year. For the current year a much larger amount (8 millions worth) was anticipated in the budget, the matter being avowedly one of much uncertainty. But, as has been explained to-day, the actual amount proved to be insignificant. And at present the promise for the future is hardly more favorable. Bullion is not flowing into the country; the mints are still inactive; the rate of exchange is lower than usual at this season of the year.

The postal receipts are estimated at a sum (£719,000) which is more than the amount received during the current year, but, on the other hand, less than the actual amount of the past year (1871-72). The great fluctuation in the receipts of the current year in official postage has been already explained to-day; and the same cause will continue to operate beneficially in keeping down the official postage during the coming year. But there will, it is hoped, be some slight advance in private postage; and a large increase is caused on both sides of the account by the incorporation in the postal account of the receipts and expenditure for certain services hitherto recorded separately.

The estimate of electric telegraph receipts in India shows a slight increase, which is justified by the increase of private messages under the improved tariff introduced two years ago. But the receipts of the Indo-European line have fallen off by reason of the competition of private companies; and this causes the total (£225,000) to show no increase, and even a slight decrease.

The slight diminution in the receipt under interest has occurred in the home estimates. In India the item stands well, being chiefly derived from the investment of a part of the specie reserve of the paper currency, which investment has been brought very nearly up to the limit of six millions fixed by law.

Under the head of railway receipts, the gross traffic earnings of the new state railways are beginning to appear: for the present year the amount is small, being only £39,000; doubtless it will grow year by year as the lines are opened.

The rest of the item consists of the gain by exchange on the sums received in India on account of the guaranteed railways under the arrangement explained more than once in my previous expositions. As the traffic receipts are large, and as the payments for the construction of the lines are becoming small, the net gain on this exchange account is considerable. Questions have been raised whether the rate of 1*s.* 10*d.* to the rupee fixed in 1849, whereby the

BUDGET, 1873-74

payments and receipts are accounted for to the principal railway companies, is a just one in the interests of India. Having seen the working of the arrangement for some years, I may declare my belief that it is quite just. Until recently, the result of the transaction was a net loss to the Indian treasury; but in the present, and probably for the future, the result will be net gain. It may be said that the actual rates of the exchanges have been high heretofore, but are now lower, and are likely to continue low; and that thus while we were losing, the loss was computable at a high rate, and when we shall be gaining, the gain will be computable at a low rate. This may prove true; but, on the other hand, the period of loss has been comparatively short, and the period of gain will probably be long; and, on the whole, I infer that the arrangement of 1849 was made with skill and foresight.

The total of receipts is set down at £48,286,000, or £48¼ millions.

On the expenditure side the first item is that of interest on the funded debt. This accrues in nearly equal portions in England and in India. The portion in England shows some slight diminution (£25,000), due to the expected conversion of 5 per cent. sterling debentures. The portion in India shows a larger reduction, as it is set down at £2,792,400, whereas in the current year it is estimated at £2,872,100, and in the past year it amounted to £3,032,672. This diminution is due to the conversion operations explained in my last exposition, whereby the interest on 16½ millions of debt was reduced from 5 to 4½ per cent., with prospect of further reduction to 4 per cent. Moreover, in the early part of the current year, it was considered that some small part of the cash balances might be safely invested, for a time, in Government securities, and thus yield a profit to the exchequer until such time as it might be required for the public service. With this view, a million sterling was applied to the purchase of Government securities, producing a saving in interest here shown of £46,000 for 1873-74. This saving was for the most part realized in the year 1872-73 also, but then there was a debit of the premium paid upon the promissory notes purchased.

The items of interest on service funds and other accounts, and of refunds and drawbacks, do not seem to require remark.

In the charges connected with the land revenue, there is a slight tendency to increase, by reason of the settlement operations in progress in several provinces. This outlay will, however, prove beneficial, and its good effect has been already seen to-day on the receipt side of the account.

The items of expenditure on forest, excise, customs, salt, opium, stamps do not seem to require further remark here.

The mint charges show a reduction, as might be expected after what has been explained regarding the slow influx of bullion. It is impossible to reduce fully these highly organized establishments in reference to a cessation of work, of which the resumption may become necessary at any time, under circumstances which cannot now be foreseen.

The increase shewn under the head of post office does not indicate any expansion of the regular establishment. On the contrary, the establishment is being reduced to some extent. It arises from the incorporation of the accounts of certain separate services, as has been already explained on the receipt side. In the electric telegraph there is a slight decrease, which occurs in the home estimate. In reference to the slow growth of the income of the department, it is much to be wished that this expenditure could be lowered.

The items of administration, of minor departments, of law and justice, and of marine exhibit no noteworthy change.

The grant for ecclesiastical services (£157,000) provides for vacancies in the roll of the chaplains being filled up, so that this important establishment may be maintained at its present complement.

The political charges are set down at some increase, £70,000, to meet the various requirements of the political service.

The heading of loss by exchange shows an increase of £111,000. The Secretary of State has warned us that he must raise by bills during the year 13⅓ millions sterling. And, after consulting the best authorities on the spot, we have assumed a rate of from 1-10½ to 1-10⅝ to the rupee, which gives an estimated loss of £850,000. BUDGET, 1873-74.

The miscellaneous heading shows a large decrease as compared with the current year. This mainly arises from the circumstance that the heading had become swollen by certain payments under decrees of the Privy Council, which will not recur.

The allotments for provincial services are set down at £5,156,000, or 5¼ millions, a sum slightly below that of the regular estimate, which includes various grants that will not re-appear. I need not add anything here to the explanation already given in respect to this important branch of the expenditure.

The army charges are estimated at £15,524,000, or 15½ millions, showing a decrease of £122,000. This is the lowest amount set down for the army since the year 1863-64.

The revised estimate of military expenditure in India during the current year 1872-73, for reasons already explained, was reduced to £12,025,000. But this included extraordinary charges for the Looshai expedition, £75,000, arrear charges for the overland troop transport service £30,000, arrear charges of the Order of British India, pay to the Native Army, £14,000, and special payments to Artillery Officers on retirement, £9,000,—amounting in all to £128,000. Deducting this sum from the aggregate estimate, there will remain £11,897,000 as the estimated ordinary expenditure of the year 1872-73.

For the coming year 1873-74, the budget is for £11,845,000 in India, or £52,000 less than the estimated ordinary expenditure of the preceding year. In framing the budget, regard has been had to the actual experience of the past and current years. Abatement has been made for officers of the staff corps and general lists, who have elected, or may elect, to reside in England under the provisions of the order of 1st August 1872. The stud expenditure has been curtailed, consequently upon the reductions recently ordered by Government. The provision for supplies in the commissariat, barrack, and ordnance departments has been made on the lowest scale compatible with the actual requirements in each case. The extended employment of the overland transport service, and the diminution of reliefs of troops between Indian ports, will admit of a reduced provision. Then, we have not this year to make provision on account of any military expedition.

There is indeed a net increase of £58,000 in that part of our military expenditure which is incurred in England. On the one hand there is an increase of £120,000 on account of clothing and ordnance supplies, and from the recent extraordinary rise in the price of iron-work and other stores; also an increase of £50,000 in the item of retired pay of officers of the Indian service consequent on the retirement of a large number of officers of the Royal Artillery, and the succession to Colonel's allowance of many other Indian officers. On the other hand, there is a decrease of £108,000 in the cost of troop transport service, and of £20,000 in retired pay of troops which have served in India.

The grant for public works ordinary stands at £2,354,000, or 2⅓ millions. It will be remembered that this amount is irrespective of the grant for roads and civil buildings, which is included in the allotments for provincial services. It thus relates only to particular civil works which still remain under the direct financial control of the Government of India, and to military works for the accommodation of the troops. Out of the above sum the portion relating to the military service amounts to £1,150,000.

The charge for guaranteed railway interest, less net traffic receipts, is set down at £1,790,000, or 1¾ millions. This may be considered as an average charge in the present period. The gross payment for this interest is taken as £4,690,000. From this sum there is an abatement of £2,900,000 net traffic

BUDGET 1873-74 receipts (after deduction of working expenses), which leaves the amount of £1,790,000 above shown.

The charge is £327,000 less than that which we expect to have to pay this year; but I have already explained that the unfavorable result during the current year is largely due to circumstances which are not expected to recur.

The total ordinary expenditure is set down at £48,066,000, or 48 millions.

The total ordinary expenditure, compared with the total receipts already shown, leaves a small surplus of £220,000.

Besides the ordinary expenditure as above explained, there is set down a proposed extraordinary expenditure of £3,878,000, or more than 3¾ millions, on public works, of which £1,266,000 are for canals of irrigation, and £2,612,000 for state railways. The irrigation works on which progress is being made are the canals from the Jumna near Agra, the lower Ganges canal, the canal from the river Soane, and the completion of the canal system in the deltas of the Kistna and the Godavery, the improvements of the western Jumna canal, and the Moota project in the Bombay Presidency. The state railways consist of the line from Agra to Jeypur, the Sambhur salt lakes, and Ajmere; the line from Rewaree to Ulwur to join the last named railway; the line from Lahore towards Peshawur, where the operations are chiefly directed to the bridges over three great rivers; the Indus valley line; the Wurda line to the coal mines near the Nagpur country; and the Holkar line from Nimar to Indore. Perhaps doubt may be felt whether a sum in itself so large, and so much larger than the sum expended in any previous year, can be advantageously laid out during the coming year. But the expenditure on the canals is to be much the same as that which is shown for the current year, and the plans and designs, as already explained, are mature. The proposed increase is to be found in the state railways, which lines have been sanctioned and are in the hands of contractors, whose interests and obligations impel them to strive for completion within specified periods; and the capacity evinced by them warrants the belief that they will punctually perform their allotted tasks. Moreover, a considerable part of the expenditure is for stores in England, which, doubtless, will be provided in the manner laid down. It would, therefore, be prudent to be prepared for the demand of the 3¾ millions for this important outlay, the progress of which must immediately promote the wealth and power of the country, and the delay of which would represent so much advantage lost.

But, in relation to this, we must remember the state of the estimate appended to my last exposition, styled "the estimated account of money raised by loan for reproductive works and of extraordinary expenditure" for 1871-72. The account showed a balance of £2,648,185 of loan money to be carried forward to 1872-73. The actual account now presented shows a balance of £3,814,366; and an estimate in the same form shows that by the end of the current year, the loan money will have been exhausted, the net amount borrowed being in excess of the net expenditure on reproductive works by £266,194.

This result entirely accords with the expectation held out in my last statement.

Up to the end of 1872-73 the extraordinary expenditure has been defrayed out of the cash balances augmented by loans previously raised for this purpose. But in 1873-74 it is to be defrayed from the cash balances without any such augmentation. That this should be found possible is a circumstance affording cause for much satisfaction. And the statement of the cash balances which I shall presently make will amply testify to the possibility.

If it be thought strange that our cash balances should be so strong as to bear the drain of 3¾ millions for these works without any borrowing, then we must remember that there is still an excess amount of money, 2¼ millions, in the treasury, which belongs to the railway capital account, as I shall presently explain; to which extent the cash balances are abnormally augmented. Then there is the accumulated surplus on the ordinary account of several past years. It is true that this surplus may be regarded as recouping the deficit of previous

years, as already shown in this exposition. But it is to be remembered that, in the years when that deficit occurred, there was borrowing both for ordinary purposes and for extraordinary public works, as shown in my exposition for 1869-70 on the 6th March 1869; that is, 6½ millions were borrowed, out of which 3 millions were expended on public works extraordinary. In this way the fact of the balances being able to bear the present strain will be fully accounted for. BUDGET, 1873-74

In a former part of this exposition, I have shown that the deficit from 1866-67 to 1868-69 has been nearly counteracted by the accumulated surplus from 1869-70 to 1872-73. Accordingly, there ought not, at the present time, to be any increase over the debt at the close of 1865 66, on account of the deficit of the three following years. But I showed in my statement of 6th March 1869, that for meeting that deficit, three and a half millions were borrowed. Hence, it is expedient and proper that the three and a half millions which we have on hand from the surplus of the three years now expiring, should be employed on public works extraordinary in the stead of an equal amount of borrowing. This will have the same effect on the public debt as if it had not been increased by 3½ millions for meeting the deficit from 1866 67 to 1868-69; or, in other words, the arrangement will be virtually equivalent to a diminution of debt.

In previous expositions I alluded to the doubts apparently entertained in some quarters, first, as to whether the loan money has been really applied to the public works extraordinary, and, secondly, whether a proper account is published annually of these moneys and of this expenditure. I have now presented three yearly accounts of these transactions, from the beginning of 1869-70 to the end of 1872-73. That account must now be regarded as closed, inasmuch as we are now to carry on the works without having any loan money in hand. And as the Government of India has desired to discharge fully its obligations in respect to these transactions, I append an additional abstract of this account for the four years 1869-70 to 1872-73 inclusive.

It has been urged that, in order to prove that the loan money has been rightly applied to the works for which it is intended, there ought to be accounts annually published, demonstrating this to be the case. The statements above adverted to are accounts of this nature. Whatever differences of opinion there may be as to the form of such an account, the substance of it ought to be this, that on one side there should be all the loan receipts, and on the other side all the expenditure on the specified classes of works. And this is exactly what these statements show. On the one side there are the several loans, item by item, embracing all the loan transactions of the Government of India for the period; on the other side there is the expenditure—divided into the three heads, irrigation, state railways, and advances to municipalities,—and embracing all the disbursements under that category. The receipt side of the statement depends on the accounts audited partly at the India Office in London, and partly by the Comptroller General at Calcutta; the expenditure depends on the accounts passed by the public works auditors, and as regards municipalities on accounts audited by the Comptroller General.

But another account will be required to show how far the works become profitable and how far they repay the interest paid by the State on the capital borrowed for their construction. It is to be remembered, however, that the works undertaken since 1869-70 are quite incomplete, so that with insignificant exceptions there can be neither income nor working expenses.

As regards the transactions with municipalities, this account would be simple; on the one side, so much interest paid by the treasury on the loan funds advanced to the municipalities; on the other side, so much recovered from municipalities in defrayal of the said interest, or in repayment of the advance.

As regards state railways the case is also easy, as their accounts will be kept in the manner so well established for the guaranteed railways.

As regards canals there is some difficulty which I must pause for a moment to explain.

BUDGET, 1873-74.

So much of the canal income as is represented by water-rent is, and always has been, shown in the accounts; so much as arises from improvement in the land revenue is not so easily shown. For the future, in the Bengal Presidency, where the largest works are to be undertaken, the canal laws contain provisions in regard to the rating. In these provinces then we shall have such certainty as may properly be embodied in accounts. For the other parts of India it may not be practicable to enact such provisions or to obtain such certainty; and for those provinces we must accept the best calculations that can be made by the local authorities.

Thus the establishment of a revenue account of the canals of the period beginning from 1869-70 is in due train.

It has also been suggested that such an account should be prepared for works of periods antecedent to 1869-70, such as the Ganges canal, the Punjab canals, and most of the Madras irrigation works. Now, so far as expenditure on one side, and water-rent on the other side, may go, the account has been duly made up. But in Northern India the water-rent shows only a part (though a large part) of the canal income; the remainder consists of improvement in land revenue. In the Madras Presidency generally (with the exception of the particular works belonging to the Madras irrigation company) there is no such thing as water-rent; the whole income of canals consists of improvement of the land revenue; and therein is room for controversy. Some will claim the entire improvement of land revenue from one period to another; others will demand abatement, alleging that there would have been improvement in the land revenue even without the canals. And as no capital or revenue accounts were formally established at the outset for any of the canals, whether in Northern or in Southern India, the preparation of such statements at this late period cannot be satisfactorily completed. Why at the beginning, some 30 or 35 years ago, such accounts were not drawn out is a question which may be asked, but cannot now be perfectly answered. The works were then constructed out of ordinary income; there were no separate transactions for raising funds; the regular income might not always be sufficient to defray such outlay, and there might be deficit: such deficit, however, was not attributed to this outlay in particular, but to the general expenditure. And the broad consideration was that, in constructing these works, the Government was fulfilling one of its highest duties, and conferring a public benefit, the cost of which might fairly be borne by the general revenues.

On the whole, it may be said that the capital and revenue accounts will be made quite complete for the new canals, namely, those of the Soane, of Sirhind, of the Jumna near Agra, of the lower Ganges, and of Orissa; that they will be nearly complete for the canals of the Ganges, of the Jumna Eastern and Western, and of the Baree Doab; that they will be made up in some form for the Madras canals, but whether such form will at all approach to the exact nature of an account is more than I can say at present. For any new works that may be undertaken in the Madras or Bombay Presidency, or in any province, there will be capital and revenue accounts.

As regards the Madras irrigation works, however, I can affirm—having had the advantage of studying the subject on the spot in company with the best informed authorities—that they are eminently successful, and abundantly remunerative in the highest sense both to the State and to the people; and that the benefits, direct and indirect, are so great that they can hardly be represented adequately by any regular account, in whatever form it may be prepared.

WAYS AND MEANS AND CASH BALANCES.

I now proceed to the fourth and last division of the subject, namely, the ways and means and the cash balance account.

It will be remembered that the regular estimate for the past year, 1871-72, showed an expected cash balance in India at the close of that year of £21,640,143, or 21½ millions. The accounts, however, for that year, as finally made up, show a cash balance somewhat exceeding the estimate, namely, £21,997,715, or 22 millions. This excess is attributable to the surplus of

income over ordinary expenditure being larger than was expected; and the extraordinary expenditure being somewhat less.

WAYS AND MEANS AND CASH BALANCES.

For the current year, 1872-73, the budget gave an estimated cash balance, at the close, of £17,541,543, or 17½ millions in India. The regular estimate now shows a somewhat larger sum, namely, £19,300,000, or 19¼ millions.

There have been various causes during the year affecting the amount of the balance—some favorably, others unfavorably. The circumstances producing a favorable effect have been, first of all, the excess sum of £357,572 in the opening balance; then the expenditure in India on public works extraordinary has been less than estimate by £204,700; the surplus of income over ordinary expenditure in India has been greater by £1,054,300; and the railway capital account by £1,143,000. On the other hand, the causes operating in diminution of the balance have been the increase of £1,260,000 in the amount of Secretary of State's bills paid, and the investment of one million of the cash balances as already explained.

The coming year 1873-74, which is expected to open with a cash balance of £19,300,000 as just seen, has an estimated balance at its close of £14,800,000, or nearly 15 millions. It is not now proposed that there should be any borrowing, either in England or India, for the public works extraordinary. In my last exposition it was shown in detail that in 1872-73 we had 2½ millions in hand remaining of the money raised by loan. It was then expected that the expenditure of the year for these works would absorb the above-mentioned remainder. This expectation, as already seen, has been actually fulfilled.

As directly bearing on the amount of cash balance which ought to be kept up, there is still the fact, adverted to in my previous expositions, that the exchequer owes a considerable sum on the capital account with the guaranteed railways. On the last occasion it was shown that the payments from the treasuries for the construction of the lines, when set against the capital subscriptions in England received by the Secretary of State, left a debt due by the treasury of 3½ millions. This debt has now been reduced to 2¼ millions. Even the reduced sum, however, is considerable; and the fact dictates the necessity of maintaining a strong cash reserve.

This circumstance again has a bearing upon the amount to be drawn from India by the Secretary of State during the year. This amount is set down (as already stated to-day) at 13½ millions, for which purpose we estimate that bills to total amount of 14⅓ crores of rupees must be drawn upon India. It is arrived at in this way: the net expenditure ordinary in England on account of the Government of India is estimated at £8,091,600, or 8 millions; the extraordinary expenditure, chiefly stores for works in progress in India, at £832,200, or more than ¾ million; the guaranteed railway interest at £4,652,000, or 4½ millions. These three items make up the amount of £13½ millions.

I may here add that the amount of the bills drawn by the Secretary of State, outstanding at the beginning of 1873-74, is expected to be £863,000.

The general cash account of the Indian treasury will be found in the appended statement of the estimated receipts and payments in England and in India during 1872-73 and 1873-74. It will be sufficient here to mention the main items in the statement for 1873-74.

For 1873-74 then, on the receipt side (total for England and India), besides the opening balance of £22,138,852 and the Government income of £48,286,000 already described, there are traffic receipts of guaranteed railways, recoveries and deposits, provincial and local funds, and receipts on remittance and suspense account, which bring up the total to £138,117,527, or more than 138 millions. On the payment side, besides the Government expenditure, ordinary and extraordinary, as already described, there are working expenses of guaranteed railways, advances recoverable, deposits to be repaid, sums payable on bills drawn by Secretary of State, disbursements for construction of guaranteed railways in India, and some transfer entries which bring up the total to £121,052,959. This total, on being deducted from the total on the receipt side, leaves the anticipated sum of £17,064,568, or 17 millions, as the probable balance at the close of the year, that is on the 31st March 1874.

WAYS AND MEANS AND CASH BALANCES.

The statement also shows, in separate columns, an abstract estimate of the cash account kept by the Secretary of State in London on account of India for 1873-74. On the receipt side there is the opening balance of £2,838,852; the amount to be received on bills of exchange drawn on India is set down at 13½ millions; there will be 1½ million railway capital subscribed; all which, together with some smaller items, make up a total of £18,140,127. On the payment side there will be an expenditure in England on account of India of £13,575,800; there will be 1,142,700 paid on the remittance account, and there will be £1,154,059 of railway capital withdrawn. These, together with some smaller items, make a total of £15,875,559, which, deducted from the total on the receipt side, leaves a probable closing balance of £2,264,568 on the 31st March 1874.

The estimates relating to the budget are elaborated by a sound method. First, they are prepared by the executive authorities on the spot; then transmitted to the local accountant general, and, after revision by him, examined by the local Government. After this, they are submitted to the Government of India in the Financial Department in the beginning or middle of January. They are then considered there, heading by heading, item by item, repeatedly, as later information is received. A statement of proposed modifications is prepared and sent to each local accountant general, who, in communication with the local Government, returns his answers to the Government of India during the month of February; these answers are then considered, and the result embodied in the draft budget by the beginning of March. A date is then fixed, towards the end of March, by which date the latest information on every point is sent by electric telegraph to the Financial Department; and thus the last rectifications are made in the budget estimate before it is produced. The same system *mutatis mutandis* is established for all the imperial departments, army, railways, post office, electric telegraph, and others, under the direct control of the Government of India.

MISCELLANEOUS.

Before concluding I must touch on a few subjects connected with finance.

Since January 1872, the note circulation of the Government paper currency has developed itself considerably. For several months it has exceeded 13 millions. For the year 1872-73 the average net circulation has amounted to £12,972,340. The highest point reached was that of £13,660,872, or 13¾ millions. All these figures represent growth and expansion of the paper currency. I have hardly space enough to enter on the details of the causes of this result. One main cause, however, is immediately apparent, in the increase of the export trade, as already shown; which trade promotes activity of monetary circulation between the trading ports and the producing districts in the interior. Another cause is the facility afforded by Government for the encashment of notes, under the order authorising the provincial offices of issue to cash notes of other circles besides their own within certain limits. In this way, accommodation has been afforded by the encashment of several millions worth of notes which could not otherwise have been cashed. Something also has been effected by the issue of notes of additional denominations. Five-rupee notes have been issued, and 5,57,500 of these notes have been asked for since July last, when the issue first began. The convenience to bankers and others having large transactions has been consulted by the issue of notes of ten thousand rupees. The opening of currency agencies in some of the district agencies has had but slight effect as yet. There are twenty such agencies, and the amount consigned to them in notes and in silver is over a quarter of a million sterling, or £280,000.

The Government Savings Banks of all kinds have a return of 60,000 depositors and £1,461,090, or nearly 1½ million, of deposits. The number of District Savings Banks in Bengal is 110, in which £71,095 are held in deposit by 3,646 depositors. All the above figures show a considerable increase over those of last year.

The number of Money Order Offices now open in British India is 302, against 362 as given in my statement last year. This diminution in number is owing to the abolition of many offices which were found to be inoperative. But the number of orders issued during the year 1871-72 was 2,51,123,

amounting in value to £1,251,400, against 2,42,700 issued during the previous year, which amounted to £1,300,600. On the whole, it may be said that this useful branch of business performed by the State for the public is fairly well sustained. MISCELLANEOUS

The arrangements for a money order system between India and England have been completed, and have had effect from the 1st of October last, since which date, 4,181 overland money orders have been issued and received at Bombay. The amount of these orders is £28,312. In this branch of the business we anticipate further development.

In my last exposition, a classified abstract was given of the public debt of India, and reference was made to the high prices commanded by the 4 per cent. stock in India and in England. Subsequently these prices have been still higher; not only reaching par, but standing at a premium of nearly 2 per cent. in India and 3 per cent. in England. The credit of the Government of India in the money market has hardly ever been in so satisfactory a position as at present, and may be measured by a rate of interest something below 4 per cent.

I shall now summarize the chief points in the explanations which have been given. It has been shown, then— CONCLUSION.

that for 1871-72 there is an actual surplus of £3,124,178, or more than 3 millions of income over ordinary expenditure;

that this surplus is owing to increase of net opium receipts and to reduction of expenditure;

that for 1872-73 there is an estimated surplus of £1,354,000, or 1⅓ million of income over ordinary expenditure, owing to increase of net opium receipts;

that the surplus from beginning of 1869-70 to end of 1872-73 will be 6 millions;

that this surplus almost counteracts the deficit of 6¼ millions which occurred between the beginning of 1866-67 and the end of 1868-69;

that for 1873-74 there is estimated an equilibrium between income and ordinary expenditure supported by a small surplus of £220,000;

that the income-tax for 1872-73, which is about to expire, will not be renewed for the coming year;

that the net receipts of the several income-tax measures passed between 1869-70 and 1872-73 amount to £4,453,232, or 4½ millions;

that the concession to the several local governments of increased financial control over certain provincial services continues to work well as regards both efficiency and economy;

that, an account is published of the receipts and expenditure of provincial services and local funds, embracing the actual figures of 1871-72, the regular estimate of 1872-73, and the budget of 1873-74;

that the 2½ millions which had remained in hand of money borrowed for public works extraordinary have been expended during the year 1872-73;

that, the entire borrowing since 1869-70 having been equalled by expenditure on public works extraordinary since that date, the account of loan money and of extraordinary expenditure for that period is closed;

that capital and revenue accounts for works of irrigation are being established, as far as existing circumstances render the arrangement practicable;

that it is proposed to meet £3,878,000, or nearly 4 millions of expenditure on public works extraordinary during 1873-74 without borrowing either in England or in India;

that the Indian treasury is to meet bills to be drawn by the Secretary of State in England, during 1873-74, to the amount of 14⅓ crores of rupees.

that the cash balances in India are estimated at £19,300,000 on the 31st March 1873 and at £14,800,000 on the 31st March 1874.

CONCLUSION.

that the interest on the public debt of India has been reduced by £235,000 per annum since 1871-72 with a prospect of still further decrease;

that the government paper currency has had a circulation of more than 13 millions sterling;

that the prices of the 4 per cent. securities of the Government of India have been higher than ever, and that the stock now commands a premium of 2 per cent.

In concluding this exposition, I need not again dwell on those principles of financial policy which have been vindicated on previous occasions. On a retrospect of the results which have accrued during the period of five years which is now approaching its termination, I find that our hopes have in some respects been more than realized, and in other respects have been disappointed.

Though the ordinary revenue of India has increased, and has in a certain degree flourished, it has not proved as elastic as we might desire; its growth is perceptible indeed, but slow and gradual. The obstacles to the imposing of additional taxation, imperial or local, to any appreciable amount, have proved practically great. There are acknowledged defects in our salt duties, and in our inland customs system, and in our export tariff, which we have not yet been able to remedy. The opium crops, always regarded as precarious, have of late been subject to embarrassing vicissitudes of season. The import trade of the country, as respects European piece goods, has hardly developed of late; and we expected that the people of India, with their recently good harvests and general prosperity, would have augmented their consumption of these goods more largely than has been the case. Although the cotton trade of India received a powerful impulse after the American war, and although the advanced position then gained is not wholly lost, still it is to be feared that the country is not fully maintaining the place it occupied for a time in the cotton marts of Europe, and is less and less able to compete with the riviving power of the Southern States of America. The extension of canal irrigation in Northern India is tardy and uncertain to a degree hardly anticipated by us after the warnings which the people have received from the periodical recurrence of drought and famine. It is now certain that some period must elapse before the great canals, which have been undertaken or may yet be commenced in Northern India, can repay the interest on the borrowed capital laid out by the State on their construction. The earnings of the completed series of guaranteed railways are much below our anticipations: though the native passenger traffic is increasing, still the goods traffic lags behind, indicating sometimes even a tendency towards retrogression, while the competing communication by water and by road continues to prosper. For a long time to come, the possession of these railways, however beneficial in other respects, must prove to be a burden on the finances. As regards metallic currency, public opinion has not practically manifested any desire for the introduction of a gold coinage with legal tender.

These several circumstances must be sources of disappointment more or less to all persons concerned in the affairs of Indian finance.

But as a counterpart of the case, there are points where the advantages have exceeded our hopes. The aggregate of surplus income over ordinary expenditure is very considerable. Though deficit occurred in some years, it is now seen to be counteracted by surplus in other years. If the finance of India be examined upon a series of years, an approximate equilibrium between income and ordinary expenditure will be found to exist. The possibility of repressing the public expenditure within prescribed bounds has been satisfactorily demonstrated. Notwithstanding the influences of a progressive age, the demands of administrative reform, and the needs of a growing civilization, some reduction of expenditure has been found practicable. The experiment of entrusting local authorities with increased financial control, so as to secure not only greater activity in improvement, but also greater economy in administration, has proved successful. The export trade has, in regard to several of its staples, advanced in a remarkable manner. Some agricultural products, such as jute-fibre, rice, and oilseeds, some products produced under European supervision, such as tea and coffee, are fast acquiring a prominent position in the markets of the world. The Suez canal is already exerting upon Indian trade an influence equal even to the hopes of the projectors, and is bringing the trade centres of India into direct connexion with the ports of continental Europe. The prices commanded

CONCLUSION.

by Indian opium in Chinese markets have been so high as to produce important fiscal results. Separate resources have been provided by loan funds for public works of a reproductive character, whereby the operations so essential to the welfare of the country can be prosecuted without the interruptions to which the course of ordinary finance is liable. On the other hand, the interests of the ordinary finance have been preserved from the temptation to charge to capital account various items which may be hard to be defrayed, but which, nevertheless, ought to be defrayed, from current revenue. An effective restriction has been exercised on the transfer to the extraordinary head of charges which ought to be treated as ordinary. A separate account of the borrowing for the extraordinary public works, and of the expenditure on those works, has been successfully established. The national credit of India has stood almost unprecedentedly high, and may be measured by a rate of interest somewhat less than 4 per cent. The rate of interest which exceeded 4 per cent. on portions of the public debt has been successfully lowered. The note circulation of the government paper currency, though it has not spread among the masses of the people, has yet established itself at the trade centres with expansive vigour. The general treasury has remained so full as to afford a strong cash reserve, which proved of service in maintaining the public credit at a time when the occurrence of deficit had caused discouragement. Then as a part of the cash reserve was deposited in the presidency banks, it did not lie idle, but was to some extent utilised for the benefit of commerce.

On the whole, a comparison of those matters wherein success has been attained with those wherein disappointment has occurred, confirms me in the view that it has been possible so to administer the finances of India that troubles and difficulties might be vigorously encountered, and that in time of peace there might be exhibited a constantly increasing prosperity. In respect to the future I need not offer any prediction.

RICHARD TEMPLE.

Havildar Talleea to be Jemadar, *vice* Jemadar Rajeea, promoted.

POLITICAL.

The 25th March 1873.

No. 576*P.*—Subject to the confirmation of Her Majesty's Government, His Excellency the Viceroy and Governor General in Council is pleased to recognize the appointment of Mr. Charles Buchanan Forbes as Acting Consul for Siam at Bombay.

The 28th March 1873.

No. 596*P.*—Subject to the confirmation of Her Majesty's Government, His Excellency the Viceroy and Governor General in Council is pleased to recognize the appointment of Mr. Georg Smidt as Acting Consul for the German Empire at Calcutta.

No. 605*P.*—By virtue of authority duly acquired in that behalf by agreement with the Maharaja of Cashmere, the Governor General in Council is pleased, under Sections 4 and 5 of Act XI of 1872 (*The Foreign Jurisdiction and Extradition Act*), to delegate to the British Officer for the time being on duty in Cashmere the powers described in the following Regulations :—

I. The British Officer for the time being on duty at Srinuggur shall represent the British Government in Cashmere, and for the maintenance of good order the following powers and duties are respectively conferred and imposed upon him :

(*a.*) He may direct any European British subject who is travelling or residing in Cashmere, and who is guilty of any gross misconduct, to leave Cashmere forthwith, and may punish any person knowing of such direction and disobeying the same with rigorous or simple imprisonment for a term which may extend to six months, or with fine which may extend to one thousand rupees, or with both.

(*b.*) He shall receive, try, and determine in his Court (which shall be called "The Court of the British Officer in Cashmere") all suits of a civil nature between European British subjects, or between European British subjects and their servants, provided—

(1) that the right to sue has arisen, or the defendant at the time of the commencement of the suit dwells or carries on business, or personally works for gain, within Cashmere.

(2) that the suit is not of the same nature as those suits of which the cognizance by the ordinary Civil Courts of British India is barred by law.

(*c.*) He shall have the powers of a Magistrate of the first class as described in Section 20 of the Code of Criminal Procedure (Act X of 1872) for the trial of offences committed by European British subjects or by Native British subjects, being servants of European British subjects.

Provided that in the case of any offender being a European British subject, he shall only have power to pass a sentence of imprisonment for a term not exceeding three months, or fine not exceeding one thousand rupees, or both; and when the offence complained of is under the Indian Penal Code punishable with death, or with transportation for life, or when it cannot, in the opinion of such officer, be adequately punished by him, he shall (if he thinks that the accused person ought to be committed) commit him to the Chief Court of the Punjab.

II. Fines shall be recovered in manner provided by Section 307 of the Code of Criminal Procedure (Act X of 1872.)

III. Sentences of whipping shall be carried into execution in manner provided by Section 310, 311, 312 and 313 of the same Code.

IV. Persons sentenced to imprisonment shall be transferred to, and confined in, the Sealkote or Rawul Pindee Jail.

V. The procedure in all civil suits between European British subjects, or European British subjects and their servants, shall be regulated by the Code of Civil Procedure The procedure in all criminal prosecutions shall be regulated by the Code of Criminal Procedure.

VI. The said Officer shall make rules to regulate the service and execution of processes issuing from his Court, and shall fix the fees to be charged to suitors for serving such processes.

VII. All questions of law, or fact, or both, arising in cases before the said Officer, shall be dealt with and determined according to the law administered in the Courts of the Punjab.

VIII. The said Officer shall keep such registers, books, and accounts, and submit to the Lieutenant Governor of the Punjab such statements of the work done in exercise of the aforesaid powers, as may, from time to time, be prescribed by the said Lieutenant Governor. He shall also comply with such requisitions for records as the said Lieutenant Governor may, from time to time, make upon him.

IX. Duties and fees of the same amount respectively as the Stamp duties and Court fees prescribed by Act XVIII of 1869 and Act VII of 1870, shall be enforced by the said Officer.

X. There shall be no appeal against any order, judgment, or decree passed by the said Officer in a civil suit. But if, in the trial of any such suit, any question of law or as to the construction of a document (which construction may affect the merits of the decision) shall arise, he may draw up a statement of the case, and refer it for the decision of the Chief Court of the Punjab; and he shall, on receipt of a copy of such decision, dispose of the case conformably thereto.

And any person convicted on a trial held by such Officer may appeal to the Commissioner of the Rawul Pindee Division; and if such person be an European British subject, he may appeal either to the said Commissioner or to the Chief Court of the Punjab.

XI. The appellant shall in every case give notice of the appeal to the said British Officer in Cashmere, who shall, if necessary, instruct the Officer empowered to prosecute the case.

The Mixed Court.

XII. Civil suits between European British subjects or their servants not being subjects of the Maharaja on the one side, and subjects of His Highness the Maharaja of Cashmere on the other side, shall be decided by a Mixed Court composed of the said British Officer and the Civil Judge of Srinuggur, or other officer specially appointed in this behalf by the Maharaja of Cashmere.

XIII. When the said British Officer and the said Civil Judge or other Officer are unable to come to a final decision in any such suit, they shall reduce their difference into writing and refer it to a single arbitrator to be named by them.

XIV. The arbitrator so nominated shall proceed to try the case, and his decision shall be final.

XV. And in every case of a reference under these Rules—

(*a*) the arbitrator shall be at liberty to proceed *ex parte* in case either party, after reasonable notice, neglects or refuses, without good and sufficient cause, to attend on the reference;

(*b*) the arbitrator shall have power to summon witnesses in cases referred to him;

(*c*) and the parties respectively shall produce before the arbitrator all books and documents within their possession or control, which the arbitrator may call for as relating to the matters referred;

(*d*) and the parties and their representatives in interest shall abide by and perform the award.

GENERAL.

The 22nd March 1873.

No. 718*G.*—LEAVE.—The subsidiary leave of absence granted to Captain W. J. W. Muir, Political Agent, Haraotee and Tonk, in Notification No. 384G, dated the 14th ultimo, is extended to twenty-one days.

The 28th March 1873.

No. 2122.—Mr. T. W. Gribble received charge of the Office of Post Master General of Bengal from Mr. J. Tweedie on the afternoon of the 17th March 1873.

R. B. CHAPMAN,
Secretary to the Govt. of India.

MILITARY DEPARTMENT.

Fort William, the 22nd March 1873.

No. 328 *of* 1873.—The under-mentioned Officers are permitted to proceed to Europe on furlough on private affairs:—

Lieutenant Colonel Hungerford Meyer Boddam, of the Bengal Staff Corps, Deputy Commissioner, Hazareebaugh,—for two years, under the Regulations of 1868.

Captain Alexander Haldane Eckford, of the Bengal Staff Corps, Cantonment Magistrate, and Judge, Court of Small Causes, Barrackpore,—for seven months, under the Regulations of 1868, embarking at Bombay.

Captain Robert Edward Seymour Smith, of the General List, Infantry, Adjutant, 15th (The Loodianah) Regiment of Native Infantry,—for eighteen months, under the Regulations of 1868, embarking at Bombay.

Captain John Henry Willoughby Osborne, of the late 4th Regiment Native Infantry, Deputy Superintendent, Revenue Survey Department,—for twelve months, under the Regulations of 1868.

The 24th March 1873.

No. 329 *of* 1873.—The under-mentioned Officer of the Bengal Staff Corps, having completed twelve years' service in the rank of Lieutenant Colonel, is admitted to the Colonel's allowance, with effect from the date specified, under the operation of G. G. O. No. 808 of 1866, paragraph 61, clause 5:—

Lieutenant Colonel (Brevet Colonel) Charles Fitzroy Miller Mundy,—23rd March 1873.

The 25th March 1873.

No. 330 *of* 1873.—His Excellency the Governor General in Council is pleased to confirm Major H. Watson, of the Madras Staff Corps, in his appointment as Commandant of the 1st Cavalry, Hyderabad Contingent, with effect from the 25th March 1873, *vice* Colonel W. Murray.

No. 331 *of* 1873.—His Excellency the Governor General in Council is pleased to confirm Captain (Brevet Major) C. V. Conway-Gordon, of the Bengal Staff Corps, in his appointment as Brigade Major, Hyderabad Contingent, with effect from the 25th March 1873, *vice* Major H. Watson, appointed to another situation.

No. 332 *of* 1873.—His Excellency the Governor General in Council is pleased to make the following appointment:—

Bangalore Rifle Volunteer Corps.

Mr. J. D. Gordon, C. S. I., to be 2nd in command, *vice* Major C. A. Benson, appointed Commandant.

No. 333 *of* 1873.—Lieutenant Colonel C. Murray, of the Bengal Staff Corps, having elected to reside in India on the terms laid down in paragraph 2 of G. G. O. No. 797 of the 1st August 1872, is permitted to remain in this country, with effect from the 10th January 1873.

This cancels G. G. O. No. 1316 of the 30th December 1872, granting this Officer an extension of furlough in India from the 10th January to the 10th April 1873.

No. 334 *of* 1873.—The under-mentioned Officers and Warrant Officer have reported their return from England:—

Lieutenant Colonel F. R. Maunsell, of the Royal Engineers, Commandant, Corps of Bengal Sappers and Miners,—date of arrival at Bombay, 28th February 1873.

Lieutenant Colonel R. Young, of the Royal Engineers, Deputy Commissioner, Punjab,—date of arrival at Bombay, 28th February 1873.

Lieutenant Colonel A. H. Paterson, of the Bengal Staff Corps, Deputy Inspector General of Police, Calcutta,—date of arrival at Bombay, 28th February 1873.

Lieutenant Colonel (Brevet Colonel) H. C. Johnstone, C. B., of the Bengal Staff Corps, Deputy Superintendent, Revenue Survey Department,—date of arrival at Bombay, 6th March 1873; date of departure on furlough from Bombay, 13th May 1871.

Major C. J. Mead, of the Bengal Staff Corps, Superintending Engineer, Department Public Works,—date of arrival at Bombay, 3rd March 1873.

Major T. Buttanshaw, of the Bengal Staff Corps, District Superintendent of Police, Bengal,—date of arrival at Fort William, 9th March 1873.

Major H. Z. Darrah, of the Bengal Staff Corps,—date of arrival at Bombay, 12th March 1873.

Surgeon E. J. Gayer, of the Medical Department,—date of arrival at Bombay, 28th February 1873.

Captain C. S. De F. Roche, of the Bengal Staff Corps, 3rd Squadron Officer, 14th Bengal Cavalry (Lancers),—date of arrival at Bombay, 3rd March 1873.

Captain J. Liston, of the Bengal Staff Corps, Assistant Commissioner, Jhansi, North-Western Provinces,—date of arrival at Bombay, 6th March 1873.

Captain H. McV. Chrichton, of the Royal Engineers, Executive Engineer, 2nd Grade, Public Works Department, Bengal,—date of arrival at Fort William, 9th March 1873.

Captain H. R. Thuillier, of the Royal Engineers, Deputy Superintendent, Great Trigonometrical Survey of India,—date of arrival at Fort William, 9th March 1873.

Captain M. A. Alves, of the Royal Engineers,—date of arrival at Bombay, 16th February 1873.

Lieutenant S. A. Swinley, of the General List, Cavalry, 1st Squadron Subaltern, 3rd Bengal Cavalry,—date of arrival at Bombay, 31st January 1873; date of departure on furlough from Bombay, 4th February 1871.

Honorary Surgeon T. Murray, M. D., of the Subordinate Medical Department, in medical charge of the Mhairwarra Battalion,—date of arrival at Bombay, 1st March 1873.

No. 335 *of* 1873.—The under-mentioned Officer is permitted to proceed to Europe on furlough on private affairs :—

Lieutenant Colonel Felix Vincent Richard Jervis, of the Bengal Staff Corps,—for two years, under the Regulations of 1868.

No. 336 *of* 1873.—Under the authority of the Right Hon'ble the Secretary of State for India, His Excellency the Governor General in Council is pleased to notify that the period of tenure of appointment as Brigade Major by Officers of the Staff Corps and Indian Army will for the future be restricted to three years.

Officers appointed from Native Regiments to the Brigade Staff under this ruling will retain a lien on their substantive regimental appointments and return to them on the expiration of their tour of staff service, their names being meanwhile retained on their Regimental Lists.

They will receive the benefit of any promotion which may take place in their Regiments during their absence, provided they are considered qualified for the same, but will retain no claim whatever on any regimental allowances during the period of their absence on staff employ.

Officers appointed to fill these temporary vacancies will receive the full allowances from the date on which they may take up the duties of their appointments.

The above ruling is not to be held to affect present incumbents.

The 26th March 1873.

No. 337 *of* 1873.—With reference to the notification issued by the Public Works Department, No. 180, dated the 14th March 1873, the services of Lieutenant J. C. Barker, of the Royal Engineers (Imperial Establishment), late Assistant Engineer, 2nd Grade, Irrigation Branch, Bengal, are replaced at the disposal of His Excellency the Commander-in-Chief.

No. 338 *of* 1873.—ADDENDUM.—His Excellency the Governor General in Council is pleased to authorize the following addition to be made to the list of Barrack furniture issued by the Public Works Department, as published in G. G. O. No. 303 of 1872 :—

Letter.	Articles.	When required and for what purpose.	Authorized proportion.	REMARKS.
C	Clock ...	Schools ...	One to each Regiment.	When absolutely necessary.

Order books to be corrected accordingly.

No. 339 *of* 1873.—The furlough in India on private affairs granted to Lieutenant Colonel J. B. Thelwall, C. B., of the Bengal Staff Corps, Commandant, 21st (Punjab) Regiment of Native Infantry, in G. G. O. No. 326, dated 27th March 1872, is extended for six months, from the 10th April 1873, on the same account without pay.

No. 340 *of* 1873.—The under-mentioned Officer is permitted to proceed to Europe on urgent private affairs :—

Lieutenant G. de C. Morton, of the 1st Battalion, 6th Foot, Private Secretary and Aide-de-Camp to the Hon'ble the Lieutenant Governor, Punjab,—for six months, without pay, under the Regulations of 1854.

This cancels G. G. O. No. 295 of the 18th March 1873.

The 27th March 1873.

No. 341 *of* 1873.—Agreeably to G. G. O. No. 94, dated 1st May 1837, the under-mentioned widow is admitted to Pension equal to that conferred by the 2nd Class Order of Merit on her late husband for three years, commencing from the date of the casualty :—

1st Sikh Infantry.

Lieutenant A. F. Lambe, 1st Wing Subaltern, to be Quartermaster, *vice* Lieutenant C. B. Norman, appointed to the 3rd Sikh Infantry.

4th Sikh Infantry.

Captain L. C. deL. Daniell, 2nd Wing Subaltern, 1st Sikh Infantry, and Officiating Wing Officer, 4th Sikh Infantry, to be 1st Wing Subaltern, but to continue to officiate as Wing Officer of the Regiment during the time Captain B. E. Gowan continues to officiate as 2nd in Command, or until further orders.

5th Goorkha Regiment (The Hazara Goorkha Battalion).

Captain J. Cook, Adjutant, and Officiating Wing Officer, 3rd Sikh Infantry, to be Wing Officer, *vice* Captain E. C. Codrington, appointed to the 3rd Sikh Infantry.

No. 343 *of* 1873.—ERRATUM.—In G. G. O. No. 1069 of 1872, appointing Lieutenant Colonel T. E. Gordon, of the Bengal Staff Corps, to be an Assistant Adjutant General of Divisions, for 16th October 1872, *read* 28*th October* 1872, the date on which the tenure of Colonel H. R. Drew's staff service expired.

Order Books to be corrected accordingly.

No. 344 *of* 1873.—His Excellency the Governor General in Council is pleased to make the following appointment :—

Surgeon J. Picthall, M. D., Examiner of Medical Accounts, to officiate as Examiner of Commissariat and Stud Accounts in addition to his own duties during the period Colonel T. James, C. B., may officiate as Controller of Military Accounts at Bombay, or until further orders.

No. 345 *of* 1873.—The under-mentioned Officers have reported their departure for Europe on the dates specified :—

Major B. W. D. Morton, of the Bengal Staff Corps, G. G. O. No. 37 of 1873, per *Mirzapore*, 14th March 1873.

Major T. G. Montgomerie, of the Royal Engineers, G. G. O. No. 70 of 1873, 10th March 1873.

Captain T. R. Cowie, of the Bengal Staff Corps, G. G. O. No. 179 of 1873, per *Peshawur*, 17th March 1873.

Captain F. F. J. Toke, of the Bengal Staff Corps, G. G. O. No. 152 of 1873, per *Jas. C. Stevenson*, 20th March 1873.

No. 346 *of* 1873.—In modification of paragraphs 1, 2, 3 and 4 of Chapter VIII of the Medical Regulations of 1851, the following rules for the admission of candidates to the Subordinate Medical Department (Apothecary Class) are laid down for the information and guidance of Half-yearly Committees of Examination in the Bengal Presidency.

2. No candidate shall be admitted below 15 or above 18 years of age.

3. Candidates will be required to produce certificates of parentage and age, and satisfactory testimonials of good character, before they can be deemed eligible for preliminary examination.

4. In cases where, from unavoidable circumstances, an original extract (or certified copy) from a Baptismal Register cannot be produced, an affidavit before a Justice of the Peace by the next of the kin of the candidate, or other person in a position to swear to the candidate's age, should be submitted.

5. Candidates must be of healthy constitution, and physically fit for the active duties of the service. Examining Committees will certify to this effect in their Proceedings.

6. The Educational standard will be as follows:—

I.—English Language.

Dictation.—Thirty lines from a standard work; 10 errors to exclude from further competition.

Reading.—Prose and Poetry, 30 lines of each.

Grammar.—Rules of Syntax, and meaning of words.

II.—History of England and of India (outlines of).

III.—Geography, more especially that of India.

IV.—Arithmetic, up to the Rule of Three, including Vulgar and Decimal Fractions.

V.—Vernacular, colloquial.

7. The relative merits of each candidate will be determined by the number of marks which he may gain, to be assigned by Examining Committees according to the following Table:—

English, 250 Marks.									
Reading.	Handwriting.	Orthography.	Meaning of words.	Grammar and Rules of Syntax.	History.	Geography.	Arithmetic.	Vernacular.	Total number of marks obtainable.
50	50	50	50	50	50	50	100	50	500

8. A candidate obtaining less than half the number of marks fixed for any subject will be considered to have failed in his examination.

9. The papers of unsuccessful candidates should be at once returned to them by the Committee, with an intimation that they are not qualified for admission to the Subordinate Medical Department.

No. 347 *of* 1873.—The under-mentioned Officers have reported their return from England:—

Lieutenant Colonel H. H. Stansfeld, of Infantry,—date of arrival at Fort William, 17th March 1873.

Major (Brevet Lieutenant Colonel) R. H. M. Aitken, V. C., of the Bengal Staff Corps, Inspector General of Police, Oude,—date of arrival at Bombay, 13th March 1873.

Captain J. S. Tait, of the Bengal Staff Corps,—date of arrival at Fort William, 17th March 1873.

Surgeon R. Gray, M. B., of the Medical Department,—date of arrival at Bombay, 13th March 1873.

Lieutenant H. Howell, of the Bengal Staff Corps, Quartermaster, 1st Regiment of Punjab Infantry, Punjab Frontier Force,—date of arrival at Bombay, 13th March 1873.

No. 348 *of* 1873.—With reference to the last paragraph but one of G. G. O. No. 550, dated 17th May 1872, it is notified that Batteries and Regiments proceeding to England will take with them the appointments appertaining to Trumpeters, Drummers and Pioneers, together with such musical instruments as are the property of Government.

ADDENDUM.—In G. G. O. No. 550 of 1872, laying down the list of arms, &c., to be taken home by Lancer Regiments, *add* "1 Lance" between the words "1 Pistol" and "1 Sword with Scabbard."

Order Books to be corrected accordingly.

No. 349 *of* 1873.—Native Medical Pupil Shaik Ausgur Ally, No. 309, who was admitted into the service by G. G. O. No. 49 of 1872, is struck off the List of Native Medical Pupils.

No. 350 *of* 1873.—The under-mentioned Officer having completed twelve years' service, including four years in the Staff Corps, is promoted to the rank of Captain from the date specified, under the Royal Warrant of the 16th January 1861, subject to Her Majesty's approval:—

Bengal Staff Corps.

Lieutenant (Brevet Captain) Henry Stephen Hutchinson,—25th March 1873.

No. 359 *of* 1873.—It is hereby announced that on the recommendation of the Government of India, Her Majesty's Government has been pleased to confer a good service pension on the under-mentioned Officer with effect from the 7th October 1872, in room of Major General Sir James Brind, K. C. B., who has succeeded to the Colonels' allowance :—

Deputy Inspector General of Hospitals Henry Bruges Buckle, C. B., of the Medical Department.

Served in the Punjab Campaign, including passage of Chenab and battles of Chillianwalla and Goojerat—Medal and Clasp; served at the siege and capture of Delhi—Medal and Clasp; served in the expeditions against Cabul Kheyl Wuzeerees, 15th December 1859, and against the Mahsood Wuzeerees in April 1860, under Brigadier General N. Chamberlain, C. B; was senior Medical Officer with the native portion of the Eusufzaie Field Force, and there superintended all arrangements for the numerous native sick and wounded in the most zealous and efficient manner—Medal and Clasp, for North-West Frontier and Umbeyla.

Assistant Surgeon, 18th March 1811.
Surgeon, 16th September 1857.
Surgeon Major, 18th March 1861.
Deputy Inspector General of Hospitals. } 4th October 1870.

Was senior Officer of his Department, and served during the Looshaie Expedition with the Left Column of the Force; was indefatigable in his exertions for the health and comfort of the troops.

No. 360 *of* 1873.—His Excellency the Governor General in Council is pleased to direct the publication of the accompanying letters from the Quartermaster General of the 16th January and 17th February 1873, reporting, the operations of the Camp of Exercise at Hussan Abdal and the breaking up of the camp.

The Governor General in Council has received with high satisfaction this report of the great success which attended this Camp of Instruction, and the testimony borne by the Commander-in-Chief to the cordial assistance afforded to His Excellency by the Civil authorities in the Punjab as well as by the Officers of the Madras and Bombay Armies and of the Hyderabad Contingent, who attended the Camp and zealously aided the Staff Officers of the Bengal Army in rendering every assistance in their power.

His Excellency in Council desires to acknowledge the services of these Officers, as well as those of the several Departments favorably noticed by the Commander-in-Chief, and further to place on record the pleasure with which he has received His Excellency's report as to the efficiency and soldierly bearing of the troops which were assembled on this occasion.

The Governor General in Council desires to offer the thanks of the Government of India to the Commander-in-Chief for the very successful manner in which, under His Excellency's orders, the arrangements connected with the Camp of Exercise have been carried out.

No. 288 C, dated Army Head Quarters, Lawrencepore, the 16th January 1873.
From—MAJOR GENERAL P. S. LUMSDEN, C. S. I., Quarter Master General,
To—The Secretary to the Government of India, MILITARY DEPARTMENT.

I am directed by the Commander-in-Chief to report, for the information of the Right Hon'ble the Governor General in Council, that in conformity with the sanction of the Government of India, as conveyed in Military Department letters No. 61 of 3rd August, Camps Instruction, and No. 440 of 12th October 1872, the troops as per margin (with the exception of the 39th Foot, temporarily detained at Rawul Pindee, on account of a case of small-pox) were concentrated by the 1st January around Lawrencepore, and distributed as detailed in the accompanying sketch.

CAMPS OF EXERCISE.

2. The preliminary operations of the force have been confined to the working separately of the several arms, the Artillery being concentrated, with the exception of the Mountain Battery Brigade, at Hajee Shah, the Cavalry at Shumshabad, and the Infantry Divisions respectively at Hussan Abdal, Gondul and Jullalia.

3. The Mountain Battery of Artillery has been located at Hussan Abdal, where the features of the country present a very suitable field for development of the specialities of this important branch.

4. The original position selected for the Artillery at Hameed, on the level plain of Chuch, not presenting sufficient diversity of ground to allow of the practice of judging dis-

tance and taking up positions, it was altered to Hajee Shah, to the southward of which the undulating country is of the most perfect description for the purpose required.

5. The Artillery Batteries and Regiments of Cavalry will now join their respective divisions, where the force will be distributed as per margin at Hussan Abdal, Gondul and Jullalia, under the command, respectively, of Major General Sir H. Tombs, K. C. B., V. C., Major General McMurdo, C. B., and Major-General Macdonell, C. B.

Distribution of the Force with all arms combined for Field Manœuvres.

1st Division—Hussan Abdal.

Major General Sir H. Tombs, K. C. B., V. C., *Commanding.*

Cavalry Brigade ...	4th Hussars. The Guides Cavalry. 10th Bengal Lancers.
Artillery Brigade ...	B-F Royal Horse Artillery. H-8th Field Battery. 3-23rd Heavy Battery. 1-13th Mountain Battery.
1st Infantry Brigade ...	39th Foot. The Guides Infantry 23rd Pioneers.
2nd Infantry Brigade ...	58th Foot. 4th Sikh Infantry. 19th Native Infantry.
3rd Infantry Brigade ...	14th Native Infantry. 25th "

2nd Division—Gondul.

Major General W. M. S. McMurdo, C. B., *Commanding*

Cavalry Brigade ...	5th Lancers. 1st Punjab Cavalry. 15th Bengal Cavalry.
Artillery Brigade ...	B-A Royal Horse Artillery. D-16th Field Battery. Peshawur Mountain Battery.
1st Infantry Brigade ...	55th Foot. 1st Punjab Infantry. 36th Native Infantry.
2nd Infantry Brigade ...	36th Foot. 12th Native Infantry. 15th " "

3rd Division—Jullalia.

Major General A. Macdonell, C. B., *Commanding*

Cavalry Brigade ...	5th Bengal Cavalry. 9th " 16th "
Artillery Brigade ...	D-A Royal Horse Artillery. A-8th Field Battery. Hazara Mountain Battery.
1st Infantry Brigade ...	70th Foot. 29th Native Infantry. 5th Goorkhas.
2nd Infantry Brigade ...	2nd Battalion, 60th Rifles. 22nd Native Infantry. 30th " "

6. The Head Quarters of the Army, the General Hospital of British and Native Troops; the Engineer and Ordnance Parks; the Head Quarters Sappers and Miners are established, with the Commissariat Department, at Lawrencepore.

A field ground telegraph connects Shumshabad with Head Quarters, while aërial lines have been established to all the other camps.

Trestle bridges have been constructed over the Chel stream in the Gondul Camp, and on the line of communication with Shumshabad.

A temporary suspension wire bridge of 100 feet span is now also in course of construction by the Sappers at Gondul over the same river.

Norton's pumps have been sunk for use in the Gondul and Hussan Abdal Camps, as also at the Hutti encampment.

The difficult hilly country on the extension of the Gundgurh range between the Hussan Abdal and Jullalia positions has been successfully opened out by a direct gun road constructed by the 23rd Pioneers.

A detachment of signallers has been steadily at work since the commencement of operations, and, in addition to flags, heliographs are now being experimented upon.

Preparations are in hand for the bridging of the Indus during the final operations according to the means that may be available.

7. The Commander-in-Chief has just inspected the Artillery and Cavalry preparatory to their dispersion to different divisions. The former under Colonel Arbuthnot have been most usefully occupied in practising the employment of Artillery in masses.

8. A most interesting trial of the effect of Artillery on wings of Infantry in column and line, represented by matting at unknown distances up to 2,800 yards, has just been most successfully concluded, and will be duly reported on hereafter.

9. His Excellency has been specially pleased with the working of the Cavalry under the command of Colonel T. Wright, C. B., who has most zealously labored to instruct all under his command in the field duties required of this arm of the service.

10. Brigadier Generals of Infantry have, in the meantime, been equally industrious with their respective commands, endeavouring as far as possible to apply the new system of drill as laid down by His Royal Highness the Field Marshal Commanding-in-Chief.

11. The Commander-in-Chief now proposes to leave the Major Generals to carry out divisional manœuvres for a period of about ten days with the three arms.

12. His Excellency then purposes to detach a Brigade of Infantry with a Mountain Battery to occupy a selected village position on the Gundgurh range, and to cause it to be attacked by two Brigades with Mountain Artillery, advancing from Jullalia and Hussan Abdal.

13. For the more extensive operations, the field selected by His Excellency is the country between Attock and Hurreepore.

The last period allowed for the camp will be devoted to extended manœuvres.

No. 823 C, dated Hussan Abdal, the 17th February 1873.

From—LIEUT. COLONEL F. S. ROBERTS, Deputy Quarter Master General,

To—The Secretary to the Govt. of India, MILITARY DEPARTMENT.

In continuation of this Office letter No. 288 C of 16th January, I am directed by the Right Hon'ble the Commander-in-Chief to report for the information of Government the breaking up of the Camp of Exercise at Hussan Abdal on the 12th February.

2. The troops are now on their way to their respective quarters.

3. It will be in the recollection of Government that, owing to the existence of cholera at Peshawur, it was considered advisable to postpone the assembly of the Camp from the 1st December to the 1st January.

4. It is to be regretted that this change was necessary, as the 1st of December would have been a more suitable date with regard to the weather and the cultivation.

5. The present season has been an exceptionally favorable one, but the register of the rainfall gives a lower average in December and the early part of January than in the succeeding six weeks.

6. The crops during the last fortnight have advanced so rapidly as to induce the Commander-in-Chief to alter the more extended manœuvres which were originally planned to concentrate on Lower Hazara, and to restrict them to ground already traversed in the less fertile neighbourhood of the Trunk Road.

7. The conduct of the troops has been most exemplary, not a single case of misbehaviour towards the people of the country having been reported. The result has been that the population, who received the concentration of the force with some feelings of anxiety and alarm, now express themselves as extremely well pleased; they have shown the most friendly confidence, and have exerted themselves cheerfully to give every assistance in their power in furnishing supplies, and have followed the movements of the troops with lively demonstrations of interest and pleasure.

8. The Commander-in-Chief feels much indebted to the Surveyor General for the liberal supply of maps of the country which have proved to be most correct, and have been used for the conduct of all operations and the guidance of Officers and troops.

A large number (400 copies) have been distributed among the Staff and Regimental Officers.

9. The report of the Inspector General of Hospitals of Her Majesty's British Forces will be forwarded through the usual channel.

The health of the troops has been excellent. Those that were suffering from Peshawur fever rapidly improved on coming into the Camp. The convalescents, of whom there were more than two hundred, were first moved to Attock, where they benefitted by the change, and from thence were drafted into Camp by detachments as they became fit to move.

10. The establishment of the General Hospital in the buildings of the former cantonment of Lawrencepre, supplemented by tents, proved very successful, and ensured an amount of comfort to the sick and convalescents, which could not otherwise have been obtained. The tarpaulins for the floors of the tents proved a valuable protection.

11. Bell tents and Sepoy pals were used in substitution for the soldiers ordinary tent, and proved quite sufficient for the accommodation of troops in this part of India in the cold season; but although Bell tents shelter a greater number than could be covered by the same weight in any other form, yet, even with a double fly, they are not suitable for the extreme heat of India in the plains.

12. The pals with double flys especially made up at Cawnpore for trial with Mountain Batteries, and capable of sheltering from six to eight men, are still being experimented upon; a report of the result will be made hereafter.

13. The want of shelter of any description for the syces and grasscutters of British Batteries and Regiments of Cavalry was severely felt during cold and rainy weather.

14. Communication by Electric Telegraph has on this occasion been extensively applied between distant Camps by ærial lines, and by the field wire with the advance and disconnected portions of the force. The conveyance of the Field Telegraph on wheeled carriage broke down shortly after the assembly of the Camp, but by the ingenuity and resource of the Royal Engineers and the Corps of Sappers, measures were immediately adopted for substituting in the first place camels, and eventually mules, instead of carts: a telegraph depending on wheeled carriage would fail in any war carried on in rough country without roads.

15. The system of Army signalling has been largely employed both by flags and by the use of the Heliograph, special reports on which will be duly submitted hereafter.

16. Bridging by means of Biragos' trestles has been practised, and a chain bridge was thrown over the Chel stream, while the Sappers also constructed a bridge of boats, with pontoon superstructure, across the Indus at Mandoria, and further prepared all the means for a passage of the Indus by a flying bridge at Nilab.

17. On appropriate occasions shelter trenches, rifle pits and batteries have been constructed by the troops.

18. The postal arrangements throughout the Camps have been excellent, as also have been those for accelerating the conveyance of Officers and sick men to and from the Camp of Exercise. In the absence of any rail, these duties have been of very considerable importance, and reflect great credit on Mr. A. G. Faichnie, the energetic Superintendent of the Postal Department.

19. The Telegraph Department afforded very useful assistance in co-operating with the military lines and in supplementing them with their own instruments, stores, &c., when necessary.

20. The exertions of the Commissariat Department deserve the greatest praise. The supplies for the troops have never failed, while the energy of private enterprise has filled the several bazaars.

21. The manœuvres which followed the divisional operations, already referred to in this Office No. 288C of 16th January 1873, have extended from Attock and Nilab on the Indus, along the line of the Trunk Road to the Margulla Pass. They consisted of two operations, the result of which will be transmitted as a separate communication.

22. These movements have been carried out with the greatest interest and cheerfulness by both Officers and men, and it affords the Commander-in-Chief great satisfaction to testify to the efficiency and soldierly bearing of the troops, among whom the Regiments of the Punjab Frontier Force have held a high place.

23. The Officers of the Madras and Bombay Armies and the Hyderabad Contingent, attending the manœuvres, have most cordially joined their efforts to the Staff of the Bengal Army, in rendering every assistance in their power to promote the objects of the Camp of Exercise; and His Excellency gladly avails himself of this opportunity of acknowledging gratefully the aid they have afforded to the General and Umpire Staff.

24. It is impossible for the Commander-in-Chief to express too highly his sense of the cordial assistance given by the Civil authorities of the Punjab.

25. After the close of the operations, the whole force was reviewed on the Boorhan plain on the 11th instant.

The Lieutenant Governor of the Punjab and the Envoy from Yarkund were present; also the Commissioners and other Civil Officers of the Peshawur and Rawul Pindee Districts, accompanied by a very large assemblage of Chiefs with their followers. These Chiefs represented the whole of the North-West Frontier, including Hazara, Khagan, Ensufzaie, several Affreedie tribes, and the Trans-Indus clans, including even many Wuzeeries from the Suliman mountains.

His Excellency believes that the political effect of the display could not fail to be very valuable.

26. The appearance of the whole force was admirable and the discipline excellent, except in one or two instances, in which the excitement of a few men, under the novelty of the circumstances, carried them away.

These occurrences will be duly noticed, and His Excellency confidently hopes that they will never happen again.

27. The Commander-in-Chief feels it due to the Officers and men of all ranks to bear testimony to the zeal with which they have endeavoured to profit by the valuable opportunities of military instruction afforded by the Government in so liberal a manner. Lord Napier of Magdala congratulates the Government on the success which has attended these Camps, and the increased interest in military subjects which they have excited throughout the Army.

No. 361 *of* 1873.—Her Majesty has been pleased to appoint the under-mentioned gentleman to be Assistant Surgeon in Her Majesty's Indian Military Forces at the Presidency of Bengal. He is accordingly admitted into the service :—

Medical Department.

Assistant Surgeon Russick Lall Dutt, M. D.,—date of arrival at Fort William, 22nd November 1872.

No. 362 *of* 1873.—The services of Assistant Surgeon R. L. Dutt, M. D., of the Medical Department, are placed temporarily at the disposal of the Government of Bengal, with effect from the date he may have assumed charge of his duties under that Government.

No. 363 *of* 1873.—His Excellency the Governor General in Council is pleased to make the following appointments :—

HYDERABAD CONTINGENT.

2nd Cavalry.

Lieutenant H. C. Hamilton, Squadron Subaltern, 1st Cavalry, to be Adjutant, *vice* Captain R. Attley, deceased.

1st Cavalry.

Captain F. Weldon, Officiating Squadron Subaltern, 2nd Cavalry, to be Squadron Subaltern, *vice* Lieutenant H. C. Hamilton.

No. 364 *of* 1873.—Supernumerary Surgeon Sydney Charles Courtney, M. D., of the Medical Department, is brought on the establishment of Surgeons to fill an existing vacancy.

No. 365 *of* 1873.—His Excellency the Governor General in Council is pleased to make the following appointments to complete the establishment, subject to the Officers passing an examination in drill :—

CALCUTTA VOLUNTEER RIFLE CORPS.

Mr. James Arthur Aldis, to be Captain.
Mr. William Trego Webb, to be Lieutenant.

H. K. BURNE, *Colonel,*
Secretary to the Govt. of India.

MARINE DEPARTMENT.

NOTIFICATIONS.

Fort William, the 26th March 1873.

No. 2 *of* 1873.—The following Quarantine Rules, submitted by the Chief Commissioner, British Burmah, having been approved by the Right Hon'ble the Governor General of India in Council, are published under the provisions of Section 2, Act I of 1870 :—

Rules relating to quarantine for the ports mentioned in Schedule A hereto annexed.

The following rules, made by the Chief Commissioner of British Burmah, with the sanction of the Governor General in Council, in pursuance of the provisions contained in Act I of 1870, are hereby promulgated for general information :—

I.—The master or other person in charge of any vessel, about to enter any of the ports mentioned in Schedule A annexed hereto, in which any case or cases of cholera, yellow fever, Asiatic plague, small-pox, or other disease dangerous to the general health, may have occurred within a period of ten days previous to the date of the arrival of such ship or vessel at any of the ports aforesaid, shall notify this fact by hoisting a signal, which signal shall be in the day time a yellow flag at the fore, and in the night time two lighted lanterns, one over the other, at the same mast-head ; and such master, or other person as aforesaid, shall not take up anchoring ground within the said port without having obtained the previous sanction of the Master Attendant or other officer in charge of the port, nor without such leave shall he hold any communication with the shore or with any shipping within the said port.

II.—Whenever the master or other person in charge of any vessel, about to enter any of the ports aforesaid, is unable to produce a clean bill of health obtained from the proper authority at the port last visited, he shall notify this fact to the Master Attendant or other officer in charge of the port, by hoisting a signal as aforesaid, and thereupon the Master Attendant or other officer in charge of the port may, on the report of the Health Officer or other officer appointed by the Local Government in that behalf, suggesting or warranting the adoption of such a measure, refuse to permit the master or other person as aforesaid to anchor his vessel within the ordinary limits of the said port, and may forbid all communication between the vessel and the shore until a quarantine of observation, not exceeding twenty-four hours from the receipt of the report of the Health Officer or other officer appointed by the Local Government in that behalf, shall have been enforced.

III.—It shall be the duty of the Health Officer or other officer appointed by Government in that behalf, to proceed without delay on board any vessel about to enter any of the ports aforesaid in which any case or cases of cholera, yellow fever, Asiatic plague, small-pox, or other disease dangerous to the general health, shall have occurred, within ten days previous to the date of the arrival of such vessel as aforesaid, or whenever the master or other person in charge of any vessel is unable to produce a clean bill of health from the port last visited, and such Health Officer or other officer as aforesaid shall inspect the crew and passengers of every vessel as aforesaid, and make careful enquiry as to the nature of the disease then existing on board every such vessel, and make a report thereon to the Master Attendant or other officer in charge of the said port.

IV.—Upon the receipt of the report of the Health Officer or other officer appointed by the Local Government in that behalf, the Master Attendant or other officer in charge of the port shall determine whether any passengers or merchandize may be landed, or whether the master or other person in charge of such vessel shall be required to a proceed to a quarantine anchorage, or to put out to sea, or to anchor beyond the limits of the port in such place as may be appointed for that purpose by the Master Attendant or other officer in charge of the port, or to undergo a quarantine of observation.

V.—Whenever cholera, yellow fever, Asiatic plague, small-pox, or other disease dangerous to the general health, shall be actually prevailing amongst any of the crew or passengers of any vessel as aforesaid, and none of those diseases shall exist at the time in the neighbourhood of the port which the said vessel about to enter or has entered, it shall be the duty of the Health Officer or other officer appointed by Government in that behalf, to report this state of the facts to the Master Attendant or other officer in charge of the port. Thereupon the Master Attendant or other officer in charge of the port shall require the master or other person in charge of such vessel as aforesaid, to take the said vessel out to sea for a period of ten days, or to anchor at any place, to be appointed for that purpose, for a period of ten days.

VI.—All persons on board vessels in quarantine are hereby prohibited from communication with the shore beyond the limits of any place which may be set apart for performing quarantine on shore, or with any vessel in the roadstead or vicinity of the roadstead, unless the permission of an officer duly authorized by the Local Government in that behalf, shall have been previously obtained; and all persons are hereby prohibited from going on board any vessel in quarantine, unless the permission of an officer duly authorized by the said Government in that behalf shall have been previously obtained.

VII.—It shall be lawful for every officer, duly authorized by the Local Government in that behalf, to appoint a sufficient number of subordinates for the purpose of enforcing these rules at the expense of the owners of such vessels, and the master or other person in charge of such vessel shall pay the subordinates so appointed, and defray all expenses incurred in pursuance of this rule. It shall be the duty of the officer in charge of the Custom House to refuse port clearance to such vessels until all such demands be discharged.

VIII.—It shall be lawful for every officer, duly appointed as aforesaid, with the sanction of the Local Government, to appoint as many places for performing quarantine on shore as may be required, and to provide accommodation at such places for passengers on board any vessel to which these rules are applicable, at certain fixed fees, to be determined from time to time by the Government, which fees shall be payable by the master or other person in charge of such vessel. No person shall be permitted to leave the place so appointed within ten days from the date of last case of the disease for which quarantine was enforced, unless with the previous sanction of the said officer duly authorized as aforesaid.

IX.—Disobedience to any of the above Rules Nos. I, II, III, IV, V, VI and VIII will subject the offenders, and all persons aiding or abetting him, to a prosecution under Section 271 of the Indian Penal Code.

SCHEDULE A.

(Referred to in Rule I.)

Rangoon.	Sandoway.
Moulmein.	Tavoy.
Akyab.	Mergui.
Kyouk-phyoo.	Bassein.

No. 3 of 1873.—His Excellency the Governor General in Council is pleased to appoint Captain A. Baker, Deputy Master Attendant, to officiate as Master Attendant and Superintendent of the Government Dockyard, Calcutta, with effect from the 3rd December 1872, *vice* Captain S. G. Boon, deceased, as a temporary arrangement and until further orders.

The 28th March 1873.

No. 4 of 1873.—The following Notice received from the Colonial Secretary, Cape of Good Hope, is published for general information :—

GOVERNMENT NOTICE.—No. 631, 1872.

Office of the Commissioner of Crown Lands and Public Works, 23rd December 1872.

The following Notice by the Harbour-master of Port Elizabeth respecting the blinking of the existing Light on the Bird Islands is published for general information.

C. ABERCROMBIE SMITH,
Commissioner.

NOTICE TO MARINERS.

Bird Island Lights.

Notice is hereby given that a new Lighthouse is in the course of erection at the Bird Islands, and that the new Building having reached the height of the upper Light, the Light will be blinked between the bearings of S. and S. by W. ½ W. by compass from a ship.

Vessels passing inside the Islands at night are therefore warned of this until the new Light is exhibited.

PORT OFFICE, PORT ELIZABETH, *9th December* 1872.

F. SKEAD,
Harbour-master.

H. K. BURNE, *Colonel,*
Secretary to the Govt. of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENT.

Fort William, the 24th March 1873.

No. 207.—Mr. R. H. Trotter, Controller of Public Works Accounts, 2nd Class, 3rd Grade, Central Provinces, is allowed furlough to Europe for one year under Section 7 of Supplement F of the Civil Leave Code, with effect from the 7th April next, or such date as he may avail himself of it.

Mr. J. H. Harding, Controller, 2nd Class, 2nd Grade, Central India, is appointed Controller of Public Works Accounts, Central Provinces.

Mr. Becher will officiate as Deputy Controller during the absence of Captain Westmorland, or until further orders.

No. 223.—The following Notification in the Military Department is re-published for information and guidance in the Public Works Department :—

No. 249 *of* 1873.—The following Military letter from the Right Hon'ble the Secretary of State for India is published for general information :—

MILITARY. INDIA OFFICE;
No 14. *London, 30th January* 1873.

To His Excellency the Right Hon'ble the Governor General of India in Council.

MY LORD,

Para. 1.—I have received and considered in Council your Military letter No. 200 of the 26th September 1872, containing proposals to enable Officers of Royal Engineers employed in India to qualify for the Military examinations prescribed by Horse Guards General Order No. 52 of 1872, to be passed previous to promotion.

2.—In reply, I have to acquaint your Government that I have sanctioned the following arrangements :—

I.—That Royal Engineer Officers in the Public Works Department in India may be allowed to take special leave for three months in India on full pay, in order that they may be attached to some corps for military duty; such leave to be considered as service in all respects.

II.—That all Lieutenants and Captains of the Royal Engineers, when on furlough in England, shall be allowed, in addition to their furlough, to spend a certain time on duty at the School of Military Engineering at Chatham, drawing English pay and extra pay as laid down at page 45 of the Revised Army Regulations, together with servant's allowance at the rate of 1*s.* 6*d.* a day.

The "certain time" above referred to is to be a maximum of six months after the first eight years of service in India qualifying for furlough, and three months after the second period of six years.

The time passed at Chatham on duty will not be allowed to reckon as a qualification for furlough.

Officers on furlough, who may prefer to spend a part of their furlough at the school, will not be subject to any reduction of their furlough pay.

III.—That the same advantages be accorded to Officers of Royal Engineers on leave on medical certificate, the time to be passed at Chatham in their case being regulated on the above principle, the period, however, not being less than three months.

3. In accordance with the suggestion of Lord Napier of Magdala, a certificate of proficiency will be required in all cases to authorize the time passed in study at Chatham to count as service in India.

I have, &c.,
(Sd.) ARGYLL.

The 27th March 1873.

No. 224.—Captain J. Dundas, V. C., R. E., Executive Engineer, 2nd Grade, is transferred from the Neemuch (State) Railway to the Military Works Branch.

No. 225.—The under-mentioned Officers of Royal Engineers are appointed to the Public Works Department as Assistant Engineers, 2nd Grade, and posted as follows :—

Lieutenant R. F. Moore	...	...	Military Works Branch.
" W. Peacocke	...	...	Military Works Branch.
" R. H. Brown	...	...	Bengal Irrigation Branch.
" R. O. Lloyd	...	...	British Burmah.
" E. W. Creswell	...	...	N. W. P., Irrigation Branch.

No. 226.—Mr. F. W. Papworth is appointed to the Public Works Department as a temporary Supervisor of the 1st Grade and posted to the Holkar (State) Railway. The appointment has effect from 27th February 1873.

The 28th March 1873.

No. 227.—Mr. F. H. Landon, temporary Assistant Engineer, 2nd Grade, Neemuch (State) Railway, is confirmed in his appointment, with effect from 4th January 1873.

No. 228.—Mr. F. H. Landon, Assistant Engineer, 2nd Grade, Neemuch (State) Railway, is granted six months' leave under Section 9, Supplement F of the Civil Leave Code from such date as he may avail himself of it.

No. 229.—Messrs. E. Blackwell and J. Gilmore are appointed temporarily to the Public Works Department, the former as an Overseer of the 2nd Grade, and the latter as a Sub-Engineer of the 2nd Grade, with effect from 15th November 1872 and 7th January 1873, respectively, and are posted to the Indus Valley (State) Railway.

No. 230.—Baboo Thakur Das Ghosh is appointed to the Public Works Department as a temporary Overseer of the 1st Grade and posted to Bengal in the Public Works Department, Irrigation Branch.

No. 231.—Captain K. C. Pye, R. E., Assistant Secretary to the Government of India, Public Works Department, Railway Branch, is granted three months' privilege leave, with effect from the 15th April next.

Captain W. Shepherd, R. E., Deputy Consulting Engineer to the Government of India for Guaranteed Railways, Lucknow, will officiate as Assistant Secretary in the Railway Branch during Captain Pye's absence, or until further orders.

No. 232.—Captain H. McV. Crichton, R. E., Executive Engineer, 2nd Grade, is transferred from Bengal to the Military Works Branch.

No. 233.—*Erratum.*—In Public Works Department Notification No. 186 of the 18th instant, transferring Baboo Radhica Persaud Mokerjee from the Military Works Branch to Bengal, *for* "Assistant Engineer, 1st Grade," *read* "Executive Engineer, 4th Grade," and after the word Bengal add the words "Provincial establishment."

TELEGRAPH.

The 24th March 1873.

Notice.

Tenders are hereby invited for the supply of the following material for the Sutlej Bridge Indus Valley (State) Railway:—

30,000 (thirty thousand) maunds of Sukkur limestone.

30,000 (thirty thousand) maunds of limestone from the neighbourhood of Pinddadun-Khan.

30,000 (thirty thousand) maunds of Jhund or Keekur charcoal.

The deliveries from each direction to be made at the minimum rate of 5,000 (five thousand) maunds monthly, commencing with the month of July, so that the whole shall be delivered by the end of December 1873.

The charcoal also to be delivered in six monthly quotas of 5,000 (five thousand) maunds each.

Distinct tenders should be made for each of the three above operations, and an earnest deposit of Rs. 500 to be lodged with each tender, which will be returned to those whose tenders are not accepted.

A deduction of 10 per cent. will be made from all payments in addition to the deposit of Rs. 500, and the sum thus accumulated will remain in the hands of Government until the contracts are completed, when it will be repaid to the contractor.

The two limestone contracts will not be given to one individual, but the charcoal supply and one limestone contract may be obtained by the same contractor.

Sealed tenders will be received up to and on the 31st March 1873, and will be opened in the presence of those who may wish to attend at noon on the 1st day of April 1873.

The lowest tender will not necessarily be accepted.

Further information may be obtained on application to the undersigned at Adamwahan.

R. HEENAN,
Superintendent of Works, Sutlej Bridge.

POST OFFICE.

NOTIFICATIONS.

GOVERNMENT SIMLA PASSENGER DAK.

UMBALLA AND KALKA ROAD.

Calcutta, the 15th March 1873.

From the 1st April to the 31st of May 1873, arrangements have been made for booking Express Passenger Dâks from Umballa to Kalka, at the Calcutta Post Office,* under certain rules and conditions, of which a printed copy can be obtained on application to the Post Master, Calcutta.

* Post Master's room, east verandah, between the hours f 10 A. M. and 4 P. M.

It is expected that about twelve Express Dâks can be supplied daily, and the charge per dâk will be Rs. 30.

From the 1st April, two ordinary vans carrying mails will leave the Umballa Post Office, one in the morning at or about 6 A. M., and the other in the evening at or about 6 P. M. In each of these vans, four seats will be available for passengers (if the weight of the mails admit) at a charge of Rs. 6 per seat.

F. R. HOGG,

Offg. Director Genl. of the Post Office of India.

N. B.—For conditions respecting the booking of dâks in Calcutta, see paragraph 11 of the Rules.

The 28th March 1873.

Mails for Akyab, Rangoon, and Moulmein, for transmission per Steamer *Abyssinia*, will be closed at this Office on Sunday, the 30th March, at 7 P. M.

Mails for Port Blair and Camorta, for transmission per Steamer *Scotia*, will be closed at this Office on Monday, the 31st March, at 7 P. M.

Mails for Ceylon and the Australian Colonies, for transmission per Steamer from Bombay, will be closed at this Office on Wednesday, the 2nd April, at 7 P. M.

The next Overland Mail *viâ* Bombay will close on Friday, the 4th April 1873.

2. Book post and pattern packets must be posted on the 3rd.

N. B.—The Letter Box will close at 7 P. M. precisely, after which hour Overland letters, fully prepaid and bearing extra postage stamp of two (2) annas on each cover, will be received up to 7·30 P. M., or bearing an extra postage stamp of four (4) annas on each cover up to 8 P. M., and after 8 up to 9 P. M. by a Post Office Clerk at the East Indian Railway Station, Armenian Ghât.

Mails for Ceylon, Penang, Singapore, Hong-Kong, China, and Japan, for transmission per Steamer from Bombay, will be closed at this Office on Saturday, the 5th April, at 7 P. M.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 19.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th March 1873, and was referred to a Select Committee with instructions to make their report thereon in six weeks:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, and the Panjáb Municipal Act, 1873, be published in English, Marhátthí and Hindí in the *Central Provinces Gazette*:—

No. 6 OF 1873.

A Bill to extend the Panjáb Municipal Act, 1873, to the Central Provinces.

Preamble.

FOR the purpose of extending the Panjáb Municipal Act, 1873, to the Central Provinces; It is hereby enacted as follows:—

Extension of Act IV of 1873 to Central Provinces.

1. The said Act shall extend to the Central Provinces, but subject to the following modifications, that is to say—

(*a*.) The title and preamble, section one, paragraph one, and section two, shall be read as if, after the word 'Panjáb,' the words "and Central Provinces" were inserted.

(*b*.) Section one, paragraph two, shall be read as if, for the words "under the government of the Lieutenant Governor of the Panjáb," the words "respectively under the government of the Lieutenant Governor of the Panjáb, and the administration of the Chief Commissioner of the Central Provinces," were substituted.

(*c*.) In sections four, five, six and seven, after the words "*Panjáb Gazette*" (wherever they occur), the words "or *Central Provinces Gazette*, as the case may be," shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

Under section 21 of the Panjáb Municipal Act (XV of 1867), that Act was at various times extended to several towns in the Central Provinces for five years from the date of each extension. Act IV of 1873, which replaces Act XV of 1867 in the Panjáb, has been made exclusively applicable to that Province, and thus there will soon be no Act under which municipal rates or taxes can be raised or expended in any town of the Central Provinces. It is therefore necessary to pass an Act to supply a fresh legal basis on which the action of Municipal Committees may rest. As the Panjáb Act of 1867 has hitherto served for the Central Provinces, and has been found to work well, it is considered best to extend to those Provinces the new Panjáb Act, which is a modification of the former one.

CALCUTTA, 26*th February* 1873. } A. HOBHOUSE.

WHITLEY STOKES,
Secy. to the Govt. of India.

[Third Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th March 1873, and was referred to a Select Committee with instructions to make their report thereon in a fortnight:

It was also ordered in Council that the Bill, together with the Statement of Objects and Reasons, be published in English, Urdú and Hindí in the *North-Western Provinces Gazette*:—

No. 7 OF 1873.

A Bill to consolidate and amend the law relating to Village Police in the North-Western Provinces.

Preamble.

WHEREAS it is expedient to consolidate and amend the law relating to the Village Police in the North-Western Provinces; It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Village Police (North-Western Provinces) Act, 1873:"

It extends only to the territories under the government of the Lieutenant Governor of the North-Western Provinces;

Local extent.

And it shall come into force on the passing thereof.

Commencement.

2. So much of section twenty-one of Bengal Regulation XX of 1817 as relates to the Village Watchmen of the North-Western Provinces, and sections eighteen, nineteen and twenty of Act No. III of 1869, are hereby repealed.

Repeal of enactments.

3. The nomination to the post of Village Policeman shall be made by the zamíndár of the village, or, where there are more zamíndárs than one by the lambardár as their representative, and where there are more lambardárs than one, the opinion of the majority (unless there is some special provision to the contrary in the village administration paper) shall prevail.

Right of nomination of Village Policemen.

4. Every person authorized to nominate a person to the office of Village Policeman shall, within fifteen days after the occurrence of a vacancy in the office, nominate a proper person to the vacant post, and communicate the nomination to the Magistrate of the District.

Obligation to nominate.

5. The person so nominated shall, after due enquiry into his age, character and ability, be appointed or rejected by such Magistrate at his discretion, or by some officer authorized in that behalf.

Discretion to appoint or reject nominee.

6—(*a*.) In default of such nomination within the said fifteen days, the Magistrate of the District shall appoint such person as he thinks fit to the vacancy.

Power to Magistrate to appoint.

(*b*.) If the nomination has been made within the said fifteen days, but the nominee is rejected, the person authorized to nominate a person to the office of Village Policeman, shall within fifteen days from the date of such rejection, nominate another person to the vacant post; and in default of such nomination, or if such nomination has been made, but the nominee is again rejected, the Magistrate of the District shall appoint such person as he thinks fit to the vacancy.

Procedure in case of rejection of nominee.

7. Every Village Policeman shall perform the following duties:—

Duties of Village Policemen.

(*a*). He shall give immediate information to the officer in charge of the police-station within the jurisdiction of which the village is situate, of every unnatural, suspicious, or sudden death occurring in the village of which he is Chaukídár;

of each of the following offences occurring in such village (that is to say)

murder, culpable homicide, rape, dacoity, theft, mischief by fire, house-breaking, counterfeiting coin, causing grievous hurt, riot,

and all attempts and preparations to commit, and abetments of, the said offences.

(*b*.) He shall keep the Police informed of all disputes which are likely to lead to any riot or serious affray.

(*c*.) He shall arrest all proclaimed offenders, and all persons whom he may find in the act of committing any offence specified in clause (*a*) of this section.

(*d*.) He shall observe, and from time to time report to the officer in charge of the police-station within the jurisdiction of which the village may be situate, the movements of all bad characters in such village.

(*e*.) He shall report to the officer in charge of such police-station the arrival of suspicious characters in the neighbourhood.

(*f*.) He shall supply any local information which a Magistrate or any officer of police may require, and shall promptly execute all orders legally issued to him by competent authority.

8. Whenever a Village Policeman arrests any person, he shall forthwith take him to the police-station within the jurisdiction of which his village is situate; provided that, if the arrest is made at night, such person shall be so taken, as soon as possible, on the following morning.

Procedure on arrest by Village Policeman.

9. The Magistrate of the District may dismiss any Village Policeman for any misconduct or neglect of duty.

Dismissal of Village Policeman.

10. Every Village Policeman guilty of any wilful misconduct in his office or of neglect of duty, such misconduct or neglect not being an offence within the meaning of the Indian Penal Code;

Acts punishable.

or withdrawing from the duties of his office without permission, or without having given previous notice for a period of two months;

or guilty of cowardice,

or offering any unwarrantable personal violence to any person in his custody;

or violating any of the rules that may under section eleven be framed by the Local Government in pursuance of this Act,

shall be liable, on conviction before a Magistrate, to a penalty not exceeding three months' pay, or to imprisonment for a period not exceeding three months, or to both.

Penalty.

11. The Local Government may from time to time frame further rules for the discipline of the Village Police, and for carrying out generally the purposes of this Act, and breach of such rules shall be punishable as an offence under this Act.

Rules under Act.

12. All fines levied under this Act on Village Policemen shall be credited to the Chaukídárí Fund of the District in which they are employed.

Fines to be credited to Chaukídárí Fund.

STATEMENT OF OBJECTS AND REASONS.

The only two laws at present in force for the appointment of village-watchmen, for the definition of their duties, and for enforcing penalties for neglect thereof, are section 21, Regulation XX of 1817, and sections 18, 19 and 20 of Act III of 1869.

The provisions of the latter Act are of special and not of general application, being applicable only to watchmen appointed under that Act. Those of the former, however good, are not of themselves sufficient. But the two combined, with certain alterations and additions, give excellent materials for one consolidated Act on the subject.

So long as the village-watchmen of these Provinces were remunerated by the small pittance in money, grain, or land, which they formerly received, it was hard to expect much of them, or to subject them to a severer penalty for neglect of duty than that prescribed by Regulation XX of 1817, namely, dismissal from their posts. But now that these men have been put on a regular footing, and receive fixed monthly salaries, it seems proper that they should, as regards their appointment, discipline, and general management, be subjected to rules similar to those adopted for village-watchmen, paid under Act III of 1869, while such portions of the old law, Regulation XX of 1817, as defined correctly their present duties and responsibilities, should be re-enacted. The present Bill has been framed with the above views.

CALCUTTA, *23rd February* 1873. } J. F. D. INGLIS.

WHITLEY STOKES,
Secy. to the Govt. of India.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th March 1873, and was referred to a Select Committee with instructions to make their report thereon in a week:—

No. 8 OF 1873.

A Bill to amend the law relating to Cargo-boats plying for hire within the Port of Calcutta.

Preamble.

WHEREAS, under the Consolidated Customs Act, No. VI of 1863, section one hundred and sixty-two, the Chief Officer of Customs of the port of Calcutta is empowered to issue licenses for, and to make registration of, cargo-boats plying within the limits of such port, under the rules, and on payment of the fees, therein referred to: And whereas it is expedient to transfer such power from the said Chief Officer to the Conservator of the said port; It is hereby enacted as follows:—

Transfer of power to license and register cargo-boats.

1. The power hereinbefore recited shall henceforward be exercised by the Conservator of the Port of Calcutta in lieu of the Chief Officer of Customs of the said Port.

STATEMENT OF OBJECTS AND REASONS.

When the Government of Bengal proposed that three-fourths of the charge of the River Police should be paid out of port revenues, the Port Commissioners agreed on certain conditions, one being that the nett proceeds realized from the registration of cargo and passenger-boats should be made over to them.

To this condition the Government of Bengal, with the concurrence of the Government of India, so far as the condition referred to cargo-boats, assented, charges of registration being also transferred. At present the law requires that cargo-boats shall be registered by the Collector of Customs, and passenger-boats by the Commissioner of Police; but it is considered advisable to amalgamate the establishments employed upon these duties, and to place them under the Port Commissioners as Conservators of the Port of Calcutta. The object of the present Bill is simply to remove the legal difficulty in the way of the proposed amalgamation.

A. HOBHOUSE.

45. Prosecutions.
46. Recovery of taxes.

A Bill to make better provision for the appointment of Municipal Committees in the North-Western Provinces and Oudh, and for other purposes.

Preamble.

WHEREAS it is expedient to make better provision for the appointment of Municipal Committees in the North-Western Provinces and Oudh, and for the police, conservancy and local improvements, and for education and for the levying of rates and taxes, in the places to which this Act may be extended; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. This Act may be called "The North-Western Provinces and Oudh Municipalities Act, 1873:"

Local extent.

It extends to the territories for the time being respectively under the government of the Lieutenant Governor of the North-Western Provinces and under the administration of the Chief Commissioner of Oudh;

Commencement.

And it shall come into force at once.

Repeal of enactments.

2. Acts Nos. XVIII of 1864 (*to provide for the appointment of a Municipal Committee for the City of Lucknow*), XXII of 1865 (*to amend Act No. XVIII of* 1864), XV of 1867 (*to make better provision for the appointment of Municipal Committees in the Panjáb, and for other purposes*), and VI of 1868 (*to make better provision for the appointment of Municipal Committees in the North-Western Provinces, and for other purposes*) are repealed.

But all extensions and appointments made, and all limits defined, under any of the said Acts shall be deemed to be respectively made and defined under this Act.

And all assessments, bye-laws, rules and regulations of any kind relating to matters provided for by this Act, which may heretofore have been made and approved by the Local Government, shall be deemed to have been made under this Act.

And all proceedings taken under any such assessment, bye-law, rule or regulation shall be deemed to be as valid as if they had been taken under this Act.

Interpretation-clause.

3. In this Act, unless there be something repugnant in the subject or context—

"Committee."

"Committee" means a Municipal Committee appointed under the provisions of this Act;

"Municipality."

"Municipality" means any town or towns to which this Act may be extended.

Power to extend Act.

4. The Local Government may, by notification in the local official Gazette, declare its intention to extend this Act, or any of its provisions, to any town or towns in the territories under such Government.

Any inhabitant of such town objecting to such extension may, within six weeks from the date of the said publication, send his objection in writing to the Secretary to the Local Government, and the Local Government shall take such notice into consideration.

When six weeks from the said publication have expired, the Local Government, if no such objections have been sent as aforesaid, or (where such objections have been so sent) if in its opinion they are insufficient, may, by like notification, effect the proposed extension.

Power to define limits of places to which Act extends.

5. For the purposes of this Act, the Local Government may from time to time, by notification in the local official Gazette, define the limits of any town, and may include within the limits of such town any railway-station, village, building or land in the vicinity:

Provided that no cantonment shall, without the previous consent of the Governor General in Council, be included within the limits of any town for the purposes of this Act.

The Local Government may from time to time, by notification in the local official Gazette, declare to be united for the purposes of this Act any two or more towns, and may also declare by what name the municipality so formed shall be designated.

CHAPTER II.

APPOINTMENT OF MUNICIPAL COMMITTEES.

Appointment of Committees.

6. In any municipality to which this Act shall have been extended, the Local Government may appoint or direct to be appointed by election, for such period not exceeding two years as to it may seem fit, any number of the inhabitants of such municipality, to be members of a Committee for carrying out the purposes of the Act.

The persons so appointed shall continue in office for two years or until their successors shall have been appointed, and shall be eligible for re-appointment.

In cases where the Local Government directs the appointment to be by election, it may fix the time and manner of the election and the qualification of the electors, and generally may make such rules as it shall think fit for regulating the election.

Removal of members.

7. The Local Government may from time to time remove any of the members of the Committee so appointed who shall desire to be discharged, or refuse or become incapable to act, or be convicted of an offence punishable under the Indian Penal Code with imprisonment for a term of not less than six months.

Addition of members.

8. The Local Government may also, if it think fit, on the recommendation of the Committee, add to their number, and may fill up vacancies occurring among them.

Every member so appointed shall have the same powers, and be subject to the same liabilities, and vacate his office, and be eligible for re-appointment, as if he had been originally appointed a member under section six.

Ex officio members.

9. In addition to the members appointed as aforesaid, the Local Government shall have power to appoint, by notification in the official Gazette, *ex officio* members of the Committee for every place in which they exercise their offices and to which this Act shall have been extended:

Provided that the number of such *ex officio* members shall not be more than one-third of the total number of the Committee.

Appointment of president and vice-president.

10. The Local Government may also appoint the president and vice-president, or either of them, of any Committee, or sanction the election by any Committee of one of their members as president or as vice-president.

Appointment of secretary.

The Committee may appoint any one of their members or any other person to be their secretary.

Notification of appointments.

All appointments made under this section shall be notified in the local official Gazette.

CHAPTER III.

OFFICE AND MEETINGS OF COMMITTEES.

Committee to have an office.

11. The Committee shall have an office, where they shall meet for the transaction of business at least once in every month.

Rules as to meetings.

12(*a*). The president, or in his absence the vice-president, shall take the chair at every meeting of the Committee. In the absence of both the president and vice-president, the members present may elect a chairman for the occasion.

(*b*). The meetings shall be either general or special.

(*c*). The president or vice-president may, whenever he thinks fit, and he shall, upon a requisition made in writing by not less than one-fifth in number of the members, convene a meeting.

(*d*). Notice shall be given of every such meeting, and when the meeting is to be special, at least three days' notice thereof shall be given. Every notice shall state the general nature of the business to be transacted at the meeting proposed to be called.

(*e*). The quorum necessary for the transaction of business at a general meeting shall be three.

(*f*). The quorum necessary for the transaction of business at a special meeting shall be one-half of the total number of members at the time of the meeting; and at least two-thirds of such quorum shall consist of non-official members.

(*g*). If within one hour from the time appointed for the meeting a quorum is not present, the meeting, if summoned by the president or vice-president, shall be dissolved.

(*h*). In any other case it shall stand adjourned to the same day in the next week at the same time and place. And if at such adjourned meeting a quorum is not present, it shall be adjourned *sine die*.

(*i*). All business may be transacted at a general meeting which this Act does not require to be transacted at a special meeting.

(*j*). All questions which may come before the Committee at any meetings shall be decided by a majority of votes. Every member shall have one vote. In case of equality of votes, the chairman shall have a second or casting vote.

(*k*). Such decisions shall be recorded in a book kept for the purpose, and shall be published in some local English or vernacular newspaper, or in such other manner as the Local Government may from time to time direct.

Correspondence between Committee and Local Government.

13. All correspondence between the Committee and the Local Government shall pass through the Commissioner of the Division.

The Commissioner of the Division shall be entitled to make such suggestions for the consideration of the Committee as he may deem fit; and the Committee shall furnish him with any information he may call for connected with the duties imposed upon them by this Act.

CHAPTER IV.

POWERS OF COMMITTEES.

Power to make assessments and levy taxes.

14. Subject to any general rules or special orders which the Governor General in Council may from time to time make in this behalf,

every Committee intending to impose taxes for the purposes of this Act shall from time to time give notice of such intention, and shall in such notice define the persons or property within the municipality to be taxed for the purposes of this Act, and the amount or rate of the taxes to be imposed hereunder.

Any inhabitant of such town objecting to such notice may, within a fortnight from the date of the said notice, send his objection in writing to the Chairman of the Committee, and the Committee shall take such objection into consideration and report their opinion thereon to the Local Government.

When a fortnight from the date of the said notice has expired, if no such objections have been sent as aforesaid, or (where such objections have been sent in) if, in the opinion of the Committee, they are insufficient, the Committee may, with the previous sanction of the Local Government, to be notified in the official Gazette, define the persons or property, or the amount or rate of the taxes aforesaid, and may then at a special meeting impose such taxes accordingly.

The Committee may, at a special meeting, with the same sanction, cancel or vary any tax so imposed.

Specification of taxes.

15. Such taxes may (subject to the rules or orders last aforesaid) be all or any of the following:—

(*a*).—A tax on houses, buildings and lands according to the annual value thereof, not exceeding seven and-a-half per cent. of such value:

(*b*).—A tax on professions and trades:

(*c*).—Taxes on carriages, horses, mules, elephants, camels, bullocks and asses:

(*d*).—Tolls on carriages, carts and animals entering the limits of the municipality:

(*e*).—An octroi on articles brought within the said limits for consumption or use therein: Provided that a list of such articles shall have been submitted to and approved by the Local Government: Provided also, that the Local Government may exempt from the octroi any such articles intended for consumption or use by any class of persons or animals.

Imposition of other taxes.

16. If the Committee desire to impose any other or further tax than such as is hereinbefore specified, they may do so with the previous sanction of the Local Government and of the Governor General in Council.

Taxes to be confirmed.

17. No tax shall be collected until the assessment thereof has been confirmed by such persons and in such manner as the Local Government appoints.

Rules for confirmation and collection of taxes.

The Local Government may from time to time make rules as to the persons by whom, and the manner in which, any assessment of taxes under this Act shall be confirmed and for the collection of such taxes.

The Local Government may from time to time repeal, alter or add to such rules.

No rate invalid for defect of form.

18. No rate on property made under this Act shall be invalid for defect of form, and it shall be enough, in any such rate on property, or any assessment of value for the purpose of making such rate, if the property rated or assessed shall be so described as to be generally known, and it shall not be necessary to name the owner or occupier thereof.

Rules and Bye-laws.

Power of Committees to make rules.

19. Every Committee may at a special meeting make rules consistent with this Act, for regulating the time and place of their meeting, the conduct of their business, the restriction of the amount or objects of expenditure under section thirty-one, the division of duties among the members of the Committee, the salaries, appointment, suspension and removal of the officers and servants of the Committee, and other similar matters.

Enforcement of rules and regulations.

20. The Committee may appoint one or more of their number to carry out their resolutions, and to enforce the rules and bye-laws made under the provisions of this Act for the protection of the public health, or they may appoint a special officer for such purposes.

Power to make bye-laws as to nuisances, and registration of births, marriages and deaths.

21. The Committee may at a special meeting make bye-laws for defining, prohibiting and removing nuisances which are not public or common nuisances under the Indian Penal Code, or under Act No. V of 1861 (*for the regulation of Police*), and for the securing of a proper registration of births, marriages and deaths, and for carrying out all or any of the purposes of this Act.

The Committee may from time to time at a special meeting repeal, alter or add to such bye-laws.

Confirmation of bye-laws.

22. No bye-law and no alteration or repeal of, or addition to, a bye-law shall have effect until it has been confirmed by the Local Government.

Publication of bye-laws.

23. All bye-laws made under this Act and all rules made under section nineteen, and all alterations and repeals of, and additions to, such bye-laws and rules shall be published for such length of time and in such manner as the Local Government from time to time directs.

Nuisances.

Power to prohibit repetition or continuance of nuisances.

24. Every Committee may enjoin within the limits of the municipality any person not to repeat or continue a public nuisance.

Every such injunction shall be deemed to have been made by a public servant.

Power to remove nuisances.

25. Every Committee which the Local Government authorizes in this behalf may, so long as such authorization continues, exercise the powers of a Magistrate of a District as described in section 521 of the Code of Criminal Procedure for the removal of nuisances, and in the exercise of such powers shall follow the procedure prescribed in sections 521 to 528 (both inclusive) of the same Code.

Purchase and Sale of Land.

Power to buy and sell land for purposes of Act.

26. Any Committee may at a special meeting, and with the previous sanction of the Local Government, purchase land for the purposes of this Act, and may, at a like meeting and with the like sanction, sell any portion of such land which is not required for the purposes aforesaid, and convey the same in the names of the president and two of the members of the Committee.

Receipts.

The receipt of the president and any two members of the Committee for any monies paid to them upon any such sale shall effectually discharge the persons paying the same therefrom, or from being concerned to see to the application thereof, or being accountable for the non-application or misapplication thereof, and the proceeds of any such sale shall be applied for the purposes of this Act.

Controlling Power of Local Government.

Cancellation and suspension of proceedings of Committee.

27. The Local Government may by order cancel, suspend or limit any of the acts, proceedings or rules of any Committee.

Abolition of taxes.

28. The Local Government may also abolish any tax which shall have been sanctioned under the provisions hereinbefore contained, but not so as to entitle any person to a refund of money paid in respect of such tax.

CHAPTER V.

RIGHTS, DUTIES AND LIABILITIES OF COMMITTEES.

Municipal Fund.

Municipal fund.

29. All sums received by the Committee of any municipality to which this Act extends, and all fines levied under this Act, and all receipts from property entrusted to and managed by the Committee, shall constitute a fund which shall be called the Municipal Fund of such municipality, and shall, together with all property which may become vested in such Committee, be under their control, and shall be applied by them as trustees for the purposes of this Act.

Custody and disbursement of Municipal Fund.

30. The funds of every Committee shall be kept in the Government Treasury of the District, or in the Bank (if any) to which the Government Treasury business shall have been made over.

No disbursement of such funds or any part thereof shall be made except under the signature of the president or vice-president and one other member of the Committee.

Duties of Committees.

31. Every Committee, subject to such rules restricting the amount or the objects of expenditure as it shall make at a special meeting, and so far as the Municipal Fund at their disposal will permit, shall, after providing out of such fund for a police establishment in the manner hereinafter mentioned, keep the public streets, roads, drains, tanks and water-courses of the municipality for which they are appointed, clean and in repair,

and may cause such streets and roads or any of them to be watered and lighted,

and may construct and provide for the management of poor-houses, dispensaries, market-places and other works of general utility,

and generally may do all acts and things necessary for the purposes of conservancy and general utility within their municipality.

The Committee may also make provision, by the establishment of new schools or the aiding of already existing schools, or otherwise, for the promotion of education in their municipality.

Contracts.

32. Every contract made on behalf of any Committee in respect of any sum exceeding twenty rupees, or in respect of any property exceeding twenty rupees in value, shall be in writing, and shall be signed by the president or vice-president and at least two other members of the Committee, of whom one shall be an *ex officio* member. Unless so executed, it shall not be binding on the Committee.

Municipal Police.

Provision for police.

33. Every Committee shall provide in the first place from its funds for the maintenance of the police establishment in the municipality.

The municipal police shall be appointed under such Act of the Governor General in Council as may be applicable to the town, and their number shall be fixed by the Committee in consultation with the Inspector General of Police, subject to the final decision of the Local Government.

Police to aid in carrying out orders regarding nuisances.

34. Every officer of police in any municipality to which this Act shall have been extended shall have power to take into custody without a warrant any person who, within his view, commits any of the offences mentioned in section 34 of Act No. V of 1861 (*for the regulation of Police*), and shall be bound to carry out the orders issued by the Committee for the prohibition and prevention of public nuisances, or nuisances defined to be such by any bye-law made under this Act.

Annual Reports.

Annual reports and statements to be submitted.

35. Every Committee shall annually, or oftener if directed by the Local Government to do so, submit statements of their receipts on account of and disbursements from the Municipal Fund, and also reports of all works executed or proceedings taken by them under the authority of this Act.

The Committee shall also submit, at such time and in such form as may be directed by the Local Government, an estimate of their probable receipts for the financial year next following, with proposals for their expenditure.

An abstract of such estimate and proposals shall, on being so submitted, be published in such manner as the Local Government from time to time directs.

Rules as to cost and class of works.

36. The Local Government may from time to time make rules consistent with this Act, as to the cost and the class of works which the Committee may execute, and the Committee shall be legally bound to obey such rules.

Public Highways.

Right of Committee in public highways.

37. All public highways in any municipality in which this Act is in force, not specially reserved by Government, together with all erections thereon and all materials thereof, shall be vested in and belong to the Committee.

Land required for Public Purposes.

Acquisition of land for municipal purposes.

38. When any land within the limits of any municipality to which this Act is extended is required for the construction or improvement of a highway, for the promotion of the healthiness of the neighbourhood, or for any other public purpose, if the Committee cannot agree with the owner for the purchase thereof, the Local Government, on the recommendation of the Committee, may notify in the local official Gazette that such land is required under the provisions of the Land-Acquisition Act, 1870, and on payment by the Committee of the compensation awarded under such Act, the land shall vest in them for the purposes of this Act.

Suits by and against Committees.

Suits by and against Committees.

39. Every Committee shall sue and be sued in the name of their president.

Members not personally liable for contracts made by Committee.

40. No member of a Committee shall be personally liable for any contract made or expense incurred by or on behalf of the Committee, but the funds from time to time in the hands of the Committee shall be liable for and chargeable with all contracts made in the manner above provided for.

Liability of members for breach of trust.

41. Every member of a Committee shall be liable for any misapplication of money entrusted to the Committee to which he shall have been a party, or which shall happen through or be facilitated by the neglect of his duty, and he shall be liable to be sued for the same in such Court as the Local Government directs as for money due to Government.

Notice previous to suing Committee or their officers.

42. No suit shall be brought against a Committee or any of their officers, or any person acting under their direction, for anything done under this Act until the expiration of one month next after notice in writing shall have been delivered or left at the office of the Committee, or at the place of abode of such person, stating the cause of suit and the name and place of abode of the intending plaintiff.

Unless such notice be proved, the Court shall find for the defendant.

Every such suit shall be commenced within three months next after the accrual of the cause of the suit and not afterwards.

If any person to whom any such notice of suit is given shall, before suit is brought, tender sufficient amends to the plaintiff, such plaintiff shall not recover.

CHAPTER VI.

PENALTIES AND PROSECUTIONS AND RECOVERY OF TAXES.

Penalty on member or servant of Committee being interested in contracts made with Committee.

43. No member of a Committee or servant of a Committee shall be interested directly or indirectly in any contract made with the Committee, and if any such person be so interested, he shall thereby become incapable of continuing in office or in employment as such member or servant, and shall be liable to a fine of rupees five hundred:

Provided that no person shall by reason of being a shareholder in or member of any incorporated or registered Company be deemed interested in any contract entered into between such Company and the Committee.

Penalty for infringement of bye-laws or non-payment of fines.

44. Whoever infringes any bye-law made and confirmed as directed in this Act, shall be liable to a fine not exceeding rupees fifty, and in the case of a continuing infringement, to a fine not exceeding rupees five, for every day after notice from the Committee of such infringement.

In default of payment of any fine imposed under this section, the defaulter shall, in the case of a continuing infringement, be liable to imprisonment for a term not exceeding one month; and in any other case, to imprisonment for a term not exceeding eight days.

Prosecutions.

45. Prosecutions under this Act for infringements of rules or bye-laws may be instituted before any Magistrate by the Committee or any person authorized by the Committee in this behalf.

Recovery of taxes.

46. All arrears of taxes imposed under this Act may be recovered as if they were fines, in the manner prescribed in section 307 of the Code of Criminal Procedure.

STATEMENT OF OBJECTS AND REASONS.

The primary object of this Bill is to provide a permanent municipal law for the towns of Oudh. The late Panjáb Municipal Act, XV of 1867, was experimentally extended to several of those towns, but that Act provided that the term for which it was to run should be only five years from the date of the extension. The consequence is that these terms are in the course of expiry, and fresh legislation is required. As to the form of this legislation, the Chief Commissioner of Oudh prefers that the North-Western Provinces Municipal Act, VI of 1868, should be followed rather than the Panjáb Municipal Act. The Bill accordingly repeals and re-enacts, with four modifications, the North-Western Provinces Municipal Act, and makes it applicable to Oudh as well as to the territories to which it originally applied.

The modifications above referred to are as follows: *first*, a provision that any inhabitant of any town in which the Local Government proposes to establish a municipality may formally object, and

that such objection shall be duly considered before taking any further steps; *secondly*, a provision that the power to impose municipal taxes shall be exercised subject to rules made by the Government of India; *thirdly*, a provision that any inhabitant of a town in which the proposed Act is in force objecting to any proposed assessment or rate may formally object, and that such objection shall be duly considered both by the Municipal Committee and the Local Government; and, *fourthly*, an express provision that, besides the taxes specified in the Bill, any other tax may be imposed with the previous sanction of the Local Government and the Government of India.

The first, second and third of the above provisions are taken from the recent Panjáb Municipal Act, IV of 1873; the fourth is only for the purpose of putting into clearer terms what was intended to be, and has been treated as, the effect of the North-Western Provinces Act.
